@ Adjusted PAT is calculated before unwinding of finance costs (non-cash) related to 0.01% NCDs/EBCs.

Commenting on the results, Mr. Anil Jain, Vice Chairman and Managing Director of the Company said:
Q1 FY27 saw consolidated revenues remain broadly steady year-on-year, supported by strong performance from our Agro Processing business and overseas Plastic operations. The quarter was shaped by volatility in polymer prices and the timing of the monsoon, which led to some customer purchases in the domestic pipe and drip businesses moving into subsequent periods. Encouragingly, business momentum improved progressively through May and June and we were successful in passing on higher costs of raw materials.

The outlook ahead is positive. Polymer prices are stabilising and improved rainfall is expected to strengthen agricultural demand in the coming months.

We remain confident of delivering double-digit revenue growth in FY27 and reiterate our EBITDA margin guidance of around 14% on a standalone basis and 12.5% on a consolidated basis. With demand conditions improving, we expect a significantly stronger performance in second half and remain firmly on track to deliver our full-year objectives subject to stability in geopolitical events.
