Commenting on the results, Mr. Anil Jain, Vice Chairman and Managing Director of the Company said:

Overall, Q2 FY27 was a good quarter despite the challenging business environment, with consolidated revenue growing by 10.1% YoY and a healthy EBITDA margin of 13.2%. Our Agro Processing and overseas Plastics businesses continued to deliver strong growth. Improved receivables collections resulted in standalone operating cash flow reaching 180% of EBITDA, enabling timely repayment of NCDs. We remain focused on improving collections and strengthening cash flow.

The operating environment continued to present significant challenges. Adverse weather patterns and drought conditions in parts of India moderated demand for micro-irrigation systems and agricultural pipes. Developments in West Asia led to higher polymer prices and freight costs, which we managed through timely pricing actions and effective supply chain management.

Polymer prices, which had declined earlier, increased sharply again during Q2 FY27 due to supply concerns. Policy measures, such as the Minimum Import Price on suspension-grade PVC resin and the withdrawal of the customs duty exemption, have helped reduce price volatility.

With our Agro Processing and overseas businesses performing well, and the Hi-Tech Agri and domestic Piping businesses expected to recover, we anticipate improved operational efficiencies going forward.
