### Rationale

The ratings continue to derive strength from Housing and Urban Development Corporation Ltd. (HUDCO)'s sovereign ownership, with the Government of India (GoI) holding 75% of the equity as on December 31, 2025, and its strategically important role as a nodal agency for implementing Government policies in the priority areas of social housing and urban infrastructure.

The ratings also draw comfort from the relatively low credit risk profile of the company's loan portfolio, supported by its focus on Government-sponsored urban infrastructure and housing projects, many of which benefit from guarantees and/or budgetary provisions from the Central and state governments for debt servicing. Moreover, the ratings reflect HUDCO's healthy capitalisation, adequate earnings profile, and good financial flexibility and resource profile, which support its liquidity position.

ICRA notes that while the credit risk for HUDCO's loan portfolio is mitigated by the presence of government guarantees and/or budgetary allocations for debt repayments, the weak financial profile of several state governments remains a key risk factor. Nevertheless, HUDCO's asset quality metrics remain comfortable, with gross and net stage 3 percentages at 1.08% and 0.06%, respectively, as on December 31, 2025 (1.67% and 0.25%, respectively, as on March 31, 2025), supported by strong book growth, limited fresh slippages and recoveries from stressed accounts.

The Stable outlook reflects ICRA's expectation that HUDCO will continue to remain strategically important to the GoI for policy implementation in the housing and urban development sectors, while maintaining adequate profitability, borrowing, and capitalisation profile.

ICRA has reaffirmed and withdrawn the ratings for the Rs. 3,000.00-crore long-term borrowing programme with no amount outstanding against the rated instruments. The ratings have been withdrawn as per ICRA's policy on the withdrawal of credit ratings

## Key rating drivers and their description

### Credit strengths

**Majority ownership by GoI; strategic role in implementing various GoI schemes** – HUDCO continues to serve as a nodal agency for implementing Government policies for the high priority sectors of social housing and urban infrastructure. As one of the major financiers of urban infrastructure and housing projects, it remains strategically important for achieving the Government's objectives in the sectors. The GoI remains the majority shareholder in HUDCO with a 75% stake as on December 31, 2025. The company's board includes Government nominee directors, besides independent directors and functional directors with experience in different fields. HUDCO's long-standing relationships with different state governments further strengthens its position as a preferred lender for their urban infrastructure and housing projects. HUDCO has also received the approval from GoI to raise low-cost capital gain bonds, which provide comfort with respect to its importance to the GoI.

**Healthy capitalisation, good financial flexibility and resource profile** – HUDCO's financial profile continues to be characterised by comfortable capitalisation with a reported capital adequacy ratio of 38% as on December 31, 2025 and a gearing of 7.3 times {6.2 times, adjusting for GoI fully serviced bonds (GoI FSBs)} as of December 31, 2025 compared to 6.0 times (4.9 times excluding GoI FSBs) as of March 31, 2025. The reported capital adequacy is supported by the 20% risk weight associated with state government-guaranteed exposures and the 0% risk weight for funding to Building Materials and Technology Promotion Council (BMTPC) out of the extra budgetary resources, i.e. GoI FSBs. These bonds are serviced through budgetary allocations to the Ministry of Housing and Urban Affairs (MoHUA) in the Union Budget. Prudent capitalisation is one of the key mitigants against the concentration risk arising out of the wholesale nature of HUDCO's exposures and ICRA expects the company to maintain a prudent capitalisation level going forward as well.

HUDCO's funding profile is diversified, comprising tax-free bonds, GoI FSBs, taxable bonds, bank loans, commercial paper, and foreign currency borrowings. As on December 31, 2025, around 23% of its borrowings were in the form of long-tenor (10-15 years) tax-free bonds and GoI FSBs, which supports the asset-liability maturity (ALM) profile.

**Relatively low credit risk on portfolio, given the high share of government-backed exposures** – Over the past few years, HUDCO's disbursements have been only to public sector agencies, resulting in a steady decline in the share of its legacy private sector portfolio. Consequently, the public sector loan book accounted for ~99% of the company's total advances as on December 31, 2025 (91% as on March 31, 2017). The company has recently resumed private sector disbursements in a calibrated manner, although exposures remain insignificant at present. ICRA notes that a large portion of HUDCO's advances in the public sector loan book are backed by guarantees/budgetary allocations of the Central or state governments (87% of loan book covered by guarantee as on December 31, 2025). This mitigates the credit risk for the company to some extent as the underlying projects may not have comfortable cashflows for debt servicing.

The asset quality indicators improved, with gross and net stage 3 assets at 1.08% and 0.06%, respectively, as on December 31, 2025 from 1.67% and 0.25%, respectively, as on March 31, 2025, supported by strong book growth and limited slippages and some recoveries from stressed accounts. However, HUDCO's stage 2 assets continue to exhibit volatility. Given the wholesale nature of the loans and the resulting high concentration risk, hence any slippages in any of the larger accounts could lead to a sharp deterioration in the company's asset quality indicators. Nonetheless, ICRA believes that the risks are largely mitigated by HUDCO's comfortable capitalisation and solvency metrics and the relatively high proportion of government guaranteed exposures in the loan book.

**Adequate profitability indicators** – HUDCO reported a profit after tax (PAT) of Rs. 2,053 crore in 9M FY2026 compared to Rs. 2,709 crore in FY2025 translating into (return on managed assets (RoMA) of 1.9% in 9MFY2026 from 2.4% in FY2025). Although the company's relatively less risky exposure results in modest yields, its profitability indicators remain adequate, supported by low credit costs and operating expenses. The NIM appears optically lower at 2.8% in 9M FY2026 due to the impact of the low spread (0.4%) available on the funding extended out of the extra budgetary resources. Further, the company's operating expenses remained low at 0.3% of average managed assets (AMA) in 9M FY2026 (0.3% in FY2025) due to the wholesale nature of its operations. Provisioning costs were negative due to provision reversal, following the favourable resolution of some

stressed accounts and limited slippages in 9M FY2026. ICRA expects overall profitability to remain adequate, going forward as well.

### Credit challenges

**Concentration risk; albeit declining supported by book growth over past 2 years** – Although the credit risk for HUDCO’s loan portfolio is partly mitigated by government guarantees and/or budgetary allocations for debt servicing, the weak financial profile of several state governments remains a concern, especially given HUDCO’s concentration of its exposure to states such as Telangana and Andhra Pradesh. As on December 31, 2025, HUDCO’s exposure to AP accounted for about 117% of its net worth while its exposure to both these states aggregated 203% of its net worth (121% of its net worth as on December 31, 2025). While lower regulatory risk weights apply to government guaranteed exposures for concentration norms, the company nonetheless faces elevated concentration risk and remains susceptible to slippages, which could keep the stage 2 assets volatile, though ultimate losses are expected to remain limited. The concentration risk is partly mitigated through the geographically diversified book growth over the past two years. The company disbursed loans worth Rs. 41,347 crore resulting in 33% (annualised) growth in 9MFY2026. Going forward the company expected to grow at a CAGR of ~18-22%, however, its ability to diversify its state-wise portfolio mix remains imperative from a concentration risk perspective.

### Environment and social risks

Given the service-oriented nature of its business, HUDCO does not face material physical climate risks. However, it is exposed to environmental risks indirectly through its portfolio of assets. If the entities or businesses to which HUDCO has an exposure face business disruption because of physical climate adversities or if such businesses face climate transition risks because of technological, regulatory, or customer behaviour changes, the same could translate into credit risks for the company. However, such risk is mitigated for HUDCO through adequate portfolio diversification. With regard to social risks, data security and customer privacy are among the key sources of vulnerability for lending institutions as material lapses could be detrimental to their reputation and invite regulatory censure. Given the nature of its business, HUDCO’s exposure to social risks is limited.

### Liquidity position: Adequate

While HUDCO does not maintain sizeable on-balance sheet liquidity, it has a demonstrated track record of maintaining sufficient unutilised bank lines for plugging near-term mismatches. As of December 31, 2025, the company’s asset-liability maturity profile reflected debt servicing burden of Rs. 34,025 crore against estimated inflows from advances of Rs. 19,452 crore. The liquidity profile is also supported by undrawn bank lines of about Rs. 9,397 crore as on December 31, 2024 and cash and liquid investments of Rs. 455 crore. Moreover, the healthy financial flexibility, backed by the company’s parentage and strategic importance to the GoI, provides comfort.

### Rating sensitivities

**Positive factors** – Not applicable

**Negative factors** – Change in the ownership and/or a change in HUDCO’s strategic role or importance to the GoI shall negatively impact the ratings. Also, a deterioration in the solvency level to more than 40% on a sustained basis will be a negative for HUDCO’ credit profile.

## Analytical approach

Analytical Approach	Comments
Applicable rating methodologies	<a href="#">ICRA's Credit Rating Methodology for Non-banking Finance Companies</a> <a href="#">Policy on Withdrawal of Credit Ratings</a>
Parent/Group support	The ratings derive significant strength from HUDCO's sovereign ownership (75% held by the GoI as of December 31, 2025) and its important role as a nodal agency for the implementation of Government policy in the high priority sectors of social housing and urban infrastructure. ICRA expects support from the GoI to be forthcoming, if required.

## About the company

Housing and Urban Development Corporation Ltd. (HUDCO), incorporated in 1970, is a listed Navratna public sector enterprise under the Ministry of Housing and Urban Affairs (MoHUA), Government of India (GoI). It is a public financial institution, primarily financing social housing and urban infrastructure projects. The GoI held a share of 75% in HUDCO, as on December 31, 2025, while the balance was held by the public. In August 2024, the company has received a fresh certificate of registration from the Reserve Bank of India as an NBFC-Infrastructure Finance Company (NBFC-IFC).

HUDCO has been taking incremental exposures exclusively to state governments and public sector agencies. As a result, the share of its legacy private sector portfolio in the overall portfolio declined to about 1.2% of its total advances as on December 31, 2025 while the public sector loan book accounted for 98.8% (91% as on March 31, 2017). As far as the sector-wise portfolio mix is concerned, the housing segment accounted for ~34% of the loan book as on December 31, 2025 while urban infrastructure accounted for 66%.

HUDCO reported a profit after tax (PAT) of Rs. 2,053 crore on a total income of Rs. 9,702 crore in 9M FY2026 against PAT of Rs. 2,709 crore on a total income of Rs. 10,348 crore in FY2025.

ICRA ratings should not be treated as recommendation to buy, sell or hold the rated debt instruments. ICRA ratings are subject to a process of surveillance, which may lead to revision in ratings. An ICRA rating is a symbolic indicator of ICRA's current opinion on the relative capability of the issuer concerned to timely service debts and obligations, with reference to the instrument rated. Please visit our website [www.icra.in](http://www.icra.in) or contact any ICRA office for the latest information on ICRA ratings outstanding. All information contained herein has been obtained by ICRA from sources believed by it to be accurate and reliable, including the rated issuer. ICRA however has not conducted any audit of the rated issuer or of the information provided by it. While reasonable care has been taken to ensure that the information herein is true, such information is provided 'as is' without any warranty of any kind, and ICRA in particular, makes no representation or warranty, express or implied, as to the accuracy, timeliness or completeness of any such information. Also, ICRA or any of its group companies may have provided services other than rating to the issuer rated.
