PRESS RELEASE

Infosys Partners with Google Cloud to Develop Data Native Intelligent Enterprise

Offers suite of cloud solutions for enterprises to transform their businesses

San Francisco and Bengaluru - September 21, 2018: Infosys (NYSE: INFY), a global leader in consulting, technology and next-generation services, today announced a new partnership with Google Cloud to develop cloud transformation and migration services. Through this partnership that enhances Infosys' existing capabilities, the company will offer solutions and services on Google Cloud Platform (GCP), creating a scalable, on-demand cloud model that will enable enterprises to easily transition and adopt a cloud-first strategy.

As part of this partnership, Infosys has built artificial intelligence and machine learning-driven industry-specific solutions on GCP that are foundational to digitizing the data supply chain, such as Analytics Workbench, which augments data platforms to deliver end-to-end self-service capabilities, Information Grid, which provides a data pipeline for seamless movement of data to Google Cloud (GCP), and Customer Genome, a holistic offering that helps enterprises build a self-service driven and entity-centric foundation for explorative, predictive and prescriptive analytics. These solutions will enable enterprises to modernize their IT and use the power of insights to monetize and digitize their businesses as they navigate the next stages in their transformation journey.

In addition, Infosys today announced the launch of a new offering called the 'Data Native Intelligent Enterprise' powered by the 'Infosys Digital Brain' on GCP. Data Native Intelligent Enterprise is a solution that learns from the data collected from various sources, connects it across silos using Artificial Intelligence and encodes this intelligence. This allows enterprises to react to external signals in real time and create intelligent, engaging experiences for their customers. This offering will help organizations accelerate their digital journeys and lead them towards sustainable growth.

Ravi Kumar, President and Deputy Chief Operating Officer, Infosys, said, "The technology landscape is moving at a rapid pace, making it difficult for our large customers to maintain their legacy technology infrastructure and cater to the needs of the digital consumer. Infosys solutions on GCP will provide clients the best-in-class digital technologies, as well as a path to migrate and modernize their legacy infrastructure by leveraging artificial intelligence, machine learning, compute and analytics to build modern digital apps. We see Google Cloud as a key partner in the cloud-first landscape, putting our partnership in a great position to provide exceptional value to our global customer base."

Kevin Ichhpurani, Corporate Vice President, Strategic Alliances at Google Cloud, said, "Google Cloud customers are looking for simple solutions to shift their systems to the cloud in order to apply our machine

learning and Artificial Intelligence technologies to their businesses. We are excited about our partnership with Infosys which will help them achieve those goals. The new 'Digital Brain' from Infosys is a great example of how customers can benefit from Google Cloud's technology in combination with Infosys' unique consulting services."

About Infosys

Safe Harbor
Certain statements in this press release concerning our future growth prospects are forward-looking statements regarding our future business expectations intended to qualify for the 'safe harbor' under the Private Securities Litigation Reform Act of 1995, which involve a number of risks and uncertainties that could cause actual results to differ materially from those in such forward-looking statements. The risks and uncertainties relating to these statements include, but are not limited to, risks and uncertainties regarding fluctuations in earnings, fluctuations in foreign exchange rates, our ability to manage growth, intense competition in IT services including those factors which may affect our cost advantage, wage increases in India, our ability to attract and retain highly skilled professionals, client concentration, restrictions on immigration, industry segment concentration, our ability to manage our international operations, reduced demand for technology in our key focus areas, disruptions in telecommunication networks or system failures, our ability to successfully complete and integrate potential acquisitions, liability for damages on our service contracts, the success of the companies in which Infosys has made strategic investments, withdrawal or expiration of governmental fiscal incentives, political instability and regional conflicts, legal restrictions on raising capital or acquiring companies outside India, and unauthorized use of our intellectual property and general economic conditions affecting our industry. Additional risks that could affect our future operating results are more fully described in our United States Securities and Exchange Commission filings including our Annual Report on Form 20-F for the fiscal year ended March 31, 2018. These filings are available at www.sec.gov. Infosys may, from time to time, make additional written and oral forward-looking statements, including statements contained in the company's filings with the Securities and Exchange Commission and our reports to shareholders. In addition, please note that any forward-looking statements contained herein are based on assumptions that we believe to be reasonable as of the date of this press release. The company does not undertake to update any forward-looking statements that may be made from time to time by or on behalf of the company unless it is required by law.
