Dear Sir/Ma'am,

Sub: Press Release

We are pleased to inform you that Hindustan Zinc Limited has signed a six-year transportation agreement with MFL India Limited for the deployment of 30 electric trucks for concentrate transportation, reinforcing the Company's ongoing mine-to-smelter decarbonisation initiative. The Press Release in this regard is enclosed.

The same is also available on the website of the Company at www.hzlindia.com.

The disclosure is being made in compliance with Regulation 30 of the SEBI (Listing Obligations and Disclosure Requirements) Regulations, 2015.

This is for your information and records.

Thanking You.

Yours faithfully,
For Hindustan Zinc Limited

Hindustan Zinc deploys 30 New Electric Trucks, accelerates Mine-to-Smelter Decarbonisation

• Company signs six-year contract with MFL for concentrate transportation from Rampura Agucha Mine

• Enabled dedicated EV charging infrastructure for reliable mine-to-smelter electric logistics

Udaipur, 9th September 2026: Hindustan Zinc Limited (BSE: 500188 | NSE: HINDZINC), the world's largest integrated zinc producer and among the top ten silver producers globally, has signed a six-year transportation contract with MFL India Limited for the deployment of 30 electric trucks for concentrate transportation, accelerating the electrification of its mine-to-smelter logistics network. MFL India Limited is a logistics solutions provider focused on enabling reliable, efficient, and sustainable movement of materials across critical industries.

Under the contract, extendable by a further two years, electric trucks will be progressively inducted to replace conventional diesel vehicles used for transporting zinc and lead concentrate from Rampura Agucha, the world's largest underground zinc mining operations to its smelting operations in Rajasthan. MFL will also establish and operate dedicated EV charging infrastructure to support the fleet, creating the ecosystem required for reliable electric mobility across a critical industrial logistics route.

Mr. Amarendu Prakash, CEO & Whole-time Director, Hindustan Zinc Limited, said, *"The future of mining will be defined not only by the metals we produce, but by how responsibly and efficiently we produce and move them. The contract for deployment of EV trucks for concentrate transportation is yet another step towards that future, demonstrating how industrial decarbonisation can strengthen competitiveness while creating an ecosystem in which our partners and communities grow with us."*

Recognising the higher capital requirements associated with emerging technologies such as EVs and LNG, Hindustan Zinc is working with MFL to enable a phased transition to cleaner mobility, progressively replacing conventional vehicles as the EV fleet and charging infrastructure are established, while ensuring continued participation of local drivers in the transportation network.

Mr. Anil Thukral, Chairman & Managing Director, MFL India Limited, said, *"We are proud to partner with Hindustan Zinc in advancing the transition to cleaner industrial logistics. This deployment demonstrates how electric mobility can be effectively integrated into large-scale transportation networks, supported by the right charging infrastructure and operational planning. Together, we are building a scalable model for sustainable logistics that delivers both environmental benefits and long-term operational value."*

The deployment builds on Hindustan Zinc's growing adoption of cleaner mobility across its integrated operations. During FY2026, the company added 42 electric vehicles for transporting materials across its operations, expanding its green logistics fleet to 232 vehicles including 52 EVs and 180 LNG vehicles. Hindustan Zinc has steadily expanded electric and alternative-fuel mobility across different parts of its operations. The company pioneered the deployment of battery electric vehicles in underground mining at Sindesar Khurd Mine in Rajpura Dariba, Rajasthan and has subsequently expanded cleaner mobility across mining equipment, material transportation and workforce mobility.

The transition is part of Hindustan Zinc's wider decarbonisation roadmap to achieve Net Zero emissions by 2050 or sooner. The company has increased the share of renewable energy in its power mix to nearly 22% and continues to scale renewable power, electrification, energy efficiency and low-carbon technologies across its operations and value chain.

About Hindustan Zinc

Hindustan Zinc Limited (BSE: 500188 and NSE: HINDZINC), a Vedanta Group company, is the world's largest integrated zinc producer and is amongst the top 10 silver producers globally. The company supplies to more than 35 countries and holds a market share of about 74% of the primary zinc market in India. Hindustan Zinc has been recognized as the world's most sustainable company in the metals and mining category for the third consecutive year by the S&P Global Corporate Sustainability Assessment 2025, reflecting its operational excellence, innovation, and leading ESG practices. The company also became the first Indian company to join the prestigious International Council on Mining & Metals (ICMM) in 2025. The company also launched EcoZen, Asia's first low carbon 'green' zinc brand, produced using renewable energy. Hindustan Zinc is also a certified 3.32 times Water-Positive company and is committed to achieving Net Zero emissions by 2050 or sooner. The company is also transforming the lives of 2.6 million people through its focused social welfare initiatives. As an energy transition metals company, Hindustan Zinc is pivotal in the journey of sourcing critical metals essential for a sustainable future.
