About ITD Cementation India Limited

ITD Cem's presence dates back to 1931 when The Cementation Company Limited, UK started its operations in India and was engaged in providing seepage control and stability related solutions to a few distressed dams in the country. The Company was mainly active in the field of specialised civil, mining and foundation engineering till the eighties and thereafter was a part of various Multinational, Transnational organisations like Trafalgar House - UK, Kvaerner - Norway and Skanska – Sweden. Today, it is a part of Italian- Thai Development Public Company Limited, Thailand.

Over a period of time, it has developed expertise in design and construction of large infrastructure projects. The strong international parentage which ITD Cem has continuously enjoyed over eight decades provides a distinct advantage in delivering key technical knowhow that are in line with international companies in this field.

In India, it has contributed significantly in the growth of Infrastructure in the country over the last eight decades and continues to provide expertise in the field of Civil Engineering. It has been closely involved in a number of major national-level projects of diverse nature including jetties at Dahej, Shiplift facility at Karwar, 2nd Container Terminal at Chennai, Elevated viaduct , road projects for NHAI and underground tunnels and stations at Delhi Metro and the new Integrated Terminal at Kolkata Airport. The Company's past experience has been strengthened by the rich and diverse expertise of the parent company, ITD, Thailand one of the leading contracting organisations in South East Asia.
