Construction of building and civil works	Commenced w.e.f. March 15, 2025	Feb -2027	The progress of construction activities was affected by several external and operational challenges, including fluctuations in iron and steel prices, supply chain disruptions, delays in the procurement and delivery of PEB steel structures, and shortages of skilled and unskilled labor. Furthermore, the rainy season and adverse weather conditions significantly affected construction activities and the movement of materials. Regulatory clearance delays, the temporary suspension of stone mining activities by the Madhya Pradesh Government, and logistical challenges further contributed to delays in the timely availability of construction materials and execution of work. Despite these challenges, the Company is continuously coordinating with suppliers, contractors, and other
