## PRESS RELEASE

### Announcement of the Inauguration of Cable Manufacturing Plant on 23rd January 2026

Haryana, 09 January 2026:

We at **Jainik Power Cables Limited** are pleased to announce the inauguration of our new Cable Manufacturing Plant on 23 January 2026, marking a major milestone in the company's growth and expansion.

The new manufacturing facility has been set up on our own land and is equipped with modern machinery sourced from reputed manufacturers. With the commissioning of this plant, we strengthen our manufacturing capabilities and take a significant step towards meeting the growing demand for quality power cables in India and overseas markets.

The plant has an installed capacity of up to 12,000 tonnes per annum and is expected to generate additional revenue of up to ₹400 crore per year at optimum utilisation. This capacity expansion will play an important role in improving our production scale and operational efficiency.

The facility will manufacture Low Tension (LT) Power Cables and Aerial Bunched (AB) Cables up to 150 sq. mm. These products are widely used in power distribution networks, industrial infrastructure, residential projects, and rural electrification. LT Power Cables are in strong demand due to rapid urbanisation and industrial growth, while AB Cables are increasingly preferred for their safety, lower power losses, reduced theft, and suitability for congested and high-risk areas.

**Speaking on the occasion, Mr. Shashank Jain, Managing Director, Jainik Power Cables Limited, said:**

"The inauguration of this cable manufacturing plant is a proud and important moment for Jainik Power Cables Limited. This facility strengthens our manufacturing base and positions us for the next phase of growth. With an annual capacity of 12,000 tonnes and an expected revenue potential of up to ₹400 crore, we are well prepared to meet rising domestic demand. Going forward, we also plan to enter new markets by exporting our cables to African and Middle Eastern countries, expanding our global footprint and strengthening the Jainik Power brand internationally."

The new plant will help us improve delivery timelines, ensure consistent product quality, and better serve our customers across various sectors. It also supports our long-term objective of expanding domestic manufacturing while contributing to power infrastructure development in India and abroad.

With this inauguration, we reaffirm our commitment to quality, reliability, and sustainable growth, as we move confidently into the next phase of Jainik Power Cables Limited's journey.

SHASHANK JAIN
