Subject: Release – “HCLTech unveils VisionX 2.0, a next-gen multi-modal AI Edge Platform with NVIDIA”

Dear Sir/Madam,

Enclosed please find a release on the captioned subject being issued by the Company today.

This is for your information and records.

Yours faithfully,
For **HCL Technologies Limited**

Manish Anand
Company Secretary

HCLTech unveils VisionX 2.0, a next-gen multi-modal AI Edge Platform with NVIDIA

Noida, India, February 20, 2026 – [HCLTech](#), a leading global technology company, today unveiled VisionX 2.0, an upgraded version of its multi-modal AI edge platform. This platform delivers real-time intelligence, enhanced safety and operational efficiency at scale for mission-critical industrial environments.

VisionX 2.0 builds on HCLTech's award-winning [Intelligent Secure Edge capabilities](#), integrating advanced computer vision, vision language models (VLMs), multi-modal fusion and edge-optimized generative AI. It harnesses the NVIDIA physical AI computing stack, including [NVIDIA Blueprint for video search and summarization \(VSS\)](#), [NVIDIA DeepStream](#), NVIDIA Cosmos Reason VLM and [NVIDIA TAO](#) for post-training vision models for unparalleled performance.

Purpose-built for demanding industrial use cases, VisionX 2.0 introduces several innovations:

- **On-Prem Edge AI Performance:** Real-time inference at the edge via [NVIDIA Jetson](#), [NVIDIA RTX PRO 6000 Blackwell](#) GPUs, and Dell NativeEdge deployments. This eliminates bandwidth bottlenecks, safeguards data privacy, and supports sensitive industrial operations.
- **Multi-Modal AIoT Engine:** Analyzes video, audio, images, LiDAR, stereo cameras, and IoT telemetry streams to detect events, anomalies, safety violations, and risks with superior accuracy.
- **VSS Event Reviewer for Reliable Verification:** Select computer vision clips are sent to Cosmos Reason to detect false positives, engage in additional NLP based reasoning to deliver scene-level insights, and boost decision-making confidence.
- **Zero-Trust Edge Security:** Features Zero-Trust architecture and Zero-Touch Provisioning on Dell NativeEdge OS for secure, scalable rollouts across distributed sites.
- **Seamless Integration:** Compatible with existing cameras, Video Management Systems (VMS), and sensors via a robust, flexible Integration layer

“With VisionX 2.0, HCLTech is redefining how intelligence is delivered at the industrial edge,” said Vijay Guntur, CTO and Head of Ecosystems at HCLTech. “By combining our deep expertise in secure edge engineering with NVIDIA AI infrastructure and AI models, we are enabling enterprises to move from reactive monitoring to real-time, trusted decision-making agents, where milliseconds matter. VisionX 2.0 empowers organizations to achieve safer operations, higher efficiency and scalable AI outcomes without compromising on security or performance.”

“The next wave of industrial transformation is being driven by Physical AI—real-time, multi-modal intelligence that elevates performance, safety, and autonomy across global operations,” said Deepu Talla, vice president, Robotics and Edge AI at NVIDIA. “By leveraging NVIDIA Metropolis and NVIDIA Omniverse, HCLTech’s VisionX 2.0 platform provides enterprises with a trusted, scalable foundation to deploy high-performance AI at the industrial edge.”

HCLTech’s [Physical AI](#) portfolio brings together the power of Kinetic AI (Cognitive Robotics), Autonomous Systems and Edge AI to drive productivity, resilience and sustainability in real-world environments.

About HCLTech

[HCLTech](#) is a global technology company, home to more than 226,300 people across 60 countries, delivering industry-leading capabilities centered around AI, digital, engineering, cloud and software, powered by a broad portfolio of technology services and products. We work with clients across all major verticals, providing industry solutions for Financial Services, Manufacturing, Life Sciences and Healthcare, High Tech, Semiconductor, Telecom and Media, Retail and CPG, Mobility and Public Services. Consolidated revenues as of 12 months ending December 2025 totaled \$14.5 billion. To learn how we can supercharge progress for you, visit hcltech.com.
