Muted Q4 outlook weighs on insurers

DEEPAK KORGAONKAR & RAM PRASAD SAHU
Mumbai, 3 April

Led by listed life insurance majors, stocks of insurers were under pressure, falling up to 4 per cent on the BSE in Thursday's intraday deals. Life Insurance Corporation (LIC) of India, HDFC Life Insurance, Bajaj Finserv, ICICI Prudential Life Insurance Company, and ICICI Lombard General Insurance Company hit their respective 52-week lows.

In the past one month, these stocks have declined in the range of 14-24 per cent. By comparison, the BSE Sensex has been down 10.5 per cent. The decline in the stocks was on account of expectations of a muted fourth quarter of 2025-26 (Q4FY26), uncertainty due to the Iran war, and regulatory changes.

In the near term, Q4FY26 performance is among key triggers for the sector.

Krupal Maniar and Komal Sharma of Antique Stock Broking believe that muted consumer sentiments during a seasonally strong March 2026, due to the ongoing West Asia war, are likely to weigh on Q4FY26 annual premium equivalent (APE) growth and profitability. The March quarter is a critical period as it usually accounts for 45 per cent of quarter premiums.

While yield curve movements and product mix shift would add value of new business (VNB) margins, weak growth may have negative impact due to operating leverage, besides goods and services tax (GST) input tax credit disallowance, says the brokerage.

Iran-related geopolitical tensions, according to analysts at Geojit Investments, have triggered significant notional losses in LIC's investment portfolio, weighing on its stock price. A recovery is expected as the situation stabilises and portfolio valuations rebound. The ongoing digital transformation and product innovation positions LIC for sustainable long-term growth, says the brokerage, which has a

Downtrend

"Buy" rating on the insurer.

Regulatory changes are also expected to be an overhang on the sector, though the impact will vary across insurance companies. While the potential implementation of commission caps may disrupt bancassurance economics, posing near-term risks to new business growth and distribution expansion, Motilal Oswal Financial Services Ltd expects its impact on SBI Life to be low. This is because its commission ratio of 4.8 per cent in the first nine months of FY26, is significantly better than the industry average. However, a drastic reduction in commission may lead to renegotiations with the bank.

The Insurance Regulatory and Development Authority of India (Irdai) is considering proposing changes to the commission structure, with possible amendments such as staggered commission, and commission caps for particular channels, among others. This may create a temporary hiccup, promp-

ting the need for commission renegotiations and product refilling.

However, in the long run, the industry is likely to bounce back, considering the under-penetrated market, low awareness, and improved affordability of products across segments, points out Motilal Oswal Research.

In its recent consultation paper, Irdai has proposed to implement Indian Accounting Standards (Ind AS) for all insurers with effect from April 1, 2026, promoting better transparency, comparability, and alignment with globally accepted standards. However, parallel implementation for a few years may be suggested by the industry for a smooth transition.

Key differences in international Financial Reporting Standards accounting include contractual service margin, which is the key profitability metric, deferred acquisition costs, and parincome, which would be recognised over time.

Meanwhile, in February 2026, the Reserve Bank of India (RBI) issued draft guidelines for marketing and sales of financial services by banks, non-banking financial companies, and other regulated entities — the focus has been on third-party products, including insurance.

The objective seems to be to ensure the appropriateness of products sold; and reduce the risk of mis-selling, forced selling, and/or involuntary bundling. Seeking explicit approvals, incentive alignment, and strong feedback mechanism are some of the steps for the same. Analysts at Kotak Institutional Equities said that they do not find any major adverse impact of these guidelines on insurance companies. The most positive reading is that these guidelines may end any residual concern or speculation on adverse bancassurance norms.

Meanwhile, life and health companies remain enthused about post-GST momentum (in term and health), which still seems to sustain.

RETIREMENT MUTUAL FUNDS

Invest if you are prone to panic-selling during volatility

HIMALI PATEL

The Securities and Exchange Board of India (Sebi) has reversed its decision to scrap retirement and children's mutual funds. Of the two, retirement schemes are the larger category, with assets under management (AUM) of ₹32,229 crore.

What are retirement schemes?

These funds come with a mandatory lock-in of five years or until retirement, whichever is earlier. "They typically combine equity and debt to balance growth and capital preservation over time," says Gaurav Kulshrestha, chief investment officer (CIO), Nexedge Capital.

Most retirement funds in India currently operate like hybrid funds, with asset allocation moving within pre-set bands for equity and debt.

One major difference between retirement schemes and diversified equity schemes is that the former work with sticky capital. "Unlike diversified equity funds that primarily focus on generating higher returns, retirement

schemes seek to build a more stable corpus while balancing risk," says Vinayak Magotra, product head and founding team, Centricity WealthTech.

Behavioural discipline

These funds impose behavioural discipline. "The statutory lock-in prevents retail investors from panic-selling during market downturns," says Archit Doshi, senior vice president, PL (Prabhudas Lilladher) Asset Management Company.

Sticky capital allows fund managers to take long-term bets. "Fund managers are able to capture the illiquidity premium by making long-term value bets that

enhance alpha generation," says Doshi. Specific notified retirement funds allow investors to claim deductions of up to ₹1.5 lakh under Section 80C.

"Structured asset allocation reduces the need for investors to actively manage shifts between equity and debt," says Magotra.

Illiquid for five years

Their drawback is the lock-in, which reduces access to liquidity. "Investors cannot access their money even in emergencies," says Feroze Azeez, joint chief executive officer, Anand Rath Wealth. He points out that many of these funds also have higher expense ratios than diversified equity funds.

The fund manager, not the investor, decides the asset allocation. "An investor may want a higher equity allocation even near retirement given their risk profile, but the fund manager will turn conservative because of the category's characteristics," says Azeez.

Who should invest?

These funds suit investors who recognise their own behavioural weaknesses. "They are suited for those prone to frequent churning

or panic-selling during volatility," says Doshi. People in their 30s and 40s who prefer to outsource asset allocation may consider them.

On the other hand, people who need high liquidity should avoid them. "For sophisticated investors who manage diversified portfolios with defined asset allocation strategies, they are not critical," says Kulshrestha.

Retirement funds vs NPS

Retirement funds offer greater flexibility in access to funds and are simpler. "National Pension System (NPS) is a low-cost product and offers investors an earmarked tax deduction," says Harsh Vira, chief financial planner and founder, FinPro Wealth. The deduction allowed is ₹50,000 under Section 80CCD(1B) of the Income Tax Act.

"NPS is more restrictive in terms of withdrawals and exit rules," says Jyoti Prakash Gadia, managing director, Resurgent India.

Retirement funds vs deferred annuity schemes

The main advantages of retirement funds are growth potential, transparency, and flexibility. "They can help investors build a larger retirement corpus over time and beat inflation, but returns are not guaranteed," says Vira.

Insurers' deferred annuity schemes serve a different purpose. "Their objective is income certainty," says Gadia. They offer a fixed, regular income after retirement with no market risk, but have lower returns.

Forgot to exchange cash? You can do that at airport departure zones

The Reserve Bank of India (RBI) has introduced a new rule allowing travellers to convert rupees at international airports more efficiently, simplifying the process for those boarding outbound flights.

It has allowed both residents and non-residents to exchange Indian rupee notes at foreign exchange (forex) counters in

departure halls — after immigration and security checks.

Until now, forex counters beyond immigration (in duty-free or security hold areas) had limited functionality. They could only buy Indian rupees from non-residents and sell them foreign currency.

That restriction is gone, and under the new rule residents and

non-residents can exchange Indian rupee notes inside an airport, even after clearing immigration and Customs.

This change is small on paper but helpful in real life. Did you forget to convert rupees before entering an airport or find extra cash in your wallet at the gate? You can now exchange it before

boarding your flight. Travellers end up carrying unused rupees abroad because they forgot to convert or because forex counters before check-in were crowded. They can now convert even small amounts at the last minute. The rule applies to forex counters duty-free areas and security areas (post-immigration zones).
