Revenue from Operations

₹ 3,123 Cr

EBITDA

₹ 616 Cr

Profit After Tax

₹ 460 Cr

Consistent **Growth** recorded YoY

Revenue from Operations

EBITDA

PAT

Commenting on the results and performance, Mr. Anurag Choudhary, CMD & CEO of Himadri Speciality Chemical Ltd said:

"We are pleased to report another robust quarter, achieving new performance milestones with consolidated H1 FY27 revenue surpassing ₹3,000 crore, EBITDA exceeding ₹600 crore, and PAT exceeding ₹450 crore. These achievements establish a new benchmark for Himadri and reflect the strength of our strategy, disciplined execution and continued focus on higher-value products.

Our sustainable growth in profitability is driven by an optimised product mix, growth in our core businesses and an expanding portfolio of speciality and advanced materials. Years of investment in R&D, innovation, customer relationships and strategic global partnerships have enabled us to diversify revenue streams, strengthen our competitive position and build a more resilient, future-ready business with significant growth potential.

During the quarter, the proposed merger of Birla Tyres business with Himadri marked an important step towards creating an integrated tyre value chain, leveraging our capabilities across feedstock, speciality carbon black, R&D and manufacturing.

We strengthened our investment in Sicona Battery Technologies, which has completed 100% acquisition of Advano (USA), strengthening silicon anode IP and adding US pilot plant, R&D and cell-testing capabilities. Sicona has also secured AUD 45 million in funding from the Australian Renewable Energy Agency (ARENA) to accelerate the commercialization of its next-generation silicon-carbon anode technology. Our strategic investment in International Battery Company (IBC) provides Himadri a unique platform spanning material validation, cell development and commercial deployment, positioning us at the forefront of the lithium-ion value chain while creating a powerful pathway from materials innovation to commercial adoption, thereby unlocking new growth opportunities in the global energy transition.

As global supply chains realign, our deep R&D expertise is strengthening domestic capabilities in critical advanced materials like Carbon Nano Tube, Super Speciality Carbon Black, Silicon Carbon, LFP Cathode, Synthetic Anode etc; reducing import dependence and advancing India's Atmanirbhar Bharat vision.

Looking ahead, our focus remains on sustaining this growth momentum, accelerating the commercialisation of advanced materials, strengthening our global presence and unlocking opportunities across emerging technologies. Backed by strong R&D capabilities, strategic partnerships and an increasingly diversified portfolio, we are confident of transforming Himadri into a leading global advanced materials and application driven solution company while delivering sustainable growth and long-term value for our stakeholders"

About Himadri Speciality Chemical Ltd

Himadri Speciality Chemical Ltd is a global speciality solutions powerhouse that has evolved from its carbon chemistry roots into a science-led enterprise driven by innovation, application diversity, and resilient earnings. The company delivers high-performance, value-added solutions across a wide range of industries, including lithium-ion batteries, electric mobility, paints, plastics, tyres, technical rubber goods, aluminium, graphite electrodes, agrochemicals, defence, and construction chemicals, with its products trusted across 61 countries.

Himadri's diversified portfolio includes advanced battery materials, speciality carbon black, coal tar pitch, refined naphthalene, SNF & PCE, speciality oils, and clean power solutions. As one of India's early pioneers in lithium-ion battery materials, the Company continues to strengthen its capabilities across the battery value chain through continuous research, technology development, and product innovation.

At Himadri, the focus extends beyond manufacturing to designing customised solutions aligned with evolving customer and industry requirements. Backed by strong R&D capabilities and a customer-centric approach, Himadri's product-plus model has positioned itself as an integrated solutions partner, building enduring relationships across future-oriented industries globally.

Sustainability remains central to Himadri's long-term strategy. The Company operates eight zero-liquid-discharge manufacturing facilities and meets 100% of its electrical energy requirements through in-house clean power generation. With a strong emphasis on operational excellence, technological sophistication, environmental responsibility, and human capital, Himadri continues to pursue transformative growth anchored in scale, scope, sophistication, and sustainability.
