PRESS RELEASE

Infosys and Indian Institute for Human Settlements Host BioConserve Summit 2025 to Advance the Urban Sustainability Dialogue

Convening educators, researchers, corporate leaders, policymakers, and NGOs to accelerate collective action for sustainable environmental change and a greener future

Bengaluru, India – January 7, 2025: [Infosys](#) (NSE, BSE, NYSE: INFY), a global leader in next-generation digital services and consulting, today jointly convened the inaugural **BioConserve Summit 2025**, with the [Indian Institute for Human Settlements \(IIHS\)](#), India's national knowledge institution committed to its urban transformation. This event, held at the Infosys Bengaluru campus, brought together diverse stakeholders, including individuals representing academic and research institutions, architectural firms, NGOs, corporates, and government bodies, to co-create biodiversity conservation strategies for urban spaces and campuses.

Biodiversity preservation requires urgent collective action. The BioConserve Summit 2025 served as a collaborative platform for knowledge sharing among experts from academia, research, government bodies, and industry. The discussions ranged from the critical issue of biodiversity loss to land sharing approaches, ecological restoration planning, urban biodiversity integration, campus sustainability, among other similar topics. Recognizing the significant role of large urban campuses in supporting biodiversity, the summit explored how these spaces can be designed, managed, and utilized for conserving ecosystems and supporting sustainable environments through innovative solutions and collaborative action.

Nandan Nilekani, Co-founder and Chairman, Infosys, said, "Sustainability is a shared responsibility, and addressing it requires collaboration across industries and sectors. The BioConserve Summit 2025 is a call to action to preserve and protect our planet's natural wealth while redefining how we approach urban expansion. It serves as a critical platform for uniting visionaries, urban planners, policymakers, and environmental experts to address the urgent challenges facing our ecosystems. Infosys, with a long-standing commitment to environmental stewardship, is delighted to host this platform with IIHS, and we look forward to fostering partnerships that drive meaningful change."

Aromar Revi, Founding Director of IIHS, said, "Urban areas are emerging as critical spaces for biodiversity action and nature-based solutions to address the climate crisis. The BioConserve Summit 2025 provides an opportunity for institutions, corporates, and policymakers to concretely enhance biodiversity conservation and restoration – addressing one of the world's most pressing challenges, from the local to

global scale. We are glad to partner with Infosys to unlock innovative solutions to transform urban landscapes into sustainable ecosystems.”

About Infosys

Infosys is a global leader in next-generation digital services and consulting. Over 300,000 of our people work to amplify human potential and create the next opportunity for people, businesses and communities. We enable clients in more than 56 countries to navigate their digital transformation. With over four decades of experience in managing the systems and workings of global enterprises, we expertly steer clients, as they navigate their digital transformation powered by cloud and AI. We enable them with an AI-first core, empower the business with agile digital at scale and drive continuous improvement with always-on learning through the transfer of digital skills, expertise, and ideas from our innovation ecosystem. We are deeply committed to being a well-governed, environmentally sustainable organization where diverse talent thrives in an inclusive workplace.

Safe Harbor

Certain statements in this release concerning our future growth prospects, or our future financial or operating performance, are forward-looking statements intended to qualify for the 'safe harbor' under the Private Securities Litigation Reform Act of 1995, which involve a number of risks and uncertainties that could cause actual results or outcomes to differ materially from those in such forward-looking statements. The risks and uncertainties relating to these statements include, but are not limited to, risks and uncertainties regarding the execution of our business strategy, increased competition for talent, our ability to attract and retain personnel, increase in wages, investments to reskill our employees, our ability to effectively implement a hybrid work model, economic uncertainties and geo-political situations, technological disruptions and innovations such as Generative AI, the complex and evolving regulatory landscape including immigration regulation changes, our ESG vision, our capital allocation policy and expectations concerning our market position, future operations, margins, profitability, liquidity, capital resources, our corporate actions including acquisitions, and cybersecurity matters. Important factors that may cause actual results or outcomes to differ from those implied by the forward-looking statements are discussed in more detail in our US Securities and Exchange Commission filings including our Annual Report on Form 20-F for the fiscal year ended March 31, 2024. These filings are available at www.sec.gov. Infosys may, from time to time, make additional written and oral forward-looking statements, including statements contained in the Company's filings with the Securities and Exchange Commission and our reports to shareholders. The Company does not undertake to update any forward-looking statements that may be made from time to time by or on behalf of the Company unless it is required by law.
