**Surbhi Jain**  
**Company Secretary and Compliance Officer**

## **InfoBeans' GenAI solution Quilo to be deployed for a leading SDO**

InfoBeans, a global leader in design-led AI and enterprise software solutions, is set to deploy its purpose-built Generative AI solution Quilo, for a leading global SDO.

This initiative is part of InfoBeans' broader mission to redefine how standards bodies interact with and serve their members by offering ready-to-deploy AI tools that drive efficiency, engagement, and innovation.

In today's fast-evolving digital landscape, SDOs are looking to modernize their operations and offer enhanced value to their communities. Quilo is designed to do exactly that—enabling streamlined service delivery, intelligent access to proprietary knowledge, and the potential to unlock new revenue opportunities through scalable digital offerings.

As part of the rollout, the client will adopt InfoBeans' GenAI architecture, which is backed by a phased go-to-market strategy for seamless integration. The initial deployment will include an AI-powered natural language interface combined with RAG-based search that provides contextual and accurate insights from the SDO's extensive standards documentation. Members will be able to ask questions in natural language and receive targeted, reliable answers.

This engagement further demonstrates InfoBeans' leadership in AI-led transformation, especially in mission-critical domains like standards development, where accuracy, accessibility, and scalability are paramount.

### **About InfoBeans**

InfoBeans specializes in design-led AI and software solutions, helping enterprise clients solve their most complex business challenges. Listed on the NSE in India, InfoBeans has a strong presence across the US, Europe, and the Middle East. At its core, InfoBeans fosters a work culture that feels like a second home, built on collaboration and excellence. The company is deeply committed to social responsibility through the InfoBeans Foundation, which empowers underprivileged communities by providing free tech education to enhance employability.
