Note 42 as described above is reproduced as Note 45 to the Restated Consolidated Financial Information.

These Restated Consolidated Financial Information have been approved by the Board of Directors of the Company on February 11, 2026.

**i. Functional and presentation currency**

The Group presents its balance sheet in the order of liquidity.

The Restated Consolidated Financial Information are presented in Indian Rupees (INR) which is also the functional currency of the Group, in denomination of million rounded off to two decimal places. The Restated Consolidated Financial Information have been prepared on a historical cost basis, except for certain financial instruments that are measured at fair value.

The Group generally reports financial assets and financial liabilities on a gross basis in the Balance Sheet. They are offset and reported net only where it has legally enforceable right to offset the recognised amounts and the Group intends to either settle on a net basis or to realise the asset and settle the liability simultaneously as permitted by Ind AS. Similarly, the Group offsets income and expenses and reports the same on a net basis where the netting off reflects the substance of the transaction or other events as permitted by Ind AS.

**ii. Basis of measurement**

The restated consolidated financial information have been prepared under the historical cost convention except for the following items:

- a. Certain financial assets and liabilities that are measured at fair value and
- b. Net defined benefit asset / liability – plan assets are measured at fair value less present value of defined benefit obligation

**iii. Use of estimates and judgements**

The preparation of the Group's Restated Consolidated Financial Information requires Management to make use of estimates and judgements. In view of the inherent uncertainties and a level of subjectivity involved in measurement of items, it is possible that the outcomes in the subsequent financial years could differ from those on which the Management's estimates are based.

Accounting estimates and judgements are used in various line items in the financial information for example:

- a. Business model assessment
- b. Fair value of financial instruments
- c. Impairment of financial assets

### **a. Business model assessment**

The Group determines its business model at the level that best reflects how it manages groups of financial assets to achieve its business objective.

The Group's business model is not assessed on an instrument-by-instrument basis, but at a higher level of aggregated portfolios and is based on observable factors such as:

- a) How the performance of the business model and the financial assets held within that business model are evaluated and reported to the key management personnel.
- b) The risks that affect the performance of the business model (and the financial assets held within that business model) and, in particular, the way those risks are managed.
- c) How managers of the business are compensated (for example, whether the compensation is based on the fair value of the assets managed or on the contractual cash flows collected).
- d) The expected frequency, value and timing of sales are also important aspects of the Group's assessment.
- e) The business model assessment is based on reasonably expected scenarios without taking 'worst case' or 'stress case' scenarios into account. If cash flows after initial recognition are realised in a way that is different from the Group's original expectations, the Group does not change the classification of the remaining financial assets held in that business model but incorporates such information when assessing newly originated or newly purchased financial assets going forward.

### **b. Fair value of financial instruments**

The fair value of financial instruments is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction in the principal (or most advantageous) market at the measurement date under current market conditions (i.e. an exit price) regardless of whether that price is directly observable or estimated using another valuation technique. When the fair values of financial assets and financial liabilities recorded in the balance sheet cannot be derived from active markets, they are determined using a variety of valuation techniques that include the use of valuation models. The inputs to these models are taken from observable markets where possible, but where this is not feasible, estimation is required in establishing fair values.

### **c. Impairment of financial assets**

The measurement of impairment losses across all categories of financial assets requires judgement, in particular, the estimation of the amount and timing of future cash flows and collateral values when determining impairment losses and the assessment of a significant increase in credit risk. These estimates are driven by a number of factors, changes in which can result in different levels of allowances.

The Groups's expected credit loss ("ECL") calculations are outputs of complex models with a number of underlying assumptions regarding the choice of variable inputs and their interdependencies. Elements of the ECL models that are considered accounting judgements and estimates include:

- a. The Group's criteria for assessing if there has been a significant increase in credit risk and so allowances for financial assets should be measured on a lifetime expected credit loss basis.
- b. Development of ECL models, including the various formulae and the choice of inputs.
- c. Determination of associations between macroeconomic scenarios and economic inputs, such as gross domestic products, lending interest rates and collateral values, and the effect on probability of default ("PD"), exposure at default ("EAD") and loss given default ("LGD").
- d. Selection of forward-looking macroeconomic scenarios and their probability weightings, to derive the economic inputs into ECL models.

#### iv. Basis of consolidation

##### a. Subsidiaries

Subsidiaries are all entities over which the Group has control. The Group controls an entity when the Group is exposed to, or has rights to, variable returns from its involvement with the entity and has the ability to affect those returns through its power to direct the relevant activities of the entity. Subsidiaries are consolidated from the date on which the control is transferred to the Group. They are deconsolidated from the date the control ceases.

The Group combines the financial statements of the parent and its subsidiaries line by line adding together like items of assets, liabilities, equity, income and expenses. Intercompany transactions, balances and unrealised gains on transactions between the Group companies are eliminated. Unrealised losses are also eliminated unless the transaction provides evidence of an impairment of the transferred asset. Accounting policies of subsidiaries have been changed wherever necessary to ensure consistency with the policies adopted by the Group.

Non-controlling interest in the results and equity of subsidiaries are shown separately in the restated consolidated statement of profit and loss, restated consolidated statement of changes in equity and balance sheet respectively.

##### b. Associates

Associates are all entities over which the Group has significant influence but not control or joint control. This is generally the case where the Group holds between 20% and 50% of the voting rights. Investments in associates are accounted for using the equity method of accounting, after initially being recognized at cost.

- **Equity method**

Under equity method of accounting, the investments are initially recognized at cost and adjusted thereafter to recognize the Group's share of the post-acquisition profits or losses of the investee in profit and loss, and the Group's share of other comprehensive income of the investee and in other comprehensive income. Dividends received or receivable from associates are recognized as a reduction in the carrying amount of investment.

When the Group's share of losses in an equity-accounted investment equals or exceeds its interest in the entity, including any other unsecured long-term receivables, the Group does not recognize further losses, unless it has incurred obligations or made payments on behalf of the other entity.

Unrealised gains on transactions between the Group and its associates are eliminated to the extent the Group's interest in these entities. Unrealised losses are eliminated unless the transaction provides evidence of an impairment of asset transferred. Accounting policies of equity accounted investees have been changed where necessary to ensure consistency with the policies adopted by the Group.

### **c. Change in ownership interests**

The Group considers transactions with non-controlling interests that do not result in a loss of control as transactions with equity owners of the Group. A change in ownership interest results in an adjustment between the carrying amounts of the controlling and non-controlling interests to reflect their relative interest in the subsidiary. Any difference between the amount of the adjustment to non-controlling interests and any consideration paid or received is recognized within equity.

When the Group ceases to consolidate or equity account for an investment because of loss of control, any retained interest in the entity is remeasured to its fair value with the change in carrying amount recognized in profit or loss. The fair value becomes the initial carrying amount for the purposes of subsequently accounting for the retained interest as an associate, joint venture or financial asset. In addition, any amounts previously recognized in the other comprehensive income are reclassified to profit or loss.

If the ownership interest in an associate is reduced but significant influence is retained, only proportionate share of the amounts previously recognized in other comprehensive income are reclassified to profit or loss where appropriate.

### **d. Business Combination**

The acquisition method of accounting is used to account for all business combinations, regardless of whether equity instruments or other assets are acquired. The consideration transferred for the acquisition of a subsidiary comprises of the:

- Fair values of assets transferred
- Liabilities incurred to the former owners of the acquired business
- Equity interests issued by the Group and
- Fair value of any assets and liabilities resulting from a contingent consideration arrangement.

Identifiable assets acquired and liabilities and contingent liabilities assumed in a business combination are, with limited exceptions, measured initially at their fair values at acquisition date. The Group recognizes any non-controlling interests in the acquired entity on acquisition-by-acquisition basis either at fair value or by non-controlling interest's proportionate share of the acquired entity's net identifiable assets.

The excess of:

- Consideration transferred
- Any amount of non-controlling interest in the acquired entity and
- Acquisition date fair value of the previous entity interest in the acquired entity

Over the fair value of identifiable assets acquired is recorded as goodwill. If those amounts are less than the fair value of identifiable assets, the difference is recognized in other comprehensive income and accumulated in equity as capital reserve provided there is clear evidence of the underlying reason for carrying the business combination as a bargain purchase. In other cases, bargain purchase gain are recognized directly in equity as capital reserve.

If the business combination is achieved in stages, the acquisition date carrying value of the acquirer's previously held equity interest in the acquire is remeasured to fair value at acquisition date. Any gains or losses arising from such remeasurement are recognized in profit or loss or other comprehensive income, as appropriate.

### C. Presentation of financial statements

The restated consolidated financial information of the Group are presented as per Division III of Schedule III, as amended, of the Companies Act, 2013 applicable to NBFCs, as notified by the Ministry of Corporate Affairs ('MCA'). The Statement of Cash Flows has been prepared and presented as per the requirements of Ind AS 7, Statement of Cash Flows. The disclosure requirements with respect to items in the Balance Sheet and Restated Consolidated Statement of Profit and Loss, as prescribed in the Schedule III to the Act, are presented by way of notes forming part of the financial statements along with the other notes required to be disclosed under the notified Accounting Standards.

The Group generally reports financial assets and financial liabilities on a gross basis in the Balance Sheet. They are offset and reported net only when Ind AS specifically permits the same or it has an unconditional legally enforceable right to offset the recognised amounts without being contingent on a future event. Similarly, the Group offsets incomes and expenses and reports the same on a net basis when permitted by Ind AS.

### D. Material accounting policies and other explanatory information

#### 1. Measurement of fair values

The Group's accounting policies and disclosures require the measurement of fair values for financial instruments.

The Group has an established control framework with respect to the measurement of fair values. The management has the overall responsibility for overseeing all significant fair value measurements, including Level 3 fair values.

The management regularly reviews significant unobservable inputs and valuation adjustments. If third party information, such as broker quotes or pricing services, is used to measure fair values, then the management assesses the evidence obtained from the third parties to support the conclusion that these valuations meet the requirements of Ind AS, including the level in the fair value hierarchy in which such valuations should be classified.

When measuring the fair values of a financial asset or a financial liability, the Group uses observable market data as far as possible. Fair values are categorized into different levels in a fair value hierarchy based on the inputs used in the valuation techniques as follows.

- *Level 1:* quoted prices (unadjusted) in active markets for identical assets or liabilities.
- *Level 2:* inputs other than quoted prices included in Level 1 that are observable for the asset or liability, either directly (i.e., as prices) or indirectly (i.e. derived from prices).

- *Level 3*: inputs for the asset or liability that are not based on observable market data (unobservable inputs).

When measuring the fair value of a financial asset or a financial liability, the Group uses observable market data as far as possible. If the inputs used to measure the fair value of an asset or a liability fall into different levels of the fair value hierarchy, then the fair value measurement is categorised in its entirety in the same level of the fair value hierarchy as the lowest level input that is significant to the entire measurement.

The Group recognises transfers between levels of the fair value hierarchy at the end of the reporting period during which the change has occurred.

## 2. Financial instruments

A financial instrument is defined as any contract that gives rise to a financial asset of one entity and a financial liability or equity instrument of another entity. Trade receivables and payables, loan receivables, investments in securities and subsidiaries, debt securities and other borrowings, preferential and equity capital are some examples of financial instruments.

All financial instruments are at amortised cost, unless otherwise specified.

All the financial instruments are recognised on the date when the Group becomes party to the contractual provisions of the financial instruments. For tradable securities, the Group recognises the financial instruments on settlement date.

### i. Financial assets

#### Initial measurement

All financial assets are recognised initially at fair value including transaction costs that are attributable to the acquisition of financial assets except in the case of financial assets recorded at FVTPL where the transaction costs are charged to profit or loss. Generally, the transaction price is treated as fair value unless proved to the contrary. However, trade receivables that do not contain a significant financing component are measured at transaction price.

On initial recognition, a financial asset is classified as measured at

- Amortised cost;
- Fair value through other comprehensive income ('FVOCI')
- Fair value through profit and loss ('FVTPL')

Financial assets are not reclassified subsequent to their initial recognition, except if and in the period the Group changes its business model for managing financial assets. The Group classifies its financial assets in the following measurement categories:

### **Financial assets measured at amortised cost**

A financial asset that meets the following two conditions is measured at amortised cost (net of any write down for impairment), unless the asset is designated at FVTPL:

- i. the financial asset is held within a business model whose objective is to hold assets to collect contractual cash flows; and
- ii. the contractual terms of the financial asset give rise on specified dates to cash flows that are solely payments of principal and interest ('SPPI') on the principal amount outstanding.

### **Financial assets measured at Fair value through other comprehensive Income ('FVOCI')**

A financial asset is measured at FVOCI if it meets both of the following conditions and is not designated as at FVTPL:

- i. the financial asset is held within a business model whose objective is achieved by both collecting contractual cash flows and selling financial assets; and
- ii. the contractual terms of the asset give rise on specified dates to cash flows that are solely payments of principal and interest ('SPPI') on the principal amount outstanding.

### **Financial assets measured at Fair Value through Profit and Loss ('FVTPL')**

A financial asset which is not classified in above category is subsequently measured at FVTPL. Where assets are measured at fair value, gains and losses are recognized entirely in the Restated Consolidated Statement of Profit and Loss.

### **Subsequent measurement**

The assets classified in the aforementioned categories are subsequently measured as follows:

#### **Financial assets at Amortised cost**

These assets are subsequently measured at amortised cost at each reporting period using the effective interest method. The amortised cost is reduced by impairment losses. Interest income, foreign exchange gains and losses and impairment are recognised in restated consolidated statement of profit and loss. Any gain or loss on derecognition is recognised in restated consolidated statement of profit and loss.

#### **Debt investments at FVOCI**

These assets are subsequently measured at each reporting period at fair value. Interest income under the Effective Interest Rate (EIR) method, foreign exchange gains and losses and impairment are recognised in Restated Consolidated Statement of Profit and Loss. Other net gains and losses are recognised in OCI. On derecognition, gains and losses accumulated in OCI are reclassified to Restated Consolidated Statement of Profit and Loss.

### **Equity investments designated at FVOCI**

These assets are subsequently measured at each reporting period at fair value. Dividends are recognised as income in restated consolidated statement of profit and loss unless the dividend clearly represents a recovery of part of the cost of the investment. Other net gains and losses are recognised in OCI and are not reclassified to restated consolidated statement of profit and loss .

### **Financial assets at FVTPL**

These assets are subsequently measured at each reporting period at fair value. Net gains and losses, including any interest or dividend income, are recognised in Restated Consolidated Statement of Profit and Loss.

## **ii. Financial liabilities**

Financial liabilities are classified and measured at amortised cost or FVTPL. A financial liability is classified as at FVTPL if it is classified as held-for-trading or it is designated as on initial recognition.

Financial liabilities and equity instruments issued by the Group are classified according to the substance of the contractual arrangements entered into and the definitions of a financial liability and an equity instrument.

All financial liabilities are recognised initially at fair value and, in the case of payables, net of directly attributable and incremental transaction cost.

Amortised cost is calculated by taking into account any discount or premium on acquisition and fees or costs that are an integral part of the EIR. The EIR amortisation is included as finance costs profit and loss.

## **iii. Derecognition**

### **Financial assets**

The Group derecognizes a financial asset (or, where applicable, a part of a financial asset or part of a group of similar financial assets) when the contractual rights to receive cash flows from the financial asset expires or it transfers the rights to receive the contractual cash flows in a transaction or in which the Group neither transfers nor retains substantially all of the risks and rewards of ownership but does not retain control of the asset.

The Group sells, assigns (including Co-lending transaction) its loans to counterparties wherein the risk and reward of the asset is transferred for the entire/substantial portion of the Loan. As per Ind AS 109, Financial assets are derecognized on the date of assignment. Any right or interest on sold portion of asset is recognized as a financial asset at fair value, basis the scheduled cash flows on execution of the transaction estimated for prepayments and defaults. Estimated costs to be incurred for servicing the de-recognized portion is recorded as servicing liability at fair value.

On de-recognition of a financial asset in its entirety, the difference between the carrying amount (measured at the date of de-recognition) and the consideration received (including any new asset obtained less any new liability assumed) shall be recognized in profit or loss.

If the Group enters into transactions whereby it transfers assets recognized on its balance sheet, but retains either all or substantially all of the risks and rewards of the transferred assets, the transferred assets are not derecognised.

Financial assets subsequently measured at amortised cost are generally held for collection of contractual cashflow. The group on looking at economic viability of certain portfolios measured at amortised cost may enter into immaterial and infrequent transaction for sale of loans which doesn't affect the business model of the Group.

### **Financial liabilities**

A financial liability is derecognised when the obligation under the liability is discharged or cancelled or expires.

When an existing financial liability is replaced by another from the same lender on substantially different terms, or the terms of an existing liability are substantially modified, such an exchange or modification is treated as the derecognition of the original liability and the recognition of a new liability. The difference in the respective carrying amounts is recognised in the statement of Profit and Loss.

#### **iv. Offsetting of financial instruments**

A financial asset and a financial liability is offset and presented on net basis in the balance sheet when there is a current legally enforceable right to set-off the recognised amounts and it is intended to either settle on net basis or to realise the asset and settle the liability simultaneously.

#### **v. Derivatives recorded at fair value through profit and loss**

A derivative is a financial instrument or other contract with all three of the following characteristics:

- Its value changes in response to the change in a specified interest rate, financial instrument price, commodity price, foreign exchange rate, index of prices or rates, credit rating or credit index, or other variable, provided that, in the case of a non-financial variable, it is not specific to a party to the contract (i.e., the 'underlying').
- It requires no initial net investment or an initial net investment that is smaller than would be required for other types of contracts expected to have a similar response to changes in market factors.
- It is settled at a future date.

The Group enters into derivative transactions with various counterparties to hedge its foreign currency risks, interest rate risks and equity price risks, respectively. These include cross-currency swaps, forward foreign exchange contracts, futures and options.

Derivatives are recorded at fair value and carried as assets when their fair value is positive and as liabilities when their fair value is negative. Changes in the fair value of derivatives are included in net gain on fair value changes unless hedge accounting is applied.

vi. **Embedded derivatives**

An embedded derivative is a component of a hybrid instrument that also includes a non-derivative host contract with the effect that some of the cash flows of the combined instrument vary in a way similar to a stand-alone derivative. An embedded derivative causes some or all of the cash flows that otherwise would be required by the contract to be modified according to a specified interest rate, financial instrument price, commodity price, foreign exchange rate, index of prices or rates, credit rating or credit index, or other variable, provided that, in the case of a non-financial variable, it is not specific to a party to the contract. A derivative that is attached to a financial instrument, but is contractually transferable independently of that instrument, or has a different counterparty from that instrument, is not an embedded derivative, but a separate financial instrument.

If the hybrid contract contains a host that is a financial asset / financial liability within the scope of Ind AS 109, the Group does not separate embedded derivatives. Rather, it applies the classification requirements contained in Ind AS 109 to the entire hybrid contract.

Derivatives embedded in all other host contracts are accounted for as separate derivatives and recorded at fair value if their economic characteristics and risks are not closely related to those of the host contracts and the host contracts are not held for trading or designated at fair value through profit or loss. These embedded derivatives are measured at fair value with changes in fair value recognised in profit or loss, unless designated as effective hedging instruments.

**3. Share capital**

Equity and preference shares are classified as equity. Incremental costs directly attributable to the issuance of new ordinary shares and share options are recognised as a deduction from equity, net of any tax effects.

**4. Business Combination**

Business combinations of entities under common control are accounted using the “pooling of interests” method and assets and liabilities are reflected at the predecessor carrying values and the only adjustments that are made are to harmonise accounting policies. The figures for the previous periods are restated as if the business combination had occurred at the beginning of the preceding period irrespective of the actual date of the combination.

**5. Impairment of financial assets**

**Overview of the Expected Credit Losses (‘ECL’) principles**

- The Group records allowance for expected credit losses for all loans, other debt financial assets not held at FVTPL, together with financial guarantee contracts, in this section all referred to as ‘financial instruments’. Equity instruments are not subject to impairment under Ind AS 109.

- The ECL allowance is based on the credit losses expected to arise over the life of the asset (the lifetime expected credit loss), unless there has been no significant increase in credit risk since origination, in which case, the allowance is based on the 12 months' expected credit loss)
- Lifetime ECL are the expected credit losses resulting from all possible default events over the expected life of a financial instrument. The 12-month ECL is the portion of Lifetime ECL that represent the ECLs that result from default events on a financial instrument that are possible within the 12 months after the reporting date.

Both Lifetime ECLs and 12-month ECLs are calculated on either an individual basis or a collective basis, depending on the nature of the underlying portfolio of financial instruments. The Group has established a policy to perform an assessment, at the end of each reporting period, of whether a financial instrument's credit risk has increased significantly since initial recognition, by considering the change in the risk of default occurring over the remaining life of the financial instrument. The Group does the assessment of significant increase in credit risk at a borrower level. Based on the above, the Group categorises its loans into Stage 1, Stage 2 and Stage 3 as described below:

### Stage 1

All exposures where there has not been a significant increase in credit risk since initial recognition or that has low credit risk at the reporting date and that are not credit impaired upon origination are classified under this stage. The Group classifies all standard advances and advances upto 30 days default under this category. 12-month ECL is recognized on stage 1 exposures.

### Stage 2

All exposures where there has been a significant increase in credit risk since initial recognition but are not credit impaired are classified under this stage. 31 Days Past Due is considered as significant increase in credit risk. Lifetime ECL is recognized for exposures with significant increase in credit risk.

### Stage 3

All exposures assessed as credit impaired when one or more events that have a detrimental impact on the estimated future cash flows of that asset have occurred are classified in this stage.

With effect from October 1, 2022, a financial instrument is considered as Stage 3 if the asset crosses 90 days past due and remains in overdue category. This is aligned to the definition of default for loan assets stipulated in RBI circular dated November 12, 2021 – "Prudential Norms on Income Recognition, Asset classification and Provisioning pertaining to Advances – Clarifications" (the "RBI circular"). For exposures that have become credit impaired, a lifetime ECL is recognized. Stage 3 exposures represent Non-Performing Assets (NPA).

### **Credit-impaired financial assets:**

At each reporting period, the Group assesses whether financial assets carried at amortised cost and FVOCI are credit-impaired. A financial asset is 'credit-impaired' when one or more events that have a detrimental impact on the estimated future cash flows of the financial asset have occurred.

- Evidence that a financial asset is credit-impaired includes the following observable data:
  - a) Significant financial difficulty of the borrower or issuer;
  - b) A breach of contract such as a default or past due event;
  - c) The restructuring of a loan or advance by the Group on terms that the Group would not consider otherwise;
  - d) It is becoming probable that the borrower will enter bankruptcy or other financial reorganisation; or
  - e) The disappearance of an active market for a security because of financial difficulties.

### **The mechanics of ECL:**

The Group calculates ECLs based on probability-weighted scenarios to measure the expected cash shortfalls, discounted at an approximation to the EIR. A cash shortfall is the difference between the cash flows that are due to the Group in accordance with the contract and the cash flows that the Group expects to receive.

The mechanics of the ECL calculations are outlined below and the key elements are, as follows:

**Probability of Default (PD)** - The Probability of Default is an estimate of the likelihood of default over a given time horizon. A default may only happen at a certain time over the assessed period, if the facility has not been previously derecognised and is still in the portfolio.

While estimating the PD, the Group reviews macro-economic developments occurring in the economy and market it operates in. On annual basis, the Group analyses if there is any relationship between key economic trends like GDP, unemployment rates, private consumption rate, Gross national saving/investment, real wholesale & retail trade and services with the estimate of PD. Typically, these macro-economic scenarios span a base case, plus an upside and downside scenario.

The ECL model allows for multiple macro-economic scenarios to be reflected in a probabilistic manner. The weights are reviewed on annual basis.

**Exposure at Default (EAD)**- The Exposure at Default is an estimate of the exposure at a future default date.

**Loss Given Default (LGD)**- The Loss Given Default is an estimate of the loss arising in the case where a default occurs at a given time. It is based on the difference between the contractual cash flows due and those that the lender would expect to receive, including from the realisation of any collateral. It is usually expressed as a percentage of the EAD. For products where empirical data is available LGD is determined based on historical recoveries. For other products in absence of enough historical data, LGD rates are adopted from RBI circular "Implementation of the Internal Rating Based (IRB) Approaches for Calculation of Capital Charge for Credit Risk" by RBI dated December 22, 2011.- (RBI/2011-12/311 DBOD.No.BP.BC.67/21.06.202/2011-12) .

The Group may also make additional impairment allowance based on its assessment of risk profile and create safeguard from potential future events.

### **Write-offs**

The Group writes off Retail secured and unsecured loans which have a days past due (DPD) for more than 18 months and 15 months respectively. However, Small and Medium Enterprises (SME) Secured and Unsecured Loans, are written off on a case-to-case basis, based on the probability of recoverability. Any subsequent recoveries against such loans are credited to the statement of profit and loss.

### **6. Hedge accounting**

The Group makes use of derivative instruments to manage exposures to interest rate risk and foreign currency risk. In order to manage particular risks, the Group applies hedge accounting for transactions that meet specified criteria.

At the inception of a hedge relationship, the Group formally designates and documents the hedge relationship to which the Group wishes to apply hedge accounting and the risk management objective and strategy for undertaking the hedge. The documentation includes the Group's risk management objective and strategy for undertaking hedge, the hedging/economic relationship, the hedged item or transaction, the nature of the risk being hedged, hedge ratio and how the Group would assess the effectiveness of changes in the hedging instrument's fair value in offsetting the exposure to changes in the hedged item's cash flows attributable to the hedged risk. Such hedges are expected to be highly effective in achieving offsetting changes in cash flows and are assessed on an on-going basis to determine that they actually have been highly effective throughout the financial reporting periods for which they were designated.

During the year, hedges that meet the criteria for hedge accounting and qualify as cash flow hedges are accounted as follows:

#### **Cash flow hedge**

A cash flow hedge is a hedge of the exposure to variability in cash flows that is attributable to a particular risk associated with a recognised asset or liability and could affect profit or loss. For designated and qualifying cash flow hedges, the effective portion of the cumulative gain or loss on the hedging instrument is initially recognised directly in OCI within equity (cash flow hedge reserve). The ineffective portion of the gain or loss on the hedging instrument is recognised immediately as finance costs in the Statement of Profit and Loss. When the hedged cash flow affects the Statement of Profit and Loss, the effective portion of the gain or loss on the hedging instrument is recorded in the corresponding income or expense line of the Statement of Profit and Loss.

When a hedging instrument expires, is sold, terminated, exercised, or when a hedge no longer meets the criteria for hedge accounting, any cumulative gain or loss that has been recognised in OCI at that time remains in OCI and is recognised when the hedged forecast transaction is ultimately recognised in the statement of profit and loss.

When a forecast transaction is no longer expected to occur, the cumulative gain or loss that was reported in OCI is immediately transferred to the Statement of Profit and Loss.

### 7. Cash and cash equivalents

Cash and cash equivalents in the balance sheet comprise cash at banks and on hand and short-term deposits with an original maturity of three months or less, which are subject to an insignificant risk of changes in value.

For the purpose of the statement of cash flows, cash and cash equivalents consist of cash and short-term deposits, as defined above, net of outstanding bank overdrafts as they are considered an integral part of the Group's cash management.

### 8. Share-based payment arrangements

- a. The cost of equity-settled transactions is determined by the fair value at the date when the grant is made using an appropriate valuation model.
- b. That cost is recognised, together with a corresponding increase in share-based payment reserves in equity, over the period in which the performance and/or service conditions are fulfilled. The cumulative expense recognised for equity-settled transactions at each reporting date until the vesting date reflects the extent to which the vesting period has expired and the Group's best estimate of the number of equity instruments that will ultimately vest.
- c. When the terms of an equity-settled award are modified, the minimum expense recognised is the expense had the terms not been modified, if the original terms of the award are met. An additional expense is recognised for any modification that increases the total fair value of the share-based payment transaction, or is otherwise beneficial to the employee as measured at the date of modification. Where an award is cancelled by the entity or by the counterparty, any remaining element of the fair value of the award is expensed immediately through the Restated Consolidated Statement of Profit and Loss.
- d. The dilutive effect of outstanding options is reflected as additional share dilution in the computation of diluted earnings per share.

### 9. Lease Accounting

The Group evaluates if an arrangement qualifies to be a lease as per the requirements of Ind AS 116. The Group uses significant judgement in assessing the lease term (including anticipated renewals) and the applicable discount rate.

The Group determines the lease term as the non-cancellable period of a lease, together with both periods covered by an option to extend the lease if the Group is reasonably certain to exercise that option; and periods covered by an option to terminate the lease if the Group is reasonably certain not to exercise that option. The Group revises the lease term if there is a change in the non-cancellable period of a lease

At the date of commencement of the lease, the Group recognizes right – of – use ("ROU") asset and a corresponding lease liability for all lease arrangements in which it is a lessee, except for leases with a term of twelve months or less (short-term leases) and low value leases. For these short-term and low value leases, the Group recognizes the lease payments as an operating expense on a straight-line basis over the term of the lease.

The right-of-use assets are initially recognized at cost, which comprises the initial amount of the lease liability adjusted for any lease payments made at or prior to the commencement date of the lease plus any initial direct costs less any lease incentives. They are subsequently measured at cost less accumulated depreciation and impairment losses.

The lease liability is initially measured at amortised cost at the present value of the future lease payments. The lease payments are discounted using the incremental borrowing rates.

### 10. Income Tax

Income tax expense comprises current and deferred tax. It is recognised in Statement of Profit and Loss except to the extent that it relates to a business combination or to an item recognised directly in equity or in other comprehensive income ('OCI').

#### Current tax

Current tax comprises the expected tax payable or receivable on the taxable income or loss for the period and any adjustment to the tax payable or receivable in respect of previous years. The amount of current tax reflects the best estimate of the tax amount expected to be paid or received after considering the uncertainty, if any, related to income taxes. It is measured using tax rates enacted or substantively enacted at the reporting date.

Current tax assets and liabilities are offset only if, the Group:

- a) has a legally enforceable right to set off the recognised amounts; and
- b) intends to realise the asset or settle the liability on a net basis or simultaneously.

#### Deferred tax

Income tax comprises of current tax and deferred tax. Income tax is recognised based on tax rates and tax laws enacted, or substantively enacted, at the reporting date and on any adjustment to tax payable in respect of previous years. It is recognised in the Statement of Profit and Loss except to the extent that it relates to items recognised in other comprehensive income or directly in equity, in which case the tax is recognised in the same statement as the related item appears. Deferred tax is recognised for temporary differences between the accounting base of assets and liabilities in the Balance Sheet, and their tax bases. Deferred tax is calculated using the tax rates expected to apply in the periods in which the assets will be realised or the liabilities settled. The carrying amount of deferred tax assets is reviewed at each reporting date by the Group and reduced to the extent that it is no longer probable that sufficient taxable profit will be available to allow all or part of the deferred tax asset to be utilised. Deferred tax assets and deferred tax liabilities are offset basis the criteria given under Ind AS 'Income Taxes'.

### 11. Property, plant and equipment

#### i. Recognition and measurement

Items of property, plant and equipment are measured at cost less accumulated depreciation and any accumulated impairment losses.

The cost of an item of property, plant and equipment comprises:

- (i) its purchase price, including import duties and non-refundable purchase taxes, after deducting trade discounts and rebates,
- (ii) any directly attributable costs of bringing the asset to the location and condition necessary for it to be capable of operating in the manner intended by management.

Income and expenses related to the incidental operations, not necessary to bring the item to the location and condition necessary for it to be capable of operating in the manner intended by management, are recognised in Restated Consolidated Statement of Profit and Loss.

Any gain or loss on disposal of an item of property, plant and equipment is recognised in Restated Consolidated Statement of Profit and Loss.

## **ii. Depreciation**

Depreciation is provided on straight-line basis as per the useful life given under Schedule II of the Companies Act, 2013, and is generally recognised in the Restated Consolidated Statement of Profit and Loss.

Depreciation on additions / (disposals) is provided on a pro-rata basis i.e., from / (upto) the date which the asset is ready for use / (disposed of).

The useful life as per Schedule II are as follows:

| <b>Asset</b>           | <b>Useful life as per Schedule II</b> |
|------------------------|---------------------------------------|
| Buildings              | 60 years                              |
| Furniture & fixtures   | 10 years                              |
| Office equipment       | 5 years                               |
| Computers and printers | 3 years                               |
| Vehicles               | 8 years                               |

Depreciation methods, useful lives and residual values are reviewed at each reporting date and adjusted if appropriate. Based on technical evaluation and consequent advice, the management believes that its estimated useful life as given above best represent the period over which management expects to use these assets.

## **12. Intangible assets**

### **i. Recognition and measurement**

Intangible assets (computer software) are stated at cost of acquisition less accumulated amortisation and impairment losses, if any. The cost of an intangible asset comprises its purchase price including any import duties and other taxes (other than those subsequently recoverable from the taxing authorities), and any directly attributable expenditure on making the asset ready for its intended use and net of any trade discounts and rebates.

**ii. Subsequent expenditure**

Subsequent expenditure on an intangible asset is capitalised only when it increases the future economic benefits embodied in the specific asset to which it relates. All other expenditures are recognised in the Statement Profit and Loss as incurred.

**iii. Amortisation**

Amortisation is calculated to write off the cost of intangible assets less their estimated residual values over their estimated useful life using the straight-line method, and is included in depreciation, amortisation and impairment in the Restated Consolidated Statement of Profit and Loss.

The intangible assets are amortised over the estimated useful life of 3 years.

Amortisation methods, useful life and residual values are reviewed at each reporting date and adjusted if appropriate.

**iv. Goodwill**

Goodwill on acquisition of subsidiaries is included in intangible assets. Goodwill is not amortised but it is tested for impairment annually, or more frequently if events or changes in circumstances indicate that it might be impaired and is carried at cost less accumulated impairment losses. Gains and losses on the disposal of an entity include the carrying amount of goodwill relating to the entity sold.

Goodwill is allocated to cash-generating units for the purpose of impairment testing. The allocation is made to those cash-generating units or Groups of cash-generating units that are expected to benefit from the business combination in which the goodwill arose. The units or Groups of units are identified at the lowest level at which goodwill is monitored for internal management purposes, which in our case are the operating segments.

**13. Impairment of non-financial assets**

Goodwill and intangible assets that have an indefinite useful life are not subject to amortization and are tested annually for impairment, or more frequently if events or changes in circumstances indicate that they might be impaired.

The carrying values of these assets at each balance sheet date are reviewed to determine whether there is any indication of impairment. If any such indication exists, then the asset's recoverable amount is estimated.

The recoverable amount of these asset is the higher of its value in use and its fair value less costs to sell. Value in use is based on the estimated future cash flows, discounted to their present value using a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset.

If the carrying amount of the assets exceed the estimated recoverable amount, an impairment loss is recognised in the Restated Consolidated Statement of Profit and Loss for such excess amount.

In respect of assets (except goodwill) for which impairment loss has been recognised in prior periods, the Group reviews at each reporting date whether there is any indication that the loss has decreased or no longer exists. An impairment loss is reversed if there has been a change in the estimates used to determine the recoverable amount. Such reversal of impairment loss is recognised in the Restated Consolidated Statement of Profit and Loss, to the extent that the asset's carrying amount does not exceed the carrying amount that would have been determined, net of depreciation or amortisation, if no impairment loss had been recognised.

### 14. Revenue from operations

#### Recognition of interest and fee income or expense

Dividend income is recognised on the date on which the Group's right to receive the payment is established.

Interest income or expense is recognised using the effective interest method.

The 'effective interest rate' is the rate that exactly discounts estimated future cash payments or receipts through the expected life of the financial instrument to:

- the gross carrying amount of the financial asset; or
- the amortised cost of the financial liability.

In calculating interest income and expense, the effective interest rate is applied to the gross carrying amount of the asset (when the asset is not credit-impaired) or to the amortised cost of the liability. However, for financial assets that have become credit-impaired subsequent to initial recognition, interest income is recognised by applying the effective interest rate to the recoverable amount of the financial asset. If the asset is no longer credit-impaired, then the calculation of interest income reverts to the gross basis.

#### Fee and commission income:

The Group recognises revenue from contracts with customers (other than financial assets to which Ind AS 109 'Financial Instruments' is applicable) based on a comprehensive assessment model as set out in Ind AS 115 'Revenue from Contracts with Customers'. The Group identifies contract(s) with a customer and its performance obligations under the contract, determines the transaction price and its allocation to the performance obligations in the contract and recognises revenue only on satisfactory completion of performance obligations.

Loan related charges such as cheque bounce charges, foreclosure charges are recognised only on receipt basis.

### 15. Income from de-recognition of assets:

Gains arising out of de-recognition transactions comprise the difference between the interest on the loan portfolio and the applicable rate at which the transaction is entered into with the transferee, also known as the right of excess interest spread (EIS). The future EIS basis the scheduled cash flows on execution of the transaction estimated for

prepayments and defaults, discounted at the applicable rate entered into with the transferee is recorded upfront, net of estimated cost, in the statement of profit and loss.

### **16. Finance Costs**

Finance costs include interest expense calculated using the EIR on respective financial instruments and borrowings including foreign currency borrowings measured at amortised cost, finance charges in respect of assets acquired on finance lease and exchange differences arising from foreign currency borrowings to the extent they are regarded as an adjustment to interest costs. All other Borrowing costs are recognised in the Statement of profit and loss in the period in which they are incurred.

### **17. Employee benefits**

#### **i. Short-term employee benefits**

Short-term employee benefits are expensed as the related service is provided. A liability is recognised for the amount expected to be paid if the Group has a present legal or constructive obligation to pay this amount as a result of past service provided by the employee and the obligation can be estimated reliably.

#### **ii. Contribution to provident fund and Employees' State Insurance Corporation (ESIC)**

Group's contribution paid/payable during the period to provident fund and ESIC is recognised in the Statement of profit and loss.

#### **iii. Gratuity**

The Group's liability towards gratuity scheme is determined by independent actuaries, using the projected unit credit method. The present value of the defined benefit obligation is determined by discounting the estimated future cash outflows by reference to market yields at the end of the reporting period on government bonds that have terms approximating to the terms of the related obligation.

The net interest cost is calculated by applying the discount rate to the net balance of the defined benefit obligation. This cost is included in employee benefit expense in the Statement of profit and loss.

Remeasurement of defined benefit plans, comprising of actuarial gains / losses, return on plan assets excluding interest income are recognised immediately in the balance sheet with corresponding debit or credit to Other Comprehensive Income (OCI). Remeasurements are not reclassified to Statement of profit and loss in the subsequent period.

#### **iv. Compensated absence**

The Group does not have a policy of encashment of unavailed leaves for its employees and are not permitted to carry forward the leaves. Hence there is no liability towards compensated absence.

### 18. Foreign currency

#### Transaction and balances

Transactions in foreign currencies are translated into the functional currency of the Group at the exchange rates at the dates of the transactions or an average rate if the average rate approximates the actual rate at the date of the transaction.

Foreign currency transactions are recorded on initial recognition in the functional currency, using the exchange rate at the date of the transaction. At each closing date, foreign currency monetary items are reported using the closing exchange rate.

Exchange differences that arise on settlement of monetary items or on reporting at each balance sheet date of the Group's monetary items at the closing rate are recognized as income and expenses in the period in which they arise.

Non-monetary items that are measured in terms of historical cost in a foreign currency are translated using the exchange rates at the dates of transactions. Non-monetary items that are measured at fair value in a foreign currency shall be translated using the exchange rates at the date when the fair value was determined. Exchange differences are recognised in the Restated Consolidated Statement of Profit and Loss.

### 19. Earnings per share

The basic earnings per share ('EPS') is computed by dividing the net profit / (loss) after tax for the period attributable to the equity shareholders by the weighted average number of equity shares outstanding during the period.

For the purpose of calculating diluted earnings per share, net profit / (loss) after tax for the period attributable to the equity shareholders and the weighted average number of equity shares outstanding during the period are adjusted for the effects of all dilutive potential equity shares.

### 20. Statement of Cash flows

Cash flows are reported using the indirect method, whereby profit for the period is adjusted for the effects of transactions of a non-cash nature, any deferrals or accruals of past or future operating cash receipts or payments and items of income or expenses associated with investing or financing cash flows. The cash flows from operating, investing and financing activities of the Group are segregated.

### 21. Segment Reporting

The Group operates in a single reportable segment i.e., financing, since the nature of the loans are exposed to similar risk and return profiles hence they are collectively operating under a single segment. The Group operates in a single geographical segment i.e. domestic.

### **22. Provisions, contingent liabilities and contingent assets**

#### **a. Provisions**

Provisions are recognized when there is a present obligation (legal or constructive) as a result of a past event, it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation and a reliable estimate can be made of the amount of the obligation.

The expenses relating to a provision is presented in the Restated Consolidated Statement of Profit and Loss.

If the effect of the time value of money is material, provisions are determined by discounting the expected future cash flows specific to the liability. The unwinding of the discount is recognised as finance cost.

#### **b. Onerous contracts**

Provisions for onerous contracts are recognized when the expected benefits to be derived from a contract are lower than the unavoidable costs of meeting the future obligations under the contract. The provision is measured at the present value of the lower of the expected cost of terminating the contract and the expected net cost of continuing with the contract. Before a provision is established, the Group recognises any impairment loss on the assets associated with that contract.

#### **c. Contingent liabilities**

A disclosure for a contingent liability is made when there is a possible obligation or a present obligation that may, but will probably not, require an outflow of resources. When there is a possible obligation of a present obligation in respect of which the likelihood of outflow of resources is remote, no disclosure is made.

The Group has a process whereby periodically all long term contracts (including derivative contracts) are assessed for material foreseeable losses. The Group assesses its obligations arising in the normal course of business, including pending litigations, proceedings pending with tax authorities and other contracts including derivative and long term contracts periodically and ensures that appropriate treatment has been made as required under Ind AS.

#### **d. Contingent assets**

Contingent assets are not recognised in the financial statements. However, contingent assets are assessed continually and if it is virtually certain that an economic benefit will arise, the asset and related income are recognised in the period in which the change occurs.

Provisions, contingent assets, contingent liabilities and commitments are reviewed at each reporting date.

### **23. Exceptional items**

When items of income and expense within profit or loss from ordinary activities are of such size, nature or incidence that their disclosure is relevant to explain the performance of the enterprise for the period, the nature and amount of such items is disclosed separately as exceptional items.

### **24. Standards issued but not yet effective upto the date of issuance of the financial statements**

There are no standards that are notified and not yet effective as on date.

An explanation of each level follows underneath table.

Except for those financial instruments for which the fair value amounts are mentioned in the above table (which is different than the carrying value), the Group considers that the carrying amounts recognised in the financial statements approximate their fair values. For financial assets that are measured at fair value, the carrying amounts are equal to the fair values.

#### C. Measurement of fair values

The following sets out the Group's basis of establishing fair values of amortised cost financial instruments and their classification between Levels 1, 2 and 3. As certain categories of financial instruments are not actively traded, there is a significant level of management judgement involved in calculating the fair values:

### Notes to the Restated Consolidated Financial Information

#### 34. Financial risk management

In the course of its business, the Group is exposed to certain financial risks namely credit risk, interest risk, market risk & liquidity risk. The Group's primary focus is to achieve better predictability of financial markets and seek to minimize potential adverse effects on its financial performance. The financial risks are managed in accordance with the Group's risk management policy which has been approved by its Board of Directors.

The Group's Board of Directors has overall responsibility for the establishment and oversight of the Group's risk management framework. The board of directors has established the Risk Management Committee, which is responsible for developing and monitoring the Group's risk management policies. The committee reports regularly to the board of directors on its activities.

The Group's risk management policies are established to identify and analyse the risks faced by the Group, to set appropriate risk limits and controls and to monitor risks and adherence to limits. Risk management policies and systems are reviewed regularly to reflect changes in market conditions and the Group's activities.

#### A. Credit risk

Credit risk is the risk of financial loss to the Group if a customer or counterparty to a financial instrument fails to meet its contractual obligations i.e. receivables from customers, investments in debt securities. Credit risk arises from loans and advances, investments carried at amortized cost and deposits with banks and financial institutions.

#### i) Credit risk management

The Group's key objective is to maintain a strong culture of responsible lending, and robust risk policies and control frameworks. The Group considers various factors, which provide an assessment of the borrower's ability-to-pay and willingness-to-pay. While the techniques used for assessment vary across product-segments, the credit principles remain a common factor.

The key factors considered include:

- **Income and cash flow analysis:** The borrower's income from multiple sources is assessed, along with the borrower's obligations and financial commitments. Hence, the funds available to repay the loan/EMI is computed, and the loan is tailored to be affordable to the borrower. For certain product types working capital gap is also calculated. For student loans, country risks are also taken into consideration for income assessment.

- **Credit history analysis:** The borrower's experience in managing debt is considered. Prior delinquencies are considered. A strong repayment track record is typically an indicator of the customer's ability-to-pay. Exceptions and nuances, like customers with a limited credit history but with strengths like job-tenure or asset-ownership, are also considered to make appropriate credit decisions.

- **Borrower's profile and intended use of the funds:** The borrower's intended use of funds is considered as a part of the credit process, including the calculation of working capital cycle for certain product types. In some product-segments, the use of funds may be certified by the borrower or controlled by disbursing directly to the end-use. Borrower profiles which are not in targeted market-segments are screened out.

- **Security cover provided:** The Group has a well defined credit policy which lays out the security to be provided. In certain cases, providing the relevant collateral is a pre-condition for loan sanction.

- **Collectability and geo-location:** The borrower's location, accessibility, stability and contact-ability are all considered before loan sanction. In cases where there are doubts or concerns about any of these factors, an adverse adjustment to the risk-profile is made.

<sup>1</sup>. **Risk Management of unsecured exposure:** The Group periodically monitors sectoral limits for consumer credit in line with the extant regulations. Also, there is a Board approved framework in place for periodic review and monitoring of sub-sectoral limits and adherence to the exposure limits on an ongoing basis by the Risk Management Committee of the Board. The Group has data analytics led early warning process to check stress build up of portfolio in certain pockets and is always vigilant to mitigate the risks through timely policy changes and other sourcing related actions to maintain the portfolio quality. Also, effective collection strategies, proactive communication, and building robust collection capacities are essential measures to mitigate risks and ensure sustainable growth. By focusing on these areas, the Company enhances its resilience and better manage the challenges associated with loan collections. The Group has separate data science/analytics team which monitors the vintage curve, bounce rates, collection efficiency, portfolio metrics and delinquencies further periodic re-audit of existing cases to unearth delinquency trends and credit learnings.

#### Measurement of Expected Credit Losses ('ECL')

The Group has segmented its outstanding portfolio based on multiple factors such as risk profile, product type, credit underwriting policy, sourcing channels etc. for the computation of ECL.

A three-stage model for impairment based on changes in credit quality since initial recognition has been implemented. The Group has used Days Past Due ('DPD') basis for staging of the portfolio and has opted for the rebuttable presumption prescribed by the standard to recognize default in case payments are overdue more than 90 days and a Significant Increase in Credit Risk ('SICR') in case payments are overdue for more than 30 days.

The ECL allowance is based on the credit losses expected to arise over the life of the asset (the lifetime expected credit loss), unless there has been no significant increase in credit risk since origination, in which case, the allowance is based on the 12 months' expected credit loss.

Lifetime ECL are the expected credit losses resulting from all possible default events over the expected life of a financial instrument. The 12-month ECL is the portion of Lifetime ECL that represent the ECLs that result from default events on a financial instrument that are possible within the 12 months after the reporting date.

Both Lifetime ECLs and 12-month ECLs are calculated on either an individual basis /collective basis, depending on the nature of the underlying portfolio of financial instruments. The Group has established a policy to perform an assessment, at the end of each reporting period, of whether a financial instrument's credit risk has increased significantly since initial recognition, by considering the change in the risk of default occurring over the remaining life of the financial instrument. The Group does the assessment of significant increase in credit risk at a borrower level. Based on the above, the Group categorises its loans into Stage 1, Stage 2 and Stage 3.

The Group measures the amount of ECL on a financial instrument in a way that reflects an unbiased and probability-weighted amount. The Group considers its historical loss experience and adjusts the same for current observable data. The key inputs into the measurement of ECL are the probability of default, loss given default and exposure at default. These parameters are derived from the Groups's internally developed statistical models and other historical data. In addition, the Group uses reasonable and supportable information on future economic conditions including macroeconomic factors such as real GDP, unemployment rate, growth in wages, real wholesale and retail trade, services etc. Since incorporating these forward looking information increases the judgment as to how the changes in these macroeconomic factor will affect ECL, the methodology and assumptions are reviewed regularly. While considering the macroeconomic factor, Group consider economic span of base case, plus upside and downside scenario.

The Group also uses an internally developed model in unsecured personal Loan portfolio as part of its Probability of Default (PD) estimation within the Expected Credit Loss (ECL) framework. The internally developed model is a proprietary Machine Learning based scoring system designed to evaluate the risk level of loan accounts and combines various data points as per the Credit Bureau of the borrower. The model is derived using internal data elements such as credit history, repayment behaviour, and borrower demographics, enabling the Company to build a comprehensive borrower risk profile. This scoring mechanism is integrated to assess the credit quality of individual exposures and assign risk grades, which are then mapped to corresponding PD values. The use case of this model in ECL computation is to further break down a portfolio segment by grouping the borrowers exhibiting similar risk characteristics.

#### Collateral held

The Group periodically monitors the quality as well as the value of the security to meet the prescribed limits. The collateral held by the Group varies on case to case basis and includes:

- First/Subservient charge on the Land and/or Building of the project or other projects
- First/Subservient charge on the fixed and current assets of the borrower
- Hypothecation over receivables from funded project or other projects of the borrower
- Default Loss Guarantee (DLG) in the form of cash collateral, lien on fixed deposits etc.

Further, the Group on the basis of its assessment of credit risk classifies loans under Stage 2 irrespective of its overdues status during the period, including loans under one-time resolution (OTR) framework prescribed by the Reserve Bank of India (RBI) for COVID-19 related stress. These accounts are upgraded to Stage 1 as and when they demonstrate satisfactory behaviour under the revised repayment schedule.

#### 34. Financial risk management (continued)

##### C. Market risk

Market risk or Interest rate risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market interest rates. The Group is exposed to interest rate risk through the impact of rate changes on interest-bearing liabilities and assets. The Group manages its interest rate risk by monitoring the movements in the market interest rates closely. The Group has Asset and Liability Management Committee (ALCO) and has empowered it to assess the interest rate risk run by it and provide appropriate guidelines to the Treasury to manage the risk. The ALCO reviews the interest rate risk on periodic basis.

##### Fair value sensitivity analysis for fixed-rate instruments

The Group does not account for any fixed-rate financial assets or financial liabilities at fair value through profit or loss. Therefore, a change in interest rates at the reporting date would not affect profit or loss.

##### Cash flow sensitivity analysis for variable-rate instruments

The sensitivity analyses below have been determined based on the exposure to interest rates for assets and liabilities at the end of the reporting period. For floating rate assets and liabilities, the analysis is prepared assuming the amount of the liabilities/assets outstanding at the end of the reporting period was outstanding for the whole year and the rates are reset as per the applicable reset dates.

If interest rates related to loans and borrowings had been 1% higher/ lower and all other variables were held constant, the Group's Profit before tax for the year ended/ Other Equity (pre-tax) as on December 31, 2025, December 31, 2024, March 31, 2025, March 31, 2024 and March 31, 2023 would increase/ (decrease) by the following amounts:

**Interest rate risk:** A fall in the discount rate which is linked to the G.Sec. Rate will increase the present value of the liability requiring higher provision.

**Salary risk:** The present value of the defined benefit plan liability is calculated by reference to the future salaries of members. As such, an increase in the salary of the members more than assumed level will increase the plan's liability.

**Asset Liability Matching Risk:** The plan faces the ALM risk as to the matching cash flow. Group has to manage pay-out based on pay as you go basis from own funds.

**Mortality risk:** Since the benefits under the plan is not payable for life time and payable till retirement age only, plan does not have any longevity risk.

Such Scheme also covered employees of the Company which were transferred pursuant to the Scheme of Arrangement, holding Employee Stock Options under the ESOP Scheme of erstwhile IFSL ("Erstwhile ESOP Scheme"). The options granted to employees under the Erstwhile ESOP scheme continue to have similar terms and conditions in respect of vesting / exercise etc. under the New ESOP Scheme. As assessed by the Company, grant of options under the New ESOP Scheme to employees of erstwhile IFSL does not form part of consideration discharged as the Company is assessed to be accounting acquiree as per Ind AS 103.

Consequently, the charge towards share-based payment in terms of Ind AS 102 has been recorded on a basis that such New ESOP Scheme is only a continuation of Erstwhile ESOP Scheme. The liability towards the employee ESOP cost in the books of the Subsidiary is compensated by way of capital contribution by Holding Company in the Group. Further, the balance outstanding in Employees Stock Option Reserve as at December 31, 2025 pertaining to erstwhile ESOP Scheme has been transferred to 'Capital contribution from parent' pursuant to such change.

The Group has established share option plans that entitle the employees of the Company and its subsidiary companies to purchase the shares of the Company. Under these plans, holders of the vested options are entitled to purchase shares at the exercise price of the shares determined at the respective date of grant of options.

The key terms and conditions related to the vesting of grants under these plans are continued employment with the Group from the date of grant of option till the date of vesting (25% each year); all options are to be settled by the delivery of shares.

The Scheme was made effective by the Board of Directors of the Company, InCred Prime Finance Limited and KKR Capital Markets Limited at their meetings held on July 26, 2022 and the relevant filing were done with the Registrar of Companies, Mumbai on July 26, 2022.

The Appointed date of the Scheme is April 1, 2022, and accordingly the books of account and financial results effecting the Scheme have been prepared with effect from April 1, 2022.

Under the Scheme, the identified NBFC business of InCred Prime Finance Limited (formerly, InCred Financial Services Limited) ('erstwhile IFSL') shall be demerged with InCred Financial Services Limited (formerly, KKR India Financial Services Limited) ('new IFSL'). As per the terms of the Scheme, the Board of Directors of erstwhile InCred Financial Services Limited have been appointed as the directors of the new IFSL constituting majority. Further, with the discharge of purchase consideration for demerger, the shareholders of erstwhile IFSL will hold majority shareholding of the new IFSL.

Accordingly, the business combination has been treated as reverse acquisition for financial reporting purpose as per Ind AS 103 and erstwhile IFSL has been identified as the accounting acquirer and new IFSL and KCM being the accounting acquiree.

As per Ind AS 103, these financial results issued under the name of new IFSL represent the continuation of the financial results of erstwhile IFSL (including comparatives) except for share capital which is currently presented as per legal share capital of KCM. Accordingly the assets, liabilities and reserves of erstwhile IFSL have been continued at their pre-business combination carrying values and measured the fair value of identified assets and liabilities of new IFSL and KCM acquired as per requirements of Ind AS 103.

The accounting impact of the aforesaid Scheme in the books of new IFSL as at March 31, 2025 has been summarily presented as follows:

##### A. Acquisition of InCred Premier Distribution Private Limited (Formerly known as "mValu Technologies Services Private Limited")

On May 18, 2022, the Holding Company acquired incremental stake in its associate mValu Technology Services Private Ltd. (mValu) for Rs.181.98 millions from existing shareholders, thus acquiring control by holding 75.82% interest in mValu post such acquisition.

### OVERVIEW

For details in relation to our business, see "*Our Business*" on page 258.

### SIGNIFICANT FACTORS AFFECTING OUR RESULTS OF OPERATIONS

Our operating and financial results are determined by several interrelated factors that reflect our technology-first strategy, diversified product lines, multi-channel distribution, and robust risk management.

The following are the most significant factors affecting our business:

#### ***Product And Customer Segment Diversification***

Our performance continues to be shaped significantly by the breadth and balance of our product portfolio and customer segments. Since our inception, we have prioritised a retail-focused model, offering a well-diversified suite of loan products, i.e., personal loans, student loans, secured business loans, specialised micro, small and medium enterprise loans, and funding solutions to financial institutions. This approach has allowed us to serve a wide spectrum of borrowers, including salaried professionals, self-employed individuals, students, small businesses, and other NBFCs, thereby promoting meaningful financial inclusion.

Through disciplined underwriting and adaptive credit policies, we manage differentiated risk and effectively support asset

quality. As at December 31, 2025, our AUM stood at ₹144,478.59 million on account of growth across most of our product portfolio. Personal loans represented the largest share at 55.56% of the total AUM, followed by student loans at 22.15%, and secured business loans and specialised MSME loans comprising 8.74% and 7.83%, respectively. Lending to other financial institutions accounted for 5.55%.

<sup>(1)</sup> **Gross Carrying Amount (stage 3 loans) (%)**: Ratio of Gross Carrying Amount (stage 3 loans) to gross carrying amount of Total Gross Loans as at the last day of the specified period/ year.

<sup>(2)</sup> **Net Carrying Amount (Stage 3 loans) (%)**: Ratio of Net Carrying Amount (stage 3 loans) to Total Gross Loans reduced by impairment loss allowances provided on stage 3 loans as at the last day of the specified period/ year. Net Carrying Amount (stage 3 loans) is gross carrying amount (stage 3 loans) reduced by impairment loss allowances provided on stage 3 loans as at the last day of the specified period/ year. Percentage of Net Carrying Amount (stage 3 loans) is calculated by subtracting impairment loss allowances (provisions) on stage 3 loans from both the numerator (Gross Carrying Amount of stage 3 loans) and the denominator (Total Gross Loans).

### Access to well Diversified Funding Sources

We maintain a prudent approach to treasury management, supporting our growth through a carefully managed mix of debt and equity, with a continued focus on strong capitalisation and sound asset-liability management with cumulative gaps across all tenors aligned with prescribed compliance frameworks. As at December 31, 2025, our lender base was well-diversified, including public sector banks, private banks, mutual funds, financial institutions, development financial institutions, and small finance banks. This broad base reduces our funding risk and strengthens our resilience against market fluctuations.

IFSL's CRAR (including both CRAR – Tier-I capital and CRAR – Tier-II capital) stood at 24.97% as at December 31, 2025, as against the regulatory requirement of 15.00%. IFSL been assigned a credit rating of CRISIL AA- / Stable by CRISIL Ratings Limited and ICRA AA- / Stable by ICRA Limited for the nine month period ended December 31, 2025. With the reduction in repo rates by the RBI, we are seeing lower costs for new loan facilities and re-pricing of existing borrowings. This change in the policy rate has led to a favourable environment, allowing us to optimise funding costs while continuing to broaden our funding base. As shown in the table below, our average cost of total borrowings for the nine month period ended December 31, 2025 and December 31, 2024, and years ended March 31, 2025, March 31, 2024 and March 31, 2023, has declined, demonstrating the positive impact of these rate cuts on our overall cost of funds.

<sup>(1)</sup> **Average Cost of Total Borrowings:** Ratio of the finance costs for the specified period/ year to average total borrowings for the specified period/ year (average total borrowings is calculated as Monthly average of Total Borrowings as at the end of each month of the specified period/ year and as at the last day of the preceding specified period/ year).

Our ongoing efforts to enhance our credit standing, combined with a robust and disciplined ALM (asset-liability management) strategy, have allowed us to contain cost of funds while maintaining access to adequate liquidity.

The table below sets forth details of our Liquidity Coverage Ratio as at the dates indicated:

| Particulars                                                 | As at December 31, 2025 | As at December 31, 2024 | As at March 31, 2025 | As at March 31, 2024 | As at March 31, 2023 |

Notes:

<sup>(1)</sup> **Liquidity Coverage Ratio** is calculated as simple average of daily observations over the trailing 90 days for the nine months period ended December 31, 2025. Number for December 31, 2024, March 31, 2025, March 31, 2024 and March 31, 2023 are as at the reporting date. Liquidity coverage ratio pertains to the Material Subsidiary, IFSL.

Our average cost of borrowings, as shown in the table above, remains competitive and continues to decline. This favourable trend is supported by improvements in our credit ratings, a strengthened liability structure, and the maintenance of a robust liquidity coverage ratio. Together, these factors enable us to secure funding on more attractive terms and further reinforce our position in efficient treasury and risk management.

### Credit risk and technology-enabled risk management

A robust, technology-driven approach to credit risk management is a fundamental strength of our business, supporting healthy asset quality and fostering responsible growth across product lines. We operate with a risk-first philosophy that prioritises rigorous, end-to-end risk controls, from customer selection and product-specific underwriting guardrails, through to dynamic portfolio monitoring and collections management. Within our personal loans vertical, we focus predominantly on salaried individuals and leverage proprietary machine-learning underwriting models. These models are built on a deep dataset collected across more than eight years, using a blend of credit bureau data, digitised bank statements, behavioural analytics, and fraud detection tools. The effectiveness of this approach is reflected in the consistently high quality of the underlying portfolio and a favourable customer bureau score mix. For instance, for the nine month period ended December 31, 2025, 76.17% and 72.52% of our personal loan disbursements were made to customers with bureau scores above 730, as shown below for the nine month period ended December 31, 2025 and year ended March 31, 2025:

In student loans, our risk minimisation framework emphasises verified academic credentials, employability, and the involvement of strong co-borrowers. This is underpinned by continuous monitoring of student progress and insurance as added protection. Our lending is predominantly to postgraduate STEM students, supporting resilient asset quality. For the year ended March 31, 2025, 75.28% and 85.30% of our student loan disbursements were directed to STEM courses, with the following breakdown by course type for the nine month period ended December 31, 2025 and for the year ended March 31, 2025:

Our risk mitigation is further strengthened through active monthly information system reporting, government-backed credit guarantee schemes, risk sharing with partners, and dual legal and technical valuation in high-value secured loans. This approach is reinforced by a centralised and digitally enabled collections strategy, bolstering control over delinquencies and supporting high collection efficiency registered at 98.30% and 97.88% for the nine month period ended December 31, 2025 and for the year ended March 31, 2025.

Collectively, these technology-enabled frameworks and embedded risk controls underpin a disciplined credit culture across our lending businesses. These measures have enabled us to maintain robust asset quality across economic cycles, evidenced by well-managed delinquency and default rates. Our ongoing investments in data-driven processes, predictive analytics, and professional credit oversight continue to differentiate the business, ensuring responsiveness to both market and regulatory change, and supporting sustainable portfolio performance.

#### ***Multi-Channel Distribution Strategy and Geographic Reach***

A significant factor contributing to our market position and growth prospects is our integrated multi-channel distribution strategy, which enables us to reach a broad spectrum of customers across diverse geographies. By leveraging a combination of digital access, building strong local engagement through branch networks and on-ground sales teams, and fostering partnerships with various channel partners and service providers, we are able to offer convenient and tailored experiences to customers while supporting scalable operations. Our approach aligns with established industry practices that prioritise a mix of direct and partner-led origination to optimise customer acquisition, mitigate risks, and enhance operational resilience. As at December 31, 2025, our distribution footprint encompassed 158 branches across 19 states and union territories, supported by 2,980 employees and supplemented by a wide array of digital and partner channels, giving us the ability to serve customers in over 17,000 unique pin codes nationwide. This distribution model not only strengthens our brand visibility and customer loyalty but also reduces concentration risks by diversifying both sourcing channels and geographic exposure. While this multi-pronged strategy enhances growth and market access, it also introduces challenges associated with managing operational complexity, ensuring consistency in customer experience and compliance standards, and maintaining cost efficiency as the network expands. To address these challenges, we continue to invest in robust governance frameworks, technology integration, and staff training, enabling us to adapt quickly to market trends and regulatory developments. Overall, our thoughtfully structured distribution network is a core differentiator, equipping us to efficiently address evolving customer needs and support sustainable, inclusive expansion.

#### ***Effectiveness Of Our Proprietary Technology Platform and Automation-First Approach***

Our in-house developed technology platform forms the backbone of our business, powering the entire lending lifecycle from origination to collections with an automation-first mindset. Built and maintained by a growing team of 152 technology professionals as at December 31, 2025 up from 114 as at March 31, 2023, the platform seamlessly integrates mobile and web channels for customers and partners, while enabling rapid product launches and operational agility. With its modular, cloud-based architecture and flexible use of APIs, we can scale services quickly and efficiently to meet changing market demands.

Technology is fully embedded across all business lines. Advanced machine learning models and workflow automation drive efficient underwriting, risk-based personalisation, and robust verification, reducing turnaround times and ensuring higher quality credit decisions. For field-based products such as secured business loans, digital applications and integrated account aggregator tools have reduced manual processes and improved accuracy, while our centralised data repository

provides near real-time insights supporting risk management, collections, and compliance.

This automation-led, full-stack capability has enabled us to grow volumes significantly while limiting operational headcount increases, expanding the operations team from 125 to just 181 employees between March 2023 and December 2025 while our AUM grew from ₹60,660.88 million to ₹144,478.59 million between March 2023 and December 31, 2025. Ongoing technology investment, reflected in rising annual information technology expenses, ensures we remain at the forefront of secure, scalable, and cost-efficient digital lending.

### ***Competition And Pricing Environment***

We operate in a highly competitive landscape, facing competition from non-banking finance companies, fintech lenders, private unorganised lenders, and established banking institutions, many of which are part of larger financial groups. These competitors vary widely in scale, reach, and market focus, and some benefit from lower-cost funding or advanced technological capabilities.

We aim to ensure that the interest rates and other terms and conditions of our loan products are competitive against the terms offered by our competitors, which vary by product, market as well as target borrower. Our ability to understand customers helps us determine pricing of these products, which in our opinion sets us apart from our peers. Our current interest rates fairly compensate for the risks associated with this sector.

### ***Evolving regulatory landscape enhancing resilience across operations***

The regulatory environment for NBFCs in India continues to evolve, driven by the RBI introducing new regulations and updating existing frameworks. These changes are designed to strengthen the overall resilience and integrity of the financial sector. Regulatory developments include updated asset classification standards, mandatory adoption of core financial services solutions for larger NBFCs, and enhanced requirements relating to lending, securitisation, and outsourcing activities. The regulatory authorities have also reinforced measures for anti-money laundering and KYC processes, reflecting their commitment to managing systemic risk and safeguarding customer interests.

Recent regulatory changes also highlight the need for NBFCs to ensure that interest rates and lending terms are fair and transparent. The RBI and other authorities increasingly monitor NBFCs for compliance with regulations on maximum permissible interest rates and the disclosure of annual percentage rates, which helps protect customers from unreasonably high charges and promotes transparency. NBFCs are expected to implement robust policies for setting interest rates, regularly review their lending terms, and maintain clear communication with borrowers.

Non-compliance with the regulatory norms increasingly poses potential risks to business continuity and stakeholder confidence, especially as requirements for quarterly and event-triggered reporting, layered board and audit oversight, and periodic inspections have intensified. Timely adaptation to regulatory changes and swift implementation of necessary controls are critical to maintaining business momentum and avoiding adverse regulatory interventions.

## **MATERIAL ACCOUNTING POLICIES AND SIGNIFICANT JUDGMENTS AND ESTIMATES**

### ***Summary of material accounting policies***

A summary of our material accounting policies as included in our Restated Consolidated Financial Information are as below:

#### **Measurement of fair values**

The Group's accounting policies and disclosures require the measurement of fair values for financial instruments.

The Group has an established control framework with respect to the measurement of fair values. The management has the overall responsibility for overseeing all significant fair value measurements, including Level 3 fair values.

The management regularly reviews significant unobservable inputs and valuation adjustments. If third party information, such as broker quotes or pricing services, is used to measure fair values, then the management assesses the evidence obtained from the third parties to support the conclusion that these valuations meet the requirements of Ind AS, including the level in the fair value hierarchy in which such valuations should be classified.

When measuring the fair values of a financial asset or a financial liability, the Group uses observable market data as far as possible. Fair values are categorised into different levels in a fair value hierarchy based on the inputs used in the valuation techniques as follows.

- *Level 1:* quoted prices (unadjusted) in active markets for identical assets or liabilities.
- *Level 2:* inputs other than quoted prices included in Level 1 that are observable for the asset or liability, either directly (i.e., as prices) or indirectly (i.e. derived from prices).
- *Level 3:* inputs for the asset or liability that are not based on observable market data (unobservable inputs).

When measuring the fair value of a financial asset or a financial liability, the Group uses observable market data as far as possible. If the inputs used to measure the fair value of an asset or a liability fall into different levels of the fair value hierarchy, then the fair value measurement is categorised in its entirety in the same level of the fair value hierarchy as the lowest level input that is significant to the entire measurement.

The Group recognises transfers between levels of the fair value hierarchy at the end of the reporting period during which the change has occurred.

#### **Financial instruments**

A financial instrument is defined as any contract that gives rise to a financial asset of one entity and a financial liability or equity instrument of another entity. Trade receivables and payables, loan receivables, investments in securities and subsidiaries, debt securities and other borrowings, preferential and equity capital are some examples of financial instruments.

All financial instruments are at amortised cost, unless otherwise specified.

All the financial instruments are recognised on the date when the Group becomes party to the contractual provisions of the financial instruments. For tradable securities, the Group recognises the financial instruments on settlement date.

#### **i. Financial assets**

##### **Initial measurement**

All financial assets are recognised initially at fair value including transaction costs that are attributable to the acquisition of financial assets except in the case of financial assets recorded at FVTPL where the transaction costs are charged to profit or loss. Generally, the transaction price is treated as fair value unless proved to the contrary. However, trade receivables that do not contain a significant financing component are measured at transaction price.

On initial recognition, a financial asset is classified as measured at

- Amortised cost;
- Fair value through other comprehensive income ('FVOCI')
- Fair value through profit and loss ('FVTPL')

Financial assets are not reclassified subsequent to their initial recognition, except if and in the period the Group changes its business model for managing financial assets. The Group classifies its financial assets in the following measurement categories:

#### **Financial assets measured at amortised cost**

A financial asset that meets the following two conditions is measured at amortised cost (net of any write down for impairment), unless the asset is designated at FVTPL:

- i. the financial asset is held within a business model whose objective is to hold assets to collect contractual cash flows; and
- ii. the contractual terms of the financial asset give rise on specified dates to cash flows that are solely payments of principal and interest ('SPPI') on the principal amount outstanding.

#### **Financial assets measured at Fair value through other comprehensive Income ('FVOCI')**

A financial asset is measured at FVOCI if it meets both of the following conditions and is not designated as at FVTPL:

- i. the financial asset is held within a business model whose objective is achieved by both collecting contractual cash flows and selling financial assets; and
- ii. the contractual terms of the asset give rise on specified dates to cash flows that are solely payments of principal and interest ('SPPI') on the principal amount outstanding.

#### **Financial assets measured at Fair Value through Profit and Loss ('FVTPL')**

A financial asset which is not classified in above category is subsequently measured at FVTPL. Where assets are measured at fair value, gains and losses are recognised entirely in the Restated Consolidated Statement of Profit and Loss.

#### **Subsequent measurement**

The assets classified in the aforementioned categories are subsequently measured as follows:

##### **Financial assets at Amortised cost**

These assets are subsequently measured at amortised cost at each reporting period using the effective interest method. The amortised cost is reduced by impairment losses. Interest income, foreign exchange gains and losses and impairment are recognised in Restated Consolidated Statement of Profit and Loss. Any gain or loss on derecognition is recognised in Restated Consolidated Statement of Profit and Loss.

##### **Debt investments at FVOCI**

These assets are subsequently measured at each reporting period at fair value. Interest income under the EIR method, foreign gains and losses and impairment are recognised in Restated Consolidated Statement of Profit and Loss. Other net gains and losses are recognised in Other Comprehensive Income ("OCI"). On derecognition, gains and losses accumulated in OCI are reclassified to Restated Consolidated Statement of Profit and Loss.

##### **Equity investments designated at FVOCI**

These assets are subsequently measured at each reporting period at fair value. Dividends are recognised as income

in Restated Consolidated Statement of Profit and Loss unless the dividend clearly represents a recovery of part of the cost of the investment. Other net gains and losses are recognised in OCI and are not reclassified to Restated Consolidated Statement of Profit and Loss.

#### **Financial assets at FVTPL**

These assets are subsequently measured at each reporting period at fair value. Net gains and losses, including any interest or dividend income, are recognised in Restated Consolidated Statement of Profit and Loss.

### **ii. Financial liabilities**

Financial liabilities are classified and measured at amortised cost or FVTPL. A financial liability is classified as at FVTPL if it is classified as held-for-trading or it is designated as on initial recognition.

Financial liabilities and equity instruments issued by the Group are classified according to the substance of the contractual arrangements entered into and the definitions of a financial liability and an equity instrument.

All financial liabilities are recognised initially at fair value and, in the case of payables, net of directly attributable and incremental transaction cost.

Amortised cost is calculated by taking into account any discount or premium on acquisition and fees or costs that are an integral part of the Effective Interest Rate (EIR). The EIR amortisation is included as finance costs profit and loss.

### **iii. Derecognition**

#### **Financial assets**

The Group derecognizes a financial asset (or, where applicable, a part of a financial asset or part of a group of similar financial assets) when the contractual rights to receive cash flows from the financial asset expires or it transfers the rights to receive the contractual cash flows in a transaction or in which the Group neither transfers nor retains substantially all of the risks and rewards of ownership but does not retain control of the asset.

The Group sells, assigns (including co-lending transaction) its loans to counter-parties wherein the risk and reward of the asset is transferred for the entire/substantial portion of the Loan. As per Ind AS 109, Financial assets are derecognized on the date of assignment. Any right on interest on sold portion of asset is recognized as a financial asset at fair value, basis the scheduled cash flows on execution of the transaction estimated for prepayments and defaults. Estimated costs to be incurred for servicing the de-recognised portion is recorded as servicing liability at fair value.

On de-recognition of a financial asset in its entirety, the difference between the carrying amount (measured at the date of de-recognition) and the consideration received (including any new asset obtained less any new liability assumed) shall be recognized in profit or loss.

If the Group enters into transactions whereby it transfers assets recognized on its balance sheet, but retains either all or substantially all of the risks and rewards of the transferred assets, the transferred assets are not derecognised.

Financial assets subsequently measured at amortised cost are generally held for collection of contractual cashflow. The group on looking at economic viability of certain portfolios measured at amortised cost may enter into immaterial and infrequent transaction for sale of loans which doesn't affect the business model of the Group.

#### **Financial liabilities**

A financial liability is derecognised when the obligation under the liability is discharged or cancelled or expires.

When an existing financial liability is replaced by another from the same lender on substantially different terms, or the terms of an existing liability are substantially modified, such an exchange or modification is treated as the derecognition of the original liability and the recognition of a new liability. The difference in the respective carrying amounts is recognised in the statement of Profit and Loss.

#### **iv. Offsetting of financial instruments**

A financial asset and a financial liability is offset and presented on net basis in the balance sheet when there is a current legally enforceable right to set-off the recognised amounts and it is intended to either settle on net basis or to realise the asset and settle the liability simultaneously.

#### **v. Derivatives recorded at fair value through profit and loss**

A derivative is a financial instrument or other contract with all three of the following characteristics:

- Its value changes in response to the change in a specified interest rate, financial instrument price, commodity price, foreign exchange rate, index of prices or rates, credit rating or credit index, or other variable, provided that, in the case of a non-financial variable, it is not specific to a party to the contract (i.e., the 'underlying').
- It requires no initial net investment or an initial net investment that is smaller than would be required for other types of contracts expected to have a similar response to changes in market factors.
- It is settled at a future date.

The Group enters into derivative transactions with various counterparties to hedge its foreign currency risks, interest rate risks and equity price risks, respectively. These include cross-currency swaps, forward foreign exchange contracts, futures and options.

Derivatives are recorded at fair value and carried as assets when their fair value is positive and as liabilities when their fair value is negative. Changes in the fair value of derivatives are included in net gain on fair value changes unless hedge accounting is applied.

#### **vi. Embedded derivatives**

An embedded derivative is a component of a hybrid instrument that also includes a non-derivative host contract with the effect that some of the cash flows of the combined instrument vary in a way similar to a stand-alone derivative. An embedded derivative causes some or all of the cash flows that otherwise would be required by the contract to be modified according to a specified interest rate, financial instrument price, commodity price, foreign exchange rate, index of prices or rates, credit rating or credit index, or other variable, provided that, in the case of a non-financial variable, it is not specific to a party to the contract. A derivative that is attached to a financial instrument, but is contractually transferable independently of that instrument, or has a different counterparty from that instrument, is not an embedded derivative, but a separate financial instrument.

If the hybrid contract contains a host that is a financial asset / financial liability within the scope of Ind AS 109, the Group does not separate embedded derivatives. Rather, it applies the classification requirements contained in Ind AS 109 to the entire hybrid contract.

Derivatives embedded in all other host contracts are accounted for as separate derivatives and recorded at fair value if their economic characteristics and risks are not closely related to those of the host contracts and the host contracts are not held for trading or designated at fair value through profit or loss. These embedded derivatives are measured at fair value with changes in fair value recognised in profit or loss, unless designated as effective hedging instruments.

#### **Share capital**

Equity and preference shares are classified as equity. Incremental costs directly attributable to the issuance of new ordinary shares and share options are recognised as a deduction from equity, net of any tax effects.

#### **Business Combination**

Business combinations of entities under common control are accounted using the “pooling of interests” method and assets and liabilities are reflected at the predecessor carrying values and the only adjustments that are made are to harmonise accounting policies. The figures for the previous periods are restated as if the business combination had occurred at the beginning of the preceding period irrespective of the actual date of the combination.

## Impairment of financial assets

### Overview of the Expected Credit Losses ('ECL') principles

- The Group records allowance for expected credit losses for all loans, other debt financial assets not held at FVTPL, together with financial guarantee contracts, in this section all referred to as 'financial instruments'. Equity instruments are not subject to impairment under Ind AS 109.
- The ECL allowance is based on the credit losses expected to arise over the life of the asset (the lifetime expected credit loss), unless there has been no significant increase in credit risk since origination, in which case, the allowance is based on the 12 months' expected credit loss)
- Lifetime ECL are the expected credit losses resulting from all possible default events over the expected life of a financial instrument. The 12-month ECL is the portion of Lifetime ECL that represent the ECLs that result from default events on a financial instrument that are possible within the 12 months after the reporting date.
- Both Lifetime ECLs and 12-month ECLs are calculated on either an individual basis or a collective basis, depending on the nature of the underlying portfolio of financial instruments. The Group has established a policy to perform an assessment, at the end of each reporting period, of whether a financial instrument's credit risk has increased significantly since initial recognition, by considering the change in the risk of default occurring over the remaining life of the financial instrument. The Group does the assessment of significant increase in credit risk at a borrower level. Based on the above, the Group categorises its loans into Stage 1, Stage 2 and Stage 3 as described below:

#### Stage 1

All exposures where there has not been a significant increase in credit risk since initial recognition or that has low credit risk at the reporting date and that are not credit impaired upon origination are classified under this stage. The Group classifies all standard advances and advances upto 30 days default under this category. 12'month ECL is recognized on stage 1 exposures.

#### Stage 2

All exposures where there has been a significant increase in credit risk since initial recognition but are not credit impaired are classified under this stage. 31 Days Past Due is considered as significant increase in credit risk. Lifetime ECL is recognized for exposures with significant increase in credit risk.

#### Stage 3

All exposures assessed as credit impaired when one or more events that have a detrimental impact on the estimated future cash flows of that asset have occurred are classified in this stage.

- With effect from October 1, 2022, a financial instrument is considered as Stage 3 if the asset crosses 90 days past due and remains in overdue category. This is aligned to the definition of default for loan assets stipulated in RBI circular dated November 12, 2021 – "Prudential Norms on Income Recognition, Asset classification and Provisioning pertaining to Advances – Clarifications" (the "RBI circular"). For exposures that have become credit impaired, a lifetime ECL is recognized. Stage 3 exposures represent Non-Performing Assets (NPA).

### Credit-impaired financial assets:

At each reporting period, the Group assesses whether financial assets carried at amortised cost and FVOCI are credit-impaired. A financial asset is 'credit-impaired' when one or more events that have a detrimental impact on the estimated future cash flows of the financial asset have occurred.

Evidence that a financial asset is credit-impaired includes the following observable data:

- a) Significant financial difficulty of the borrower or issuer;
- b) A breach of contract such as a default or past due event;
- c) The restructuring of a loan or advance by the Group on terms that the Group would not consider otherwise;

- d) It is becoming probable that the borrower will enter bankruptcy or other financial reorganisation; or
- e) The disappearance of an active market for a security because of financial difficulties.

### **The mechanics of ECL:**

The Group calculates ECLs based on probability-weighted scenarios to measure the expected cash shortfalls, discounted at an approximation to the EIR. A cash shortfall is the difference between the cash flows that are due to the Group in accordance with the contract and the cash flows that the Group expects to receive.

The mechanics of the ECL calculations are outlined below and the key elements are, as follows:

**Probability of Default (PD)** - The Probability of Default is an estimate of the likelihood of default over a given time horizon. A default may only happen at a certain time over the assessed period, if the facility has not been previously derecognised and is still in the portfolio.

While estimating the PD, the Group reviews macro-economic developments occurring in the economy and market it operates in. On annual basis, the Group analyses if there is any relationship between key economic trends like GDP, unemployment rates, private consumption rate, Gross national saving/investment, real wholesale & retail trade and services with the estimate of PD. Typically, these macro-economic scenarios span a base case, plus an upside and downside scenario.

The ECL model allows for multiple macro-economic scenarios to be reflected in a probabilistic manner. The weights are reviewed on annual basis.

**Exposure at Default (EAD)**- The Exposure at Default is an estimate of the exposure at a future default date.

**Loss Given Default (LGD)**- The Loss Given Default is an estimate of the loss arising in the case where a default occurs at a given time. It is based on the difference between the contractual cash flows due and those that the lender would expect to receive, including from the realisation of any collateral. It is usually expressed as a percentage of the EAD. For products where empirical data is available LGD is determined based on historical recoveries.

For other products in absence of enough historical data, LGD rates are adopted from RBI circular “Implementation of the Internal Rating Based (IRB) Approaches for Calculation of Capital Charge for Credit Risk” by RBI dated December 22, 2011.- (RBI/2011-12/311 DBOD.No.BP.BC.67/21.06.202/2011-12).

The Group may also make additional impairment allowance based on its assessment of risk profile and create safeguard from potential future events.

### **Write-offs**

The Group writes off retail secured and unsecured loans which have a days past due (DPD) for more than 18 months and 15 months respectively. However, Small and Medium Enterprises (SME) Secured and Unsecured Loans, are written off on a case-to-case basis, based on the probability of recoverability. Any subsequent recoveries against such loans are credited to the statement of profit and loss.

### **Hedge accounting**

The Group makes use of derivative instruments to manage exposures to interest rate risk and foreign currency risk. In order to manage particular risks, the Group applies hedge accounting for transactions that meet specified criteria.

At the inception of a hedge relationship, the Group formally designates and documents the hedge relationship to which the Group wishes to apply hedge accounting and the risk management objective and strategy for undertaking the hedge. The documentation includes the Group’s risk management objective and strategy for undertaking hedge, the hedging/economic relationship, the hedged item or transaction, the nature of the risk being hedged, hedge ratio and how the Group would assess the effectiveness of changes in the hedging instrument’s fair value in offsetting the exposure to changes in the hedged item’s cash flows attributable to the hedged risk. Such hedges are expected to be highly effective in achieving offsetting changes in cash flows and are assessed on an on-going basis to determine that they actually have been highly effective throughout the financial reporting periods for which they were designated.

During the year, hedges that meet the criteria for hedge accounting and qualify as cash flow hedges are accounted as follows:

### **Cash flow hedge**

A cash flow hedge is a hedge of the exposure to variability in cash flows that is attributable to a particular risk associated with a recognised asset or liability and could affect profit or loss. For designated and qualifying cash flow hedges, the effective portion of the cumulative gain or loss on the hedging instrument is initially recognised directly in OCI within equity (cash flow hedge reserve). The ineffective portion of the gain or loss on the hedging instrument is recognised immediately as finance cost in the Statement of Profit and Loss. When the hedged cash flow affects the Statement of Profit and Loss, the effective portion of the gain or loss on the hedging instrument is recorded in the corresponding income or expense line of the Statement of Profit and Loss.

When a hedging instrument expires, is sold, terminated, exercised, or when a hedge no longer meets the criteria for hedge accounting, any cumulative gain or loss that has been recognised in OCI at that time remains in OCI and is recognised when the hedged forecast transaction is ultimately recognised in the statement of profit and loss.

When a forecast transaction is no longer expected to occur, the cumulative gain or loss that was reported in OCI is immediately transferred to the Statement of Profit and Loss.

### **Cash and cash equivalents**

Cash and cash equivalents in the balance sheet comprise cash at banks and on hand and short-term deposits with an original maturity of three months or less, which are subject to an insignificant risk of changes in value.

For the purpose of the statement of cash flows, cash and cash equivalents consist of cash and short-term deposits, as defined above, net of outstanding bank overdrafts as they are considered an integral part of the Group's cash management.

### **Share-based payment arrangements**

- a. The cost of equity-settled transactions is determined by the fair value at the date when the grant is made using an appropriate valuation model.
- b. That cost is recognised, together with a corresponding increase in share-based payment reserves in equity, over the period in which the performance and/or service conditions are fulfilled. The cumulative expense recognised for equity-settled transactions at each reporting date until the vesting date reflects the extent to which the vesting period has expired and the Group's best estimate of the number of equity instruments that will ultimately vest.
- c. When the terms of an equity-settled award are modified, the minimum expense recognised is the expense had the terms not been modified, if the original terms of the award are met. An additional expense is recognised for any modification that increases the total fair value of the share-based payment transaction, or is otherwise beneficial to the employee as measured at the date of modification. Where an award is cancelled by the entity or by the counterparty, any remaining element of the fair value of the award is expensed immediately through the Restated Consolidated Statement of Profit and Loss.
- d. The dilutive effect of outstanding options is reflected as additional share dilution in the computation of diluted earnings per share.

### **Lease Accounting**

The Group evaluates if an arrangement qualifies to be a lease as per the requirements of Ind AS 116. The Group uses significant judgement in assessing the lease term (including anticipated renewals) and the applicable discount rate.

The Group determines the lease term as the non-cancellable period of a lease, together with both periods covered by an option to extend the lease if the Group is reasonably certain to exercise that option; and periods covered by an option to terminate the lease if the Group is reasonably certain not to exercise that option. The Group revises the lease term if there is a change in the non-cancellable period of a lease.

At the date of commencement of the lease, the Group recognizes right – of – use (“ROU”) asset and a corresponding

lease liability for all lease arrangements in which it is a lessee, except for leases with a term of twelve months or less (short-term leases) and low value leases. For these short-term and low value leases, the Group recognizes the lease payments as an operating expense on a straight-line basis over the term of the lease.

The right-of-use assets are initially recognized at cost, which comprises the initial amount of the lease liability adjusted for any lease payments made at or prior to the commencement date of the lease plus any initial direct costs less any lease incentives. They are subsequently measured at cost less accumulated depreciation and impairment losses.

The lease liability is initially measured at amortised cost at the present value of the future lease payments. The lease payments are discounted using the incremental borrowing rates.

## **Income Tax**

Income tax expense comprises current and deferred tax. It is recognised in Statement of Profit and Loss except to the extent that it relates to a business combination or to an item recognised directly in equity or in other comprehensive income ('OCI').

### **Current tax**

Current tax comprises the expected tax payable or receivable on the taxable income or loss for the period and any adjustment to the tax payable or receivable in respect of previous years. The amount of current tax reflects the best estimate of the tax amount expected to be paid or received after considering the uncertainty, if any, related to income taxes. It is measured using tax rates enacted or substantively enacted at the reporting date.

Current tax assets and liabilities are offset only if, the Group:

- a) has a legally enforceable right to set off the recognised amounts; and
- b) intends to realise the asset or settle the liability on a net basis or simultaneously.

### **Deferred tax**

Income tax comprises of current tax and deferred tax. Income tax is recognised based on tax rates and tax laws enacted, or substantively enacted, at the reporting date and on any adjustment to tax payable in respect of previous years. It is recognised in the Statement of Profit and Loss except to the extent that it relates to items recognised in other comprehensive income or directly in equity, in which case the tax is recognised in the same statement as the related item appears. Deferred tax is recognised for temporary differences between the accounting base of assets and liabilities in the Balance Sheet, and their tax bases. Deferred tax is calculated using the tax rates expected to apply in the periods in which the assets will be realised or the liabilities settled. The carrying amount of deferred tax assets is reviewed at each reporting date by the Group and reduced to the extent that it is no longer probable that sufficient taxable profit will be available to allow all or part of the deferred tax asset to be utilised. Deferred tax assets and deferred tax liabilities are offset basis the criteria given under Ind AS 'Income Taxes'.

## **Property, plant and equipment**

### **Recognition and measurement**

Items of property, plant and equipment are measured at cost less accumulated depreciation and any accumulated impairment losses.

The cost of an item of property, plant and equipment comprises:

- (i) its purchase price, including import duties and non-refundable purchase taxes, after deducting trade discounts and rebates,
- (ii) any directly attributable costs of bringing the asset to the location and condition necessary for it to be capable of operating in the manner intended by management.

Income and expenses related to the incidental operations, not necessary to bring the item to the location and condition

necessary for it to be capable of operating in the manner intended by management, are recognised in Restated Consolidated Statement of Profit and Loss.

Any gain or loss on disposal of an item of property, plant and equipment is recognised in Restated Consolidated Statement of Profit and Loss.

### **Depreciation**

Depreciation is provided on straight line basis as per the useful life given under Schedule II of the Companies Act, 2013, and is generally recognised in the Restated Consolidated Statement of Profit and Loss.

Depreciation on additions / (disposals) is provided on a pro-rata basis i.e., from / (upto) the date which the asset is ready for use / (disposed of).

The useful life as per Schedule II are as follows:

| <b>Asset</b>           | <b>Useful life as per Schedule II</b> |
|------------------------|---------------------------------------|
| Buildings              | 60 years                              |
| Furniture & fixtures   | 10 years                              |
| Office equipment       | 5 years                               |
| Computers and printers | 3 years                               |
| Vehicles               | 8 years                               |

Depreciation methods, useful lives and residual values are reviewed at each reporting date and adjusted if appropriate. Based on technical evaluation and consequent advice, the management believes that its estimated useful life as given above best represent the period over which management expects to use these assets.

### **Intangible assets**

#### **Recognition and measurement**

Intangible assets (computer software) are stated at cost of acquisition less accumulated amortisation and impairment losses, if any. The cost of an intangible asset comprises its purchase price including any import duties and other taxes (other than those subsequently recoverable from the taxing authorities), and any directly attributable expenditure on making the asset ready for its intended use and net of any trade discounts and rebates.

#### **Subsequent expenditure**

Subsequent expenditure on an intangible asset is capitalised only when it increases the future economic benefits embodied in the specific asset to which it relates. All other expenditures are recognised in the Statement Profit and Loss as incurred.

#### **Amortisation**

Amortisation is calculated to write off the cost of intangible assets less their estimated residual values over their estimated useful life using the straight-line method, and is included in depreciation, amortisation and impairment in the Restated Consolidated Statement of Profit and Loss.

The intangible assets are amortised over the estimated useful life of 3 years.

Amortisation methods, useful life and residual values are reviewed at each reporting date and adjusted if appropriate.

### **Goodwill**

Goodwill on acquisition of subsidiaries is included in intangible assets. Goodwill is not amortised but it is tested for impairment annually, or more frequently if events or changes in circumstances indicate that it might be impaired, and is carried at cost less accumulated impairment losses. Gains and losses on the disposal of an entity include the carrying amount of goodwill relating to the entity sold.

Goodwill is allocated to cash-generating units for the purpose of impairment testing. The allocation is made to those

cash-generating units or Groups of cash-generating units that are expected to benefit from the business combination in which the goodwill arose. The units or Groups of units are identified at the lowest level at which goodwill is monitored for internal management purposes, which in our case are the operating segments.

### **Impairment of non-financial assets**

Goodwill and intangible assets that have an indefinite useful life are not subject to amortization and are tested annually for impairment, or more frequently if events or changes in circumstances indicate that they might be impaired.

The carrying values of these assets at each balance sheet date are reviewed to determine whether there is any indication of impairment. If any such indication exists, then the asset's recoverable amount is estimated.

The recoverable amount of these asset is the higher of its value in use and its fair value less costs to sell. Value in use is based on the estimated future cash flows, discounted to their present value using a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset.

If the carrying amount of the assets exceed the estimated recoverable amount, an impairment loss is recognised in the Restated Consolidated Statement of Profit and Loss for such excess amount.

In respect of assets (except goodwill) for which impairment loss has been recognised in prior periods, the Group reviews at each reporting date whether there is any indication that the loss has decreased or no longer exists. An impairment loss is reversed if there has been a change in the estimates used to determine the recoverable amount. Such reversal of impairment loss is recognised in the Restated Consolidated Statement of Profit and Loss, to the extent that the asset's carrying amount does not exceed the carrying amount that would have been determined, net of depreciation or amortisation, if no impairment loss had been recognised.

### **Revenue from operations**

#### **Recognition of interest and fee income or expense**

Dividend income is recognised on the date on which the Group's right to receive the payment is established.

Interest income or expense is recognised using the effective interest method.

The 'effective interest rate' is the rate that exactly discounts estimated future cash payments or receipts through the expected life of the financial instrument to:

- the gross carrying amount of the financial asset; or
- the amortised cost of the financial liability.

In calculating interest income and expense, the effective interest rate is applied to the gross carrying amount of the asset (when the asset is not credit-impaired) or to the amortised cost of the liability. However, for financial assets that have become credit-impaired subsequent to initial recognition, interest income is recognised by applying the effective interest rate to the recoverable amount of the financial asset. If the asset is no longer credit-impaired, then the calculation of interest income reverts to the gross basis.

#### **Fee and commission income:**

The Group recognises revenue from contracts with customers (other than financial assets to which Ind AS 109 'Financial instruments' is applicable) based on a comprehensive assessment model as set out in Ind AS 115 'Revenue from contracts with customers'. The Group identifies contract(s) with a customer and its performance obligations under the contract, determines the transaction price and its allocation to the performance obligations in the contract and recognises revenue only on satisfactory completion of performance obligations.

Loan related charges such as cheque bounce charges, foreclosure charges are recognised only on receipt basis.

### **Income from de-recognition of assets:**

Gains arising out of de-recognition transactions comprise the difference between the interest on the loan portfolio and the

applicable rate at which the transaction is entered into with the transferee, also known as the right of excess interest spread (EIS). The future EIS basis the scheduled cash flows on execution of the transaction estimated for prepayments and defaults, discounted at the applicable rate entered into with the transferee is recorded upfront, net off estimated cost, in the statement of profit and loss.

## **Finance Costs**

Finance costs include interest expense calculated using the EIR on respective financial instruments and borrowings including foreign currency borrowings measured at amortised cost, finance charges in respect of assets acquired on finance lease and exchange differences arising from foreign currency borrowings to the extent they are regarded as an adjustment to interest costs. All other Borrowing costs are recognised in the Statement of profit and loss in the period in which they are incurred.

## **Employee benefits**

### **Short-term employee benefits**

Short-term employee benefits are expensed as the related service is provided. A liability is recognised for the amount expected to be paid if the Group has a present legal or constructive obligation to pay this amount as a result of past service provided by the employee and the obligation can be estimated reliably.

### **Contribution to provident fund and Employees' State Insurance Corporation (ESIC)**

Group's contribution paid/payable during the period to provident fund and ESIC is recognised in the Statement of profit and loss.

### **Gratuity**

The Group's liability towards gratuity scheme is determined by independent actuaries, using the projected unit credit method. The present value of the defined benefit obligation is determined by discounting the estimated future cash outflows by reference to market yields at the end of the reporting period on government bonds that have terms approximating to the terms of the related obligation.

The net interest cost is calculated by applying the discount rate to the net balance of the defined benefit obligation. This cost is included in employee benefit expense in the Statement of profit and loss.

Remeasurement of defined benefit plans, comprising of actuarial gains / losses, return on plan assets excluding interest income are recognised immediately in the balance sheet with corresponding debit or credit to Other Comprehensive Income (OCI). Remeasurements are not reclassified to Statement of profit and loss in the subsequent period.

### **Compensated absence**

The Group does not have a policy of encashment of unavailed leaves for its employees and are not permitted to carry forward the leaves. Hence there is no liability towards compensated absence.

## **Foreign currency**

### **Transaction and balances**

Transactions in foreign currencies are translated into the functional currency of the Group at the exchange rates at the dates of the transactions or an average rate if the average rate approximates the actual rate at the date of the transaction.

Foreign currency transactions are recorded on initial recognition in the functional currency, using the exchange rate at the date of the transaction. At each closing date, foreign currency monetary items are reported using the closing exchange rate.

Exchange differences that arise on settlement of monetary items or on reporting at each balance sheet date of the Group's monetary items at the closing rate are recognized as income and expenses in the period in which they arise.

Non-monetary items that are measured in terms of historical cost in a foreign currency are translated using the exchange rates at the dates of transactions. Non-monetary items that are measured at fair value in a foreign currency shall be translated using the exchange rates at the date when the fair value was determined. Exchange differences are recognised in the Restated Consolidated Statement of Profit and Loss.

### **Earnings per share**

The basic earnings per share (“EPS”) is computed by dividing the net profit / (loss) after tax for the period attributable to the equity shareholders by the weighted average number of equity shares outstanding during the period.

For the purpose of calculating diluted earnings per share, net profit / (loss) after tax for the period attributable to the equity shareholders and the weighted average number of equity shares outstanding during the period are adjusted for the effects of all dilutive potential equity shares

### **Statement of Cash flows**

Cash flows are reported using the indirect method, whereby profit for the period is adjusted for the effects of transactions of a non-cash nature, any deferrals or accruals of past or future operating cash receipts or payments and items of income or expenses associated with investing or financing cash flows. The cash flows from operating, investing and financing activities of the Group are segregated.

### **Segment Reporting**

The Group operates in a single reportable segment i.e., financing, since the nature of the loans are exposed to similar risk and return profiles hence they are collectively operating under a single segment. The Group operates in a single geographical segment i.e. domestic.

### **Provisions, contingent liabilities and contingent assets**

#### **Provisions**

Provisions are recognized when there is a present obligation (legal or constructive) as a result of a past event, it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation and a reliable estimate can be made of the amount of the obligation.

The expenses relating to a provision is presented in the Restated Consolidated Statement of Profit and Loss.

If the effect of the time value of money is material, provisions are determined by discounting the expected future cash flows specific to the liability. The unwinding of the discount is recognised as finance cost.

#### **Onerous contracts**

Provisions for onerous contracts are recognized when the expected benefits to be derived from a contract are lower than the unavoidable costs of meeting the future obligations under the contract. The provision is measured at the present value of the lower of the expected cost of terminating the contract and the expected net cost of continuing with the contract. Before a provision is established, the Group recognises any impairment loss on the assets associated with that contract.

#### **Contingent liabilities**

A disclosure for a contingent liability is made when there is a possible obligation or a present obligation that may, but will probably not, require an outflow of resources. When there is a possible obligation of a present obligation in respect of which the likelihood of outflow of resources is remote, no disclosure is made.

The Group has a process whereby periodically all long term contracts (including derivative contracts) are assessed for material foreseeable losses. The Group assesses its obligations arising in the normal course of business, including pending litigations, proceedings pending with tax authorities and other contracts including derivative and long term contracts periodically and ensures that appropriate treatment has been made as required under Ind AS.

## **Contingent assets**

Contingent assets are not recognised in the financial statements. However, contingent assets are assessed continually and if it is virtually certain that an economic benefit will arise, the asset and related income are recognised in the period in which the change occurs.

Provisions, contingent assets, contingent liabilities and commitments are reviewed at each reporting date.

## **Exceptional items**

When items of income and expense within profit or loss from ordinary activities are of such size, nature or incidence that their disclosure is relevant to explain the performance of the enterprise for the period, the nature and amount of such items is disclosed separately as exceptional items.

## **PRINCIPAL COMPONENTS OF INCOME AND EXPENDITURE**

### **Total Income**

Total income comprises revenue from operations and other income.

### **Total Revenue From Operations**

In the event of a significant increase in any component, an explanation should be provided, particularly for higher borrowings or changes in borrowing mix.
- Net loss on derecognition of financial instruments under amortised cost: Reflects losses recognised upon the derecognition of financial instruments carried at amortised cost.
- Impairment on financial instruments (net of recoveries): Includes provisions for expected credit losses on loans and other financial assets, loan write-offs (based on company policy, e.g., technical write-off after a threshold

- Fees and commission income increased from ₹218.05 million for the year ended March 31, 2023 to ₹330.85 million for the year ended March 31, 2024. - Net (loss)/gain on fair value changes – increased from ₹50.17 million for the year ended March 31, 2023 to ₹133.38 million for the year ended March 31, 2024. Other income increased by 55.63% from ₹150.55 million in the year ended March 31, 2023 to ₹234.30 million in the year ended March 31, 2024. The primary driver was a significant rise in marketing income from ₹51.00 million for the year ended March 31, 2023 to ₹196.31 million for the year ended March 31, 2024 attributable to a new marketing agreement with a third party, allowing us to promote their products through our branches.

This increase was partially offset by a decrease in business support charges, which fell by 12.66% from ₹27.33 million in the year ended March 31, 2023 to ₹23.87 million in the year ended March 31, 2024.

The main contributors to this increase were higher finance costs, a net loss on derecognition of financial instruments under the amortised cost category, increased employee benefit expenses, and other expenses.

Notably, despite the rise in absolute expenses, expense efficiency improved. Total expenses as a proportion of total revenue from operations declined to 68.87% in the year ended March 31, 2024 from 72.71% in the year ended March 31, 2023.

The main factor for this increase was a 42.81% increase in interest on borrowings which increased from ₹2,313.20 million in the year ended March 31, 2023 to ₹3,303.58 million in the year ended March 31, 2024.

This increase corresponds with a significant increase in borrowings (other than debt securities), which went up from ₹27,124.69 million as at March 31, 2023 to ₹40,472.59 million as at March 31, 2024.

In contrast, interest on debentures decreased by 10.39%, decreasing from ₹1,096.84 million in the year ended March 31, 2023 to ₹982.86 million in the year ended March 31, 2024. This reduction was due to a decrease in the level of debt securities during year.

### ***Other Expense***

Other expense increased by 31.75% from ₹918.44 million for the year ended March 31, 2023 to ₹1,210.00 million for the year ended March 31, 2024, mainly due to higher information technology expenses and collection expenses. Information technology expenses increased by 46.63% from ₹174.84 million for the year ended March 31, 2023 to ₹256.36 million for the year ended March 31, 2024, reflecting increased storage and processing costs driven by a larger customer base and higher loan volumes. In the year ended March 31, 2023, InCred Premier Distribution Private Limited (*formerly known as “mValu Technology Services Private Limited”*) which was as associate of InCred TechInvest Private Limited (*formerly known as “Booth Fintech Private Limited”*) became subsidiary on account of change in shareholding. In addition to this, there was a goodwill impairment of ₹ 195.65 million.

As at December 31, 2025, current tax assets (net) were ₹206.08 million, a decrease from ₹459.42 million as at December 31, 2024. This decrease primarily reflects the utilization of tax deducted at source (“TDS”) balances and advance tax payments against current tax liabilities, consistent with higher profits earned during the period.

As at March 31, 2025, current tax assets (net) decreased to ₹348.56 million from ₹465.82 million as at March 31, 2024, compared with ₹503.91 million as at March 31, 2023. This decrease mainly reflects lower tax deducted at source on payments received by IFSL.

IFSL obtained what is called a ‘Lower TDS Certificate’ from the tax authority, which allows IFSL to have less tax deducted on its income at the point of receipt. This reduces the amount of tax IFSL needs to claim back later as a refund, leading to lower current tax assets on the balance sheet. In addition, because IFSL had accumulated tax losses from prior years, it was able to offset these losses against recent profits. This offsetting reduced both current tax assets (which represent advance tax payments and TDS that can be recovered) and deferred tax assets (which generally relate to higher taxes paid in current year to be set off against future profit).

#### **Deferred tax assets (net)**

#### **Capital work-in-progress**

As at December 31, 2025, capital work-in-progress was ₹13.20 million, a decrease from ₹18.98 million as at December 31, 2024. This decrease primarily reflects capitalization of projects completed and transferred to property, plant and equipment during the period.

As at March 31, 2025, capital work-in-progress decreased to ₹23.02 million from ₹33.66 million as at March 31, 2024. This decrease occurred primarily because several new branches opened during the period. When a branch becomes operational, its associated costs, previously recorded as capital work-in-progress are transferred (or “capitalized”) to property, plant and equipment. As a result, capital work-in-progress reduced. The decrease also reflected a reduction in ongoing branch-related expenses and software implementation costs, as fewer projects remained unfinished at the year end.

As at March 31, 2024, capital work-in-progress increased to ₹33.66 million from ₹16.18 million as at March 31, 2023. This increase mainly reflects higher spending on new branch set-ups that were not yet completed by the end of the financial year. Until the branches opened became operational, these costs remained classified as capital work-in-progress.

In summary, capital work-in-progress increases when there are more expenses for projects that are not yet ready for use

(such as branches under construction or software being implemented), and it decreases as these projects are completed, and their costs are transferred to property, plant and equipment.

## Goodwill

As at December 31, 2025, goodwill increased to ₹708.30 million from ₹664.56 million as at December 31, 2024, following the recognition of ₹95.69 million in new goodwill arising from the acquisition of software as part of a business combination with B Singh Tech Services Private Limited (“BSTSPL”) during the nine month period ended December 31, 2025, partially offset by an impairment charge of ₹51.95 million recognized consequent to the disposal of the Group’s entire equity stake in its step-down subsidiary, InCred Finserv Private Limited, resulting in loss of control. Goodwill had remained consistent at ₹664.56 million as at December 31, 2024 and March 31, 2025 and March 31, 2024, with no new acquisitions or impairment charges during those periods. Previously, as at March 31, 2023, goodwill was ₹677.87 million, which decreased to ₹664.56 million as at March 31, 2024 driven by an impairment charge of ₹13.32 million, recognized after our impairment assessment. Goodwill balances are reviewed regularly, and management continues to assess their carrying value based on business performance, regulatory developments, and annual impairment testing.

## Other intangible assets

As at December 31, 2025, other intangible assets were ₹517.03 million, a significant increase from ₹25.87 million as at December 31, 2024. This increase was primarily on account of recognition of software of ₹681.70 million acquired through the BSTSPL business combination during the nine month period ended December 31, 2025, mainly offset by the amortization charge during the period.

As at March 31, 2025, the carrying value of other intangible assets decreased to ₹18.99 million from ₹39.34 million as at March 31, 2024, mainly due to amortisation of software. The previous year also saw a decrease in other intangible assets from ₹66.64 million as at March 31, 2023 to ₹39.34 million as at March 31, 2024, again attributable to the amortisation charge. Amortisation of software is recognised over a period of three years, in line with the asset's estimated useful life. This systematic allocation of cost is similar to depreciation, but applies to intangible assets such as software.

## Other non-financial assets

As at December 31, 2025, other non-financial assets were ₹746.17 million, a decrease from ₹840.22 million as at December 31, 2024.

As at March 31, 2025, other non-financial assets had increased to ₹788.50 million from ₹464.20 million as at March 31, 2024.

## QUALITATIVE AND QUANTITATIVE DISCLOSURE ABOUT RISKS

In the course of our business, we are exposed to certain financial risks namely credit risk, interest risk, market risk & liquidity risk. Our primary focus is to achieve better predictability of financial markets and seek to minimise potential adverse effects on its financial performance. The financial risks are managed in accordance with our risk management policy which has been approved by our Board.

Our Board has the overall responsibility for the establishment and oversight of our risk management framework. Our Board has established the Risk Management Committee, which is responsible for developing and monitoring our risk management policies. The committee reports regularly to the board of directors on its activities.

Our risk management policies are established to identify and analyse the risks faced by us, to set appropriate risk limits and controls and to monitor risks and adherence to limits. Risk management policies and systems are reviewed regularly to reflect changes in market conditions and our activities.

## Credit Risk

Credit risk is the risk of financial loss to us if a customer or counterparty to a financial instrument fails to meet its contractual obligations i.e. receivables from customers, investments in debt securities. Credit risk arises from loans and advances, investments carried at amortised cost and deposits with banks and financial institutions.

## Liquidity Risk

Liquidity Risk refers to insufficiency of funds to meet the financial obligations. Liquidity Risk Management implies maintenance of sufficient cash and marketable securities and the availability of funding through an adequate amount of committed credit lines to meet obligations when due.

We have formulated an Asset Liability Management Policy. The Asset Liability Management Committee (“ALCO”) is responsible for the management of our short-term, medium-term and long-term funding and liquidity management requirements. We manage liquidity risk by maintaining adequate reserves, banking facilities and by continuously monitoring forecast and actual cash flows, and by assessing the maturity profiles of financial assets and liabilities.

### **Price Risk**

We are exposed to price risk arising from investment in mutual funds and investment in debt securities classified in the balance sheet at fair value through profit & loss and at fair value through other comprehensive income, respectively.

### **Foreign Currency Risk**

We are exposed to foreign currency fluctuation risk for its external currency borrowing (“ECB”). Our borrowings in foreign currency are governed by RBI guidelines (RBI master direction RBI/FED/2018-19/67 dated March 26, 2019 and updated from time to time) which requires entities raising ECB for an average maturity of less than 5 years to hedge minimum 70% of our ECB exposure (Principal and Coupon). We hedge our entire ECB exposure for the full tenure of the ECB as per Board approved policy. For our ECB, we evaluate the foreign currency exchange rates, tenure of ECB and its fully hedged costs. We are following hedge accounting. We manage our currency risks by entering into derivatives contracts as hedge positions and the same are being governed through the Board approved policy.

### **UNUSUAL OR INFREQUENT EVENTS OR TRANSACTIONS**

Except as described in this UDRHP-I, there have been no unusual or infrequent events or transactions that have in the past or may in the future affect our business operations or future financial performance.

### **KNOWN TRENDS OR UNCERTAINTIES**

Our business has been subject, and we expect it to continue to be subject, to significant economic changes arising from the trends identified above in “—*Significant Factors affecting our Results of Operations*” and the uncertainties described in the section “*Risk Factors*” on page 24. Except as discussed in this UDRHP-I, there are no known trends or uncertainties that have or had or are expected to have a material adverse impact on our revenues or income.

### **NEW PRODUCTS OR BUSINESS SEGMENTS**

Except as described in this UDRHP-I, we have not publicly announced any new products or business segments, nor have there been any material increases in our revenues due to increased disbursements and the introduction of new products.

### **FUTURE RELATIONSHIP BETWEEN COST AND INCOME**

Other than as described elsewhere in this section and sections “*Risk Factors*”, and “*Our Business*” on pages 24 and 258, respectively there are no known factors that will have a material adverse impact on our operations and financial condition.

### **SIGNIFICANT DEPENDENCE ON A SINGLE OR FEW CUSTOMERS OR SUPPLIERS**

Given the nature of our business operations, we do not believe our business is dependent on any single or a few customers or suppliers.

### **SEASONALITY/CYCLICALITY OF BUSINESS**

Our disbursements and loan originations under the student loan portfolio are concentrated around specific periods of the year, primarily corresponding to academic admission cycles most notably during the months preceding the commencement of international academic sessions, typically between April and September each year. This seasonality results in pronounced peaks in demand for student loans during certain months, followed by periods of relatively lower activity. Consequently, our monthly or quarterly operational results, disbursement volumes, and associated cash flows may exhibit substantial fluctuations that are not necessarily indicative of full-year performance. For further information,

see “*Risk Factors – 26. Our student loan business is subject to significant seasonality, which may lead to fluctuations in our operating performance, cash flows, and financial condition.*” on page 44.

**SIGNIFICANT DEVELOPMENTS AFTER DECEMBER 31, 2025 THAT MAY AFFECT OUR FUTURE RESULTS OF OPERATIONS**

Except as disclosed below and elsewhere in this UDRHP-I, no circumstances have arisen since December 31, 2025 that could materially and adversely affect, or are likely to affect, our operations or profitability, or the value of our assets or our ability to pay our material liabilities within the next 12 months.

**2. Outstanding litigation proceedings initiated by our Subsidiaries**

*i. Material civil litigations*

- a. A petition under Section 7 of the Insolvency and Bankruptcy Code, 2016, ("**Petition**") was by filed InCred Financial Services Limited ("**IFSL**") against Resonance Eduventures Limited ("**REL**") by filing CP (IB) No. 63/7/JPR/2024 before the National Company Law Tribunal at Jaipur ("**NCLT**") on July 25, 2024. The liability of the REL arises from a consolidated default under three financial debt facilities extended by IFSL to two special purpose vehicles, Accelerating Education and Development Private Limited ("**AEDPL**") and RKV Enterprises Private Limited ("**RKVEPL**"), both of which are promoted by REL. REL is a signatory to the financing documents for all three facilities as the "Reference Entity" and is the ultimate beneficiary of the financial debt. In addition to being a reference entity, REL is contractually obligated as a co-obligor to make repayments upon default by the primary borrowers, AEDPL and RKVEPL. Due to continued and consolidated defaults across these facilities, the accounts were classified as NPAs, and IFSL issued default notices to REL on March 8, 2024 and subsequently filed the Petition. REL filed its reply before the NCLT on August 26, 2024, disputing its status as the corporate debtor and raising other objections. IFSL submitted its rejoinder on September 3, 2024, reaffirming REL's position as the corporate debtor and noting that REL had not disputed the disbursement or default, thereby supporting admission of the Petition in line with established precedents. The Petition was dismissed by NCLT vide order dated February 10, 2026 and subsequently IFSL has filed an appeal under Section 61 of the Insolvency and Bankruptcy Code, 2016, ("**Appeal**") bearing filing number 9910101/02666/2026 before the National Company Law Appellate Tribunal at New Delhi ("**NCLAT**") dated March 12, 2026.

Further, IFSL has executed an assignment agreement dated April 30, 2026 for the assignment of the loan facility to AEDPL and transfer of NCDs of AEDPL and RKVEPL to Assets Care & Reconstruction Enterprise Limited for an aggregate consideration of ₹449.00 million.

- b. A writ petition bearing number W.P.(C) 6466/2025 dated May 9, 2025 ("**Writ Petition**") was filed by Vistra ITCL (India) Ltd. (in its capacity as security trustee on behalf of InCred Financial Services Limited ("**IFSL**") and L&T Finance Limited) with the High Court of Delhi at New Delhi ("**High Court**"), challenging the orders dated February 25, 2025 and February 27, 2025 issued by the Learned Adjudicating Authority ("**AA**") under the Prevention of Money Laundering Act, 2002 ("**PMLA**") against ND Telecom Services Private Limited. The impugned orders rejected an application made under Section 8(2) of the

PMLA, which sought a hearing regarding a provisional attachment order dated September 5, 2024 which was not furnished to IFSL.

The Writ Petition was listed on May 16, 2025 before the High Court wherein the High Court refused to stay on the operation of the impugned order and instead the High Court gave IFSL the liberty to approach it in the event that the Directorate of Enforcement (“ED”) takes any precipitative actions against the properties of IFSL. ED has filed its reply to the Writ Petition on July 29, 2025. The next date of hearing is October 27, 2026.

- c. An appeal bearing number FPA-PMLA-4188/BNG/2021 (“**Appeal**”) was filed by IFSL before the Appellate Tribunal, Prevention of Money Laundering Act, New Delhi (“**Adjudicatory Authority**”) under the Prevention of Money Laundering Act, 2002, being aggrieved by the order dated March 19, 2021 passed by Adjudicatory Authority wherein they had confirmed the provisional attachment order dated September 24, 2020 (“**Order**”) passed by the Directorate of Enforcement, Bengaluru Zonal Office (“**ED**”). In the Order certain immovable and movable properties beneficially owned by the borrower of IFSL were attached by the ED. These properties had been mortgaged to IFSL as security for loans advanced by it and IFSL filed the Appeal asserting its rights as a secured creditor. IFSL contended that the mortgaged properties had been acquired by the borrowers much prior to the commission of the alleged offences and therefore could not constitute proceeds of crime, and that the loans had been granted after carrying out due diligence on the borrowers’ financials and creditworthiness.

Since the Presiding Officer’s court of the Adjudicatory Authority was vacant, IFSL had filed a Writ Petition No. 6354 of 2022 on April 18, 2022 before the High Court of Delhi at New Delhi for setting aside the Order (“**Writ Petition**”). In the alternative, IFSL had also sought for appointment of the Presiding Officer for adjudication on their Appeal. However, in the interim a Presiding Officer was appointed and the Appeal of IFSL was dismissed. Subsequently, IFSL withdrew the Writ Petition filed before Delhi High Court and filed a restoration application dated November 19, 2024 before the Adjudicatory Authority (“**Restoration Application**”) wherein the Adjudicatory Authority was pleased to allow the Restoration Application. The Enforcement Directorate has filed its reply to IFSL’s appeal and a rejoinder was filed by IFSL against the said reply. The case is now listed for final arguments on May 12, 2026.

The Accused had availed a loan facility for an amount of ₹100.00 million from IFSL which were later siphoned off to different manufacturers other than those mentioned under the loan agreement. Thereafter, a forensic audit was conducted on behalf of the lenders in 2023 wherein the forensic report concluded that the identified audit areas are low-risk, the explanations provided are satisfactory, and the findings do not indicate any instances of fraud. Further, IFSL has recently taken steps to declassify the Accused from the fraud category and has made / is in the process of making all necessary filings under applicable law. Any representation to the contrary is a criminal offence in the United States. In making an investment decision, investors must rely on their own examination of our Company and the terms of the Offer, including the merits and risks involved.

transferred except in an “offshore transaction” in accordance with Regulation S to a person outside the United States and not known by the transferor to be a U.S. Person by pre arrangement or otherwise (such permitted transactions including, for the avoidance of doubt, a bona fide sale on the BSE or NSE).

Until the expiry of 40 days after the commencement of the Offer, an offer or sale of the Equity Shares within the United States by a dealer (whether or not it is participating in the Offer) may violate the registration requirements of the U.S. Securities Act unless made pursuant to Rule 144A or another available exemption from the registration requirements of the U.S. Securities Act and in accordance with applicable state securities laws in the United States.

11. the purchaser understands and acknowledges that our Company may be considered a “covered fund” for purposes of the Volcker Rule. The definition of “covered fund” in the Volcker Rule includes (generally) any entity that would be an investment company under the U.S. Investment Company Act, but for the exceptions provided under Section 3(c)(1) or 3(c)(7) thereunder. Because our Company relies on Section 3(c)(7) of the U.S. Investment Company Act for its exclusion from registration thereunder, it may be considered to be a covered fund. ## **ERISA CONSIDERATIONS**

The following is a summary of certain considerations associated with the purchase and holding of Equity Shares by Benefit Plan Investors. A “Benefit Plan Investor” is (1) an “employee benefit plan” (as defined in Section 3(3) of the United States Employee Retirement Income Security Act, as amended (“ERISA”)) that is subject to Title I of ERISA, (2) a plan, individual retirement account, “Keogh” plan or other arrangement subject to Section 4975 of the United States Internal Revenue Code of 1986, as amended (the “Code”), or provisions under any United States federal, state or local laws, or non-U.S. or other laws or regulations that are similar to such provisions of the Code or ERISA, (3) an entity whose underlying assets are considered to include “plan assets” by reason of a plan’s investment in such entity (including but not limited to an insurance company general account) (each of (1), (2) and (3), a “Plan”), and (4) any entity that otherwise constitutes a “benefit plan investor” within the meaning of the regulations promulgated under ERISA by the U.S. Department of Labor (the “DOL”), as modified by Section 3(42) of ERISA (the “DOL Plan Asset Regulations”).

The following is merely a summary, however, and should not be construed as legal advice or as complete in all relevant respects. All investors are urged to consult their own legal advisors before investing assets of a Plan in Equity Shares and to make their own independent decision.

### **General Fiduciary Matters**

ERISA and the Code impose certain duties on persons who are fiduciaries of a Plan subject to Title I of ERISA or Section 4975 of the Code and prohibit certain transactions involving the assets of a Plan and its fiduciaries or other interested parties. Under ERISA and the Code, any person who exercises any discretionary authority or control over the administration of such a Plan or the management or disposition of the assets of such a Plan, or who renders investment advice for a fee or other compensation to such a Plan, is generally considered to be a fiduciary of the Plan.

In considering an investment in Equity Shares with a portion of the assets of any Plan, a fiduciary should determine whether the investment is in accordance with the documents and instruments governing the Plan and the applicable provisions of ERISA, the Code or any similar law relating to a fiduciary’s duties to the Plan including, without limitation, the prudence, diversification, delegation of control and prohibited transaction provisions of ERISA, the Code and any other applicable United States federal, state or local laws, or non-US or other laws or regulations that are similar to the Code or ERISA (collectively, “Similar Laws”).

### **Prohibited Transaction Considerations**

Section 406 of ERISA and Section 4975 of the Code prohibit Plans from engaging in specified transactions involving plan assets with persons or entities who are “parties in interest,” within the meaning of Section 406 of ERISA, or “disqualified persons,” within the meaning of Section 4975 of the Code, unless an exemption is available. A party in

interest or disqualified person who engages in a non-exempt prohibited transaction may be subject to excise taxes and other penalties and liabilities under ERISA and the Code and may result in the disqualification of an individual retirement account. In addition, the fiduciary of the Plan that engages in such a non-exempt prohibited transaction may be subject to penalties and liabilities under ERISA and/or the Code.

Regardless of whether or not the underlying assets of our Company (if any) are deemed to include “plan assets,” as described below, the acquisition and/or holding of Equity Shares by a Plan with respect to which our Company or an underwriter is considered a party in interest or a disqualified person may constitute or result in a direct or indirect prohibited transaction under Section 406 of ERISA and/or Section 4975 of the Code, unless the investment is acquired and is held in accordance with an applicable statutory, class or individual prohibited transaction exemption. In this regard, the DOL has issued prohibited transaction class exemptions, or PTCEs, that may apply to the acquisition and holding of Equity Shares. These class exemptions include, without limitation, PTCE 84-14 respecting transactions determined by independent qualified professional asset managers, PTCE 90-1 respecting insurance company pooled separate accounts, PTCE 91-38 respecting bank collective investment funds, PTCE 95-60 respecting life insurance company general accounts and PTCE 96-23 respecting transactions determined by in-house asset managers. In addition, Section 408(b)(17) of ERISA and Section 4975(d)(20) of the Code provide an exemption from the prohibited transaction provisions of Section 406 of ERISA and Section 4975 of the Code for certain transactions, provided that neither the issuer of the securities nor any of its affiliates (directly or indirectly) have or exercise any discretionary authority or control or render any investment advice with respect to the assets of any Plan involved in the transaction and provided further that the Plan receives no less, and pays no more, than adequate consideration in connection with the transaction. There can be no assurance that all of the conditions of any such exemptions will be satisfied or that any such exemptions will be available with respect to investments in interests in any Equity Shares.

### **Plan Asset Considerations**

The DOL Plan Asset Regulations generally provide that when a Plan acquires an equity interest in an entity that is not (1) a “publicly-offered security,” (2) a security issued by an investment company registered under the Investment Company Act, or (3) an “operating company,” the Plan’s assets are deemed to include both the equity interest and an undivided interest in each of the underlying assets of the entity unless it is established that the equity participation in the entity by Benefit Plan Investors is not “significant” (the “**Insignificant Participation Test**”).

For purposes of the DOL Plan Asset Regulations, an “operating company” is an entity that is primarily engaged, directly or through a majority-owned subsidiary or subsidiaries, in the production or sale of a product or service, other than the investment of capital. It is anticipated that our Company will qualify as an operating company within the meaning of the DOL Plan Asset Regulations, although no assurance can be given in this regard.

For purposes of the Insignificant Participation Test, the DOL Plan Asset Regulations provide that equity participation in an entity by Benefit Plan Investors is not significant if, immediately after the most recent acquisition of an equity interest in the entity, the Benefit Plan Investors’ aggregate interest is less than 25% of the value of each class of equity interests in the entity, disregarding, for purposes of such determination, any interests held by any person that has discretionary authority or control with respect to the assets of our Company or who provides investment advice for a fee with respect to the assets of our Company or an affiliate of our Company (each, a “**Controlling Person**”) other than Benefit Plan Investors. Following this offering, it is possible that Benefit Plan Investors will hold and will continue to hold, less than 25% of the value of each class of equity interests of our Company, disregarding, for purposes of such determination, any interests held by any Controlling Person other than Benefit Plan Investors and, as such, that our Company may rely on the Insignificant Participation Test; however, we cannot be certain or make any assurance that this will be the case.

### **Plan Asset Consequences**

If assets of our Company were deemed to constitute “plan assets” pursuant to the DOL Plan Asset Regulations, the operation and administration of our Company would become subject to the requirements of ERISA, including the fiduciary duty rules and the “prohibited transaction” prohibitions of ERISA, as well as the “prohibited transaction” prohibitions contained in the Code. If our Company becomes subject to these regulations, unless appropriate administrative exemptions are available (and there can be no assurance that they would be), our Company could, among other things, be restricted from entering into otherwise favorable transactions, and certain transactions entered into by our Company in the ordinary course of business could constitute non-exempt prohibited transactions and/or breaches of applicable fiduciary duties under ERISA and/or the Code, which could, in turn, result in potentially substantial excise taxes and other penalties and liabilities under ERISA and the Code.

### **Representation**

Because of the foregoing, Equity Shares should not be acquired or held by any Benefit Plan Investor or any other person investing “plan assets” of any Plan, unless such acquisition and holding will not constitute a non-exempt prohibited transaction under ERISA and the Code and will not constitute a similar violation of any applicable Similar Law.

Any purchaser or subsequent transferee, including, without limitation, any fiduciary purchasing on behalf of a Plan, a Benefit Plan Investor, or a governmental, church or non-U.S. plan which is subject to Similar Laws will be deemed to have represented and warranted, in its corporate and fiduciary capacity, that if the purchaser or subsequent transferee is a Benefit Plan Investor, none of our Company or the underwriters or any of their respective affiliates, has acted as the Plan’s fiduciary (within the meaning of ERISA or the Code), or has been relied upon for any advice, with respect to the purchaser or transferee’s decision to acquire and hold Equity Shares, and shall not at any time be relied upon as the ERISA Plan’s fiduciary with respect to any decision to acquire, continue to hold or transfer Equity Shares.

The foregoing discussion is general in nature, is not intended to be all-inclusive. Such discussion should not be construed as legal advice. Due to the complexity of these rules and the penalties that may be imposed upon persons involved in non-exempt prohibited transactions, it is particularly important that fiduciaries, or other persons considering investing in Equity Shares on behalf of, or with the assets of, any Plan consult with counsel regarding the potential applicability of ERISA, Section 4975 of the Code and Similar Laws to such investment and whether an exemption would be applicable to the acquisition and/or holding of Equity Shares.

### **Phased implementation of Unified Payments Interface**

SEBI has issued the UPI Circulars in relation to streamlining the process of public issue of *inter alia* equity shares and convertibles by introducing an alternate payment mechanism using UPI. Pursuant to the relevant UPI Circulars, the UPI Mechanism has been introduced in a phased manner as a payment mechanism (in addition to mechanism of blocking funds in the account maintained with SCSBs under ASBA) for applications by UPI Bidder through Designated Intermediaries with the objective to reduce the time duration from public issue closure to listing from six Working Days to up to three Working Days. Considering the time required for making necessary changes to the systems and to ensure complete and smooth transition to the UPI payment mechanism, the UPI Circulars have introduced and implemented the UPI Mechanism in three phases in the following manner:

**Phase I:** This phase was applicable from January 1, 2019 until March 31, 2019 or floating of five main board public issues, whichever was later. Subsequently, the timeline for implementation of Phase I was extended until June 30, 2019. Under this phase, an RIB had the option to submit the ASBA Form with any of the Designated Intermediary and use his/her UPI ID for the purpose of blocking of funds. The time duration from public issue closure to listing continued to be six Working Days.

**Phase II:** This phase was applicable from July 1, 2019 and was to initially continue for a period of three months or floating of five main board public issues, whichever is later. SEBI pursuant to its circular no. SEBI/HO/CFD/DCR2/CIR/P/2019/133 dated November 8, 2019, had decided to extend the timeline for implementation of UPI Phase II until March 31, 2020. Subsequently, SEBI pursuant to its circular no. SEBI/HO/CFD/DIL2/CIR/P/2020/50 dated March 30, 2020 extended the timeline for implementation of UPI Phase II till further notice. Under this phase, submission of the ASBA Form by RIBs through Designated Intermediaries (other than SCSBs) to SCSBs for blocking of funds was discontinued and replaced by the UPI Mechanism. However, the time duration from public issue closure to listing continued to be six Working Days during this phase.

**Phase III:** This phase became applicable on a voluntary basis for all issues opening on or after September 1, 2023 and on a mandatory basis for all issues opening on or after December 1, 2023, vide SEBI circular bearing number SEBI/HO/CFD/TPD1/CIR/P/2023/140 dated August 9, 2023 ("**T+3 Notification**"). In this phase, the time duration from public issue closure to listing has been reduced to three Working Days. The Offer shall be undertaken pursuant to the processes and procedures as notified in the T+3 Notification as applicable, subject to any circulars, clarification or notification issued by SEBI from time to time, including any circular, clarification or notification which may be issued by SEBI.

The processing fees for applications made by UPI Bidders using the UPI Mechanism may be released to the SCSBs only after such banks provide a written confirmation, in compliance with the SEBI RTA Master Circular and SEBI ICDR Master Circular, in a format as prescribed by SEBI, from time to time, and such payment of processing fees to the SCSBs shall be made in compliance with circulars prescribed by SEBI and applicable law.

All SCSBs offering the facility of making application in public issues shall also provide facility to make application using UPI.

NPCI through its circular (NPCI/UPI/OC No. 127/ 2021-22) dated December 9, 2021, *inter alia*, has enhanced the per transaction limit from ₹ 0.20 million to ₹ 0.50 million for applications using UPI in initial public offerings.

Pursuant to the SEBI ICDR Master Circular, SEBI has set out specific requirements for redressal of investor grievances for applications that have been made through the UPI Mechanism. The requirements of the ICDR Master Circular include appointment of a nodal officer by the SCSB and submission of their details to SEBI, the requirement for SCSBs to send SMS alerts for the blocking and unblocking of UPI mandates, the requirement for the Registrar to submit details of

cancelled, withdrawn or deleted applications, and the requirement for the bank accounts of unsuccessful Bidders to be unblocked no later than one day from the date on which the Basis of Allotment is finalised. Failure to unblock the accounts within the timeline would result in the SCSBs being penalised under the relevant securities law. Additionally, if there is any delay in the redressal of investors' complaints, the relevant SCSB as well as the post-Offer BRLM will be required to compensate the concerned investor.

All SCSBs offering facility of making application in public issues shall also provide facility to make application using UPI.

Our Company will be required to appoint one of the SCSBs as a sponsor bank to act as a conduit between the Stock Exchanges and NPCI in order to facilitate collection of requests and/or payment instructions of the UPI Bidders.

The Sponsor Bank(s) shall host a web portal for intermediaries (closed user group) from the date of Bid/Offer Opening Date till the date of listing of the Equity Shares with details of statistics of mandate blocks/unblocks, performance of apps and UPI handles, down-time/network latency (if any) across intermediaries and any such processes having an impact/bearing on the Offer bidding process.

For further details, refer to the General Information Document available on the websites of the Stock Exchanges and the BRLMs.

## Bids by FPIs

In terms of the SEBI FPI Regulations, the issue of Equity Shares to a single FPI or an investor group (which means the same multiple entities having common ownership directly or indirectly of more than 50% or common control) must be below 10% of our post-Offer Equity Share capital. Further, in terms of the FEMA Non-debt Instruments Rules, the total holding by each FPI, of an investor group, shall be below 10% of the total paid-up Equity Share capital of our Company on a fully diluted basis and the aggregate limit for FPI investments shall be the sectoral caps applicable to our Company, which is 100% of the total paid-up Equity Share capital of our Company on a fully diluted basis. In case the total holding of an FPI or investor group increases beyond 10% of the total paid-up Equity Share capital of our Company, on a fully diluted basis, the total investment made by the FPI, or investor group will be re-classified as FDI subject to the conditions as specified by SEBI and the RBI in this regard and our Company and the investor will be required to comply with applicable reporting requirements. Further, the total holdings of all FPIs put together, with effect from April 1, 2020, can be up to the sectoral cap applicable to the sector in which our Company operates (i.e., up to 100% under the automatic route).

In terms of the FEMA Rules, for calculating the aggregate holding of FPIs in a company, holding of all registered FPIs shall be included. Bids by FPIs which utilise the multi investment manager structure, submitted with the same PAN but with different beneficiary account numbers, Client IDs and DP IDs may not be treated as multiple Bids.

FPIs are permitted to participate in the Offer subject to compliance with conditions and restrictions which may be specified by the Government from time to time. In terms of the FEMA Non-debt Instruments Rules, for calculating the aggregate holding of FPIs in a company, holding of all registered FPIs shall be included.

SEBI, pursuant to its circular dated July 13, 2018, has directed that at the time of finalisation of the Basis of Allotment, the Registrar shall (i) use the PAN issued by the Income Tax Department of India for checking compliance for a single FPI; and (ii) obtain validation from Depositories for the FPIs who have invested in the Offer to ensure there is no breach of the investment limit, within the timelines for Offer procedure, as prescribed by SEBI from time to time.

Subject to compliance with all applicable Indian laws, rules, regulations, guidelines and approvals in terms of the SEBI FPI Regulations, an FPI, may issue, subscribe to or otherwise deal in offshore derivative instruments (as defined under the SEBI FPI Regulations as any instrument, by whatever name called, which is issued overseas by a FPI against securities held by it in India, as its underlying) directly or indirectly, only in the event (i) such offshore derivative instruments are issued only by persons registered as Category I FPIs; (ii) such offshore derivative instruments are issued only to persons eligible for registration as Category I FPIs; (iii) such offshore derivative instruments are issued after compliance with 'know your client' norms; and (iv) such other conditions as may be specified by SEBI from time to time.

An FPI issuing offshore derivative instruments is also required to ensure that any transfer of offshore derivative instruments issued by, or on behalf of it subject to, *inter alia*, the following conditions:

1. such offshore derivative instruments are transferred to persons subject to fulfilment of SEBI FPI Regulations; and
2. prior consent of the FPI is obtained for such transfer, except when the persons to whom the offshore derivative instruments are to be transferred are pre-approved by the FPI.

The FPIs who wish to participate in the Offer are advised to use the Bid cum Application Form for non-residents.

Bids received from FPIs bearing the same PAN shall be treated as multiple Bids and are liable to be rejected, except for Bids from FPIs that utilize the multiple investment manager structure in accordance with the operational guidelines for FPIs and designated Depository Participants issued to facilitate implementation of SEBI FPI Regulations (such structure referred to as "**MIM Structure**"), provided such Bids have been made with different beneficiary account numbers, Client IDs and DP IDs.

Accordingly, it should be noted that multiple Bids received from FPIs, who do not utilize the MIM Structure, and bear the same PAN, are liable to be rejected. In order to ensure valid Bids, FPIs making multiple Bids using the same PAN, and with different beneficiary account numbers, Client IDs and DP IDs, are required to provide a confirmation in the Bid cum Application Forms that the relevant FPIs making multiple Bids utilize the MIM Structure. In the absence of such confirmation from the relevant FPIs, such multiple Bids shall be rejected.

Further, in the following cases, Bids by FPIs shall not be treated as multiple Bids:

1. FPIs which utilise the MIM structure, indicating the name of their respective investment managers in such confirmation;
2. Offshore derivative instruments which have obtained separate FPI registration for ODI and proprietary derivative investments;
3. Sub funds or separate class of investors with segregated portfolio who obtain separate FPI registration;
4. FPI registrations granted at investment strategy level/sub fund level where a collective investment scheme or fund has multiple investment strategies/sub-funds with identifiable differences and managed by a single investment manager;
5. Multiple branches in different jurisdictions of foreign bank registered as FPIs;

6. Government and Government related investors registered as Category 1 FPIs; and
7. Entities registered as collective investment scheme having multiple share classes.

The Bids belonging to any of the above mentioned seven structures and having same PAN may be collated and identified as a single Bid in the Bidding process. The Equity Shares allotted in the Bid may be proportionately distributed to the applicant FPIs (with same PAN). In order to ensure valid Bids, FPIs making multiple Bids using the same PAN, and with different beneficiary account numbers, Client IDs and DP IDs, are required to provide a confirmation along with each of their Bid cum Application Forms that the relevant FPIs making multiple Bids utilize any of the above-mentioned structures and indicate the name of their respective investment managers in such confirmation. In the absence of such confirmation from the relevant FPIs, such multiple Bids shall be rejected.

For example, an FPI must ensure that any Bid by a single FPI and/ or an investor group (which means the same multiple entities having common ownership directly or indirectly of more than 50% or common control) (collective, the “FPI Group”) shall be below 10% of the total paid-up Equity Share capital of our Company on a fully diluted basis. ## RESTRICTIONS ON FOREIGN OWNERSHIP OF INDIAN SECURITIES

Foreign investment in Indian securities is regulated through the Industrial Policy, 1991 of the Government of India and FEMA. While the Industrial Policy, 1991 prescribes the limits and the conditions subject to which foreign investment can be made in different sectors of the Indian economy, FEMA regulates the precise manner in which such investment may be made. Foreign investment is permitted (except in the prohibited sectors) in Indian companies, either through the automatic route or the approval route, depending upon the sector in which foreign investment is sought to be made. The responsibility of granting approval for foreign investment under the Consolidated FDI Policy (defined herein below) and FEMA has been entrusted to the concerned ministries / departments.

The Government of India has from time to time made policy pronouncements on FDI through press notes and press releases. The DPIIT issued the Consolidated FDI Policy Circular dated October 15, 2020, with effect from October 15, 2020 (the “**Consolidated FDI Policy**”), which consolidates and supersedes all previous press notes, press releases and clarifications on FDI issued by the DPIIT that were in force and effect prior to October 15, 2020. The FDI Policy will be valid until the DPIIT issues an updated circular. FDI in companies engaged in sectors/ activities which are not listed in the FDI Policy is permitted up to 100% of the paid up share capital of such company under the automatic route, subject to compliance with certain prescribed conditions. For further details, see “*Key Regulations and Policies*” on page 295.

The transfer of shares between an Indian resident and a non-resident does not require the prior approval of the RBI, provided that: (i) the activities of the investee company are under the automatic route under the foreign direct investment policy and transfer does not attract the provisions of the SEBI Takeover Regulations; (ii) the non-resident shareholding is within the sectoral limits under the Consolidated FDI policy; and (iii) the pricing is in accordance with the guidelines prescribed by the SEBI/RBI.

As per the existing policy of the Government of India, OCBs cannot participate in this Offer. For details, see “*Offer Procedure*” on page 568.

On October 17, 2019, Ministry of Finance, Department of Economic Affairs, had notified the FEMA Rules, which had replaced the Foreign Exchange Management (Transfer and Issue of Security by a Person Resident Outside India) Regulations 2017. Foreign investment in this Offer shall be on the basis of the FEMA Rules. Further, in accordance with Press Note No. 3 (2020 Series), dated April 17, 2020 issued by the DPIIT and the FEMA Rules, any investment, subscription, purchase or sale of equity instruments by entities, investments under the foreign direct investment route by entities of a country which shares land border with India or where the beneficial owner of an investment into India is situated in or is a citizen of any such country will require prior approval of the Government of India. Further, in the event of transfer of ownership of any existing or future foreign direct investment in an entity in India, directly or indirectly, resulting in the beneficial ownership falling within the aforesaid restriction/ purview, such subsequent change in the beneficial ownership will also require approval of the Government of India. Each Bidder should seek independent legal advice about its ability to participate in the Offer. In the event such prior approval of the Government of India is required, and such approval has been obtained, the Bidder shall intimate our Company and the Registrar in writing about such approval along with a copy thereof within the Offer Period.

Further, in the event of withdrawal, postponement or abandonment of the IPO or the IPO not being successful or consummated or completed, all Offer related expenses (including but not limited to the costs, charges, fees and reimbursement of the BRLMs and the legal counsels in relation to the IPO) which may have accrued up to the date of such withdrawal, abandonment, postponement or failure shall be borne by our Company, unless required by Applicable Law or written observations issued by any governmental authority in relation to the Offer.

No portion of the consideration payable by the Exit Drag Purchaser(s) to any Shareholder shall be payable in consideration other than cash, and the Exit Drag Offer Price shall reflect the entirety of the consideration payable in respect of the Transfer of the Exit Drag Securities. The Exit Drag Purchaser shall be a *bona fide* Third Party purchaser(s) and shall not be an Affiliate or a Related Party or a proxy of any Shareholder.
- 14.3.5 If the Exit Drag Purchaser(s) acquiring or proposing to acquire any Exit Drag Securities from KKR is not a Qualified Purchaser, and KKR has not consented to such sale, KKR shall not be obligated to sell any portion of the Exit Drag Securities held by them to such Exit Drag Purchaser(s).

- 14.3.9 No Shareholder shall be required to provide any representations, warranties or indemnities, or incur any liability, in respect of any matters relating to the business, management or operations of the Company, provided that each Shareholder shall be required to provide representations, warranties and indemnities, if so requested by the Company or the Exit Drag Purchaser(s) in relation to such Shareholder’s authority and capacity to enter into such Transfer and the title to Exit Drag Securities proposed to be Transferred by it.

The Company, and if the Individual Promoter is the CEO at such time, the Individual Promoter, shall take all such actions as may be required to facilitate such sale of the Exit Drag Securities, including by providing diligence access and information to, and cooperating, with the Exit Drag Purchaser(s) in connection with such sale. Any representations, warranties or indemnities that are required to be provided to the Exit Drag Purchaser(s) in relation to the business, management or operations of the Company, shall be provided only by the Company, and shall be standard and customary in nature. InCred Holdings Limited

[Address]

Ladies and Gentlemen:

This letter (“**Resale Letter**”) relates to the sale or other transfer by us of equity shares (the “**Shares**”) of the Company, which is required to be in an “offshore transaction” as defined in, and in reliance on, Regulation S (“**Regulation S**”) under the Securities Act of 1933, as amended (the “**U.S. Securities Act**”).

Terms used in this Resale Letter are used as defined in Regulation S, except as otherwise stated herein.

We hereby represent and warrant to you as follows:

- (a) We previously purchased the Shares for our own account (or for one or more beneficial owners for which we have acted as fiduciary or agent, with complete investment discretion and with authority to bind each such person), as both a “qualified institutional buyer” (as defined in Rule 144A under the U.S. Securities Act) and a “qualified purchaser” (as defined in Section 2(a)(51) and related rules of the Investment Company Act of 1940, as amended, and the rules thereunder (the “**U.S. Investment Company Act**”). We understand that the Shares have not been and will not be registered under the U.S. Securities Act and that the Company has not registered and will not register as an investment company under the U.S. Investment Company Act).
- (b) The offer and sale of the Shares by us was not made to a person in the United States or to a U.S. Person (as defined in Regulation S).
- (c) Either:
  - (i) at the time the buy order for the sale of the Shares by us was originated, the buyer was outside the United States or we and any person acting on our behalf reasonably believed that the buyer was outside the United States; or
  - (ii) the transfer of the Shares by us was executed in, on or through the facilities of the [●] Stock Exchange or the [●] Stock Exchange, and neither we nor any person acting on our behalf has reason to believe that the transaction was pre-arranged with a buyer in the United States.
