PRESS RELEASE

Infosys, Arizona State University Partner to Enhance End-to-End Learning Using Digital Solutions

New program to accelerate learning experiences for ASU engineering graduate students

Phoenix, Arizona – November 9, 2020: Arizona State University and [Infosys](#), a global leader in next-generation digital services and consulting, today announced a strategic partnership to enhance the learning experience for engineering graduate students in both on-campus and fully interactive remote classes.

Starting in spring, 2021, full-time graduate students in the [Ira A. Fulton Schools of Engineering](#) at ASU, enrolled in either in-person or ASU Sync classes will have access to digital learning solutions and services offered through Infosys. Using the [Infosys Wingspan](#) platform from the Live Enterprise for Education Suite, students will be able to earn certifications and badges in several technical skill sets. They can gain valuable applied project experience in the content area “Playgrounds,” to run demos and practice exercises.

Infosys Wingspan will allow ASU to better engage students in online synchronous and asynchronous learning. In addition, the platform will be used by administration and IT staff at ASU, allowing the university to more quickly and efficiently identify and resolve technical issues for enhanced student support. Upon completing their degree program, these graduate students will be competitive job candidates, equipped to tackle the most pressing challenges facing the industry.

“Using the Infosys digital solutions, students anywhere in the world can engage in the immersive learning experience that characterizes our high-quality engineering and technology degree programs,” **said ASU President Michael M. Crow**. “We look forward to expanding access to the global network of learners who will soon drive their own solutions forward as career-ready industry professionals.”

“This academic year, it is more important than ever for remote learning to function seamlessly, allowing students to continue their education from anywhere in the world,” said **Ravi Kumar, President, Infosys**. “This strategic partnership is just the latest example of our deep ties to Arizona State University and our shared commitment to bringing the best training and opportunities to its students.”

Newly admitted full-time master’s students starting in Spring 2021 and enrolled in on-campus immersion or ASU Sync classes through any of four degree programs — computer science, software engineering, information technology or computer engineering — are eligible to receive a scholarship for one year of access to an Infosys Wingspan license at no cost. Learn more about the program at: <https://engineering.asu.edu/infosys>.

About ASU

Arizona State University has developed a new model for the American Research University, creating an institution that is committed to access, excellence and impact. ASU measures itself by those it includes, not by those it excludes. As the prototype for a New American University, ASU pursues research that contributes to the public good, and ASU assumes major responsibility for the economic, social and cultural vitality of the communities that surround it.

Safe Harbor

Certain statements in this release concerning our future growth prospects, financial expectations and plans for navigating the COVID-19 impact on our employees, clients and stakeholders are forward-looking statements intended to qualify for the 'safe harbor' under the Private Securities Litigation Reform Act of 1995, which involve a number of risks and uncertainties that could cause actual results to differ materially from those in such forward-looking statements. The risks and uncertainties relating to these statements include, but are not limited to, risks and uncertainties regarding COVID-19 and the effects of government and other measures seeking to contain its spread, risks related to an economic downturn or recession in India, the United States and other countries around the world, changes in political, business, and economic conditions, fluctuations in earnings, fluctuations in foreign exchange rates, our ability to manage growth, intense competition in IT services including those factors which may affect our cost advantage, wage increases in India, our ability to attract and retain highly skilled professionals, time and cost overruns on fixed-price, fixed-time frame contracts, client concentration, restrictions on immigration, industry segment concentration, our ability to manage our international operations, reduced demand for technology in our key focus areas, disruptions in telecommunication networks or system failures, our ability to successfully complete and integrate potential acquisitions, liability for damages on our service contracts, the success of the companies in which Infosys has made strategic investments, withdrawal or expiration of governmental fiscal incentives, political instability and regional conflicts, legal restrictions on raising capital or acquiring companies outside India, unauthorized use of our intellectual property and general economic conditions affecting our industry and the outcome of pending litigation and government investigation. Additional risks that could affect our future operating results are more fully described in our United States Securities and Exchange Commission filings including our Annual Report on Form 20-F for the fiscal year ended March 31, 2020. These filings are available at www.sec.gov. Infosys may, from time to time, make additional written and oral forward-looking statements, including statements contained in the Company's filings with the Securities and Exchange Commission and our reports to shareholders. The Company does not undertake to update any forward-looking statements that may be made from time to time by or on behalf of the Company unless it is required by law.
