Subject: Successful Design & Development of Indigenous Dual-Polarized High-Gain Antenna System for an Emergency Procurement Supporting Drone Deployments for the Indian Armed Forces

Kavveri Defence & Wireless Technologies Limited is pleased to announce the successful design and development of an advanced dual-polarized, high-gain antenna system, engineered entirely in-house, which has now been shipped to a key defence customer supplying next-generation drone platforms to the Indian Armed Forces.

The product has been engineered from the ground up in a very compact and ruggedized form factor, ensuring suitability for demanding field environments and platform-mounted mission profiles. The development and execution were completed under a compressed timeline as part of an emergency procurement requirement of strategic importance. Kavveri's antenna system was chosen over an incumbent North American supplier, marking a significant achievement for the Company and a noteworthy step toward India's growing technological self-reliance.

This milestone reflects the accelerating adoption of sovereign defence communications technology and strengthens Kavveri's position as a trusted provider of mission-critical wireless systems aligned with the objectives of national security and capability enhancement.

Statement from the Managing Director

Mr. Shivakumar Reddy, Managing Director, stated:

"This milestone is one of many innovation-driven design and development programs underway at Kavveri. We continue to hire the best minds and empower them with world-class tools and environment, enabling breakthrough concepts to become engineered reality. Each product we create strengthens our in-house engineering capabilities and rapidly expands India's technological backbone in advanced wireless defence systems. We are building on this momentum every single day with every single product."

Kindly take the same on record.

Thanking You,
Yours faithfully,

For KAVVERI DEFENCE & WIRELESS TECHNOLOGIES LIMITED
