National Stock Exchange of India Ltd **Scrip Symbol - INTELLECT**

BSE Ltd. **Scrip Code - 538835**

Dear Sir/Madam,

Sub: IntellectAI Launches Xponent Portfolio Navigator, Letting Insurers Steer Their Entire Book Instead of Just Reporting on It

IntellectAI, *the Insurtech business unit of* Intellect Design Arena Ltd., today launched Xponent Portfolio Navigator (XPN), an AI portfolio steering application for commercial and specialty (Re)Insurers. It shows carriers, MGAs, and reinsurers all key metrics that drive P&L and risk, where their book is drifting and lets them reprice, refer, or non-renew that business from the same screen.

Portfolio performance is decided across the whole book, yet most insurers still act on it one file at a time. Finding a problem typically means running a business intelligence (BI) report, pulling detail from source systems, then acting in a separate tool. By the time they act, the problem has often already shown up as losses.

XPN closes that gap by combining portfolio analytics, in-context AI, and underwriting workflow in one application. Every number traces back to the underlying policies, quotes, and claims. Every decision can be routed to agentic workflows, referral underwriters, managers, or the portfolio committee.

Please find enclosed herewith a copy of the Media Release dated November 11, 2026, titled "**IntellectAI Launches Xponent Portfolio Navigator, Letting Insurers Steer Their Entire Book Instead of Just Reporting on It**".

Kindly take the above information on record.

Yours Truly,
For **Intellect Design Arena Limited**

IntellectAI Launches Xponent Portfolio Navigator, Letting Insurers Steer Their Entire Book Instead of Just Reporting on It

New AI application lets carriers, MGAs and reinsurers spot portfolio drift, test each quote's impact before binding, and act on one policy or 30,000 in a single step

Piscataway, NJ, November 11, 2026: IntellectAI, *the Insurtech business unit of* Intellect Design Arena Ltd., today launched Xponent Portfolio Navigator (XPN), an AI portfolio steering application for commercial and specialty (Re)Insurers. It shows carriers, MGAs, and reinsurers all key metrics that drive P&L and risk, where their book is drifting and lets them reprice, refer, or non-renew that business from the same screen.

Portfolio performance is decided across the whole book, yet most insurers still act on it one file at a time. Finding a problem typically means running a business intelligence (BI) report, pulling detail from source systems, then acting in a separate tool. By the time they act, the problem has often already shown up as losses.

XPN closes that gap by combining portfolio analytics, in-context AI, and underwriting workflow in one application. Every number traces back to the underlying policies, quotes, and claims. Every decision can be routed to agentic workflows, referral underwriters, managers, or the portfolio committee.

Xponent Portfolio Navigator is built on Purple Fabric, Intellect's governed AI platform. Insurers decide, action by action, whether AI agents handle the work or a person reviews it, set the limits for automation, and keep a full audit trail of every decision. It joins a growing IntellectAI platform that includes MSOCK, the company's system of connected knowledge, which lets carriers buy turnkey products like Xponent or build their own on the same foundation.

"*Commercial and specialty insurers are being asked to grow profitably in a market that keeps shifting under them*," **said Banesh Prabhu, CEO, IntellectAI.** "*Xponent Portfolio Navigator gives their underwriting leaders a live view of the whole book and the ability to act on it right away. That's how portfolio steering becomes a daily discipline instead of a quarterly report*."

"*Insurers don't lack portfolio data. They lack a fast way to act on it*," said **Sandeep Haridas, EVP and Insurance Business Head, IntellectAI.** "*XPN lets an underwriting leader find drift, size the fix, and set it in motion in one sitting, whether that's one policy or an entire segment*."

Xponent Portfolio Navigator is available now in two ways. Insurers can add it to Intellect Xponent, IntellectAI's underwriting workbench, where portfolio steering sits alongside risk-level underwriting in a single view. Or they can buy it on its own and connect it through APIs to the policy administration, claims, and data warehouse systems they already run.

About Intellect Design Arena Limited

Intellect Design Arena Ltd is a global leader in AI-First, enterprise-grade financial technology, architected from first principles to deliver measurable business impact at scale. With three decades of domain expertise, Intellect delivers composable, intelligent platforms across Wholesale Banking, Consumer Banking, Central Banking, Wealth, Capital Markets, Treasury, Insurance and Digital Technology for Commerce. Applying First Principles Thinking and Design Thinking, Intellect has elementalized financial services into a finite set of Events, Microservices and APIs, enabling faster, modular transformation with predictable and measurable outcomes.

At the heart of this AI-First architecture are eMACH.ai, the world's most comprehensive, composable and intelligent open finance platform; Purple Fabric, the world's first Open Business Impact AI platform; and iTurmeric, a composable integration and configuration platform. A pioneer in applying Design Thinking at enterprise scale, Intellect's 8012 FinTech Design Center™, the world's first Design Center dedicated to Design Thinking principles, underscores its commitment to continuous, outcome-driven innovation. Intellect serves over 500+ customers across 62 countries, supported by a global workforce of domain, solution and technology experts.
