Dear Sir/Madam,

Subject: Investor Presentation - Regulation 30 of the SEBI (Listing Obligations and Disclosure Requirements) Regulations, 2015 ("Listing Regulations").

This is in continuation of our earlier intimation dated July 28, 2026, regarding the earnings conference call for analysts and investors scheduled to be held on Tuesday, August 4, 2026, and pursuant to Regulation 30 read with Para A of Part A of Schedule I of the SEBI (Listing Obligations and Disclosure Requirements) Regulations, 2015, we enclose herewith the Investor Presentation on the financial highlights of the Company for the quarter ended June 30, 2026.

The said information is also available on the website of the Company at: <https://jainmetalgroup.com/results-announcements.php>

Kindly take the above information on record.

Yours faithfully,

**For JAIN RESOURCE RECYCLING LIMITED
(FORMERLY JAIN RESOURCE RECYCLING PRIVATE LIMITED)**

**ARAVINDKUMAR V
COMPANY SECRETARY AND COMPLIANCE OFFICER**

Jain Resource Recycling Limited

Investor Presentation
Q1FY27

This presentation and the accompanying slides (the “Presentation”), which have been prepared by **Jain Resource Recycling Limited (the “Company”)**, have been prepared solely for information purposes and do not constitute any offer, recommendation or invitation to purchase or subscribe for any securities, and shall not form the basis or be relied on in connection with any contract or binding commitment whatsoever. No offering of securities of the Company will be made except by means of a statutory offering document containing detailed information about the Company.

This Presentation has been prepared by the Company based on information and data which the Company considers reliable, but the Company makes no representation or warranty, express or implied, whatsoever, and no reliance shall be placed on, the truth, accuracy, completeness, fairness and reasonableness of the contents of this Presentation. This Presentation may not be all inclusive and may not contain forward-looking the information that you may consider material. Any liability in respect of the contents of, or any omission from, this Presentation is expressly excluded.

This presentation contains certain forward-looking statements concerning the Company’s future business prospects and business profitability, which are subject to a number of risks and uncertainties, and the actual results could materially differ from those in such forward-looking statements. The risks and uncertainties relating to these statements include, but are not limited to, risks and uncertainties regarding fluctuations in earnings, our ability to manage growth, competition (both domestic and international), economic growth in India and abroad, ability to attract and retain highly skilled professionals, time and cost over runs on contracts, our ability to manage government policies and actions regulations, interest and other fiscal costs generally prevailing in the economy. The Company does not undertake to make any announcement in case any of these forward-looking statements become materially incorrect in future or update any forward-looking statements made from time to time by or on behalf of the Company.

Q1FY27 Performance Highlights

Performance Highlights & Outlook – Q1FY27

Commenting on the performance, Mr. Kamlesh Jain – Chairman & Managing Director said:

*"We are pleased to begin FY27 with another quarter of strong operational and financial performance, reflecting the successful execution of our growth strategy and the resilience of our integrated recycling business. Consolidated Revenue from Operations for Q1 FY27 stood at **~Rs. 2,725 crore**, registering a robust **76% year-on-year growth**. EBITDA increased to **~Rs. 110 crore**, while Profit After Tax stood at **~Rs. 69 crore**, reflecting healthy year-on-year growth of **22%** and **23%**, respectively. While margins moderated during the quarter owing to the evolving product mix and the initial ramp-up of our value-added copper business, we believe these investments will strengthen our earnings profile and support sustainable margin expansion as utilization levels improve.*

*Our strategic focus on copper continues to deliver encouraging results, with copper and copper products contributing **~67% of consolidated revenue** during the quarter. Strong growth in copper volumes, coupled with the initial contribution from value-added products, underscores the success of our forward integration strategy. At the same time, our lead business continued to deliver stable profitability, supported by our diversified product portfolio, disciplined sourcing capabilities and long-standing customer relationships.*

*On the execution front, we achieved a significant milestone with the successful commissioning of the **entire Copper Anode production line**, with both furnaces now operational. This marks an important step in our journey towards becoming a fully integrated player across the copper value chain. The Copper Cathode project remains on track for commissioning in Q2 FY27, while the Copper Wire Rod and Copper Busbar projects are progressing as planned and are expected to be commissioned during Q3 FY27. These projects will significantly expand our value-added product portfolio, enhance customer integration and strengthen our competitive positioning in the non-ferrous recycling industry.*

Our diversification initiatives are also progressing well. The Antimony project remains on schedule for commissioning in Q3 FY27, expanding our presence in specialty metals. Our Ahmedabad joint venture with C&Y Group started its trial production and is expected to streamline its operations by Q2 FY27, strengthening our copper recycling ecosystem and processing capabilities. We are also advancing the development of our dedicated plastic recycling facility, which will improve operational efficiency by decongesting our existing facilities and further reinforce our commitment to the circular economy. Meanwhile, our Kuwait strategic investment continues to progress, with temporary shipment delays arising from the prevailing geopolitical situation in West Asia.

During the quarter, operations at our Unit-II facility were temporarily impacted following a fire incident in one of the manufacturing sheds. We acted swiftly to implement the required corrective actions and strengthen safety measures across the facility. Following detailed inspections and regulatory approvals, manufacturing operations have now resumed across Unit-II, excluding the affected shed, where restoration work and the remaining statutory compliances are progressing as planned. This incident has not altered our long-term growth plans, and we remain firmly committed to maintaining the highest standards of safety, operational excellence and business continuity.

Looking ahead, we remain optimistic about the long-term prospects of the non-ferrous recycling industry, supported by favourable regulatory initiatives, increasing demand for recycled metals and the global transition towards sustainable manufacturing. With multiple value-added projects nearing commercialization, a strong execution pipeline and a robust sourcing network, we are well positioned to capitalize on the next phase of growth while continuing to create sustainable long-term value for our stakeholders."

Business Update and Key Initiatives (1/2)

Key Focus Areas

- Forward integration into value-added copper products
- Expansion into higher-margin and specialty metal products
- Strengthening raw material security and recycling ecosystem
- Scaling global partnerships and processing capabilities

Copper Value-Added Expansion

Product	Total Capacity	Current Status	Timeline
Copper Anode	1,600 MT/month	Phase 1 commissioned in March 2026, Phase 2 commissioned in July 2026	Capacity ramp - up in progress
Copper Cathode	1,500 MT/month	Civil work complete; Phase 1 commissioning pending	Q2 FY27
Copper Wire Rod	600 MT/month	Construction near completion; erection to begin shortly	Q3 FY27
Copper Busbar & Profiles	1,500 MT/month	Machinery erection to start in July 2026	Q3 FY27

Strategic Rationale

- Expands presence across the copper value chain
- Focus on higher value-added products
- Supports margin improvement and customer integration

Business Update and Key Initiatives (2/2)

Specialty Metal & Plastic Recycling Expansion

Antimony Project

- Capacity: 1,000 MT Lead-Antimony bullion processing
- Expected output: ~100 MT/month
- Commissioning targeted in Q3 FY27

Plastic Recycling Facility

- Finalized ~6 acres of land for setting up a dedicated plastic recycling unit, shifting operations from the copper and lead recycling plants
- Dedicated plastic recycling unit will help decongest both the copper recycling plant and lead recycling plant
- New unit expected to become operational by Q3 FY27
- Estimated capex of ~Rs. 15 crore

Strategic JV & International Expansion

JV with C&Y Group Investments Inc. - Copper Scrap Recycling Facility - Ahmedabad

- Annual processing capacity
 - 36,000 MT motor/alternator/starter scrap
 - 24,000 MT cable scrap
 - 12,000 MT copper scrap
- Expected output: ~25,000 MT copper products annually
- Plant expected to be operational by Q2 FY27

Kuwait Strategic Investment

- Strengthens Middle East recycling ecosystem presence
- Enhances raw material security through ROFR arrangement
- Expected benefits from Q3 FY27 onwards (Machinery ready, can expect some delay due to West Asia war)

Execution Commentary

Key Commentary

- Most projects progressing broadly in line with guidance
- Temporary delays due to West Asia shipping disruptions
- Strong execution momentum across strategic initiatives

EPS	2.02	1.77		1.91		10.39	7.11	

*Loss before tax from discontinued operation

- The Company had partnered with M/s Ikon Square Limited UAE ("ISL"), by way of acquiring 70% in Jain Ikon Global Ventures (FZC) a free zone company registered in Sharjah, UAE, resulting JIGV in becoming its subsidiary.
- The acquisition was undertaken for the purposes of setting up our gold refining facility at Sharjah UAE that commenced refining of gold and its by-product silver ("Precious Metals") in the month of August 2024.
- However, the Board of Directors, at its meeting on 24th August 2025 approved the discontinuation of operations effective 17th April 2025, due to low margins, high operational overheads, working capital constraints and continued volatility in the gold refining sector.
- In this regard, Jain Ikon Global Venture FZC, a subsidiary incorporated in the United Arab Emirates, has been reclassified as an asset held for disposal in view of the company's plan to divest its stake in the subsidiary.

Company overview

FY26 - Company at a glance

One of India's largest and fastest-growing non-ferrous metal recycling companies, with a legacy spanning over seven decades

1953

Constituted as a **partnership firm under the name of Jain Metal Rolling Mills**

2013

Commenced operations by setting up a **Lead refining unit**

+3.2 lakh

MPTA of authorised production capacity

LME

One of the largest Indian recyclers with LME-registered lead ingots; also registered with **MCX**

Strong management team

Kamlesh Jain
Chairman & Managing Director

- Experience of **30+ years** in the metal industry
- Significant experience in the metal industry has been at the core of the company's growth and expansion
- Associated with the Bombay Metal Exchange as a Senior Vice President of their South India chapter and Regional Vice President, South India of the Recycling Association of Africa
- Holds directorship in 6 other companies
- Bachelor's degree in Commerce from the University of Madras

Mayank Pareek
Joint Managing Director

- Experience of 10+ years in the metal industry
- Associated with the company since 2022
- Member of Lead Product Advisory Committee of the Multi Commodity Exchange of India Ltd
- Has held a position of Designated Partner on the board of Fervent Global LLP
- Qualified Chartered Accountant from the Institute of Chartered Accountants of India

Hemant Shantilal Jain
Executive Director & Chief Financial Officer

- Experience of 15+ years in Accounts, Audit, and Taxation
- Associated with the company since 2022
- Held the position of CA with Spell Bounds Audits Pvt Ltd
- Qualified Chartered Accountant from the Institute of Chartered Accountants of India
- Obtained his Bachelor's degree in Commerce from M.L. Shah College, Gujarat University

Sanchit Jain
Executive Director

- Associated with the company since 2019
- Initially joined as Head of Operations, overseeing supply chain management and strategic leadership
- Oversees global procurement operations, handling over 20,000 metric tons of materials monthly from suppliers across 70+ countries
- Obtained his Bachelor's degree in Business Administration from SPJ Global Management, Sydney

Backed by an Experienced set of Board of Directors

Dr. Kandaswamy Paramasivan
Independent Director

- Experience of 35+ years in the public policy
- Associated with the company since 2025
- Was a Member of the Indian Police Services
- Bachelor's degree in Mechanical Engineering from IIT Madras

Jayaramakrishnan Kannan
Independent Director

- Experience of 24+ years in the field of Information Technology
- Associated with the company since 2025
- Held the position of VP on the board of Tata Consultancy Services
- Bachelor's degree in science in the field of Mathematics and a diploma in Systems Management, from University of Mumbai

Rajendra Kumar Prasan
Independent Director

- Experience of 28+ years in the field of audit practice and taxation
- Associated with the company since 2025
- Partner at Sanjiv Shah & Associates, Chartered Accountants and also a director on the board of Jumbo Bag Limited
- Qualified Chartered Accountant and a fellow member of ICAI

Revathi Raghunathan
Independent Director

- Experience of 30+ years in the field of audit practice and taxation
- Associated with the company since 2025
- Qualified Chartered Accountant and Insolvency Professional
- Designated Partner at A. Raghunathan and Co.

Our core competencies

- 01 Strategically located Recycling Facilities having Multi product processing capability
- 02 Diversified product portfolio
- 03 Strong customer base in 20+ countries & supplier base in 120+ countries with global footprint
- 04 Deep sourcing capabilities
- 05 In house tech and quality testing
- 06 Hedging Mechanism for Commodity Price Risk Protection for Products

^{5th} Facility: Hosur facility functions as segregating facility

2. Diversified product capabilities

Lead & Lead Alloy Ingots

Registered as a brand by the London Metal Exchange

Refined Lead Ingot

Converting various types of lead scrap into refined lead, with PB% ranging from **99.97% to 99.99%**. It is used in Lead Acid Batteries, Radiation, Shielding, Ammunition, Aerospace, and more

Antimony Lead Ingot

Used in Battery terminals, anodes, cathodes, grid paste, etc.

Remelted Lead Ingot

Used in Battery industry and Cable & Electrical Industry

Copper & Copper Ingots

Refined Copper Billet

Purity ranges from **95.00% to 99.07%**; Used in Cable, Chemicals, and auto industries

Copper Alloy Billets/Ingots

Made by combining copper with elements like zinc, tin, or nickel; Used for industrial applications

Copper Ingots

Solid blocks of refined copper with varying purity levels; used in industrial applications

Finished Copper Scrap

It includes various recycled copper scrap differing in copper content; applications for industrial use

Aluminum & Aluminium Ingots

Aluminium Alloy Ingot

Various grades of primary alloys- XSB, LM6, etc. & secondary alloy- ADC-12, etc. are manufactured. Used in Electrical and power Industry, electronics industry

Molten Aluminium Alloy

Through recycling, Aluminium is delivered in molten state; used in various industries due to its lightweight, high strength, corrosion resistance, etc.

Tin

Tin is extracted as a by-product in the lead recycling process. It finds applications in industries such as electronics (soldering), food packaging (tin plating), and automotive components.

Plastics

Plastic scrap from lead batteries is recycled into PP/PVC granules, used in manufacturing pipes, cables, and apparels.

42.6%

Top 5 suppliers

49.5%

Top 10 suppliers

5. In-house technology & quality testing

Facilities Equipped with Modern Machinery and Equipment....

Automatic lead acid battery scrap breaking machine efficiently separates lead, plastics by hydraulic separator

Magnetic Separation

Metal scrap is passed through a magnetic roller with conveyor belt. The magnet installed segregates iron from other metals and impurities.

Air Gravity Separation

Under this method copper granules are separated from PVC based on difference in density, particle size and movement in a specific medium with usage of Air.

Water Gravity Separation

This process is used to separate copper from PVC and aluminium from heavy metals & nonmetals using water as a medium. Copper & aluminium are processed on shaking tables moving back & forth which separates metals & non-metals due to water flow based on their density.

Eddy Current Separation

The process involves use of magnetic field to repel non-magnetic electrically conductive metals separating them from non-metallic particles based on their conductivity levels.

Employ an extensive and stringent quality control mechanism at our facilities

Products undergo a qualification process throughout entire process chain

Receiving inspection wherein incoming raw material and consumables are checked with standard requirement

In-process inspection for achieving the intended quality of product

Final inspection/pre-dispatch inspection involving microstructure analysis, spectrometer analysis to check that the final product conform with customer requirements and accordingly it is dispatch or rejected

ISO/IEC 17025:2017

Quality Team consisted of 3 full time employees*

One of the largest recycling companies in India to get its lead ingot registered as a brand by LME

6. Hedging mechanism for commodity price risk protection for products

Our business operations are directly impacted by fluctuations in the prices of base metals traded on the London Metal Exchange

Price increase or decrease in these metals can significantly affect our profitability

Safeguarding financial interest through hedging

Purchasing raw materials

Short Position in Futures contract on LME

Hedging final value¹ of the Materials

Sale of final products

Long Position in Futures contract on LME

Contracts typically span for 90-day delivery period during which we lock in the sale price of the final product

Option to sell our finished products to pre-identified buyers before the Delivery Period expires by closing futures position

"Branded lead finished products" are recognized by the LME which provides them with global recognition and universal acceptance

Ability to sell our products to LME-registered warehouses, thereby effectively settling our derivative positions.

Benefits

Stabilize financial performance

Production costs are covered regardless of market price fluctuations

Helps us manage metal price risk in real time in response to changing market conditions

Makes us resilient in the face of market volatility

¹Final value represents the final sale value

Near Term Growth drivers

Government Incentives & Growth Prospects

Advantages

India's Rs. 1,500 crore Critical Mineral Recycling Scheme aims to boost domestic recycling and reduce import dependence.

Aluminium recycling process consumes up to **95% less energy** than producing aluminium from virgin raw material

Recycling copper is an energy-efficient process saves up to **85% of the energy** used in its primary production

Using **secondary lead** instead of ore **reduces CO2 emissions by 99%**

Primary production of tin requires **99% more energy** than secondary production

Supportive provisions on metal recycling

National Critical Mineral Mission Policy (2025)

Extended Producer Responsibility (EPR) framework for non-ferrous metals (2024)

Vehicle Scrappage Policy (2021)

National Non-ferrous metal scrap recycling framework (2020)

National Resource Efficiency Policy (2019)

Steel Scrap Recycling Policy (2019)

Government has mandated that all new products made from non-ferrous metals must contain a minimum of 5% recycled content¹

**Government
mandate - Rate of
Recycled Content
(in %) ²**

Copper

Aluminium

Growth Strategies – Forward Integration into copper value added products

Expand our horizon into copper cathode, wire rod and copper busbar manufacturing, using finished products from our recycling facilities as feedstock, with electrolytic refining producing high-quality copper cathodes and wire rods.

Project being undertaken by our wholly owned subsidiary, **Jain Green Technologies Pvt Ltd.**

Total Capex Plan (Phase I): Rs. 95 crore - to be funded entirely from internal accruals, with **Rs. 74 crore** spent till March 2026.

Construction progress as of March 2026, stands at approximately **85%**.

The project is advancing as planned, **where anode phase I already commissioned in Q4 FY26 and cathode phase I expected in Q2 FY27.**

Acquired a suitable **land parcel of 6.58 acres in SIPCOT Industrial Estate at Gummidipoondi**

Authorised Capacity - 12,000 MTPA

All critical machinery has been ordered, however delivery of few machinery parts getting delayed due to West Asia crisis

Plan to operate in-house **rooftop solar power plant** which will enable us to produce **Green copper Cathode**

Continuing focus on sustainability and ESG principles

*FY25 includes operations of M/s Ikon Square Limited UAE ("ISL"), engaged in gold and silver refining. The Board of Directors, at its meeting on 24th August 2025, approved the discontinuation of ISL's operations effective 17th April 2025, due to low margins, high operating costs, working capital constraints, and sector volatility under stringent AML regulations.

^Post-IPO ROE and ROCE reflect the impact of increased equity base following capital infusion; returns are expected to normalize as new capital is deployed.

Consolidated profit and loss account statement
