

INFORMATION UPDATE

Dt: 16 February 2016

The Board of Directors of Technofab Engineering have approved the unaudited financial results for the quarter and nine months ending 31 December 2015 at its meeting held on 11 February 2016.

The Turnover (standalone) during the quarter was Rs 119.4 Crores. This is 9.4% higher than the immediately preceding quarter and 5.1% higher than the corresponding quarter in the previous fiscal year.

The cumulative turnover for the nine month ending 31 December 2015 was Rs 321.2 Crores which is 8.5% higher than the corresponding nine month period of the preceding fiscal year.

The pre tax profit for the quarter and nine months ending 31 December 2015 was Rs 3.5 Crores and Rs 9.8 Crores respectively which is 12% and 44% higher than the corresponding quarter and nine month period of the previous fiscal year

The profit after tax was Rs 2.42 Crores for the quarter and Rs 6.51 Crores for the nine month period ending 31 December 2015 which is 16% and 38% higher than the corresponding quarter and nine month period of the previous fiscal year.

The Company would also like to share the following:

There is now a visible, though so far slight, upturn in business sentiment. The Company has for the last approximately six months received a larger number of enquiries and is making bids commensurately. At the same time the Company has also received two new domestic orders, one each from the Industrial and Electrical sectors. A large number of bids are outstanding in the domestic as well as the overseas market.

The business situation in the traditional power sector, both thermal and nuclear continues to be un promising, and a revival in the short term is not expected. This is now factored into the Company's business plan. The domestic water sector appears to be poised for a huge impetus on account of urban renewal and river cleaning oriented action plans. The electrical distribution and rural electrification sectors, including sub stations will continue to provide ample opportunities. Alongside, the Company expects that the focus on modernisation of railways, solid waste management and renewables would contribute to new business opportunities. The Company continues to vigorously pursue opportunities in all sectors in sub Saharan Africa and in nearby SAARC countries.

With Liberia having been declared Ebola free, the Company has remobilised on the World Bank funded project in that country and work there is now in full swing.

There continues to be pressure on out standings as retentions increase on ongoing projects and due to time being taken in closure of old jobs which are at their final completion stage.

The order book currently stands at over Rs 1200 Crores. Bids worth over Rs 5000 Crores in both domestic and overseas markets are pending. The Company is quietly confident of a decent flow of fresh orders in 2016 and this in turn should result in the Company enhancing its growth rate.

Additional information is enclosed.

An investors con call is planned to be organised on Friday 19th february 2016 at 4:30 pm. This will be separately confirmed by intimation to the Stock Exchanges.
