'ZAM' PIPE WITH SELF HEALING TECHNOLOGY FOR FIRE- FIGHTING APPLICATIONS

WHAT IS "ZAM"

A SUSTAINABLE STEEL PRODUCT WITH PATENTED
Zi (ZINC) Al (Al-uminium) MG (Magnesium)

WHAT IS SELF HEALING TECHNOLOGY

When exposed to the environment, 'ZAM' forms a very dense zinc-based protective film, unlike galvanised steel where the film is very porous. This unique dense film is also formed on edges, welds, perforations and scratches. In case some red rust was present on these uncoated zones, the red rust will gradually be covered by the 'ZAM' film. It is almost impossible for the environment to penetrate this film. The result is that 'ZAM' provides perfect protection of the whole structure, even on the uncoated edges, scratches and perforations Increasing the coating weight will improve edge protection, especially for thick material which are used for Fire-Fighting applications.
