Subject — Intimation under Regulation 30 regarding commencement of commercial production at the Vidisha manufacturing facility, Madhya Pradesh

Dear Sir/Madam,
Pursuant to Regulation 30 read with Schedule III of the SEBI (Listing Obligations and Disclosure Requirements) Regulations, 2015, HOAC Foods India Limited ("the Company") hereby informs the Exchange that it has commenced commercial production at its new manufacturing facility in **Vidisha, Madhya Pradesh, on 5 November 2026**.
Machinery trials commenced on **1 November 2026** and were completed on **4 November 2026**. Following completion of the trials, the Company commenced production at the facility, which houses wheat cleaning and flour milling, spice processing, and edible oil crushing and production lines.

- **A shift to fully automated manufacturing**

The Vidisha facility marks a significant step in the Company's transition from semi-automatic to fully automatic machinery. The new lines are designed to give the Company better control over key processing stages, improve consistency across production batches and handle higher volumes.
The facility brings three core product categories under one roof. This gives the Company greater flexibility to plan production across flour, spices and edible oils as demand grows across its retail and distribution channels.

Installed processing and production capacities

Manufacturing line	**Installed capacity**
Wheat cleaning	4,000 kg per hour
Atta milling	2,000 - 2500 kg per hour
Oilseed crushing	6,000 –7,000 kg per 24 hours
Edible oil output	3,500- 4,000 kg per 24 hours
Spice processing, combined capacity of all installed machines	270 –280 kg per hour

The facility layout includes dedicated space for additional machinery. As demand grows, the Company can add equipment in phases to increase capacity within the existing premises.

- **Operating efficiency and wider market reach**

  The Company expects the Vidisha location and increased automation to help optimise labour and staffing costs, improve electricity efficiency per unit of output and support more consistent product quality. The benefits will depend on production volumes, capacity utilisation and the pace at which the facility ramps up.

  The facility will also support the Company's plans to serve more markets across India. With greater manufacturing capacity, the Company can supply higher volumes to its existing retail, franchise and distribution partners and support expansion into new markets in phases.

  The Company currently has a portfolio of **more than 255 SKUs**. The new facility gives it greater flexibility to introduce additional products and pack sizes across flour, spices and edible oils as customer and trade demand evolves.

- **Message from the Managing Director**

  "For us, the Vidisha plant began with a simple question. How do we deliver the same quality our customers expect as we serve more families and more markets? Building a fully automated facility was a long-standing ambition for our team. Seeing it begin production today is a proud moment for everyone who worked to bring it to life.

Our customers will judge this investment by what reaches their kitchens. We want them to see the difference in the consistency of our atta, spices and oils, and to be able to find these products in more places. As production ramps up, our focus will be on getting those basics right every day.
"To our shareholders, thank you for the trust you have placed in us. We take that responsibility seriously. We will work to put this capacity to productive use, expand in line with demand and keep you informed about our progress. The care and hard work that went into building this facility are the same qualities we intend to bring to operating it."

Kindly take the above information on record.
