Subject: Investor Presentation on Un-audited Financial Results for the Quarter ended June 30, 2026

Dear Sir/ Madam,

Pursuant to the Regulation 30 of SEBI (Listing Obligations and Disclosure Requirements) Regulations, please find enclosed herewith a copy of investor presentation w.r.t. the Un-audited Financial Results for the Quarter ended June 30, 2026.

The investor presentation shall also be made available at the website of the Company at www.hitechpipes.in.

Kindly take the above information on record and oblige.

Thanks and Regards

Q1FY27 Financial Performance

- ◆ Revenue has grown by 79% to Rs1,413Cr., compared to Rs791 Cr. in Q1FY26 driven by robust demand in infrastructure and construction sectors.
- ◆ Sales volume Increased by 26%, reaching to 1,56,136 MT, up from 1,24,027 MT in Q1FY26.
- ◆ Profit After Tax of Rs.20.04Cr., compared to Rs. 20.92 Cr. in Q1FY26.
- ◆ EBITDA has Increased by 20% to Rs49.37 Cr. in Q1FY27 as compared to Rs 41.03 Cr. in Q1FY26.
- ◆ EBITDA per Metric Ton have improved marginally from Rs. 3,148 in Q4FY26 to Rs. 3,162 in Q1FY27.

Commenting on the performance,

Mr. Ajay Kumar Bansal, Chairman and Managing Director, Hi-Tech Pipes Ltd.

“We are pleased to report a strong start to FY27, with our volumes increasing by 26% to 1,56,136 MT from 1,24,027 MT in Q1FY26, reflecting sustained demand and the successful ramp-up of our recently added capacities. Revenue grew by an impressive 79% to Rs.1,413 crore from Rs.791 crore, while profitability remained broadly stable at Rs.20.04 crore compared with Rs.20.92 crore in Q1FY26. EBITDA increased to Rs.49.37 crore from Rs.41.03 crore, supported by improved operating performance, with EBITDA per tonne also improving sequentially from Rs.3,148 to Rs.3,162. Our newly commissioned facilities are progressing well and are increasingly contributing to our growth momentum. We remain firmly committed to our roadmap of adding another 1 million tonnes of capacity, with execution progressing at a healthy pace. Going forward, we remain optimistic about the structural growth opportunities in the steel pipe industry, supported by infrastructure development, water and energy projects, and rising domestic demand. With our expanding capacity, strong execution capabilities and focus on operational efficiency, we are well positioned to deliver sustainable and profitable growth in the years ahead.”

Our New Manufacturing Facility

Brownfield Expansion at Sanand, Unit-II (Phase -II), Gujarat.

The Sanand brownfield expansion adds 1 Lakh MTPA of capacity and significantly enhances the Company's capabilities in:

- ◆ Large-diameter ERW Pipes
- ◆ Jumbo Hollow Sections
- ◆ Structural and fabrication-grade steel products

The facility is strategically positioned to serve Western India's industrial clusters, benefiting sectors such as solar, fabrication, engineering, and infrastructure, while enabling substantial logistics efficiencies.

Strategic Benefits of the Sanand Expansion

The commercial commencement of Sanand, Unit II – Phase II will:

- ◆ Strengthen Hi-Tech Pipes' presence across Western India
- ◆ Enhance supply capabilities to solar, fabrication and infrastructure customers
- ◆ Reduce logistics costs to key industrial hubs in Gujarat and neighbouring regions
- ◆ Improve product mix with larger diameters and value-added grades
- ◆ Support long-term volume visibility and scale-driven operating efficiencies
- ◆ Enhance Export Contribution by enabling supply of large Diameter ERW Pipes and heavy hollow sections to International markets.

This expansion aligns with the Company's roadmap to accelerate growth in value-added products and enhance its multi-regional manufacturing network.

Greenfield Manufacturing Facility at Kathua, J&K.

The Kathua facility has an installed capacity of 80,000 tonnes per annum (MTPA) and is designed to manufacture ERW steel pipes as well as coated and other value-added steel products. The plant has been developed with modern manufacturing infrastructure, enhanced automation, and robust quality-control systems, enabling the Company to meet stringent customer specifications and evolving industry standards. With the commissioning of the Kathua facility, Hi-Tech Pipes is now very close to achieving 1 million tonnes of installed manufacturing capacity, reinforcing its position as one of the fastest-growing steel tube and pipe manufacturers in the country.

Strategically located in Jammu, the Kathua unit offers logistical and operational advantages, enabling efficient and cost-effective supply to customers across Jammu & Kashmir, Punjab, Himachal Pradesh. The facility is well positioned to cater to increasing demand from key end-use sectors such as infrastructure development, construction, water distribution, fabrication, industrial projects, and engineering applications.

Commences Commercial Production at Sikandrabad Unit-III (U.P.) Greenfield Facility

Commissioning Marks Achievement of 1 Million Tons Installed Capacity

- ◆ The commissioning of the **Sikandrabad** facility marks a significant milestone in the Company's growth journey, strengthening its manufacturing footprint in North and Central India. Strategically located, the facility enhances proximity to key consumption centers, improves supply chain efficiency, reduces logistics costs, and enables faster response to customer requirements across infrastructure, construction, water distribution, fabrication, and industrial segments.
- ◆ With the commencement of commercial production at Sikandrabad, and supported by recently commissioned capacities at other locations, Hi-Tech Pipes Limited has effectively achieved a landmark milestone of 1 million tons of installed annual capacity. This achievement reflects the Company's consistent execution, disciplined capital allocation, and long-term strategic planning.
- ◆ The **Sikandrabad** facility adds **1,20,000** mtpa of capacity, focused on ERW pipes and hollow sections, and plays a pivotal role in enhancing regional balance, operational flexibility, and service levels. The plant is equipped with modern manufacturing technology and process efficiencies, enabling superior quality, scalability, and reliability.
- ◆ Building on this milestone, the Company is now progressing toward the next phase of expansion, with a clear roadmap to add another 1 million tons of capacity over the medium term. This expansion strategy is aligned with the Company's vision of building a robust, pan-India, and globally competitive manufacturing platform.

MARCHING TOWARDS 2 MILLION TONNE CAPACITY BY FY29.

- ◆ Looking ahead, we remain committed to our vision of achieving 2 million tonnes of installed capacity by **FY29**, in alignment with India's accelerating infrastructure and industrial growth.
- ◆ As part of this growth roadmap, we are also undertaking a strategic foray into **API-grade** Oil and Gas pipe manufacturing, aimed at significantly increasing our share of high-value, precision-engineered products. the API facility readiness is expected to be completed by **Q3FY27**.The API pipe facility will enable us to cater to critical sectors such as oil & gas, industrial pipelines, and water transmission, offering globally certified, high-performance solutions. This is a strategic value addition that will help us expand our addressable market, diversify our end-user base, and improve margins.
- ◆ The **New DFT facility** at **Sanand Unit-2 Phase-3** is expected to be operationalized by **Q3 FY27**. The commissioning of this facility marks a significant step in the Company's ongoing capacity expansion and value-added product strategy. Once operational, the facility is expected to improve overall production efficiency and optimize capacity utilization across key product lines. It will also enable faster turnaround times and enhanced responsiveness to customer requirements, thereby strengthening our customer servicing capabilities. In addition, the facility is expected to support the Company's entry and deeper penetration into high-quality and specialized pipe segments, which typically command better margins and stronger long-term demand visibility. The enhanced technological capabilities and operational flexibility of the DFT facility will further reinforce the Company's competitive positioning in both domestic and export markets. Overall, the project is aligned with the Company's long-term growth objectives and commitment towards delivering superior quality products and services to customers
- ◆ the Hindupur expansion facility are progressing at a fast pace, reflecting the Company's strong execution capabilities and commitment towards timely project implementation. We expect the fully integrated manufacturing facility for ERW pipes, specialized solar pipes, and other value-added steel products to become operational by **Q4 FY27**. Once commissioned, the facility is expected to significantly enhance the Company's manufacturing capacities and broaden its product portfolio in high-growth and specialized segments. The plant will also strengthen backward and forward integration, improve operational efficiencies, and support cost optimization across the value chain. In addition, the facility is expected to cater to the rising demand from infrastructure, renewable energy, and industrial sectors, thereby enabling the Company to expand its market presence and improve customer reach across key regions.

Nation-Building Contributions – “Safe Bhi, Secure Bhi”

Hi-Tech Pipes is proud to support two of the nation’s most critical infrastructure initiatives:

“Safe Bhi” By contributing to the Indian Railways’ **Kavach Anti-Collision System**, strengthening railway safety infrastructure.

HI-TECH PIPES LIMITED is proud to support the **Indian Railways' Kavach Anti-Collision System** by supplying high-quality **ERW Steel Pipes**. These pipes are crucial for track side structures like telecom towers and cable conduits, enabling safer and smarter railway operations. This initiative highlights our commitment to Make in India and railway modernization, reinforcing our role as a trusted partner in national infrastructure.

“Secure Bhi”

By supplying corrosion-resistant ERW Steel Pipes for
BSF’s Modular Multi-Layered High-Strength Border Fencing.

HI-TECH PIPES LIMITED has reinforced its role in bolstering national security infrastructure by supplying **ERW Steel Pipes** for **Modular Multi-Layered High-Strength Border Fencing** projects. These specialized pipes, known for their durability and adaptability, form a critical component of the robust fencing systems designed to enhance border security and prevent unauthorized crossings. By providing high-quality, corrosion-resistant steel solutions, HI-TECH PIPES supports the construction of long-lasting and resilient barriers capable of withstanding harsh environmental conditions. This supply aligns with the company's commitment to contributing to strategic national projects, leveraging its expertise in manufacturing infrastructure-grade materials. The collaboration underscores HI-TECH PIPES' reputation as a trusted partner in safeguarding territorial integrity while advancing the **Make in India** initiative through domestically produced, reliable engineering solutions.

New Initiatives- New Products Launched

- ✓ A Fire-Fighting system is the most essential part of the building services, with an aim to protect life and property.
- ✓ Sizes normally range from 25 mm to 150-mm NB "C" Class MS Pipes & Galvanized Pipe with plain end or socketed conforming to IS: 1239 & IS: 3589 specifications

- ✓ CRFH pipes used for furniture & high end segment has been started at Hindupur, (A.P.)

300X200

HI-TECH JUMBO

✓ Galvanized Section Pipes

Hi-Tech Galvanized Section Pipes are zinc-coated steel pipes known for their strength, durability, and corrosion resistance. Ideal for construction and structural applications, they offer long life, low maintenance, and a clean, smooth finish suitable for indoor and outdoor

'ZAM' PIPE WITH SELF HEALING TECHNOLOGY FOR FIRE- FIGHTING APPLICATIONS

WHAT IS "ZAM"

WHAT IS SELF HEALING TECHNOLOGY

When exposed to the environment, 'ZAM' forms a very dense zinc-based protective film, unlike galvanised steel where the film is very porous. This unique dense film is also formed on edges, welds, perforations and scratches. In case some red rust was present on these uncoated zones, the red rust will gradually be covered by the 'ZAM' film. It is almost impossible for the environment to penetrate this film. The result is that 'ZAM' provides perfect protection of the whole structure, even on the uncoated edges, scratches and perforations. Increasing the coating weight will improve edge protection, especially for thick material which are used for Fire-Fighting applications.

Independent Director.
Chartered Accountant.

Mr. Mukesh Kumar Garg
Non-Executive
Independent Director.
Ex-Railway IRSE Officer.

Mrs. Neerja Kumar
Non-Executive
Independent Director.
Ex-Banker.

OUR JOURNEY

1988-2001

- Commenced manufacturing MS pipes at Sikandrabad unit-I
- Started manufacturing cold rolled coils and strips

2001-2012

- Installation of hot-dipped galvanizing facility
- Commenced production of highway crash barriers
- Began production of hollow sections and solar mounting sections

2012-2016

- Commenced operations at Hindupur (Andhra Pradesh)
- Modernized the cold rolling plant at Sikandrabad unit
- Commissioned ERW pipes at Hindupur unit
- The third company to migrate to NSE Main Board in May 2018

2017-2020

- Commenced commercial operations of unit 2 at Sikandrabad to manufacture steel tubes and hollow sections
- Started commercial production of steel tubes and hollow sections at the Sanand (Gujarat) unit Listed on the NSE-SME Started 3rd tube mill at
- Sanand Installed solar plants at
- Sanand and Hindupur units
- Started Cold Rolling expansion project for wider product of HROp, CRCA, CRFH

2020-2023

- Received Secondary Steel Sector award from Ministry of Steel
- Received Top Performer award from SAIL
- Received Ispat Rachna Award from Ministry of Steel, Govt. of India
- Commenced operations at Khopoli (Maharashtra)
- Started Continuous Galvanizing GP/GC Line at Sikanderabad
- Listed on BSE
- Started Manufacturing of PPGL, Color Coated Sheet
- Natrax Certified Crash Barriers

2023-2025

- Commissioning Of Sanand Unit-II Phase -1 (Gujarat) Capacity : 1,70,000 MT.
- Successfully raised QIP of Rs.5000 Million Investments made by renowned investors

2025-2026

Commences commercial Production of Sanand Unit-II, Phase-2 (Gujarat) Capacity 1,00,000MTPA

Commences commercial Production Greenfield Manufacturing Facility at kathua, J&K.

Capacity 80,000MTPA

Commences commercial Production of Sikandrabad Unit-III (U.P.)

Capacity 1,20,000MTPA

Hi-Tech Pipes | Capabilities Built So

Strategic Focus & Future Prospects

Huge Opportunity in the Indian Steel Pipes & Tubes Industry

Market Size: ~Rs 500 billion (~8% of total domestic steel market)

Total Domestic Consumption: ~8.5 million tonnes (FY21)

Growth Rate last 5 years: 6-7% CAGR

Growth Rate expected next 5 years: 8-9% CAGR

Demand Drivers: Water transportation, Oil & Gas pipeline, Infrastructure, Agriculture & Irrigation, Housing etc.

Sector wise Consumption Break-Up

Source: Industry data

Per Capita Consumption (Kgs) - Steel

India has become the 2nd largest consumer of finished Steel in world.
The finished steel consumption was 106 million tons(MT) during FY22

Per Capita Consumption (Kgs) – Steel Pipes & Tubes

Huge demand from various sectors aided by Government Schemes

Infrastructure & Housing

Urban development program – Smart cities, Amrut Scheme, Hriday, National Infrastructure Pipeline (NIP)

Growing vertical mode of development – increased spending on Skyscrapers

Increasing Warehousing demand due to rapid digital transformation

Rapid Urbanization in Tier II & III cities – rising construction of G+20 structures, Green building norms & Rural Housing scheme (PMAY-G)

Water Supply

'Nal se Jal' scheme to offer piped water to every rural house by 2024 with outlay of Rs 3.5 lac crore
UP Jal Nigam

Jal Jeevan Mission of Central Government to provide safe and adequate drinking water through individual household tap connections by 2024 to all households in rural India.

Oil & Gas

4 mn mt of estimated demand for pipes City Gas Distribution

One Nation, One Gas Grid- Expanded by 17,000 KM to 34,500 km by 2025

Defence

Major application of Structural Steel in the manufacturing of equipments for Indian Defence Forces

Airports

'Udan' Scheme: GOI plans to open 100 Airports by 2025 with an investment of Rs. 1 trillion

Railways Infrastructure

Investment of ~ Rs. 50 Lakh Crores by 2030 for redevelopment of ~400 stations and build 4 new freight corridors

Bullet train Project , National Rail Corridor

Agriculture

Micro Irrigation - target to reach 100 lakh hectares in 5 five years

Poly House – Future of Farming – High Subsidy

Solar

Future of Power Generation – exponential growth
