**Subject:** Press Release

Dear Sir/Maám

Please find attached press release titled “**InfoBeans Launches InsaneSDD 2.0**”  
Kindly take the above information on record.

Thanking You  
Yours Faithfully  
**For InfoBeans Technologies Ltd**

**Surbhi Jain**  
Company Secretary and Compliance Officer

## InfoBeans Launches InsaneSDD 2.0 - The AI-Amplified Development Accelerator That Cuts Dev Cycles by Up to 50%

Version 2.0 of the battle-tested SDD accelerator now supercharged with AI - slashing defects, saving Dev Days, and eliminating UAT surprises

Indore, India - 28th April, 2026 - InfoBeans Technologies, a global technology services company and ServiceNow Premier Partner, today announced the launch of InsaneSDD 2.0, the next generation of its Specification-Driven Development accelerator - now powered by AI to turbocharge software delivery at enterprise scale.

Inspired by Tesla's "Insane" mode, InsaneSDD 2.0 does one thing most development frameworks ignore: it eliminates ambiguity before a single line of code is written.

### **The Problem It Solves**

Most development failures don't happen in the code. They happen in the conversation - or the lack of one - between product, engineering, and QA. Misaligned specs lead to UAT surprises, rework cycles, and missed deadlines that compound across every sprint.

InsaneSDD 2.0 shifts that ambiguity upstream. By the time development begins, every API, data model, NFR, and edge case is already defined, approved, and locked in. What follows is faster, cleaner, and more predictable.

### **What's New in Version 2.0**

Version 2.0 introduces an AI-Fueled Playbook - using large language models including ChatGPT and Grok as intelligent co-pilots to break down complex features into precise, development-ready specifications automatically.

### **Key capabilities include:**

- **Quality Gates:** Approved specs are required before code can begin. AI automates spec updates and converts them directly into test cases - closing the loop between definition and delivery
- **Modular Tool Integration:** Works with enterprise-approved AI coding tools including Gemini Code Assist, GitHub Copilot, CodeRabbit, and DevPlan
- **Spec-to-Test Automation:** Specifications don't just guide development - they become the tests

## **Proven Outcomes**

- InsaneSDD 2.0 delivers measurable impact from day one:
- Development cycles cut by up to 50%
- Production defects reduced by up to 50%
- Dev Days saved by up to 70%
- Estimation accuracy improved by 20-25%
- Sprint reliability up by 30-40%

"InsaneSDD 2.0 is what happens when you stop treating AI as a code generator and start treating it as a thinking partner in the engineering process. The specs get smarter. The code gets cleaner. The surprises go away." said Mitesh Bohra, Co-Founder, InfoBeans Technologies.
