K2 Infragen Limited Appoints D K Raju as Senior Vice President to Lead High-Growth HAM Portfolio

Strategic talent acquisition strengthens execution capabilities for the company's landmark ₹390.91 Crore Telangana HAM Road project.

Press Release

Gurugram, 21st July, 2026: K2 Infragen Limited (NSE: K2INFRA), a rapidly scaling, multi-vertical engineering and infrastructure institution, has officially announced the appointment of Mr. Danda Kanaka Raju (Mr. D K Raju) as Senior Vice President for its Hybrid Annuity Model (HAM) Project vertical. This senior appointment marks a vital step in the company's commitment to building deep managerial benches as it enters an intensive, high-velocity execution phase across its road, railway, and utility power portfolios.

The appointment is strategically timed with K2 Infragen's transition into larger, higher-barrier infrastructure mandates. Over the past month, the company has fundamentally scaled its project pipeline, highlighted by securing a ₹390.91 Crore Telangana Road project (under the Hybrid Annuity Mode) and a ₹158.58 Crore railway electrification order from the Konkan Railway Corporation Limited. These consecutive wins have significantly strengthened the company's unexecuted order book, which stood at ₹518 crore as of May 2026 and is now estimated to be nearing approx. ₹1,000 crore. This momentum reflects K2 InfraGen's transition from a small-scale EPC contractor to an emerging mid-tier infrastructure player.

Mr. D K Raju joins K2 Infragen with over 27 years of specialized operational experience across infrastructure project execution, planning, quantity surveying, tendering, and technical operations. He has spent the majority of his career handling complex road and highway portfolios at premier listed infrastructure firms including being served as CGM – Projects at HG Infra Engineering Ltd, where he spent nearly eight years playing an instrumental role. Before joining K2 Infragen, he served as Senior Vice President at Allone Infra Private Limited, following successful leadership stints at Techno Unique Infratech Pvt. Ltd.

In his new role, Mr. D K Raju will take absolute operational ownership of K2 Infragen's landmark Telangana HAM Road project—overseeing planning, stakeholder coordination, supply-chain insulation, and execution timelines.

Commenting on the appointment, Mr. Pankaj Sharma, Founder and Managing Director of K2 Infragen Limited, said: ‘An order book is won in the boardroom, but its true profitability and cash flow are secured on-site. As K2 Infragen transitions into a national-scale Multi vertical infrastructure institution, our strategy is not defined by chasing volume, but by ensuring relentless execution velocity. Bringing on a leader of Mr. D K Raju’s operational caliber is a direct commitment to translating national infrastructure capital into world-class physical assets with absolute structural integrity. His deep experience in managing complex, multi-crore road corridors strengthens our technical leadership bench, ensuring we deliver our HAM portfolio on time, on margin, and to the highest standards of safety."

The appointment reflects K2 Infragen's broader governance trajectory: transitioning from a EPC led business model to an institutionalized, professionally led enterprise capable of executing complex public assets with zero friction.
