Granted ACRS Certification for Structural Hollow Sections

Only Indian Company to Receive This Certification

Strengthens Access to Global Infrastructure Markets

Chandigarh, 4th May 2026: JTL Industries Limited (“JTL” or “The Company”) (BSE: 534600 | NSE: JTLIND), a leading manufacturer of structural steel tubes, has been granted Product Conformity Certification from the Australasian Certification Authority for Reinforcing and Structural Steels (ACRS).

With this achievement, JTL becomes the only company in India to have received this certification for structural hollow sections.

The certification has been granted for the Company’s manufacturing facility located at Mangaon, Raigad, Maharashtra. It covers the manufacture of cold-formed structural steel hollow sections in accordance with AS/NZS 1163:2016, along with compliance to additional standards including AS 4100:2020, AS/NZS 5131:2016, AS/NZS 5100.6:2017, and NZS 3404:2009.

This certification enables JTL to manufacture and supply structural hollow sections across multiple grades and product categories, including circular, square and rectangular hollow sections with thickness ranging from 2.0 mm to 12.0 mm, catering to diverse structural and infrastructure applications, and further strengthens the global acceptance of its DFT structural product portfolio.

The ACRS certification is a globally recognized quality benchmark, particularly for infrastructure and construction projects in Australia and New Zealand. With this certification, JTL is now eligible to supply products for high-specification infrastructure projects in these markets, thereby strengthening its presence in regulated export markets and enhancing the positioning of its DFT products in international markets.

In addition, the Company has recently commenced supplies of DFT pipes to the United States market, marking a significant step in expanding its global footprint. This development, along with the ACRS certification, further strengthens JTL’s presence across key international markets and supports the global expansion of its DFT product portfolio.

Commenting on the development, Mr. Madan Mohan, Managing Director of JTL Industries said:

“This certification marks an important milestone for JTL Industries. It reinforces the quality and global acceptance of our DFT structural products and strengthens their positioning in international markets. Being recognized by ACRS enables us to participate in high-specification infrastructure projects, particularly in Australia and New Zealand. We have also recently commenced supplies of DFT pipes to the United States, which further expands our global reach and supports our long-term growth strategy.”

About JTL Industries Limited

JTL Industries Limited is among the fastest-growing steel tube manufacturers, with its registered office situated in Chandigarh. The company operates manufacturing facilities in Punjab, Maharashtra, Chhattisgarh and Himachal Pradesh (including its subsidiaries). Its cumulative pipe manufacturing capacity is approximately 9,36,000 MTPA, with around 3,00,000 MTPA dedicated to backward integration. The company is a recognized Three Star Export House. Its product range includes DFT Structural Pipes, GI Pipes, MS Black Pipes, Hollow Sections, Solar Structures, HR Coils and Phosphorous Bronze, Copper and Brass Alloys, among others, which cater to various industrial and infrastructural applications.
