Incora and Infosys Collaborate to Advance AI-Enabled Supply Chain Operations

Leveraging Infosys Topaz and the Infosys EdgeVerve AI Next Platform, collaboration unites AI innovation with aerospace supply chain expertise to drive faster, more accurate, and resilient operations globally

Fort Worth, Texas and Bengaluru, India – March 10, 2026: [Infosys](#) (NSE, BSE, NYSE: INFY), a global leader in next-generation digital services and consulting, and [Incora](#), a leading provider of innovative supply chain solutions in the aerospace and defense industry, today announced a new strategic collaboration to advance the use of artificial intelligence across Incora's global supply chain operations.

Through the multi-year alliance, Incora will work closely with Infosys to implement AI-enabled capabilities supporting operations across more than 60 countries. The initiative leverages [Infosys Topaz](#), an AI-first set of services, solutions and platforms using generative AI technologies, including the [Infosys EdgeVerve AI Next Platform](#), to help modernize Incora's supply chain environment by integrating with its existing multi-ERP landscape and enabling greater visibility, accuracy and responsiveness across core operational workflows.

"Infosys brings proven leadership in AI and large-scale digital transformation, making them an ideal choice as we continue to modernize our global supply chain," said **Hari Kumar Rajendran, Executive Vice President of Global Operations, Incora**. "This alliance allows us to apply advanced AI capabilities in a practical, enterprise-wide way. Together, we are building a foundation that enables Incora to better serve our customers today and adapt to the future of aerospace and defense supply chains."

"Supply chain transformation at this scale requires deep industry expertise and a strong AI foundation," said **Jasmeet Singh, Executive Vice President and Global Head of Manufacturing, Infosys**. "By applying Infosys Topaz and the EdgeVerve AI Next Platform, we are working with Incora to orchestrate complex, multi-system environments, reduce operational friction, and enable faster, more informed decision-making across its global enterprise."

As part of the alliance, Infosys will lead the design and deployment of a non-intrusive AI platform that harmonizes data and processes across Incora's systems without disrupting day-to-day operations. The collaboration brings together Infosys' leadership in AI-driven digital transformation and Incora's deep aerospace and defense supply chain expertise, reflecting a broader industry shift toward scalable, AI-enabled operating models that address legacy systems, fragmented data and increasing global complexity.

The pairing underscores both companies' shared commitment to innovation and operational excellence. By combining Infosys' AI-first platforms with Incora's global supply chain footprint, the collaboration is expected to deliver meaningful efficiency gains while helping set new benchmarks for digital transformation across the aerospace and defense industry.

About Infosys

Infosys is a global leader in next-generation digital services and consulting. Over 330,000 of our people work to amplify human potential and create the next opportunity for people, businesses and communities. We enable clients in 63 countries to navigate their digital transformation. With over four decades of experience in managing the systems and workings of global enterprises, we expertly steer clients, as they navigate their digital transformation powered by cloud and AI. We enable them with an AI-first core, empower the business with agile digital at scale and drive continuous improvement with always-on learning through the transfer of digital skills, expertise, and ideas from our innovation ecosystem. We are deeply committed to being a well-governed, environmentally sustainable organization where diverse talent thrives in an inclusive workplace.

Safe Harbor

Certain statements in this release concerning our future growth prospects, or our future financial or operating performance, are forward-looking statements intended to qualify for the 'safe harbor' under the Private Securities Litigation Reform Act of 1995, which involve a number of risks and uncertainties that could cause actual results or outcomes to differ materially from those in such forward-looking statements. The risks and uncertainties relating to these statements include, but are not limited to, risks and uncertainties regarding the execution of our business strategy, increased competition for talent, our ability to attract and retain personnel, increase in wages, investments to reskill our employees, our ability to effectively implement a hybrid work model, economic uncertainties and geo-political situations, technological disruptions and innovations such as artificial intelligence ("AI"), generative AI, the complex and evolving regulatory landscape including immigration regulation changes, our ESG vision, our capital allocation policy and expectations concerning our market position, future operations, margins, profitability, liquidity, capital resources, our corporate actions including acquisitions, and cybersecurity matters. Important factors that may cause actual results or outcomes to differ from those implied by the forward-looking statements are discussed in more detail in our US Securities and Exchange Commission filings including our Annual Report on Form 20-F for the fiscal year ended March 31, 2025. These filings are available at www.sec.gov. Infosys may, from time to time, make additional written and oral forward-looking statements, including statements contained in the Company's filings with the Securities and Exchange Commission and our reports to shareholders. The Company does not undertake to update any forward-looking statements that may be made from time to time by or on behalf of the Company unless it is required by law.
