## **IKS Health Announces Acquisition of ARAI Solutions, an AI Management and Technology Company**

*Applied research expertise will accelerate IKS Health's dynamic AI transformation*

**Mumbai, India | Dallas, TX – May 13, 2026** – IKS Health, a global leader in care enablement solutions supporting clinicians, staff, and patients at every step of the care journey, is proud to announce the acquisition of ARAI Solutions, a pioneering, innovation-driven provider in the field of artificial intelligence. With ARAI Solutions, IKS Health is accelerating the development of a full agentic AI technology stack with capabilities to create its own more efficient small language model.

IKS Health currently possesses a powerful four-layer healthcare AI stack with EMR integration, platform orchestration, trust/compliance, and AI applications. ARAI's ontology adds a critical knowledge layer, making IKS Health the only full-stack player with proprietary domain intelligence at every level.

ARAI's interconnected biomedical knowledge graphs, based on peer-reviewed research, feed a central reasoning engine, directly mappable to IKS Health platform outputs. Through a large language model grounding layer, several areas will see accelerated platform development and reduced dependency on third-party AI infrastructure including:

- Autonomous coding
- Clinical decisions
- Denial prevention
- Prior authorization reasoning
- Precision medicine

“ARAI’s clinical knowledge infrastructure makes IKS Health AI operational models even more economical, reliable, auditable, and capable of reasoning,” said Sachin K. Gupta, Founder and Global CEO of IKS Health. “Uniting ARAI with IKS Health adds a valuable and complementary layer to our platform as we scale our powerful AI-driven and human-in-the-loop approach with evolving clinical and regulatory guidelines.”

By integrating its own clinical reasoning and medical ontologies, IKS Health strengthens its competitive edge and accelerates growth while delivering reliable, explainable results for regulators and healthcare organizations that foundation models cannot provide.

“It’s clear that IKS Health is poised to disrupt the health tech industry by creating AI-driven systems of action that have exponential value,” said Dr. Roland Haas, co-founder and CEO of ARAI. “ARAI is pleased to join forces with IKS Health as they extend into next-generation clinical and operational AI models.”

As clinical and regulatory knowledge evolves, research-backed methodologies combined with AI are shaping the future of healthcare. ARAI’s explainable AI approach converts black box AI into glass box AI

and allows for predictions that are transparent, explainable, and traceable.

“For decades we’ve constantly pushed the frontiers of innovation and set new AI industry benchmarks,” said Dr. Asoke Talukder, co-founder and CAIO of ARAI. “By using ARAI's framework to fill the critical AI infrastructure knowledge layer, IKS Health will be the only full-stack player with proprietary domain intelligence at every tier.”

### **About IKS Health**

IKS Health reduces the administrative, clinical, and operational burdens that slow healthcare down, giving clinicians and care teams the freedom to focus on delivering exceptional care. Through its Care Enablement platform, IKS Health integrates agentic AI workflows with human expertise to create smarter, more accurate operations, better outcomes, and financially sustainable growth across the care journey. Founded in 2006 and recognized by Black Book as the top provider of AI-driven RCM services, by KLAS for performance and client satisfaction, and by Google Cloud with a DORA Award for “Augmenting Human Expertise with AI,” IKS Health partners with the largest health systems, physician groups, and specialty practices across the United States.
