PM Modi unveils Boeing global engg, tech centre

PEERZADA ABRAR
Bengaluru, 19 January

Prime Minister Narendra Modi on Friday inaugurated US aerospace giant Boeing's global engineering and technology campus in Bengaluru.

The new state-of-the-art Boeing India Engineering & Technology Center (BIETC) has been built with an investment of ₹1,600 crore and is spread across 43 acres.

The campus is Boeing's largest such investment outside the US. It will become a cornerstone for partnering with India on next-generation products and services for the global aerospace and defence industry. Modi said Bengaluru is a city which links aspirations to innovations and achievements, and India's tech potential to global demands. "Boeing's new technology campus is going to strengthen this belief," said Modi. He underlined that its scale and magnitude will not only strengthen India but also the aviation market of the world. Modi said this facility demonstrates India's commitment to driving global tech, research and innovation, design and demand.

"This strengthens the 'Make in India-Make for the World' resolution", he said. "This campus reinforces the world's trust in India's talent," he added. He expressed the faith that one day, "India will design aircraft of the future" at this facility.

Over the years, Boeing India has grown its team in the engineering and research and development (R&D) unit. It now has the largest number of employees in any country outside the US. It has more

Modi also launched the Boeing Sukanya Program, which aims to support the entry of more girls from across India into the country's growing aviation sector.

The programme will provide opportunities to girls and women from across India to learn critical skills in science, technology, engineering and math (STEM) in the aviation sector.

For young girls, the programme will create labs at 150 planned locations to help spark interest in STEM careers.

The programme will also provide scholarships to women who are training to be pilots.

Make in India a win-win situation for investors: PM

Prime Minister Narendra Modi on Friday stressed the need to build an aircraft manufacturing ecosystem in India as he highlighted the potential of India's strong network of MSMEs (micro, small and medium enterprises), huge talent pool, and stable government in India. "India's policy approach to encourage 'Make in India' is a win-win situation for every investor," said Modi, after inaugurating US aerospace giant Boeing's global engineering and technology centre campus in Bengaluru. Modi also talked about the government's focus on investment in connectivity infrastructure to overcome the previous handicap of poor connectivity that was preventing India's potential in performance.

No delay in deliveries to India, says Boeing

REUTERS
Hyderabad, 19 January

Boeing expects no meaningful delays of plane deliveries to India because of the MAX 9 issues even as it intensifies quality scrutiny of its 737 jets production programme, a top company executive said on Friday.

An incident where a cabin panel on a 737 MAX 9 jet blew out shortly after an Alaska Airlines plane took off has shaken global airlines' confidence in Boeing's planes nearly five years after a pair of crashes killed 346 people.

"Our long term objective is

adding even more scrutiny to the quality side of things," Darren Hulst, Boeing's vice president for commercial marketing said at the Wings India air show in Hyderabad.

Hulst said Boeing does not see any meaningful delays in deliveries as of now.

Boeing earlier this week named Kirkland Donald to advise the planemaker's CEO on improving quality control after the incident.

The planemaker will also focus on the quality of aircraft over numbers in India, Hulst said at the event which has attracted planemakers, airlines and government officials as they make the most of

India's travel boom, with a greater focus on international routes.

In a show of confidence, India's newest airline Akasa Air placed an order for 150 Boeing 737 MAX narrowbody planes on Thursday, taking the total to over 200 deliveries over the next eight years.

Indian commercial airlines have not ordered the MAX 9 variant of the Boeing 737.

Air India's huge order last year for 470 planes included 220 Boeing aircraft.

The planemaker was holding discussions with "every single customer" that operates the 737, Hulst said.

Latest X-ray to ease passenger check-in: Noida airport CEO

DEEPAK PATEL
Hyderabad, 19 January

Majority of passengers at Noida international airport will not have to take out electronic and liquid items from their hand baggage during security checks as most security lanes will have advanced CT X-ray machines, Christoph Schnellmann, chief executive officer (CEO), Noida International Airport Limited (NIAL), told *Business Standard* on Friday.

"We will be able to offer the newest security screen technologies (to check the hand baggage in the security lanes). We have these CT X-ray machines, which means that the passengers will not have to remove their electronics items and liquids," he stated.

The technology that is present in most Indian airports takes two X-rays — one from the top and the other from the side. Therefore, the passengers are asked to take out their electronic and

'Additional 3,418 hectares to be acquired in 6 mths'

DEEPAK PATEL
Hyderabad, 19 January

The acquisition of an additional 3,418 hectares of land in the northern and southern parts of the proposed Noida International Airport for its future expansion will be completed in six months, Shaileendra Bhatia, Uttar Pradesh government's Nodal Officer at Noida International Airport Limited (NIAL), said on Friday.

The Zurich Airport-controlled NIAL is currently developing the Noida International Airport on the 1,334 hectares that were leased to it by the UP government in 2021. The 1,334-hectare land will be developed in four phases and have two runways. The acquisition cost for this land was ₹4,326 crore. The first construction phase is expected to be over by the end of this year and the first commercial flight is expected to operate in

2024. "The 1,365 hectares of additional land is being acquired on the northern side. On the southern side, we are acquiring 2,053-hectare land," Bhatia, told *Business Standard* at Wings India Summit 2024. The additional land will be used to develop other three more runways and hubs for aviation-related services. He said the acquisition of the land in the northern area will be completed soon.

liquid items in a separate tray. However, the CT X-ray machines take a 3D picture, so that is not needed. Schnellmann clarified that not all security lanes will have the CT X-ray machines.

"Not all of them. But the majority of the passengers will be able to benefit from this technology

and we will successively increase that, if needed," he added.

Among India's network of airports, a clash has already been foretold between a newbie in Jewar, Noida, and the veteran in neighbouring Delhi.

On January 3, aviation consultancy firm Capa India said competition between the two airports is expected to be intense and could play out even before the airport in Jewar begins operations this year. "Currently, the value-added tax (VAT) on aviation turbine fuel (ATF) for domestic services is 25 per cent at Delhi airport. It will only be 4 per cent at Noida airport. This will have a bearing on capacity allocation (by airlines) and expansion," Capa India's report stated.

ATF constitutes about 40 per cent of an airline's costs in India.

Airlines may order 380 planes by March '25: Capa

DEEPAK PATEL
Hyderabad, 19 January

Indian carriers, which currently have an order book of 1,618 planes, could end up ordering about 380 more aircraft by March next year.

The additional aircraft will cater to the high air traffic demand domestically and internationally, aviation consultancy firm Capa India said on Friday.

The new orders are going to come from Air India converting some of its 370 options to a firm order for every few months, sup-

plemented by possible further orders by other Indian carriers, it said.

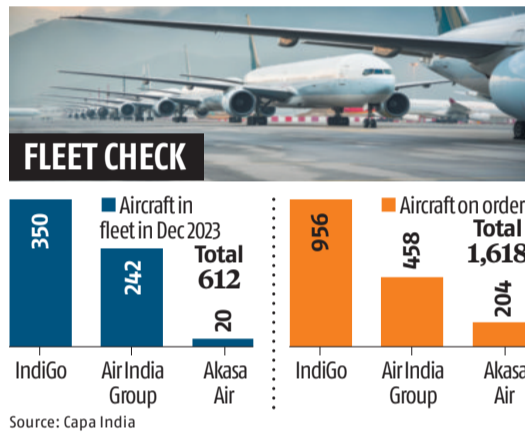

When Air India had placed an order for 470 planes in February last year with Airbus and Boeing, the Tata-run airline had an option to order 370 more aircraft.

"Indian airlines currently have an order book of close to 1,620 aircraft (after Thursday's Akasa air order, but excluding Go First and SpiceJet orders). This is expected to rise to about 2,000 aircraft by March 2025," it added.

The figure of 1,618 aircraft does not include Go First because of "uncertainty, it said. Go First went insolvent in May last year.

SpiceJet, which recently raised money from more than 60 investors, has been facing financial troubles for the last several quarters.

Capa India said that in 2023, Indian airlines ordered more aircraft than those from any other country. "And, the total order book for Western aircraft is second only to the United States," he added.
