This information will also be hosted on the Company's website, at [www.infosys.com](http://www.infosys.com).

Thanking you,

Yours sincerely,  
For **Infosys Limited**

**A.G.S. Manikantha**  
*Company Secretary*

PRESS RELEASE

## **Infosys Builds applied AI Cloud, Part of Infosys Cobalt, to Democratize AI Within its Workforce and Expand Ability to Drive AI-driven Transformation for Enterprises**

*Powered by NVIDIA DGX A100 systems, the applied AI cloud will provide Infosys employees simple and fast access to AI infrastructure*

**Bengaluru, India – January 19, 2021:** [Infosys](#) (NYSE: INFY), a global leader in next-generation digital services and consulting, today announced the launch of an [Infosys Cobalt](#) offering - its applied AI cloud, built on [NVIDIA DGX™ A100 systems](#), the universal system for all AI workloads, offering unprecedented compute density, performance, and flexibility. The powerful new Infosys applied AI cloud will be an AI center of excellence for the company, enabling developers and project teams at Infosys to quickly and easily access AI hardware and software stacks, across both private and public clouds, to build contextualized services that deliver AI-first business processes for enterprises. NVIDIA DGX A100 systems will provide the infrastructure and the advanced compute power needed for over 100 project teams to run machine learning and deep learning operations, simultaneously. [NVIDIA Multi-Instance GPU \(MIG\) technology](#) will enable Infosys to improve infrastructure efficiency and maximize utilization of each DGX A100 system. Teams can process AI algorithms centrally or locally on any device, without lag, using Infosys edge AI.

As a service delivery partner in the [NVIDIA Partner Network](#), Infosys will also be able to build NVIDIA DGX A100-powered, on-prem AI clouds for enterprises, providing access to cognitive services, licensed and open source AI software-as-a-service (SaaS), pre-built AI platforms, solutions, models and edge capabilities. Infosys will enable businesses to harness their own data estates, open source data and curated data exchanges on the cloud to build and train their AI models. Enterprises can leverage this advantage, along with services delivered by any hyperscale cloud provider to scale and future-proof their AI-powered transformation.

“For a long time now, AI has been playing a key role in shaping consumer experience. Cloud, data analytics and AI are now converging to bring the opportunity for enterprises to not just drive consumer experience but reimagine processes and capabilities too,” said **Balakrishna D.R., Senior VP, Head - AI & Automation Services, Infosys**. “Infosys applied AI cloud, powered by NVIDIA DGX A100 systems, can help enterprises to quickly build on the opportunity, while scaling with new technological advancements.”

“Many organizations are eager to infuse their business with AI but lack the strategic platform on which they can pool expertise and scale the computing resources needed to build mission-critical AI applications,” said

**Charlie Boyle, Vice President and General Manager of DGX Systems at NVIDIA.** “Working with Infosys, we’re helping organizations everywhere build their own AI centers of excellence, powered by NVIDIA DGX A100 and NVIDIA DGX POD infrastructure to speed the ROI of AI investments.”

## About Infosys

Infosys is a global leader in next-generation digital services and consulting. We enable clients in 46 countries to navigate their digital transformation. With nearly four decades of experience in managing the systems and workings of global enterprises, we expertly steer our clients through their digital journey. ## Safe Harbor

Certain statements in this release concerning our future growth prospects, financial expectations and plans for navigating the COVID-19 impact on our employees, clients and stakeholders are forward-looking statements intended to qualify for the 'safe harbor' under the Private Securities Litigation Reform Act of 1995, which involve a number of risks and uncertainties that could cause actual results to differ materially from those in such forward-looking statements. The risks and uncertainties relating to these statements include, but are not limited to, risks and uncertainties regarding COVID-19 and the effects of government and other measures seeking to contain its spread, risks related to an economic downturn or recession in India, the United States and other countries around the world, changes in political, business, and economic conditions, fluctuations in earnings, fluctuations in foreign exchange rates, our ability to manage growth, intense competition in IT services including those factors which may affect our cost advantage, wage increases in India, our ability to attract and retain highly skilled professionals, time and cost overruns on fixed-price, fixed-time frame contracts, client concentration, restrictions on immigration, industry segment concentration, our ability to manage our international operations, reduced demand for technology in our key focus areas, disruptions in telecommunication networks or system failures, our ability to successfully complete and integrate potential acquisitions, liability for damages on our service contracts, the success of the companies in which Infosys has made strategic investments, withdrawal or expiration of governmental fiscal incentives, political instability and regional conflicts, legal restrictions on raising capital or acquiring companies outside India, unauthorized use of our intellectual property and general economic conditions affecting our industry and the outcome of pending litigation and government investigation. Additional risks that could affect our future operating results are more fully described in our United States Securities and Exchange Commission filings including our Annual Report on Form 20-F for the fiscal year ended March 31, 2020. These filings are available at [www.sec.gov](http://www.sec.gov). Infosys may, from time to time, make additional written and oral forward-looking statements, including statements contained in the Company's filings with the Securities and Exchange Commission and our reports to shareholders. The Company does not undertake to update any forward-looking statements that may be made from time to time by or on behalf of the Company unless it is required by law.
