PRESS RELEASE

Infosys Launches Boundaryless Data Lake Offering Powered by its Information Grid Solution on Amazon Web Services

San Francisco, CA – May 24, 2017: Infosys (NYSE: INFY), a global leader in consulting, technology, outsourcing and next-generation services, today announced the launch of the Infosys Boundaryless Data Lake offering powered by its Information Grid Solution on Amazon Web Services (AWS).The solution allows enterprises to do more with their data by making it possible for them to leverage the insights it provides to reduce time-to-market, create new revenue models, reduce latency and improve operational efficiencies through near real-time decision making.

With the vast volume of information and data available, companies need to rethink ways to create and drive business intelligence insights without boundaries. Keeping this objective in mind, Infosys has developed its Information Grid Solution that powers the Data Lake offering on AWS. The solution enables universal access to data and has the ability to perform analytics pervasively, thereby amplifying the potential to get new business insights.

A leading consumer packaged goods company leveraged the Information Grid Solution to re-platform its global distributor sales management application on AWS. The solution significantly reduced end-to-end data processing time, addressed performance issues with visualization and led to overall cost reduction.

A professional tools manufacturer built its Data Lake on AWS using Infosys' Boundaryless Data Lake offering leveraging AWS native services such as Amazon Elastic MapReduce (Amazon EMR), Amazon Simple Storage Service (Amazon S3) and Amazon Aurora. The solution helped reduce organizational complexity by transforming and correlating data from discrete sources, while optimizing manufacturing, supply chains and SKUs listing.

“Infosys partnered with Levi Strauss & Co’s e-commerce business to build a first party data analytics solution on AWS,” said **Abigail Johnson, Senior Program Manager eCommerce, Levi Strauss & Co**. “The solution, built by Infosys, enables consumer insights of clickstream and e-commerce data to activate consumer revenue growth actions across marketing touch points.”

Sandeep Dadlani, President and Head of Americas, Infosys said, “Our collaboration with AWS allows clients to fast track their data on to the cloud. The Infosys Boundaryless Data Lake offering powered by

Infosys Information Grid Solution on AWS will help enterprises reduce latency, improve time to market and bring in operational efficiencies."

"Our enterprise customers are looking for powerful tools built on AWS that help them increase the business value they can generate from their vast amounts of data," said **Mike Clayville, Vice President, Worldwide Commercial Sales at AWS**. "These enterprises can use the Boundaryless Data Lake offering from Infosys to create the necessary foundation for a range of data and analytics needs, while also taking full advantage of the breadth of services and pace of innovation that AWS provides."

About Infosys Ltd
Infosys is a global leader in technology services and consulting. We enable clients in more than 50 countries to create and execute strategies for their digital transformation. From engineering to application development, knowledge management and business process management, we help our clients find the right problems to solve, and to solve these effectively. Safe Harbor
Certain statements in this press release concerning our future growth prospects are forward-looking statements regarding our future business expectations intended to qualify for the 'safe harbor' under the Private Securities Litigation Reform Act of 1995, which involve a number of risks and uncertainties that could cause actual results to differ materially from those in such forward-looking statements. The risks and uncertainties relating to these statements include, but are not limited to, risks and uncertainties regarding fluctuations in earnings, fluctuations in foreign exchange rates, our ability to manage growth, intense competition in IT services including those factors which may affect our cost advantage, wage increases in India, our ability to attract and retain highly skilled professionals, time and cost overruns on fixed-price, fixed-time frame contracts, client concentration, restrictions on immigration, industry segment concentration, our ability to manage our international operations, reduced demand for technology in our key focus areas, disruptions in telecommunication networks or system failures, our ability to successfully complete and integrate potential acquisitions, liability for damages on our service contracts, the success of the companies in which Infosys has made strategic investments, withdrawal or expiration of governmental fiscal incentives, political instability and regional conflicts, legal restrictions on raising capital or acquiring companies outside India, and unauthorized use of our intellectual property and general economic conditions affecting our industry. Additional risks that could affect our future operating results are more fully described in our United States Securities and Exchange Commission filings including our Annual Report on Form 20-F for the fiscal year ended March 31, 2016. These filings are available at www.sec.gov. Infosys may, from time to time, make additional written and oral forward-looking statements, including statements contained in the company's filings with the Securities and Exchange Commission and our reports to shareholders. In addition, please note that any forward-looking statements contained herein are based on assumptions that we believe to be reasonable as of the date of this press release. The company does not undertake to update any forward-looking statements that may be made from time to time by or on behalf of the company unless it is required by law.
