Sub: Notice - Special Window for Re-lodgement of Transfer Requests of Physical Shares

Dear Sir/Ma'am,

In terms of Regulation 30 read with Schedule III and other applicable provisions of the SEBI (Listing Obligations and Disclosures Requirements) Regulations, 2015 ("SEBI (LODR) Regulations, 2015"), we are enclosing herewith Newspaper Notice published in the "Business Standards" on December 03, 2025, regarding special window for re-lodgement of Transfer Requests of Physical Shares.

The copy of published notice is enclosed herewith for your reference.

The same is also available on the website of the Company at https://www.thehitechgears.com/announcementsnotices.php.

You are requested to take the above information on records and oblige.

Thanking you
Yours faithfully,
For The Hi-Tech Gears Limited

Naveen Jain (Company Secretary & Compliance Officer) Membership No. A15237 New Delhi, 2 December

India's year-end travel patterns are showing a decisive tilt towards colder climes with domestic winter destinations dominating the holiday rush, points out data from travel aggregator ixigo.

According to the platform, Srinagar is leading the surge with over 100 per cent monthon-month (M-o-M) growth in December flight searches. There was also strong traction for Dehradun at 54 per cent and Jammu at 39 per cent.

"Tourist interest for Jammu and Kashmir is growing again, which is a very positive trend. The region needs tourists back and it's heartening to see that interest coming back. Tourists like visiting the region in this weather to see fresh snow, which is a very beautiful experience," said a tourism industry executive.

"With hotel room rates and flight fares for both domestic and international beach destinations surging, people are instead choosing to ring in the New Year in the hills. Here, fares are comparatively lower and most destinations have great road connectivity," the executive further said.

Bus routes in north India's

TECHDIGEST

Winter is calling

- Srinagar December flight searches surge over 100% M-o-M
- Business route searches for Mussoorie, Manali, and Dehradun see over 100% Y-o-Y growth
- Bali bookings see over 100% Y-o-Y growth
- Tourist interest in Jammu and Kashmir is growing for fresh snow experiences

ixigo pointed out. Popular tourist destinations like Mussoorie, Manali, and Dehradun are recording over 100 per cent yearon-year (Y-o-Y) growth in bus searches.

"Together, flight and bus trends show that mountains are nearly five times more in demand than beaches this holiday season," the platform pointed out.

Luxury villa rental firm StayVista has seen higher demand in hill destinations within two to five hours of travel time, by car or flight.

"Stavs are also longer in durdays," said Amit Damani, coadded that, "Travel to Kashmir ative tourism model, which

Vivo has launched its flagship X300 series in

India, which includes the X300 and X300 Pro.

cameras, and run Android 16-based OriginOS 6.

Both models are powered by the MediaTek

has increased by 30 per cent from the previous quarter."

Tourism to Kashmir was impacted earlier in the year after terrorist attacks at Pahalgam and the conflict between India and Pakistan that followed.

Meanwhile, western and southern destinations, such as Mahabaleshwar, Lonavala. Coorg. Ooty and Wayanad, have seen an increase in demand.

The traditionally favourite domestic destinations like Goa are busy wooing travellers. The state government recently launched a New Year-end campaign, 'Feels like Goa', to evoke ation of over five days versus nostalgia and rekindle the emotypical getaways of two-three tional connect travellers share with the state. It is reflective of a founder at the company. He strategic shift towards a regener-

places people, culture, and the environment at its core.

Internationally, Southeast Asia and West Asia have emerged as new holiday favourites. In Southeast Asia, Bali has recorded over 100 per cent Y-o-Y growth in bookings, while bookings to Sri Lanka are up 63 per cent.

Favourite tourist destinations like Thailand, Singapore, and Vietnam have seen bookings surge 37 per cent, 36 per cent, and 23 per cent, respectively.

At the same time, emerging destinations across the western and central Asia are climbing rapidly on the trending list.

Kazakhstan, the UAE and Uzbekistan are seeing a growth of 40-42 per cent in bookings. followed by Oatar at 35 per cent and Oman at 32 per cent. "This signals a clear shift towards newer, value-driven international holidays," said ixigo.

"Improved connectivity, new experiences, relaxed visa norms. favourable winter climates, and ongoing holiday offers and discounts are making destinations across Southeast Asia, western and central Asia strong alternative choices. This reflects a growing appetite for unique, offbeat holidays this season," said Aloke Bajpai, group chief executive officer (CEO) at the travel

Ray-Ban Meta (Gen 2) AI glasses are now available in India. Priced at ₹39,900 onwards, the smart glasses come with integrated cameras that support up to 3K video recording. They offer improved battery life, lasting up to eight hours on a single charge.

Claims vs reality: Dust doesn't settle on Mumbai's clean-air drive

ANJALI SINGH

Mumbai, 2 December

Mumbai's air quality continues to slide, even as the Brihanmumbai Municipal Corporation (BMC) claims it has stepped up its dust-control operation. But a ground report from Andheri East and West — among the city's most pollution-hit pockets — suggests a growing disconnect between civic records and lived reality.

According to a BMC official posted at the Chakala–Andheri East ward office. the municipal corporation deploys one mist-blowing machine every morning around 7 am, covering an 80-kilometre stretch. Daily water usage for dust suppression stands at around 10,000 litres through two tankers of 5,000 litres each, operating twice a day, supplemented by direct spraying through pipelines.

The ward, the official said, has about 1,200 sweepers working in two shifts — 900 BMC staff and 165 contractual workers. Manual sweeping is carried out from 6.30 am to 1.30 pm and again from 2 pm to 8 pm. A circular issued by the BMC head office three to four days ago instructed all wards to further intensify dust-suppression measures, with additional action contingent on further directions.

Data from the India Meteorological Department shows Mumbai's Air Quality Index (AQI) hovered around 105 on Tuesday, placing it in the 'poor to moderate' category. While not yet in the severe zone, pollution levels remain consistently outside the 'good' or 'satisfactory' range, with the city rarely recording safe air over the past month.

Residents say impact barely visible On the ground, residents, workers, and vendors paint a starker picture.

Outside an active construction site next to Global Hospital & Research Centre — and adjoining a BMC office construction dust continues to billow into the air. A security official confirmed that the hospital had formally complained to the civic body after dust entered clinical spaces. "Earlier there

control campaign in Mumbai

BMC's road cleanliness and dust

was a green net around the site. It was later removed," he said. "The complaint went to BMC, but nothing has changed." Construction, though nearing completion, continues without effective suppression on site.

A traffic policeman stationed at the same location said he has not seen routine dust-control measures such as water spraying or road washing. Sweepers come around 4.30–5 pm to water plants. But vehicles pass and the dust rises again," he said, adding that prolonged mask usage is not possible for him due to health concerns, "Even if I face problems, who will listen to people like me?"

Street vendors in the area echoed similar concerns.

Hasif (name changed), a coconut seller who has worked in Andheri for over two decades, said mist-spraying machines appear "sometimes in the morning", but the relief is short-lived. "The dust comes back almost immediately. I've had health problems for three years, but life goes on. People shop, move around — pollution hasn't stopped anything," he said.

At Andheri station, Sanjivini, a 42year-old flower seller, said she has not noticed any increase in cleaning activity.

Spray, sweep, repeat

- 1 mist-blowing machine deployed daily from around 7 am, assigned to
- cover 80-km stretch ■ 10,000 litres of water used every day through two 5,000-litre
- tankers, operating twice daily Pipeline spraying supplements
- tanker operations ■ 1,200 sweepers assigned in two
- shifts, including 900 BMC staff and 165 contract workers
- Sweeping hours span nearly 14 hours daily — from 6.30 am to 1.30 pm and 2 pm to 8 pm
- A head-office circular issued 3–4 days ago instructed wards to

intensify dust-control measures

"There's dust and smoke everywhere. and people spit and throw garbage. Unless behaviour changes, you can't expect the government alone to fix this, she said. Residents of Andheri East say health

problems are becoming more common. Dhwani Fender (name changed), a 47year-old nurse from Poonam Nagar, said her allergies have worsened in recent weeks. "Manual sweeping is happening, but dust levels aren't reducing. I wear a mask for hours while attending patients. Stricter enforcement is clearly needed.

While BMC maintains that mist machines operate daily, tankers spray thousands of litres of water, and sweeping continues for nearly 14 hours, residents say critical junctions remain untreated, construction dust escapes unchecked — even near healthcare facilities - and visible road washing

Mumbai's dust-control apparatus may be busy on paper. But in Andheri, residents say they are still breathing the consequences every day.

Until enforcement becomes consistent, visible and accountable, the gap between civic claims and street-level experience may widen further — along with the city's smog.

WHO issues first-ever norms for **GLP-1 drugs**

SANKET KOUL New Delhi, 2 December

The World Health Organization (WHO) has come out with guidelines on the use of glucagon-like peptide-1 (GLP-1) agonist drugs, whose consumption in obesity management has skyrocketed across the world.

The new guidelines underscore two critical priorities: Ensuring equitable access to GLP-1 therapies and preparing healthcare systems for the effective implementation and widespread use of

these powerful medicines. It follows the WHO's earlier move to incorporate GLP-1-based therapies into its Essential Medicines List for the treatment of type 2 diabetes among high-risk patient groups.

Taking a further step, the recommendations latest advise that GLP-1 agents. which include established treatments such as semaglutide, tirzepatide, and liraglutide, may now be utilised for the long-term treatment of adults living with obesity.

With the new guidelines. the WHO aims to support people living with obesity in overcoming this serious health challenge, as part of a comprehensive approach that includes healthy diets, regular physical activity and support from health professionals. The guidelines are on the basis of two major tenets, one that GLP-1 therapies may be used by adults, but excluding pregnant women, for the long-term treatment of obesity.

"While the efficacy of these therapies in treating obesity was evident, the recommendation is conditional due to limited data on their long-term efficacy and safety, maintenance and discontinuation, their current costs. inadequate health system preparedness and potential equity implications.

The other is offering intensive behavioural interventions involving healthy diet and physical activity to adults living with obesity prescribed GLP-1 therapies.

While such therapies represent the first efficacious treatment option for adults. the WHO guideline also emphasises that medicines alone will not solve the problem.
