Dear Sirs,

Sub: Disclosure under Regulation 30 of the SEBI (Listing Obligations and Disclosure Requirements) Regulations, 2015 – Revised Investor Presentation for Analyst / Institutional Investor Meeting.

With reference to the above captioned subject, we wish to inform you that due to inadvertent typographical error in the Investor Presentation submitted earlier today i.e. on 2nd September, 2026, we are hereby submitting the revised Investor Presentation. The revised Investor Presentation is enclosed herewith.

This same is also being hosted on the Company's website at www.indiaglycols.com.

This is for your information and record.

Thanking you,

Yours truly,
For India Glycols Limited

Ankur Jain
Head (Legal) & Company Secretary
Encl: A/a

Forward Looking Statements

Except for the historical information contained herein, statements in this presentation and any subsequent discussions, which include words or phrases such as 'will', 'aim', 'will likely result', 'would', 'believe', 'may', 'expect', 'will continue', 'anticipate', 'estimate', 'intend', 'plan', 'contemplate', 'seek to', 'future', 'objective', 'goal', 'likely', 'project', 'on-course', 'should', 'potential', 'pipeline', 'guidance', 'will pursue' 'trend line' and similar expressions or variations of such expressions may constitute 'forward-looking statements'.

These forward-looking statements involve a number of risks, uncertainties and other factors that could cause actual results to differ materially from those suggested by the forward-looking statements.

These risks and uncertainties include, but are not limited to IGL Spirits Limited, India Glycols Limited and Ennature Bio Pharma Limited's ability to successfully implement its strategy, the Company's growth and expansion plans, obtain regulatory approvals, provisioning policies, technological changes, investment and business income, cash flow projections, exposure to market risks as well as other risks.

IGL Spirits Limited, India Glycols Limited and Ennature Bio Pharma Limited does not undertake any obligation to update forward-looking statements to reflect events or circumstances after the date thereof.

These materials are not a prospectus, a statement in lieu of a prospectus, an offering circular, an invitation or an advertisement or an offer document under the Indian Companies Act, 2013 together with the rules and regulations made thereunder, the Securities and Exchange Board of India (Issue of Capital and Disclosure Requirements) Regulations, 2009, as amended, or any other applicable law in India. The securities referred to herein have not been and will not be registered under the U.S. Securities Act of 1933, as amended, and may not be offered or sold in the United States, except pursuant to an applicable exemption from registration. No public offering of securities is being made in the United States or in any other jurisdiction

INDIA GLYCOLS LIMITED

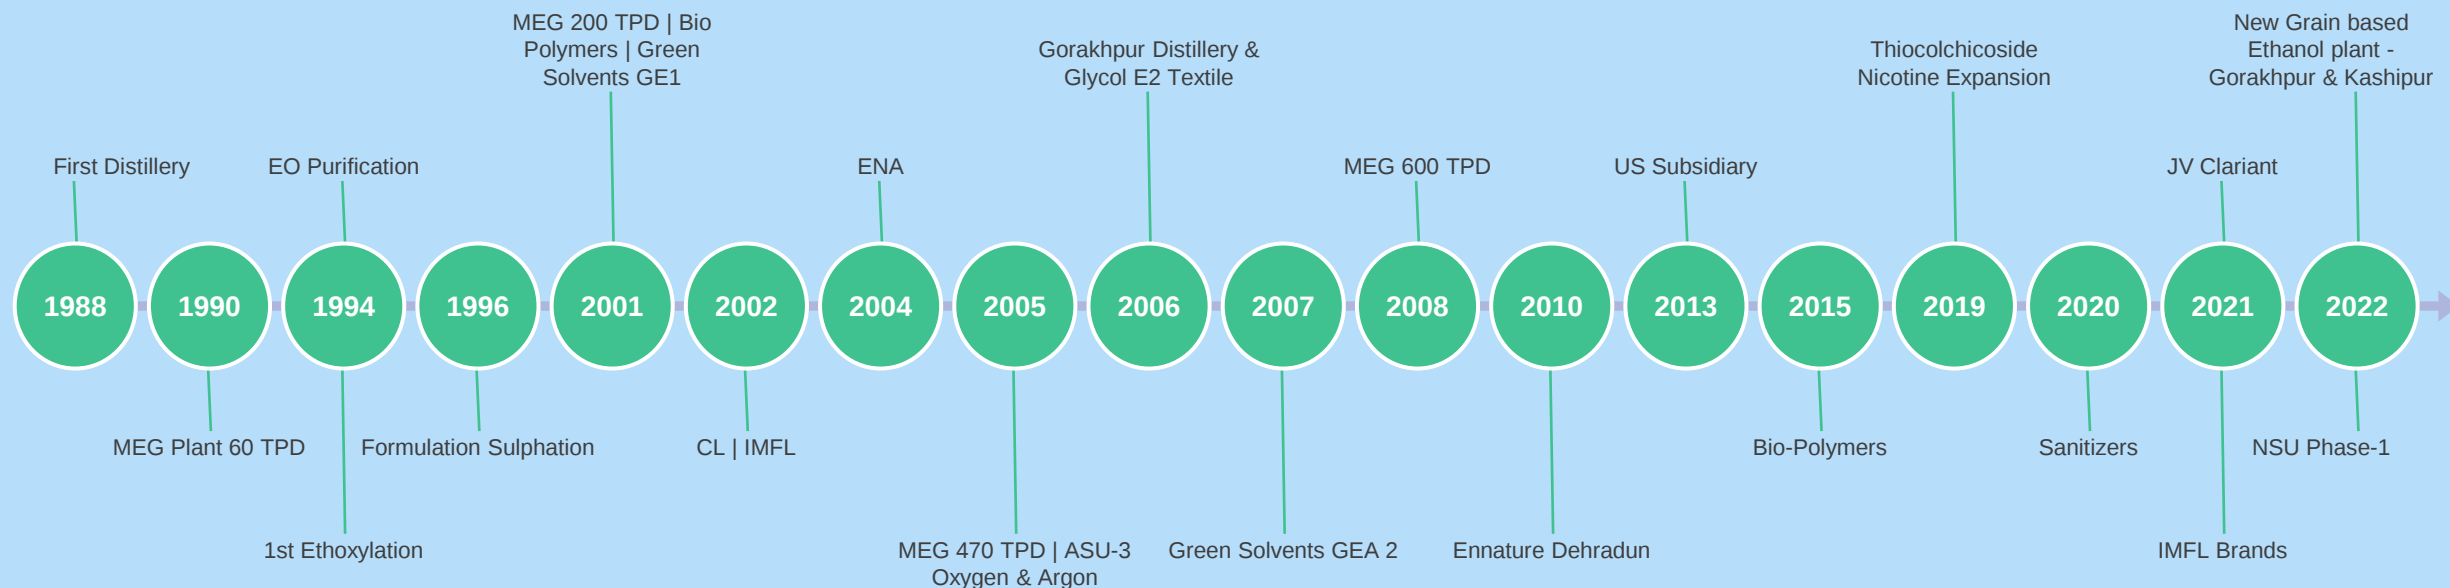

Introduction

IGL JOURNEY

A four-decade journey of capability building, building on synergies, specialties portfolio development.

India Glycols Limited

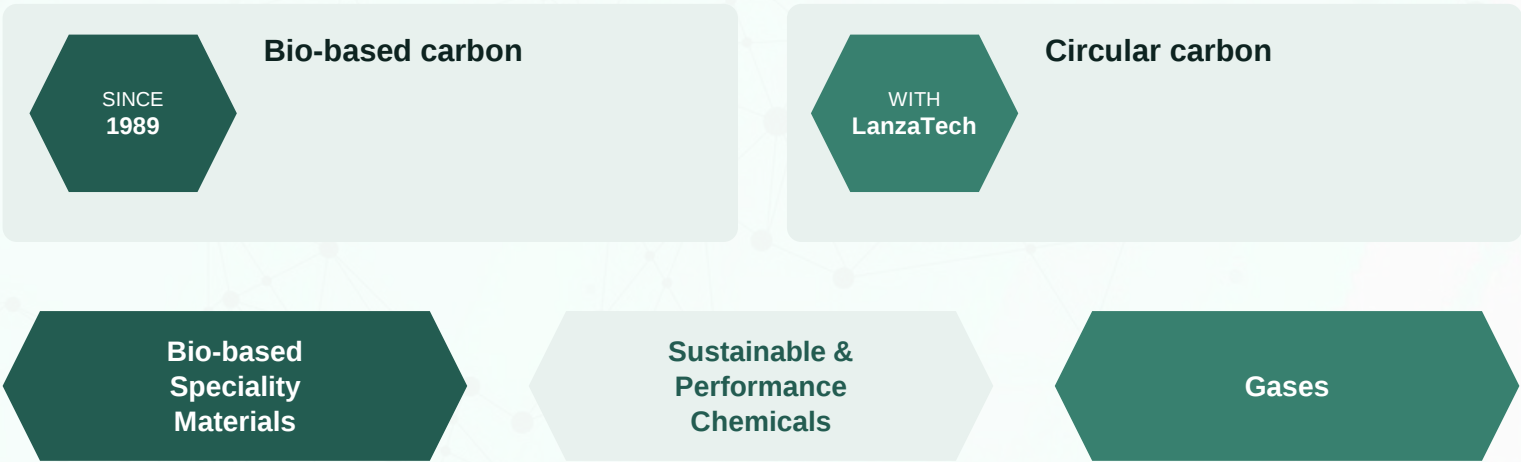

Sustainability- and Knowledge-Driven

- A four-decade head start in green chemistry
- Innovation across multiple technology and application platforms
- Collaboration with globally reputed partners
- Mix shifting toward specialties and applications
- Partners of choice for adding value through sustainability and performance

The world's first — producer of bio-based Ethylene Oxide Bio Based Glycols/Bio Based Amines – practically unique capability even today

97% of raw material renewable

A strong, well-identified near- to medium-term NPDI projects in performance chemicals

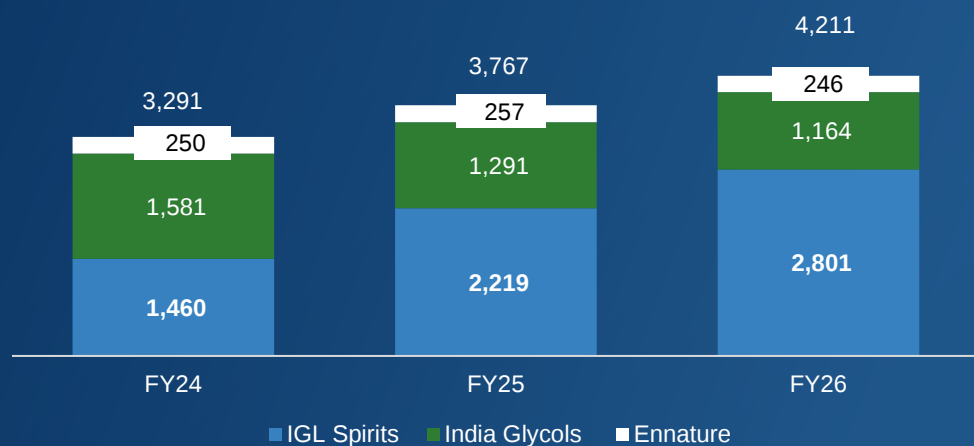

Note: (1) GE = Glycol Ethers; GEA = Glycol Ether Acetates. (2) Excluding Clariant JV sale.

India Glycols Limited | Key Financials

Net Revenue

(INR Cr)

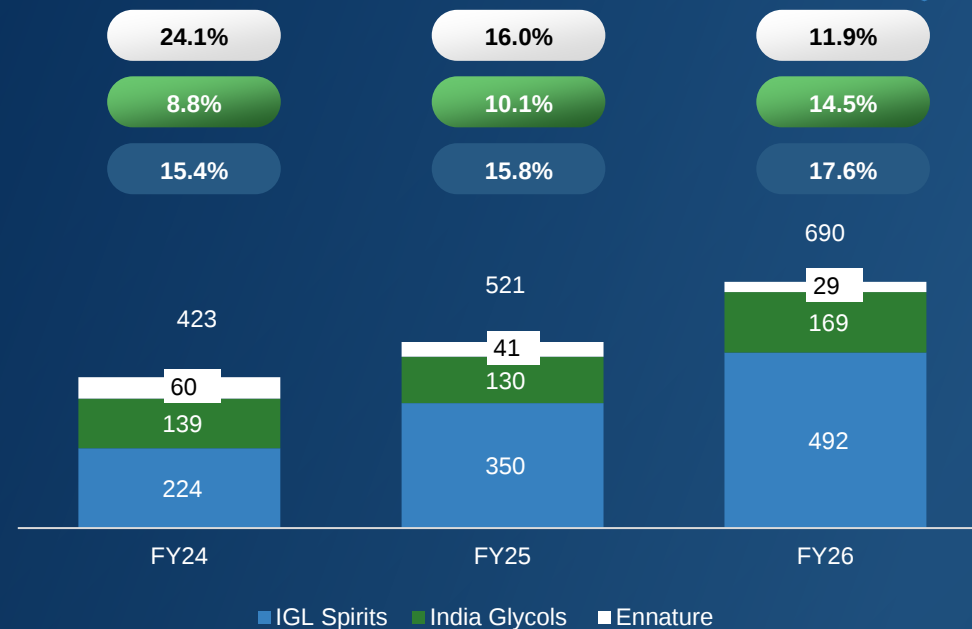

c. 13%
FY24 – 26
CAGR

- Revenue grew at a ~13% CAGR over FY24–FY26,
- Led by the scale-up of the spirits and biofuels businesses
- Discontinuation of some less profitable business, changes in operating philosophy

EBITDA / Margin (%)

c. 28%
FY24 – 26
CAGR

- EBITDA grew at ~ 28% CAGR,
- Materially outpacing revenue growth and reflecting strong operating leverage
- Focus on cost and mix to improve quality of business

Advanced Multi-capability Manufacturing Platform

Kashipur

300-acre advanced manufacturing complex

- Ethanol – Grain/Molasses
 - Fermentation
 - Distillation
 - ENA
- Bio-based Speciality Materials
 - Sustainable & Performance Chemicals
 - Gases

Biofuels
IMFL & IMIL Bottling
Biopolymers

Gorakhpur

56-acre distillation & bottling complex

- Ethanol – Grain/Molasses
 - Fermentation
 - Distillation
 - ENA
- Ethanol Bio-Fuel Grade
 - Branded IMIL Bottling / Tetra
 - IMFL bottling
 - IMFL Glass bottling

Dehradun

1,60,000 sqft state of art facility

- SCFE (Super Critical CO2)
- Solvent Extraction
- Aqueous Extraction
- Bio Fermentation

INDIA GLYCOLS LIMITED

Structure of the Demerger

Overview of the Demerger

Strategic Objective & Rationale

- **Sharper business focus**, enhanced competitiveness to unlock shareholder value
- **Improved Capital Allocation**
- **Value visibility** – each business valued appropriately by investors who understand its specific space
- **Seamless transition** to benefit from retained synergies

Transaction Perimeter

- **IGL** to retain Biobased Specialty Materials; Sustainable & Performance Chemicals, Gases. **IGL Spirits** to house Potable Spirits & Biofuels; **Ennature** will have Nutraceuticals, plant-based APIs and Biopolymers
- Assets, liabilities, contracts and employees of the respective business to be transferred to relevant resulting companies
- Suitable commercial arrangements for common assets and shared services to ensure seamless transition

Timelines

- IGL has secured **all key approvals** from the exchanges, shareholders, creditors and NCLT
- Demerger became effective on **1st September 2026** with **2nd September 2026** being the record date

Introduction to the Demerged Businesses

Nature Considered

Spirits for the Spirited One

Inspired by Nature. Enabled by Science. Created by Us.

INDIA GLYCOLS LIMITED

IGL Spirits Ltd

ENNATURE
BIOPHARMA

INDIA GLYCOLS LIMITED

Demerged Structure

Creating three focused, independently listed businesses with focused strategies, capital allocation and growth priorities

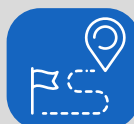

Proposed Structure

IGL to demerge its **Spirits & Biofuel** and **Biopharma** business resulting in 3 independently listed public companies

Greater & clear focus on each business with potential to unlock value for stakeholders by drawing focused investors

Will enable independent growth strategies for each business and meet industry specific standards & regulations

Improved management, operating efficiencies and resource allocation

INDIA GLYCOLS LIMITED

Performance Chemical Applications

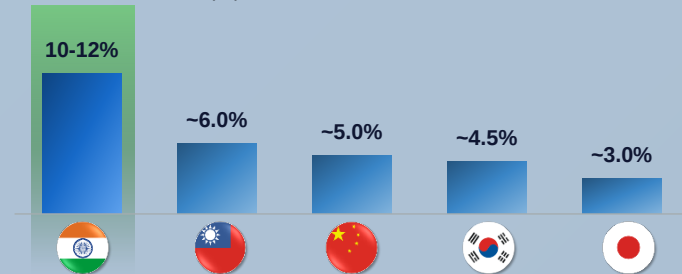

FY25 – 29E CAGR (%)¹

...Broad-Based End-Market Growth

Growth in Key Markets

FY25 – 29E CAGR (%)¹

India Expected to Outgrow Key Asian Markets...

Domestic Production

Domestic production share

Domestic Manufacture

- o Needs – Aspirations - Challenges
- o Foundational
- o Policy – MII
- o Demographics
- o Geopolitics and SC diversification
- o India Advantage – RM / Market / Capex / Talent / RE

Sources: Care Edge. 1 USD = 95 INR. Note: (1) Market size growth.

Vision: 10X 10Y

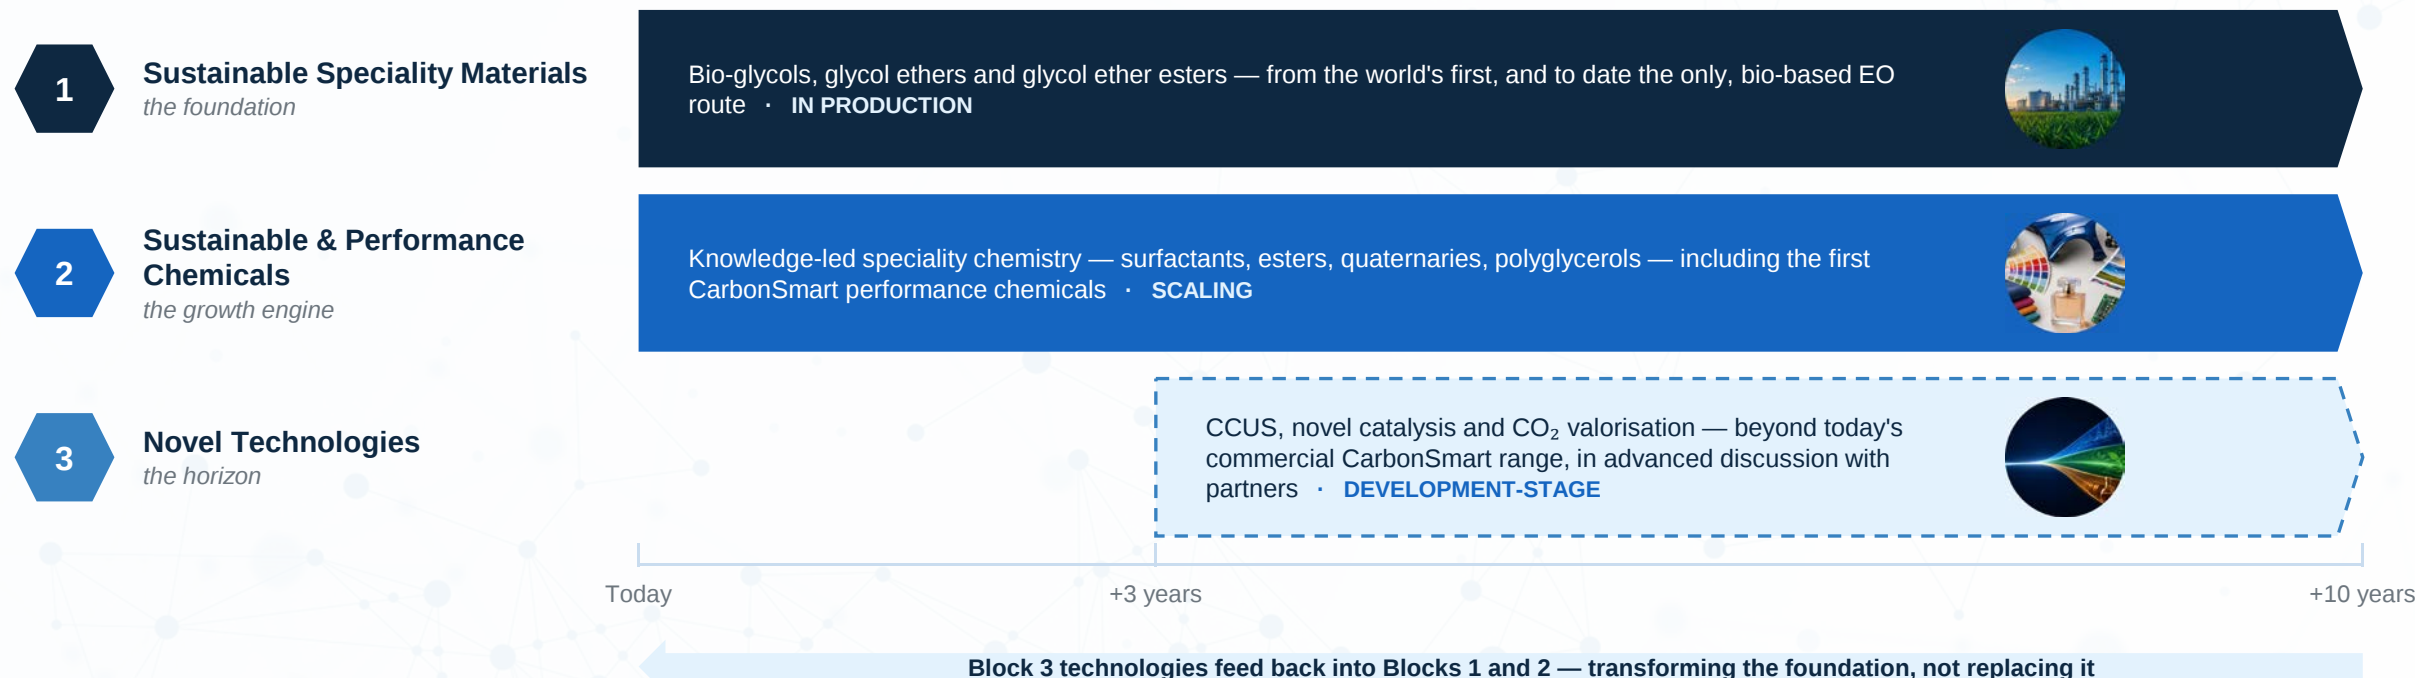

Ten times sales and profits over ten years — compounding from three blocks

10X in sales and profits, in ten years — on a renewable-carbon spine, not by acquisition.

Aiming for
₹2,000 Cr net revenue
₹400 Cr EBITDA — aspiration next 4–5 years

THE THREE BLOCKS — OVERLAPPING HORIZONS, NOT SEQUENTIAL STEPS

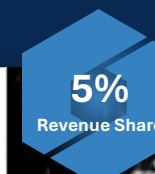

Gases — a steady adjacency: industrial and medical gases arising from the process itself, present by design rather than ambition.

We have done this twice. The world's first bio-based ethylene oxide in 1989, and circular-carbon chemistry commercialised with LanzaTech. Block 3 is the third time.

Note: Timeline indicative, not proportional. Block 3 comprises development-stage programmes; no forecasts are made for them here.

Pioneering & Scaling up Sustainable Chemistry

A differentiated portfolio-, application-led specialties, strong process & product development, strategic partnerships.

 	 	 	
Bio-based Speciality Materials	Sustainable & Performance Chemicals	Gases	Novel Tech
• Bio-glycol: Bio-based MEG, DEG, TEG • Bio-glycol Ethers & Acetates: Glycol Ethers, GE Esters; Brake fluids	• Green Tech, knowledge based, value added • Oil & Gas; Bio-amines, Green-solvents; Esters; Crop; Paper; Wire Enamel, Coatings; Personal Care; Pharma • Clariant JV	• Liquid CO₂, O₂, N₂, Argon, Sterigas and other industrial and specialty gases for diversified end-markets	• CCUS • Novel Catalysis • New Feedstocks • New Green Molecules • New Applications
Only Manufacturer of Bio-Ethylene Glycols	World-first bio-based amines	World's largest manufacturer of Bio-EO	Supporting future growth outlook

Together with JV worlds largest manufacturer of green specialty chemicals of this kind

Driving Growth with Positive Impact

Advancing renewable chemistries and bio-based materials to create differentiated growth while supporting customers' sustainability goals

1. Scale application-led specialty chemistries

Commercialize tailored solutions across personal care, oil & gas, crop protection, paints and coatings to drive a higher-value mix

2. Strong Existing Bio-based Materials Platform

Build on established scale to help packaging, textile and automotive customers transition toward renewable, lower-carbon materials

3. Expand in high-value global markets

Deepen Southeast Asian relationships while pursuing larger green-chemical opportunities across the US and Europe

4. Accelerate growth through a differentiated product pipeline

Scale bio-amines, green solvents and carbon-smart specialties that combine performance with a positive environmental impact

5. Capitalize the shift toward sustainable sourcing

Offer certified bio-based and carbon-smart alternatives that reduce reliance on fossil feedstocks and support customers' sustainability goals

6. Sharpened focus and capital allocation post-demerger

Dedicated management and resources enable faster innovation, capacity utilization and specialty-led portfolio development

What we bring to the table: six foundations, forty years deep

IGL is pursuing new value-added sustainable chemistry — and intends to build it with partners.

Product development

100+ green products commercialised; molecules co-developed with global chemical and consumer customers against identified demand, with a New Specialty Unit providing commercial-scale flexibility for launches.

Process development

The world-first agro route to ethylene oxide (1989), India's only continuous glycol-ether/ester process, and four decades of scaling fermentation-to-chemicals routes from pilot to full plant.

World-class manufacturing

Three integrated complexes over ~360 acres; a 3×3 feedstock-flexibility model across in-house, domestic and imported ethanol; internationally certified, DCS-controlled operations.

Green technology

97% renewable raw material, recycled-carbon chemistry with LanzaTech, zero-liquid-discharge distilleries and UNFCCC CDM-registered biomass cogeneration — engineered into the asset base, not added on.

Application development

Deep formulation knowledge across twelve end-markets — from surfactants for personal care to rheology modifiers for oilfields — backed by a DSIR-recognised R&D centre operating since 1993.

Global collaborations

A working history with world leaders — Scientific Design, Sulzer Chemtech, LanzaTech, Clariant, Bacardi — spanning technology licensing, joint ventures and 15-year manufacturing partnerships.

Trusted by global majors: BASF · L'Oréal · Stepan · Lamberti · Newpark · Iwatani · Suntory · Toray · Bacardi · Clariant — relationships measured in years and decades, not transactions.

Chemistry platforms — how we build

SOLID · origins and foundation routes

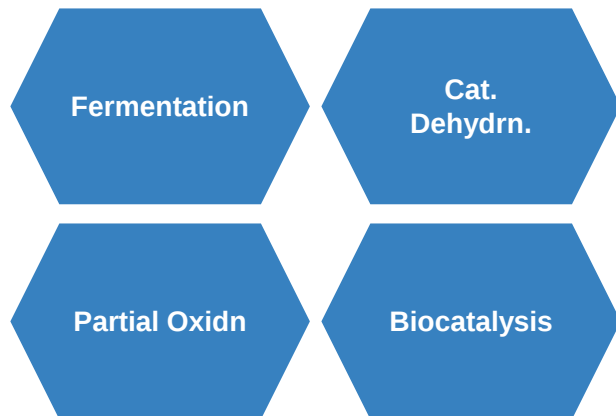

OUTLINED · derivatization platforms

Two renewable-carbon origins, four foundation routes, nineteen derivatisation platforms.

RENEWABLE CARBON ORIGINS

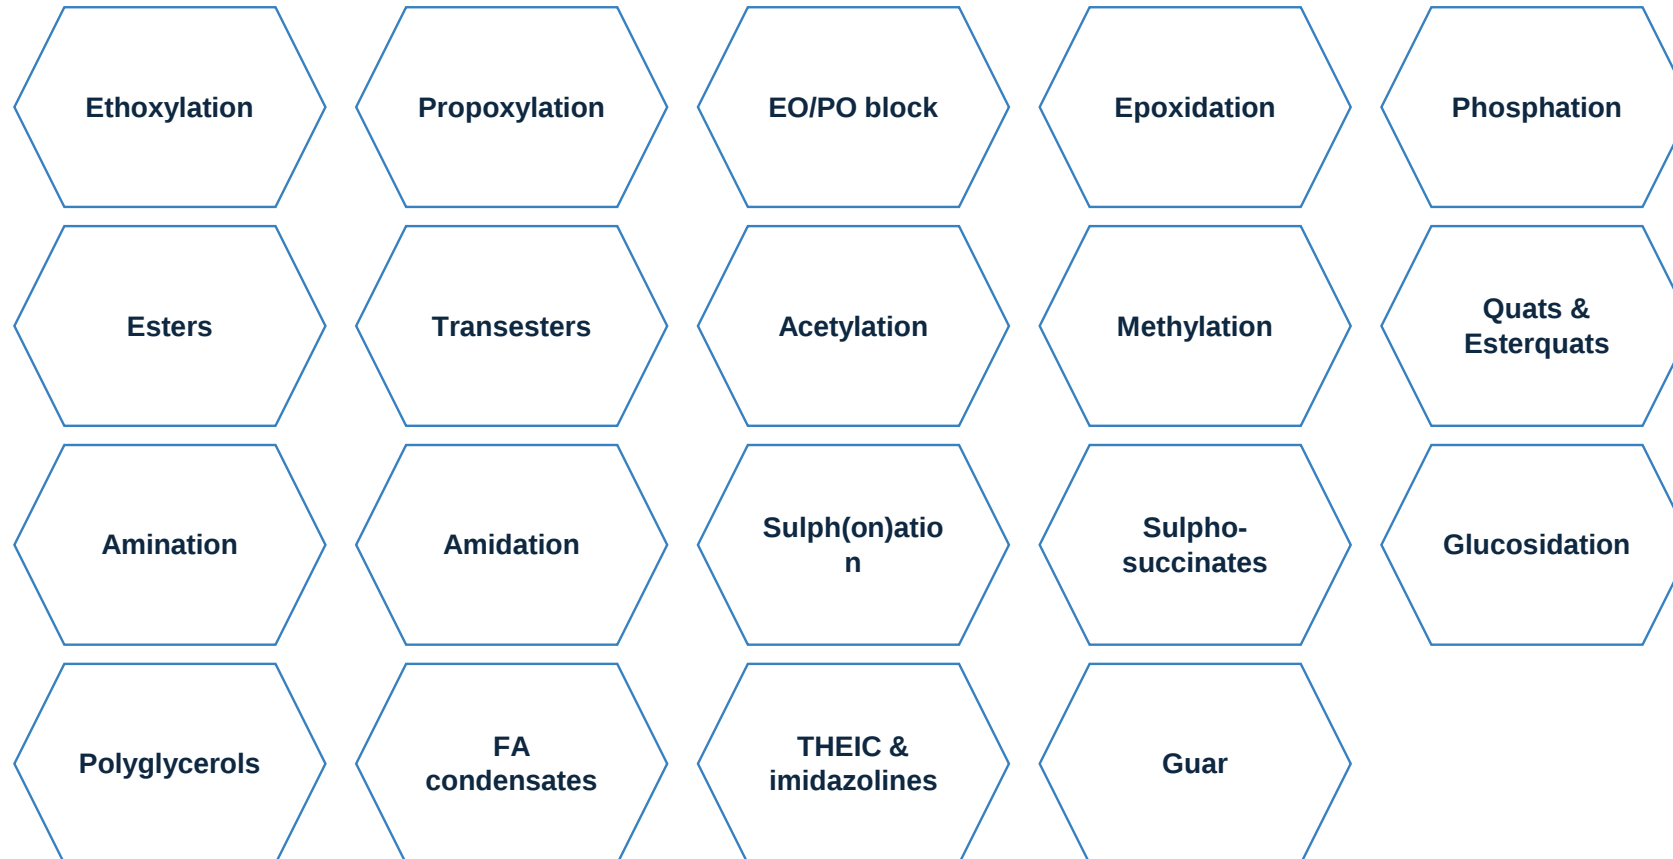

FOUNDATION ROUTES

Five knowledge capabilities

Product · process · application · formulation
development · organic synthesis

DERIVATISATION PLATFORMS

1

Reliable
Molecules

2

Good Product

3

Differentiated
Product

4

Solution
Provider

5

Collaborative
Projects

6

Strategic
Partnerships

Application platforms — what our molecules do

Twenty-eight functions across four families, feeding the materials the world makes with them.

SURFACE & INTERFACE	FLOW & FORM	CARE & FINISH	ENERGY & INDUSTRY
Emulsification	Rheology modification	Softening	Industrial cleaning
Demulsification	Gelling & crosslinking	Conditioning & emollience	Gas dehydration & hydrate control
Dispersion	Friction & drag reduction	Humectancy	Corrosion & scale inhibition
Wetting & spreading	Thickening & stabilisation	Mildness & co-surfactancy	EOR surfactant systems
Foam control & boosting	Plasticisation	Antistatic & levelling	Shale inhibition & drilling aids
Detergency & degreasing	Lubricity & base fluids	Spin finish & fibre lubrication	Heat transfer & hydraulics
Solubilisation & coupling	Coalescence & film formation	Fragrance solvency & fixation	Sterilisation (EO-CO ₂)

MATERIAL PLATFORMS — WHAT THE WORLD MAKES WITH THEM

Green Polyester- reaching wardrobes and shelves.
Green Packaging – bottles, films, rigid packaging

Combined through five knowledge capabilities: product development · process development · application development · formulation development · organic synthesis

...reaching wardrobes, shelves, fields, wells and fragrance houses the world over.

One of India's Only Chemicals Plant with a Direct Rail Line to Port

Kashipur sits ~1,500 km from the nearest gateway ports, yet access to a captive rail network in ICD Kashipur makes IGL more cost, time and safety efficient than peers based much closer to the coast.

Connecting Kashipur to Key Export Gateways

Logistical Benefits of Rail Line

Cost-Effective

Direct rail haul and **double-stack container** movement undercuts road cost

Safer

Bulk chemicals move in sealed **ISO tank containers** leading to far lower transit-accident risk

Greener

Rail cuts **CO₂ emissions per tonne-km** vs. road

More Reliable

Immune to highway congestion, weather and driver-availability delays

IGL Competitive Advantage

Strategic proximity to ICD Kashipur minimizes road bridging, reducing DG cargo risk and first-mile costs

Comprises ~35% of cargo routed through ICD Kashipur lowers overall rail haulage and logistics costs

Largest exporter from ICD Kashipur, enabling preferential handling and terminal dwell time below two days

Direct carrier relationships **eliminate intermediary costs** while improving service reliability and visibility

Long-standing carrier relationships strengthen freight-buying power and access to services

Three-year vendor agreements help maintain competitive tariffs and consistent service levels

Bio-Glycols | Renewable Alternatives Serving Large Value Chains

Established scale and differentiated renewable positioning provide access to customers seeking lower-carbon materials and sustainable value

Overview

- **Alternatives** to conventional petroleum-derived glycols, enabling customers to reduce the feedstock carbon intensity
- Strong export demand led by **South-East Asia customer** base valuing bio-based chemicals

Product Portfolio

Bio-MEG

- **Principal glycol product** used in PET packaging, polyester fibers and automotive applications
- **Applications:** PET resins, polyester textile fibers, packaging films, antifreeze, automotive coolants

Bio-DEG

- **Versatile solvent and intermediates** across resins, coatings and industrial formulations
- **Applications:** plasticizers, polyester resins, printing inks, adhesives, lubricants and brake fluids

Bio-TEG

- **Moisture-management glycol** serving oil & gas and specialist industrial applications
- **Applications:** Natural-gas dehydration, vinyl-polymer plasticization and air-sanitizing formulations

End Markets

Packaging

Textiles

Automotive

Insulation and Foams

Oil & Gas

Key Highlights

~28,750MT
FY26 Sales Volume

INR 325 Cr
FY26 Sales

63%

Volume exported

1

Scaled division

- **175,000 MTPA** Bio-Glycols capacity
- **~28,750 MT** FY26 sales volume

2

Diverse Applications

- Serving major **industrial value chains**
- Spanning **Bio-MEG, Bio-DEG and Bio-TEG**

3

Renewable differentiation

- **Alternative** to petroleum-derived glycol

Bio-Glycol Ethers | Bio-based Solvents Serving Diversified Industrial Applications

Manufacturing leadership, downstream product breadth and renewable-feedstock differentiation position the platform to serve growing demand for performance-led, lower-carbon industrial formulations.

Overview

- Manufactures bio-based glycol ethers, acetates and automotive brake fluids **used as solvents and performance ingredients**
- Offering customers a route to **reduce fossil-feedstock exposure** without changing established end-use applications

Product Portfolio

Glycol Ethers

- **High-performance solvents** with compatibility across industrial formulations

Glycol Ether Acetates

- **Versatile solvent intermediates** serving coatings, adhesives, inks and specialist formulations

Automotive Brake Fluids

- Designed to meet **OEM and industry specifications**
- **DOT-3 and DOT-4** brake fluids¹

End Markets

Paints & Coatings

Solvents for paints, coatings, adhesives, lacquers and varnish-removal

Automotive

DOT-3 and DOT-4 brake fluids¹

Printing Inks

Including specialty graphics formulations

Textiles

Textile printing, dyeing, leather treatment

Perfumery

Perfumes, lacquers and related formulations

Electronic

Electronic chemical applications

Key Highlights

Largest and Only

Manufacturer of Bio-Glycol Ethers

~18,000MT

FY26 Sales Volume

INR 221 Cr

FY26 Sales

89%

Volume sold domestically

1

Portfolio breadth

- **70,000 MTPA** installed capacity
- Glycol ethers, acetates and brake fluids

2

Application-led growth

- Serving major **industrial value chains**

3

Renewable differentiation

- **Alternative** to petroleum-derived glycol **ethers**
- Only Global Bio-Glycol Ethers manufacturer

Performance Chemicals | Application-led Chemistries For Specialty Needs

Expanding capabilities across bio-amines, green solvents and performance chemicals create a pathway toward a broader, higher-value product mix.

Overview

- Develops bio-based and performance-led specialty chemicals **tailored to end-application requirements**
- **Customer-led development model** combining application expertise and customized formulation capabilities

Product Portfolio

Bio-Amines

- Renewable **ethanol-amine derivatives**
- Used as solvents, surfactants and emulsifiers

Green Solvents

- **Biodegradable alternative** to selected petroleum-based and chlorinated solvents

Enhanced Oil Recovery Additives

- Formulations for O&G sector supporting **recovery, production and gas processing**

Plasticizers

- **Additives** enhancing flexibility, durability and processability of polymers

C-Smart Specialty Products

- Specialty chemicals **based on C-Smart alcohol¹**

End Markets

Oil & Gas

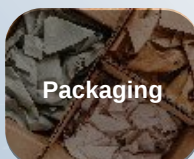

Paints & Coating

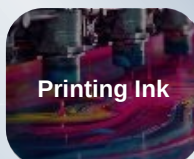

PVC

Personal Care

Packaging

Industrial Gases | High-purity Solutions for Essential End-markets

High-purity products, established certifications and caters to resilient food, healthcare and manufacturing applications.

Overview

- Produces and supplies **industrial, food-grade and medical gases**
- **Quality-led** offering serving customers where **purity, consistency and supply reliability** are critical requirements

Product Portfolio

Liquid Carbon Dioxide

- Food-grade and industrial CO₂
- Carbonation, freezing, packaging, preservation

Liquid Oxygen

- High-purity oxygen for medical and industrial applications
- Supports combustion, fabrication and metal processing

Liquid Argon

- Argon for shielding, insulation and controlled processing

Liquid Nitrogen

- Nitrogen for refrigeration, freezing and preservation

Sterigas (EO-CO₂)

- Sterilizing agent in the medical, pharmaceutical and food industries
- Effective against microorganisms on surfaces

End Markets
