Launching Today: Infosys Topaz Fabric™ – Composable Stack of AI Agents, Services and Models to Accelerate Value from Enterprise AI Investments

Bengaluru, India – November 3, 2025: [Infosys](#) (NSE, BSE, NYSE: INFY), a global leader in next-generation digital services and consulting, today announced the launch of [Infosys Topaz Fabric](#). This is a stack of layered, composable, open and interoperable data infrastructure, models, agents, flows, and AI apps that help unify and accelerate IT service delivery across the enterprise landscape. Infosys Topaz Fabric makes it simple for enterprises to access services-as-software – both integrated and modular – through a comprehensive one-shop. It unlocks enterprise value by reimagining IT processes, building on existing IT investments, and bringing together AI-led capabilities out-of-the-box while avoiding vendor lock-ins.

The enterprise services delivered through Infosys Topaz Fabric include IT operations, transformation services, quality engineering services, and cybersecurity services. It also brings 50+ agents that are purpose-built for IT operations with out-of-the-box integration with 9 enterprise platforms.

Infosys forward deployed engineers, in collaboration with the enterprise business teams, ensure that Infosys Topaz Fabric is contextualized to the enterprise's specific landscape, and delivers high quality IT services with exponential speed and accuracy.

The services are delivered with AI agents operating with humans in the loop. AI agents execute end-to-end workflows with human in/off loop, eliminate, or automate tasks, and augment humans in performing tasks. For example, the Infosys AI HR agent can process an employee query regarding business travel, over chat or email, and additionally generate the corresponding travel request. Human workers supervise, train and continuously contextualize the out-of-the-box AI agents to ensure accuracy, governance, and ethical alignment.

Satish H.C., Chief Delivery Officer, Infosys, said, "Infosys Topaz Fabric brings to our clients the resilience that comes from combining the transformative powers of artificial intelligence with human creativity to supercharge service delivery across the enterprise landscape, while building on their existing investments. This approach lets them reimagine their services stack to become the powerful engine that can accelerate to match the pace of business and deliver for them the competitive advantage that they need."

Laxmi Srinivas Samayamantri, Vice President, Global Engineering, Data & Architecture, Nu Skin, said, "We are collaborating with Infosys to enrich beauty and wellness commerce IT operations through the power of Agentic AI. Together, we are expanding this further with Infosys Topaz Fabric by enabling Agent Assist features, which we anticipate will increase automation for application and infrastructure support, enhance resilience, and elevate the user experience."

To know more about Infosys Topaz Fabric, please watch this [video](#).

Infosys Topaz Fabric, amplified with cutting edge AI through collaborations with AI solution providers and AI native startups from the Infosys partner ecosystem, is designed to accelerate value realization from enterprise AI transformation programs.

About Infosys

Infosys is a global leader in next-generation digital services and consulting. Over 320,000 of our people work to amplify human potential and create the next opportunity for people, businesses, and communities. Safe Harbor

Certain statements in this release concerning our future growth prospects, or our future financial or operating performance, are forward-looking statements intended to qualify for the 'safe harbor' under the Private Securities Litigation Reform Act of 1995, which involve a number of risks and uncertainties that could cause actual results or outcomes to differ materially from those in such forward-looking statements. The risks and uncertainties relating to these statements include, but are not limited to, risks and uncertainties regarding the execution of our business strategy, increased competition for talent, our ability to attract and retain personnel, increase in wages, investments to reskill our employees, our ability to effectively implement a hybrid work model, economic uncertainties and geo-political situations, technological disruptions and innovations such as artificial intelligence ("AI"), generative AI, the complex and evolving regulatory landscape including immigration regulation changes, our ESG vision, our capital allocation policy and expectations concerning our market position, future operations, margins, profitability, liquidity, capital resources, our corporate actions including acquisitions, and cybersecurity matters. Important factors that may cause actual results or outcomes to differ from those implied by the forward-looking statements are discussed in more detail in our US Securities and Exchange Commission filings including our Annual Report on Form 20-F for the fiscal year ended March 31, 2025. These filings are available at www.sec.gov. Infosys may, from time to time, make additional written and oral forward-looking statements, including statements contained in the Company's filings with the Securities and Exchange Commission and our reports to shareholders. The Company does not undertake to update any forward-looking statements that may be made from time to time by or on behalf of the Company unless it is required by law.
