Telcos to airports: Allow us to provide indoor telecom infra

Latest rules don't allow third-party partners to deploy active or passive infrastructure

SUBHAYAN CHAKRABORTY
New Delhi, 5 May

Telecom service providers Reliance Jio, Bharti Airtel, and Vodafone Idea have jointly asked airport authorities in Mumbai, Navi Mumbai, Bengaluru, Thiruvananthapuram, and Guwahati to allow them — and not a third-party infrastructure provider — to install and provide indoor-telecom equipment.

The telcos had last week written to the upcoming Noida International Airport Ltd as well as Mumbai Metro earlier on this issue. Barring Bangalore International Airport Ltd (BIAL), the other four are run by Adani Airports Holding Ltd (AAHL).

In their letters — on April 25 — the telcos have cited laws that mandate licensed telecom-service providers will get right of way (RoW) access in public spaces.

The airports are in various stages of granting exclusive rights to third-party entities to install In-Building Solutions (IBS).

IBS improves mobile-network cov-

ILLUSTRATION: AJAYA MOHANTY

CLASH OVER COMMUNICATION INFRA IN PUBLIC SPACES

- Telcos have requested airports to not hire third-party provider for in-building solutions (IBS) infrastructure
- Argue exclusive rights given to a third party will lead to payment of exorbitant charges
- Joint infrastructure is currently used by telcos for IBS infra in public spaces
- Last week, the companies had said it wouldn't be possible to provide IBS services in Mumbai metro
- They had blamed unviable rates offered by the selected infrastructure partner

erage and signal quality within buildings, especially where external signals struggle to penetrate.

But pacts with third parties not only contravene legal provisions but create a monopolistic environment, according to the telcos.

These entities may impose hefty charges on telcos for providing the network and become a gatekeeper for RoW, the letters said.

"We understand that you may have been approached by unlicensed entities holding IP-1 registrations from

the Department of Telecommunications, seeking exclusive rights under the pretext of being independent 'neutral hosts' for IBS deployment. We wish to clarify that under current regulations such third party vendors are not permitted to deploy active telecom infrastructure," their letters said.

Meanwhile, the telcos have sought permission to provide IBS facilities at Terminal 1 of Bangalore International Airport, where the existing IBS licence will expire on May 31.

Queries mailed to BIAL and AAHL for a response did not elicit a response.

However, the telcos are unwilling to pay for the infrastructure, arguing that IBS at public facilities do not yield substantial revenue but serves a common, public need.

"RoW permissions in such scenarios should be seen not as a revenue generating opportunity by the Airport, but as a necessary, facilitative step for public interest," the letters read. They said no public authority was allowed to charge fees for RoW beyond what was stipulated in the rules.

Airtel rolls out feature for businesses to display names

Airtel's new Business Name Display (BND) service lets businesses showcase their brand on recipient screens during calls. This solution powered by artificial intelligence helps customers distinguish genuine calls from spam. Earlier, many crucial calls from banks, hospitals, and delivery services were flagged as spam, causing customers to miss the important ones.

The solution has been successfully piloted with over 250 businesses across sectors including banking, retail, food delivery, mobility, quick commerce, courier and logistics. "By making communication more personal, secure, and seamless for both sides," said Sharat Sinha director and CEO Airtel Business. Airtel aims to revolutionise business-customer interactions, protecting customers from fraud while boosting brand credibility, he added.

Jio may become world's 6th-largest telco after IPO

Likely to replace Airtel at peak valuation of \$154 bn

SURAJEET DAS GUPTA
New Delhi, 5 May

Jio Platforms, which is believed to be considering starting the process of filing for an initial public offering (IPO), is estimated by analysts to have an enterprise value (EV) in the range of \$136 billion-\$154 billion at its peak. This is equivalent to that of the sixth-largest listed telecom company in the world by market capitalisation (mcap) as of today.

Jio would also be the fastest telco to achieve this milestone, given that it started services only in September 2016.

It will be behind US-based T-Mobile (\$282.58 billion), followed by China Mobile

(\$232.09 billion), AT&T (\$198.67 billion), Verizon (\$184.41 billion), and Deutsche Telekom (\$175.63 billion).

At its peak valuation of \$154 billion, Jio Platforms will have a higher value than Bharti Airtel's mcap to take the sixth place. In that case, it will be ahead of Comcast, China Telecom, NTT, Softbank, KDDI, Saudi Telecom, America Movil, and Singapore Telecom, among others. Currently at sixth, Bharti Airtel has a market capitalisation of \$131.34 billion.

While market capitalisation reflects the total value of a company's outstanding shares, EV provides a more holistic view by incorporating debt, preferred stock, minority interests, and subtracting cash and cash equivalents.

According to Goldman Sachs, Jio's valuation has been pegged at \$154 billion, which

THE CURRENT PECKING ORDER

Market cap as on Monday (\$ billion)

T-Mobile	282.58
China Mobile	232.09
AT&T	198.67
Verizon	184.41
Deutsche Telekom	175.63
Bharti Airtel	131.34
Comcast	128.66

Source: companiesmarketcap.com

is a bullish estimate. At a base level, it will be \$123 billion, and at a bear level \$98 billion. Even with its base-level EV, the company will be at the eighth slot, ahead of

American Tower.

Jefferies' valuation projection of \$136 billion also takes Jio to the sixth slot. It has pegged the EV of the telecom business at \$110 billion, with the rest coming from the non-mobile business.

Jio Platforms controls various subsidiaries, including Reliance Jio (which offers mobile services and broadband), Jio Satellite (which runs the satellite broadband business), Saavn Media, Jio Haptik Technologies, and Asteria Aerospace.

The company has already rustled up investments to the tune of ₹152,055 crore from top private equity and global tech companies. These companies include Facebook, Silver Lake, KKR, Mubadala, General Atlantic, Vista, TPG, ADIA and Google, which together control over a 32.9 per cent stake in the company.

50 years of opinion that shapes opinions.

Apple India shipments grew 25% in March 2025

Apple's iPhone supplies in India grew 25 per cent year-on-year (Y-o-Y) in the March quarter with an 8 per cent market share, a CyberMedia Research report (CMR) said on Monday. Chinese smartphone company Vivo led the overall smartphone market in India with a 20 per cent share, followed by Korean smartphone major Samsung (18 per cent) in January-March 2025. Xiaomi was at the third place with a 13 per cent market share.

Its share declined 37 per cent Y-o-Y — the sharpest among the top five, reflecting challenges in both affordable and value-for-money smartphone portfolios, the report said.

Marico extends CEO Gupta's tenure by 2 yrs

Home-grown fast-moving consumers goods (FMCG) major Marico said it had extended the tenure of managing director (MD) and chief executive officer (CEO), Saugata Gupta, by re-appointing him for next two years.

"The board of directors of the company at its meeting held on May 2, 2025, approved the reappointment of Saugata Gupta as the managing director and chief executive officer for a further period of two years, from April 1, 2026, till March 31, 2028," Marico said in a statement.

The board had also approved continuation of directorship of Harsh Mariwala, chairman and founder of Marico, as a non-executive director, based on recommendation of the Nomination and Remuneration Committee of the company. Since 2014, he was continuing as Marico's MD and CEO.
