Youth dies after bike falls into pit on NH service road

2.5 kilometre stretch near Nolambur closed last month for canal work

EXPRESS NEWS SERVICE
@ Chennai

EXPRESS ILLUSTRATION

A 24-year-old youth died after the two-wheeler he was riding fell into a 15-foot-deep pit dug for cut-and-cover drain construction along the Chennai Bypass service road near Nolambur on Wednesday night. The police said the biker, who was not wearing a helmet, entered the road closed for construction work and sustained fatal head injuries during the fall.

The deceased has been identified as R Hari Prasanth, a resident of ICF Colony in Athipattu, working in a private tiles factory. According to the Anna Nagar Traffic Investigation Wing police, the youth was riding towards Nolambur around 10.30 pm, and he entered the stretch closed for traffic and fell through the barricades into the pit along with his motorcycle. Sources said he suffered severe internal injuries on his forehead and head.

The residents came to know about the accident only after an hour. The death was confirmed by the 108 ambulance personnel who reached the spot later. The body was sent to Government Kilpauk Medical College Hospital for postmortem.

The police suspect Prasanth may have been under the influence of alcohol but said this could be confirmed only after the postmortem report.

Following a complaint from his father, Radhakrishnan (58), the police registered a case under Sections 281 (rash driving) and 106 (causing death by negligence) of the Bharatiya Nyaya Sanhita (BNS) and are investigating.

An official of the Water Resources Department (WRD) said about two-and-a-half kilometres of the Maduravoyal Bypass Service Road, where the cut-and-cover canal work is under way had been barricaded and closed for traffic for the past month. The accident spot lies in the middle of the stretch which also has the 'road closed' and 'danger' signboards put up, he said.

The official alleged a group of youngsters, including Prasanth, had trespassed past the barricades by shifting them and were believed to have used the precast blocks to consume alcohol. He said he could have fallen into the pit while returning home.

The 5,000-metre-long canal, taken up by the WRD on December 8, 2025, is meant to divert surplus water from Ambattur lake to the Coum river and prevent flooding. The official said the work would be completed this month.

Metro redesigns Alandur-Mount stretch to bypass land acquisition

C SHIVAKUMAR @ Chennai

CHENNAI Metro Rail Ltd (CMRL) has redesigned a critical stretch between Alandur and St Thomas Mount to avoid acquiring defence land and demolishing several buildings, opting instead for an unconventional engineering solution that involves constructing the Phase 2 of Corridor 5 (Red Line) beneath the existing Chennai Central-St Thomas Mount corridor and removing one supporting pillar each at two locations.

The revised alignment is expected to save about six months of construction time, while also allowing St Thomas Mount to emerge as a major interchange connecting two Metro corridors with MRTS and suburban railway services, according to T Archunan, director of projects at Chennai Metro Rail Limited (CMRL).

He told *TNIE* the additional engineering work involves a supplementary tender worth around ₹300 crore. CMRL is planning a 45-day suspension of train services to undertake the critical structural work, tentatively in February-March 2027, subject to approval from the Commissioner of Railway Safety (CRS).

The original design envisaged taking the alignment through a built-up stretch, which would have necessitated the demolition of several buildings and acquisition of land, including defence land, which would be time consuming.

Taking the elevated lines to a higher level was also examined but found unsuitable because of height restrictions arising from the airport's flight path. The alternative of routing both lines along one side would have involved further structural and land constraints, apart from affecting commercial establishments along the stretch.

Under the revised engineering plan, Chennai Metro has instead chosen to rebuild within its own footprint. The work is needed to build the viaduct for Corridor 5, a Phase 2 line that will run beneath Corridor 2 as it curves near Alandur and St Thomas Mount. One Corridor 5 track would strike an existing pier at the point where the lines merge, and another at the point where they separate.

At each of the two pillars, P42 and P27, a "portal beam" will replace the pier and carry Corridor 2 overhead, with Corridor 5 passing below. Because Corridor 2 keeps running until the final stage, the sequence matters. New foundations are laid first, angled in an A-frame shape and piled within the available land so they do not extend into defence property. Steel trusses and beams are then erected as temporary support.

Forty-five days are needed to dismantle the overhead traction equipment, remove the track, modify the supporting structures and lift two spans across the two locations, he said. Jacks transfer the viaduct's load to the supports, the old pedestals, pier cap and pillar are demolished, and new pedestals and bearings are set before the load is lowered onto the portal.

Initially, Alandur was envisaged as the principal interchange, while the original design provided for Corridor 5 to extend towards St Thomas Mount. The constraints involving Defence land prompted CMRL to work out a revised connection with Corridor 5 at Alandur.

CMRL has indicated September 2027 as the target for completing the entire elevated stretch towards Sholinganallur.

TNIE EXCLUSIVE

Direct access from four towers in Thirumangalam

Chennai: CMRL has awarded a ₹446.88 crore contract to Capacite Infraprojects to build four commercial and property towers around Thirumangalam station. The works are expected to be completed in 24 months. The towers will rise on 3.85 acres of open land on either side of the elevated Corridor-5 viaduct. CMRL said the layout would give commuters direct access to the metro from within the same tower complex. ENS

EPS blames govt for failing to ensure safety

EXPRESS NEWS SERVICE
@ Chennai

AIADMK general secretary Edappadi K Palaniswami on Thursday blamed the TVK government for the death of the youth, and blamed the Municipal Administration department for failing to ensure safety at the work site. He said the government must ensure that warning boards, reflective stickers and proper barricades are put up whenever stormwater drains or road works are carried out to prevent accidents.

Alleging that infrastructure works are being taken up in a hurry without proper planning or following safety procedures, he said the negligence of the department has cost the life of a young man with many dreams for the future.

Infrastructure works are being taken up in a hurry without proper planning or following safety procedures

Edappadi K Palaniswami, AIADMK gen secretary

Pointing out that the Municipal Administration department is under the direct control of Chief Minister C Joseph Vijay, Palaniswami said the incident in Chennai exposed the government's poor administration and lack of concern for public safety.

He urged the state government to provide adequate compensation to the bereaved family immediately. He also demanded that all incomplete stormwater drain works across Tamil Nadu be repaired and proper safety barricades be put in place.

Chennai dist to get 12 mini taluk offices for ₹2.14 crore

CHENNAI: The state government has ordered the setting up of 12 mini taluk offices across eight taluks in Chennai district at a cost of ₹2.14 crore to make revenue department services more accessible to the residents. The offices will be headed by deputy tahsildars and provide revenue-related services, including online certificates and land-related services. The announcement was made during the 2026-27 demand for grants for the Revenue and Disaster Management department. CM C Joseph Vijay has now issued orders for its implementation. The offices will be set up at Kodungaiyur and Erukkancheri in Perambur taluk; Porur in Maduravoyal taluk; Mogappair and Korattur in Ambattur taluk; Saligramam in Mambalam taluk; Neelankarai, Pallikaranai and Sholinganallur in Sholinganallur taluk; Besant Nagar in Velachery-Thiruvanmiyur taluk; Triplicane in Mylapore taluk; and Manapakkam in Alandur taluk. ENS

KAVIN MURDER: GOVT URGED TO FILE REVIEW PLEA IN SC

EXPRESS NEWS SERVICE @ Chennai

MORE than 200 members of Chennai district units of the Tamil Nadu Oppressed People's Right to Life Movement staged a protest in Chennai on Thursday, demanding justice for Kavin Selvaganesh, who was murdered in an alleged honour killing case in Tirunelveli in July last year. The protesters urged the state government to file a review petition in the Supreme Court against its dismissal of the government's appeal challenging the quashing of the chargesheet against the parents of the main accused. Kavin, a native of Arumugamangalam in Thoothukudi district, was hacked to death on July 27, 2025, allegedly by the brother of a girl he was in a relationship with. The Madurai Bench of the Madras High Court had quashed the chargesheet against the woman's parents in September. ENS

Audit, advisory firms roll out 10-15% pay hikes, bonuses

Firms are trying to retain employees to prepare for next round of mandatory audit rotations.

Devina Sengupta
devina.sengupta@livemint.com
MUMBAI

The firms are also getting employees to rework their skill sets. ISTOCKPHOTO

Retention is the keyword for audit and advisory firms this year.

They rolled out neat 10-15% increments this year, apart from bonuses, special monetary rewards and promotions. While the raises are in line with what the firms offered last year, top performers in some cases received hikes of 25-28%.

The increments come as firms try to retain employees and expand their teams to prepare for the next round of mandatory audit rotations. The firms are also getting the workforce to rework their skill sets as artificial intelligence (AI) becomes an integral tool, noting that going ahead, billing and compensation will be linked to how employees use AI tools.

"If firms are rolling out a 25%-plus increase in salaries, then they are doing it for retention," said Roopank Chaudhary, partner and rewards consulting leader, talent solutions, India, for Aon. "This also comes at a time when the sector including top firms and other audit firms have seen attrition which can in some teams touch 20%."

"Overall payouts have remained broadly in line with the previous year. Increments have been in the range of 10-15%, while bonuses have largely been in the 15-20% range," said Arti Dua, a partner and national talent leader at EY India. "Promotions have also remained at levels comparable with the past few years, covering nearly 20% of our workforce."

EY is one of the Big Four in India, a clutch of top audit and advisory firms. EY's rivals are Deloitte, PwC and KPMG. Some in this group, such as EY, have 50,000-60,000 employees, so a back-of-the-envelope calculation would put the number of promotions at 10,000-12,000.

More than 600 companies will be required to change their auditors in the next round of mandatory rotation starting in 2027. The rotation of auditors, which took effect in 2017, was introduced as a regulatory safeguard aimed at preventing long-term familiarity between an auditor and the company management.

Audit firms, both big and small, are retaining their key talent and ensuring there is no dip in increment numbers. Even niche firms have had to offer generous hikes to hold on to their talent as they vie for a larger slice of the client pie during the upcoming audit rotation.

"We rolled out a 15-20% hike this year versus 10-15% last year. The need to retain top talent when there is high attrition in the industry is one of the main reasons for this hike," said S. Ravi, founder of Ravi Rajan & Co LLP, a boutique chartered accountancy firm based in New Delhi with a team of over 200 professionals. The trump card for such firms is a smaller but more consistent team, not typically vulnerable to partner poaching and not cross-selling other services alongside audit.

Even for employees who are not in audit teams but work in technology, cyber security, risk and compliance, the demand for specialists is high as clients work through changes around AI, risk management and digital threats.

Deloitte India's spokesperson said the firm promoted 15% of its workforce in June this year, "marginally up" from last year in both absolute and percentage terms. Given the firm's 50,000 workforce, the number of promotions would be roughly 7,500.

"Performance bonuses were paid out as per schedule in September and approximately 1,000 were given a 'President's Bonus' – an extra bonus awarded by business heads to nominated professionals," the company said.

Mint learnt that Deloitte rolled out an 8-12% hike this year and top performers received 25-28%, but the firm did not comment on these numbers.

Hikes and bonuses are typically paid out in the May-September period for advisory firms, which handle audit and consulting as well.

Mint learnt that PwC gave out 9-14% hikes this year, almost the same range last year. The bonuses were equivalent to 10-14% of an employee's cost to the company, but the top performers got more than double that amount.

Both PwC and KPMG did not respond to *Mint*'s queries.

On the heels of the Big Four are two others: BDO India and Grant Thornton Bharat. BDO India said it gave hikes of 11-14% over the past three years, with average bonus payouts of about 10% of fixed pay.

For an extended version of this story, go to livemint.com.

RISING COMPENSATION

HIKES and bonuses are typically paid out in the May-September period for advisory firms

OVER 600 firms will need to change their auditors in the next mandatory rotation round starting in 2027

AUDIT firms are retaining their key talent and ensuring there is no dip in increment numbers

EVEN niche firms have made generous hikes to hold on to talent as they vie for a larger client share

Exide, Amara Raja rush to monetize $1 bn battery bets

Ayaan Kartik
ayaan.kartik@livemint.com
NEW DELHI

Both firms are awaiting large orders from automakers, despite securing preliminary tie-ups with Hyundai-Kia and Ather. MINT

India's top battery makers, Exide Industries Ltd and Amara Raja Energy & Mobility Ltd, are rushing to operationalize their lithium-ion cell lines amid investor pressure over returns on more than $1 billion in investments. Exide has invested $632 million so far, while Amara Raja has deployed $248 million and approved an additional $247 million this month. The push comes as both firms await large orders from car and two-wheeler makers, despite having secured preliminary tie-ups with Hyundai-Kia and Ather.

The two companies are taking distinct paths to generate early revenue from their plants. Exide is starting with cells for electric rickshaws and telecom towers, while Amara Raja is focusing on battery energy storage system (BESS) projects.

The delay in electric vehicle (EV) programmes has increased pressure on both companies, as Exide had planned to start the first 6GWh of its cell plant by FY25 but only did so in September 2026. Amara Raja, which had earlier expected commercial cell production by FY26, is now targeting Q2FY28 for its first 2GWh line.

Exide is starting with cells for e-rickshaws and telecom towers, while Amara Raja is focusing on BESS projects

Amara Raja shares are down 18% so far this year while Exide shares are up 6%. The Nifty Auto index has gained 0.15% over this period.

For Exide, initial revenue is coming from lithium iron phosphate (LFP) cells, which require shorter approval cycles than the nickel manganese cobalt (NMC) cells common in electric two-wheelers. The company is deploying its 102Ah LFP cells in its own e-rickshaw battery packs and has dispatched samples to telecom operators.

Lithium ion cells that power electric vehicles are mostly imported from China. LFP cells are cheaper and longer-lasting, while NMC cells perform better but do not last as long as LFP cells.

Exide managing director and chief executive Avik Roy said the company started earning revenue from LFP cells in October, while its NMC cells are still being tested by customers.

"Performance testing has been very satisfactory. We got positive feedback," Roy said during the company's earnings call on 5 November. "Lifecycle testing takes time, and once lifecycle testing is over, they will do the pack and the vehicle-level testing. That is the next phase."

Amara Raja, meanwhile, plans to start commercial operations in BESS before its EV cell business begins. The company has finished checking its machines at its 5GWh pack assembly plant and expects test runs in December, followed by commercial operations in January or February.

"We don't foresee a challenge with respect to utilization of the plant," chief financial officer Y. Delli Babu said, pointing to demand from grid-scale storage and commercial and industrial customers. The company expects to use 50-60% of the facility's capacity in FY28 and reach full utilization by FY29.

Its cell program remains at the customer approval stage. Amara Raja has made nearly 2,000 NMC cells at its customer qualification plant, which are being tested internally. Delli Babu said the company expects to send samples to potential original equipment manufacturers (OEMs) in the next few months. LFP cells are still being developed.

Both companies are building bigger manufacturing plants while trying to earn money soon from other uses. Exide has started a 6GWh lithium-ion cell plant in Bengaluru, while Amara Raja is developing its Giga Corridor in Divitipally, Telangana. Its bigger plan includes 16GWh of cell capacity and 5GWh of pack assembly.

{ ANIMA ANANDKUMAR } CO-FOUNDER OF ACCELERATED UNDERSTANDING AND BREN PROFESSOR AT CALTECH

Junk LLM obsession and use AI to better understand the world

We shouldn't just be focusing on one thing, but making investments across the board — invest in technical research, in humanities, and really grow that knowledge and make that first digitised, use AI, and then build AI

UNESCO recognised Arthashastra as one of the treasures from India. And I have a really interesting connection that my great-great-grandfather discovered Kautilya's Arthashastra more than a century ago

HT Correspondent
letters@hindustantimes.com

A century ago, a quiet scholarly breakthrough unfolded in erstwhile Mysore, when R Shamasastry, a pioneering epigraphist, unearthed and translated Kautilya's Arthashastra, an ancient Indian Sanskrit treatise on statecraft, economic policy, and military strategy, with manuscripts preserved on fragile strips of dried palm-leaf. Shamasastry is the great-great-grandfather of Caltech computer scientist and professor Anima Anandkumar, who drew a link between her expertise – Artificial Intelligence – and the storied history of her family.

"UNESCO recognised Arthashastra as one of the treasures from India. And I have a really interesting connection that my great-great-grandfather discovered Kautilya's Arthashastra more than a century ago. Using AI even to understand our rich history, our culture, and our local traditions, is important," she said on the opening day of the 24th Hindustan Times Leadership Summit. .

"We shouldn't just be focusing on one thing, but on having investments across the board, such as investing in technical research," she said, suggesting India's rich heritage and history as well as local traditions could do with being digitised using AI.

Anandkumar, the Bren Professor of Computing and Mathematical Sciences at the California Institute of Technology and a member of the United Nations Secretary-General's Scientific Advisory Board, held two key pieces of advice. First, AI development, particularly when there is a sovereign angle involved for countries such as India, should be done in a holistic way. And secondly, language models are great, but they're not the only thing to invest in or focus on.

Anandkumar offered a sharp corrective to the industry's obsession with frontier chatbots and autonomous agents. The core flaw in modern AI hype, she argued, was the assumption that language models can reason their way through the physical world simply by generating more text.

"So much of what those generative AI models do is try to mimic the world we see, we perceive," Anandkumar noted, adding, "On the other hand, scientific modelling is about going from microscopic to macroscopic, from atomic scales all the way to planetary scales, and maybe even cosmological scales much beyond our planet."

Anandkumar's mission is to build AI that can simulate and understand the physical world, and speed up discovery. She invented neural operators for learning multi-scale phenomena that frequently occur in nature, and later used those to train the first AI-based high-resolution weather model. A neural operator is a fundamentally different type of AI, which instead of needing supercomputers to break down the atmosphere into billions of tiny mesh blocks for calculations, relies on mathematical calculations to convert physical environments into frequencies. For instance, next-generation weather forecasting, which uses this technique, is projected to be a million times faster than traditional models.

"There are a lot of physical processes that are very difficult for us to grapple with. One example is the weather. Where a hurricane goes next, for example, is really hard to predict. We can't just eyeball it and say this is how it's going to move because it has a lot of really fine-scale interactions that are difficult for us humans to understand," she said, adding that nuclear fusion was another example, where the plasma inside the reactor can behave in unexpected ways.

Her AI algorithms have enabled many other scientific advances such as modelling plasma evolution in nuclear fusion, enabling safer autonomous drone flights, and designing novel medical devices, drugs, and functional enzymes. Speed is only part of the story, Anandkumar insisted. "Speed also helps us create better risk assessment of extreme events like hurricanes, because instead of just making one prediction based on satellite data and other information, you could have hundreds or thousands of predictions based on statistical estimates of path, and other factors," she explained.

The Fourier Neural Operator (FNO) framework that Anandkumar and her team developed forms the foundation of the Nvidia Earth-2 open source suite of AI models designed to forecast weather, climate and atmospheric physics. Anandkumar previously worked at Nvidia.

Anandkumar believed India's engineering talent pool alongside investments in AI infrastructure and budding models gave the country a strong foundation. She warned that the country's focus shouldn't be limited but instead help advance the work of startups in space technology as well as batteries, for instance. "AI can help with all those processes. But it is important to think in a broader way. Language models are great, but they're not the only thing to invest in or focus on," she said.

Anandkumar believed that with frontier language models, it was important to focus on the local language aspect as well for accessibility, something she said India uniquely could achieve.

Anandkumar is deeply skeptical of Silicon Valley's latest buzzword — the autonomous AI scientist. Without rigorous grounding, she warned, such claims are little more than hallucinated "needles in a haystack" that shifts an impossible verification burden onto human researchers. In the next few years, Anandkumar expects a scientific breakthrough on the back of AI connecting multiple disciplines together, because the real world doesn't fall into a specific physics solver or a specific knowledge. "The magic that we will see is all kinds of unexpected connections being made and which accelerate everything. Chip manufacturing, for instance, where bottlenecks are removed and it is all much cheaper to do".

{ ZUBIN KARKARIA } FOUNDER AND CEO, VFS GLOBAL

Zubin Karkaria during the 24th Hindustan Times Leadership Summit. HT PHOTO

Indian students going to foreign nations are more discerning now

HT Correspondent
letters@hindustantimes.com

India has become a "powerhouse" of global mobility and foreign visits have turned from aspiration to necessity for Indians, VFS Global founder Zubin Karkaria said on Thursday.

Speaking on the opening day of the 24th Hindustan Times Leadership Summit, Karkaria said 30 years ago, a foreign holiday was possibly an Indian's highest social desire after buying a house, but that had changed. "Now, it's not a luxury anymore. It's not a desire anymore; it's a necessity," he said. "The passport penetration in India is around 8%. So, there's a huge amount of new travellers that are coming in."

The demand, according to him, spans segments. India sends more skilled workers abroad than any other country, is a growing source of travellers visiting friends and relatives, and also the second-largest source market for international students, said Karkaria. His Dubai-headquartered firm works with 71 countries across the world and processes about 30 million visa applications a year.

Asked which assumption about global mobility had turned out completely wrong, the VFS Global CEO said that the Covid pandemic and conflicts in Europe and West Asia were expected to choke international travel indefinitely. But each time, travel rebounded much faster than expected, he said.

"Whatever geopolitics or whatever environmental conditions are there in the world, travel will always come back, and it will come back with a vengeance," he said. Crises cause only brief anxiety or logistical hurdles, during which domestic travel picks up, he added. Post-Covid "revenge travel" showed the urge never waned, he added.

Karkaria also said that Indian students travelling abroad are changing direction. Their travel to Europe is growing by almost 70% a year, he said, with Germany, Austria, Spain and France drawing students who once defaulted to the US, UK, Canada or Australia. The choice has shifted from parents to students, who now weigh a host of factors before making a decision.

"Now, the students have become very discerning. They want to see, okay, what is the course all about? What is the environment?... India is today the second-largest source market for students, but it's growing and could become number one," he said.

Europe is competing for Indian students. India has signed migration and mobility agreements with several EU countries. "A lot of countries are going the extra way to support Indian students and to get the right Indian students to their countries," Karkaria said. "Maybe they will get into the fabric of those countries in the future."

He also said that while artificial intelligence will ease travel, it will not decide who gets a visa. "It will be a support but not the decision maker," Karkaria said, adding that no country's laws currently allow AI to make that call. Governments have a sovereign right over entry and "security is paramount", he said, though "for the genuine traveller, I still see no worries".

Addressing concerns over data safety and privacy, Karkaria said his company stores no applicant data. Biometrics are captured in booths monitored live by embassies and pushed in real time over an encrypted pipeline, and names and addresses are purged once passports are returned. Passports come back in sealed envelopes, so VFS does not know whether a visa was granted, he said.

He said that VFS Global reports touts to local authorities, including those who falsely use its name, as they prey on students and workers. "The touts build on the fear of the person who is travelling," he said. "VFS Global uses its customer touchpoints, such as its website, social media channels, and notices at its premises, to advise applicants to apply well in advance and beware of fraudulent entities who promise early appointments and guaranteed visas for an additional fee. Remember, only embassies and consulates can decide on your visa."

Access to the global visa system has widened too, according to him. In the late 1990s, applicants outside Delhi, Kolkata, Chennai and Mumbai took trains and queued from the previous night; India now has more than 23 application locations and doorstep services. The process itself is getting lighter. A UK visa that once meant submitting documents and waiting for a sticker in the passport is now largely a fingerprint appointment.

India is today the second-largest source market for students, but it's growing and could become number one... A lot of countries are going the extra way to support Indian students and to get the right Indian students to their countries

BEML LIMITED

अनुमान : दूसरी तिमाही में देश की आर्थिक विकास दर 7.8 फीसदी रहेगी

नई दिल्ली, विशेष संवाददाता। भारतीय स्टेट बैंक ने रिसर्च रिपोर्ट में कहा है कि देश में आर्थिक गतिविधियों में तेजी और मांग मजबूत से विकास दर को सहारा मिल रहा है। ऐसे में चालू वित्त वर्ष 2026-27 की दूसरी तिमाही में आर्थिक विकास दर यानी जीडीपी 7.8 फीसदी रह सकती है, जो भारतीय रिजर्व बैंक के 7.2 फीसदी के अनुमान से अधिक है।

एसबीआई ने कृषि, उद्योग और सेवा क्षेत्र के 54 प्रमुख आर्थिक संकेतकों का विश्लेषण किया, जिसके बाद अनुमान लगाया है कि दूसरी तिमाही में जीडीपी की वास्तविक विकास दर 7.8 फीसदी और सकल मूल्य वर्धित (जीवीए) की वृद्धि दर 8 से 8.2 फीसदी रह सकती है। वहीं, मौजूदा कीमतों पर आधारित नॉमिनल जीडीपी में 11 से 11.5 फीसदी की वृद्धि का अनुमान है।

रिपोर्ट में दूसरी तिमाही के दौरान 88 फीसदी प्रमुख आर्थिक गतिविधियों में तेजी दर्ज की गई है। दूसरी तिमाही के दौरान वाहन बिक्री, बिजली की मांग, सीमेंट उत्पादन, गैर-तेल निर्यात और बंदरगाहों पर माल ढुलाई में सुधार से अर्थव्यवस्था को मजबूती मिली है। इसी तरह से सितंबर में वाणिज्यिक वाहनों की बिक्री में 35.7 फीसदी और सीमेंट उत्पादन में 29.5 फीसदी की वृद्धि दर्ज की गई। गैर-तेल निर्यात में 21.5 फीसदी की बढ़ोतरी हुई।

23 सौ सूचीबद्ध कंपनियों की बिक्री में सालाना 25% की वृद्धि हुई है

18.2 फीसदी बैंकों के कर्ज में सालाना और 16.7% जमा में वृद्धि हुई 15 अक्तूबर तक

कंपनियों का मुनाफा 33 फीसदी बढ़ा

रिपोर्ट में कहा गया है कि दूसरी तिमाही में कंपनियों के वित्तीय प्रदर्शन में भी सुधार हुआ है। बैंकिंग, वित्तीय सेवाओं और बीमा क्षेत्र को छोड़कर करीब 2300 सूचीबद्ध कंपनियों की बिक्री में सालाना आधार पर 25 फीसदी की वृद्धि हुई है। वहीं, कंपनियों का परिचालन मुनाफा 35 फीसदी और शुद्ध मुनाफा 33 फीसदी बढ़ा है। कंपनियों का परिचालन मुनाफा मार्जिन भी बढ़ा है।

बैंकों के सकल कर्ज वितरण में भी तेज वृद्धि

बैंकों के कर्ज वितरण में भी तेजी बनी हुई है। 15 अक्तूबर तक बैंकों के कुल कर्ज में सालाना आधार पर 18.2% और जमा में 16.7% की वृद्धि हुई है। दूसरी तिमाही में बैंकों ने 10.6 लाख करोड़ का अतिरिक्त कर्ज दिया, जबकि वित्त वर्ष 2024-25 की समान तिमाही में 5.9 लाख करोड़ का कर्ज दिया था। उद्योग, व्यक्तिगत कर्ज की हिस्सेदारी कुल नए कर्ज में करीब 50% रही।

अल नीनो से फसलों को नुकसान की आशंका

रिपोर्ट में अल नीनो को लेकर भी चिंता जताई है। कम बारिश के कारण फसल उत्पादन पर असर पड़ सकता है। इससे कुल 3.86 करोड़ टन कृषि उत्पादन का नुकसान होने का अनुमान है। इसमें खरीफ फसलों को 89 लाख टन और रबी फसलों को 2.97 करोड़ टन का नुकसान हो सकता है। इससे करीब एक लाख करोड़ रुपये मूल्य के कृषि उत्पादन पर जोखिम है।

कारखाना क्षेत्र में लागत का दबाव

एसबीआई ने माना है कि कारखाना क्षेत्र की कई कंपनियों को कच्चे माल और उत्पादन लागत में बढ़ोतरी का पूरा बोझ ग्राहकों पर डालने में मुश्किल हो रही है। बिजली उपकरण, कंप्यूटर, इलेक्ट्रॉनिक उत्पाद, फर्नीचर और धातु से बने उत्पादों के क्षेत्र में लागत और बिक्री कीमतों के बीच अंतर अधिक है। हालांकि, निर्यात में तेजी से कंपनियों की कमाई को सहारा मिला है।

बाजार 30 S

हिताची एनर्जी का मुनाफा 21% बढ़ा

नई दिल्ली। हिताची एनर्जी ने सितंबर, 2026 में समाप्त चालू वित्त वर्ष की दूसरी तिमाही में 21 प्रतिशत की वृद्धि के साथ 318.5 करोड़ रुपये का शुद्ध मुनाफा अर्जित किया है। कंपनी ने बयान में कहा कि चालू वित्त वर्ष की दूसरी तिमाही में उसका राजस्व 63.5 प्रतिशत बढ़कर 2,996.5 करोड़ रुपये हो गया।

जन होल्डिंग्स के विलय को मंजूरी

नई दिल्ली। एनसीएलटी ने जन होल्डिंग्स लिमिटेड के जन कैपिटल लिमिटेड में विलय को मंजूरी दे दी है। दोनों कंपनियां जन स्मॉल फाइनेंस बैंक लिमिटेड के प्रवर्तक समूह की इकाइयां हैं। जन स्मॉल फाइनेंस बैंक ने कहा, बैंक को 11 नवंबर, 2026 को इसकी प्रति मिली।

डॉलर के मुकाबले रुपया 41 पैसे टूटा

मुंबई। अमेरिकी मुद्रा में मजबूती के बीच रुपया गुरुवार को 41 पैसे टूटकर 94.12 (अस्थायी) प्रति डॉलर पर रहा। विदेशी मुद्रा कारोबारियों ने कहा कि अमेरिकी फेडरल रिजर्व के सख्त मौद्रिक रुख वाले बयान और दिसंबर में ब्याज दर बढ़ने की संभावना से अमेरिकी डॉलर मजबूत हुआ।

बाहरी कर्ज के प्रस्ताव सितंबर में 13% बढ़े

मुंबई। कंपनियों की ओर से बाह्य वाणिज्यिक कर्ज जुटाने के लिए भारतीय रिजर्व बैंक के पास दर्ज कराए गए प्रस्तावों का कुल मूल्य सितंबर में 13.3 प्रतिशत घटकर 7.05 अरब अमेरिकी डॉलर रह गया। पांच महीने में पहली बार इसमें मासिक आधार पर गिरावट दर्ज की गई।

दिल्ली में 17 नवंबर को निवेशक शिविर

नई दिल्ली। सेबी और निवेशक शिक्षा एवं संरक्षण कोष प्राधिकरण अगले सप्ताह राष्ट्रीय राजधानी में संयुक्त रूप से 'निवेशक शिविर' का आयोजन करेंगे। इसका उद्देश्य बिना दावे वाले शेयरों और लाभांश से जुड़े लंबित दावों का निपटारा करना है। शिविर में प्रवेश के लिए आधार, पैन कार्ड, मतदाता पहचान पत्र या ड्राइविंग लाइसेंस सहित पहचान पत्र साथ लाने की सलाह दी गई है।

मुद्रास्फीति ने आरबीआई का तय ऊपरी दायरा तोड़ा, आगे भी तेज उछाल के आसार

आशंका: भड़की खुदरा महंगाई से फिर बढ़ सकती है कर्ज की किस्त

नई दिल्ली, विशेष संवाददाता। खाद्य वस्तुओं और सेवाओं की कीमतों में बढ़ोतरी से खुदरा महंगाई अक्टूबर में बढ़कर 6.09% पर पहुंच गई। दो साल में पहली बार यह आरबीआई के छह प्रतिशत के संतोषजनक स्तर से ऊपर गई है। इसके साथ ही दिसंबर में नीतिगत ब्याज दर में एक और बढ़ोतरी की आशंका बढ़ गई है।

गुरुवार को जारी आंकड़ों के अनुसार, उपभोग की ज्यादातर श्रेणियों में महंगाई का दबाव देखा गया। खुदरा मुद्रास्फीति दो साल में पहली बार आरबीआई के छह प्रतिशत के तय दायरे से ऊपर निकली है। इससे पहले अक्टूबर 2024 में यह 6.25 प्रतिशत रही थी। सरकार ने आरबीआई को खुदरा मुद्रास्फीति दो से छह प्रतिशत के दायरे में रखने का दायित्व सौंपा हुआ है।

डीबीएस बैंक की वरिष्ठ अर्थशास्त्री राधिका राव ने कहा कि महंगाई अभी अपने उच्चतम स्तर पर नहीं पहुंची है और प्रतिकूल आधार प्रभाव के कारण आरबीआई को अपने तिमाही अनुमान बढ़ाने पड़ सकते हैं। ताजा आंकड़ों के देखते हुए आरबीआई दिसंबर में लगातार दूसरी बार नीतिगत दर में बढ़ोतरी कर सकता है। इक्रा की मुख्य अर्थशास्त्री अदिति नायर ने कहा कि खाद्य एवं पेय पदार्थों की महंगाई नवंबर में भी आठ प्रतिशत से ऊपर रह सकती है। दूध, चीनी और प्याज जैसी वस्तुओं की कीमतों से इस पर दबाव बने रहने की आशंका है। उन्होंने कहा कि अगले कुछ महीनों तक महंगाई आरबीआई की छह प्रतिशत की ऊपरी सीमा से ऊपर रह सकती है। ऐसे में दिसंबर में रेपो दर में 0.25 प्रतिशत की एक और बढ़ोतरी लगभग तय दिखती है।

इन वस्तुओं के दाम उछले

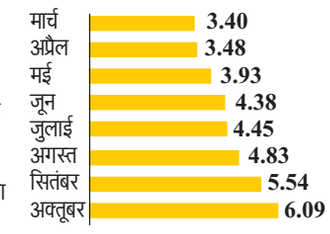

वस्तुएं	सितंबर	अक्तूबर
प्याज	108.09	116.22
अदरक	62.85	48.32
लहसुन	54.62	60.74
नींबू	36.41	47.30
रेस्टोरेंट-होटल	9.36	10.06
खाद्य एवं पेय पदार्थों	7.36	8.51
परिवहन	5.01	5.84
शिक्षा सेवाएं	3.94	4.02
कपड़े-जूते	3.93	4.96

(आंकड़े फीसदी में)

दिसंबर में होनी है बैठक

आरबीआई की मौद्रिक नीति समिति (एमपीसी) की अगली बैठक दो से चार दिसंबर को होनी है। आरबीआई ने अक्टूबर में करीब चार साल बाद पहली बार रेपो दर 0.25 प्रतिशत बढ़ाकर 5.50 प्रतिशत की थी। उसने महंगाई में बढ़ोतरी, रुपये की कमजोरी और कच्चे तेल की ऊंची कीमतों के बीच आगे भी दरें बढ़ाने का संकेत दिया था।

बीते आठ महीने में खुदरा महंगाई की चाल (% में)

यहां महंगाई सबसे ज्यादा

बीते महीने में आंध्र प्रदेश में महंगाई दर 7.25 फीसदी रही। मध्य प्रदेश में यह 7.19 फीसदी, ओडिशा में 7.17 फीसदी, तमिलनाडु में 7.29 फीसदी और तेलंगाना में 7.26 फीसदी दर्ज की गई। खाद्य महंगाई के मामले में भी कई राज्यों में स्थिति चिंताजनक रही। जारी आंकड़ों के मुताबिक, कुछ राज्यों में खाद्य महंगाई दर 12 फीसदी से अधिक दर्ज की गई।

भारत निवेश के लिए सुरक्षित ठिकाना

विशाखापत्तनम, एजेंसी। वाणिज्य एवं उद्योग मंत्री पीयूष गोयल ने वैश्विक निवेशकों से भारत में निवेश करने और उद्योगों से गुणवत्ता व टिकाऊपन पर ध्यान देने का आग्रह करते हुए बृहस्पतिवार को कहा कि मौजूदा वैश्विक अनिश्चितताओं के बीच भारत निवेश के लिए एक सुरक्षित गंतव्य है।

यहां सीआईआई साझेदारी सम्मेलन 2026 को संबोधित करते हुए उन्होंने कहा कि वैश्विक अनिश्चितताओं के बीच भारत निवेश के लिए एक सुरक्षित गंतव्य है। गोयल ने कहा, कारखानों, होटल और डेटा केंद्रों में निवेश करें, क्योंकि भारत एक सुरक्षित गंतव्य है। पिछले साढ़े चार वर्षों में भारत ने 38 विकसित देशों के साथ नौ मुक्त व्यापार समझौतों को अंतिम रूप दिया है। ये देश वैश्विक सकल घरेलू उत्पाद (जीडीपी) में 60 लाख करोड़ डॉलर का योगदान करते हैं।

अमेरिका से करार हर लिहाज से अच्छा होगा

वाणिज्य एवं उद्योग मंत्री पीयूष गोयल ने गुरुवार को कहा कि भारत, अमेरिका के साथ हर लिहाज से सबसे अच्छे व्यापार समझौतों में से एक करेगा। उन्होंने कहा कि भारत ने इस समझौते को लेकर अमेरिका के साथ बातचीत के दौरान बहुत अच्छे नतीजे हासिल किए हैं। भारत और अमेरिका ने इस साल फरवरी में द्विपक्षीय व्यापार समझौते के पहले चरण के लिए एक रूपरेखा को अंतिम रूप दिया था। हालांकि, अमेरिका में शुल्क व्यवस्था में बदलाव के कारण इस पर फिर से बातचीत हो रही है। बदलती परिस्थितियों और कुछ मुद्दों पर गतिरोध के कारण अभी तक इस पर सहमति नहीं बन पाई है।

बैटरी प्लांट के लिए 22 आवेदन मिले

नई दिल्ली, एजेंसी। सरकार की पीएलआई योजना के तहत बैटरी विनिर्माण क्षमता बढ़ाने के लिए रिलायंस इंडस्ट्रीज, विक्रम सोलर, अमारा राजा एडवांस्ड सेल टेक्नोलॉजीज और एक्साइड एनर्जी सॉल्यूशंस समेत 22 कंपनियों ने बोलियां जमा की हैं।

इसके तहत ग्रिड-स्तरीय ऊर्जा भंडारण के लिए 10 गीगावाट घंटे की उन्नत रसायन सेल बैटरी विनिर्माण क्षमता आवंटित की जानी है। देश में बड़े पैमाने पर एसीसी बैटरी विनिर्माण संयंत्र स्थापित करने की वैश्विक निविदा के तहत उसे 22 बोलियां मिली हैं। इससे ऊर्जा सुरक्षा मजबूत करने और एसीसी प्रौद्योगिकी की घरेलू आपूर्ति श्रृंखला विकसित करने में भी मदद मिलेगी।

भारतीय मूल के सीईओ वाली कंपनियों का मूल्यांकन बढ़ा

मुंबई, एजेंसी। भारतीय मूल के लोगों के नेतृत्व वाली शीर्ष वैश्विक कंपनियों का कुल मूल्यांकन एआई क्षेत्र में तेजी के दम पर 53 प्रतिशत बढ़कर 15 लाख करोड़ डॉलर हो गया है। एक रिपोर्ट में गुरुवार को यह जानकारी दी गई।

- कुल मूल्यांकन एआई क्षेत्र में तेजी के दम पर 53 प्रतिशत बढ़कर 15 लाख करोड़ डॉलर हो गया

एचएसबीसी हुरुन ग्लोबल इंडियंस लिस्ट 2026 के अनुसार, बाजार में एआई के इस्तेमाल में तेजी से इन कंपनियों का मूल्यांकन बढ़ा है। दो साल पहले इन कंपनियों का कुल मूल्यांकन 9.9 लाख करोड़ डॉलर था। मौजूदा सूची तैयार करने में 25 जून तक के आंकड़े शामिल किए गए हैं। रिपोर्ट के मुताबिक, मौजूदा सूची में सुंदर पिचाई शीर्ष पर हैं। उनके नेतृत्व वाली कंपनी अल्फाबेट का मूल्यांकन 4.2 लाख करोड़ डॉलर है, जो सूची में शामिल कंपनियों में सबसे अधिक है।

माइक्रोसॉफ्ट के सत्य नडेला 2.6 लाख करोड़ डॉलर के मूल्यांकन के साथ दूसरे स्थान पर हैं। माइक्रोन के संजय मेहरोत्रा 1.4 लाख करोड़ डॉलर के मूल्यांकन के साथ तीसरे स्थान पर हैं। सूची में शामिल 200 कंपनियों में से 103 कंपनियां एआई आधारित हैं।

रूस से कच्चे तेल का आयात अक्तूबर में रिकॉर्ड पर पहुंचा

नई दिल्ली, एजेंसी। भारत ने अक्तूबर में रूस से रिकॉर्ड 640 करोड़ यूरो के ईंधन की खरीद की है। कच्चे तेल के आयात में तेज वृद्धि इसकी प्रमुख वजह रही। इससे पश्चिमी देशों के प्रतिबंधों के बावजूद रूस का जीवाश्म ईंधन निर्यात से राजस्व दिसंबर, 2022 के बाद के सबसे ऊंचे मासिक स्तर पर पहुंच गया।

ऊर्जा एवं स्वच्छ वायु अनुसंधान केंद्र (सीआरईए) के मासिक विश्लेषण के अनुसार, भारत अक्तूबर, 2026 में रूस के जीवाश्म ईंधन का दूसरा सबसे बड़ा खरीदार रहा। उसने कुल 640 करोड़ यूरो के रूसी हाइड्रोकार्बन का आयात किया, जो जनवरी, 2022 से उपलब्ध आंकड़ों में उसका सबसे ऊंचा मासिक आंकड़ा है। भारत की कुल खरीद में कच्चे तेल की हिस्सेदारी 91 प्रतिशत रही, जिसका मूल्य 580 करोड़ यूरो था। कोयला (33.3 करोड़ यूरो) और तेल उत्पाद (23.2 करोड़ यूरो) शेष मासिक आयात में शामिल रहे। चीन, रूस के जीवाश्म ईंधन का सबसे बड़ा वैश्विक खरीदार बना रहा। शीर्ष पांच आयातकों से रूस के निर्यात राजस्व में उसकी हिस्सेदारी 51 प्रतिशत यानी 1,070 करोड़ यूरो रही।

जामनगर रिफाइनरी फिर सबसे बड़ी आयातक बनी

सीआरईए ने कहा, 'अक्तूबर, 2026 में भारत का रूसी कच्चे तेल का आयात पिछले महीने की तुलना में 10 प्रतिशत बढ़ा। भारत की तीन सबसे बड़ी आयातक रिफाइनरी इकाइयों में रूसी कच्चे तेल का आयात बढ़ा। इनमें नायरा एनर्जी की वाडिनार रिफाइनरी में 12 प्रतिशत, रिलायंस इंडस्ट्रीज लिमिटेड की जामनगर रिफाइनरी में 22 प्रतिशत और इंडियन ऑयल कॉरपोरेशन लिमिटेड की पारादीप रिफाइनरी में 28 प्रतिशत की मासिक वृद्धि हुई।

सोना ₹2,200 टूटा, चांदी स्थिर

नई दिल्ली, एजेंसी। राष्ट्रीय राजधानी के सर्राफा बाजार में सोने की कीमतों में गिरावट का सिलसिला लगातार तीसरे कारोबारी सत्र में जारी रहा। कमजोघरेलू बाजार के बीच गुरुवार को सोना 2,200 रुपये टूटकर 1,43,400 रुपये प्रति 10 ग्राम रह गया।

स्थानीय कारोबारियों के अनुसार, 99.9 प्रतिशत शुद्धता वाले सोने का भाव बुधवार के बंद भाव 1,45,600 रुपये प्रति 10 ग्राम से 2,200 रुपये टूटकर 1,43,400 रुपये प्रति 10 ग्राम रह गया। हालांकि, चांदी की कीमत 1,87,500 रुपये पर स्थिर रही।

भारत में रोजगार पर एआई का असर नहीं दिखा: मूडीज

नई दिल्ली, एजेंसी। एआई से उत्पादकता बढ़ने की संभावना है, वहीं आईटी सेवाओं और बीपीओ क्षेत्र पर अधिक निर्भरता वाले उभरते बाजारों में रोजगार के अवसर प्रभावित होने का जोखिम भी है। हालांकि, भारत में अभी तक इसका कोई स्पष्ट असर नहीं देखा गया है। मूडीज रेटिंग्स ने गुरुवार को अपनी एक रिपोर्ट में यह बात कही।

मूडीज ने अपनी रिपोर्ट 'वैश्विक उभरते बाजार परिदृश्य 2027' में कहा कि अधिकांश उभरते बाजारों के लिए कंप्यूटिंग क्षमता, डिजिटल बुनियादी ढांचे और कौशल तक अपर्याप्त पहुंच एआई से मिलने वाले लाभ हासिल करने की उनकी क्षमता को तेजी से प्रभावित कर सकती है। 'सॉफ्टवेयर, आईटी और बीपीओ निर्भर बाजारों में एआई उत्पादकता बढ़ाने के साथ रोजगार के अवसरों को प्रभावित करने का जोखिम भी पैदा कर सकता है।

केवल पांच कारों से कारोबार करने की छूट देने का प्रस्ताव

नई दिल्ली, एजेंसी। सड़क परिवहन एवं राजमार्ग मंत्रालय ने 'सेल्फ-ड्राइव' और चालक के साथ कार किराये पर देने का कारोबार शुरू करने के लिए न्यूनतम वाहन की संख्या मौजूदा के 50 से घटाकर पांच करने का प्रस्ताव दिया है। इस कदम से इस क्षेत्र में अधिक कंपनियों और कारोबारियों के प्रवेश का रास्ता आसान होने की उम्मीद है।

मंत्रालय ने 'रेंट-ए-कैब योजना, 2026' के मसौदे में कहा है कि आवेदक के पास परिचालन और रखरखाव के प्रत्येक स्थान पर कम से कम दो मोटर कैब होनी चाहिए और कुल मिलाकर कम से कम पांच मोटर कैब का बेड़ा होना चाहिए। प्रस्तावित योजना वर्ष 1989 के नियमों की जगह लेने वाला पहला व्यापक ढांचा होगी। इसे अगले साल जनवरी से लागू किया जाएगा।
