

For immediate release

Chennai, March 14, 2016: The Board of Directors of Beardsell Ltd. has approved an interim dividend of Rs 1.20 (12 percent) per Equity Share for the Year 2015-2016. The Record Date fixed for the purpose of ascertaining the members eligible for the dividend is 21st March, 2016.

Beardsell Ltd. which was established in 1936 manufactures Expanded Polystyrene (EPS) under the brand name QuikBuild as well as steel prefabricated structures for the commercial and residential segments. QuikBuild uses a prefabricated panel that consists of a super-insulated core material with an engineered steel fabric mesh to create a strong and durable monolithic structure.

The Company undertakes turnkey projects under this fast growing QuikBuild business vertical which is gaining acceptance largely because of its wide range of benefits as compared to the traditional concrete/ RCC (Reinforced Cement Concrete) structures. QuikBuild is 5% cheaper than RCC and takes 50% less amount of time to build as compared to concrete structures. Apart from that, the structure gives you 4-5% extra carpet space than the traditional concrete walls because of its thinner walls with better durability than the normal civil construction. Additionally, a Quikbuild structure is more economical, aesthetically more appealing, and stronger with better structural integrity as compared to any RCC structure.

Beardsell Ltd. also manufactures complex thermocole packaging catering to the FMCG, appliance, consumer goods and industrial equipment sectors. The Company has seven manufacturing units across the country.

The Packaging business continues to deliver steady growth and is enjoying the benefits of scale. With a 300 ton processing capacity the Company is well positioned to absorb costs, more so as the production space is very strategically used for both the packaging and prefab business. Beardsell Ltd. has been spearheading the innovations in packaging design and development and has successfully developed cost effective and shock resistant EPS packaging. The anti-static packaging is a pioneering solution designed by the company offers a viable solution for protecting electronic and ordinance items apart from explosive goods. In additions, the company also offers composite packaging which provides a one-vendor solution to their packaging needs.
