Trump's tariff tantrums lift India's US oil imports in 2025

CARGO SURGE. Key growth driver of US cargoes is geopolitics, says Kpler

Rishi Ranjan Kala
New Delhi

Ever since Donald Trump returned to the US President's office in January 2025, there has been a visible uptick in Indian refiners' engagement with US suppliers. India's annual cargoes from the US are likely to hit the second highest on record in the current calendar year (CY).

Global real-time data and analytics provider Kpler pointed out that the key structural driver in increased US cargoes has been "geopolitical".

According to Kpler data, cargoes from the US have averaged around 2,93,000 b/d in 2025 (CY) so far, which is the third highest on record after the Covid-affected 2021 (around 4,12,000 b/d) and 2022 (around 3,00,000 b/d). With four months remaining in 2025, the number is likely to rise.

The data also shows that US crude oil cargoes to India so far in August 2025 are expected at roughly 4,00,000 barrels per day (b/d) provisionally. If India does import this much quantity, it will be the second highest on record. However, Kpler expects this number to come down.

Comparing the market share of the US in India's monthly crude oil imports also points to an uptick in barrels.

For instance, in 2025 (CY), the market share of the US, which stood at 6.92 per cent in April, fell to 5.49 per cent in April later.

However, the North American country's share rose again to 6.41 per cent and a record 7.72 per cent (barring 2021) in June and July respectively.

In contrast, Russia's share in India's crude imports in 2025 fell to 38.72 per cent in

May, from 40.23 per cent a month ago. It clawed back some share to hit a healthy 44.54 per cent in June, but fell to 33.92 last month.

According to the US EIA, India surpassed China as Russia's largest crude oil importer between 2023 and 2024. It represented 34 per cent of erstwhile Soviet Union's crude oil exports in 2024, up from 30 per cent in 2023.

AMERICAN BARRELS
Sumit Ritola, Kpler's Lead Research Analyst for Refining & Modeling, told businessline: "US crude shipments to India have increased in 2025, with a notable acceleration in H2. However, August volumes appear inflated at first glance, as the month is only halfway through; based on current tracking, we estimate total arrivals to settle around 3,00,00 b/d, broadly in line with July levels."

This recent strength is part of a broader trend that began to pick up in late 2024 and gained momentum through 2025, supported by favourable price differentials and increased spot/term activity, he pointed out.

The appeal of US grades, particularly light sweet barrels, has also increased as Indian refiners seek to diversify from traditional West Asian suppliers amid a shifting price environment.

"That said, while the rally in US flows to India has been strong, we believe the current pace may not accelerate further. Max to max, I see refiners might increase 1,00,000-2,00,000 b/d more, given that US grades are very light in nature. We expect US flows to stabilise around current levels in the near term, unless fresh geopolitical developments or price dislocations open the door for further gains," he explained.

Engaging with govt and partners to maintain operational stability, says Nayara Energy

Our Bureau
New Delhi

Rosneft-backed Nayara Energy said on Thursday that it is engaging with the Indian government and trade partners to maintain operations in the country for roughly 8 per cent of India's refining output.

"Our retail fuel stations continue to operate as usual while we diligently work to ensure uninterrupted fuel supplies across India. Given our commitment to the Indian consumers and India's energy security, we are actively engaging with various governmental authorities as well as all our counterparties and partners to facilitate seamless transactions and continue to maintain operational stability," said Nayara Energy.

The European Union's 18th sanctions package targeted the company, in which Russian oil giant Rosneft holds 49.13 per cent stake. The firm owns and operates the 20 million tonnes per annum Vadinar refinery, which is India's second-largest single location refinery. The 4,05,000 barrels per day (b/d) refinery can produce high-quality Bharat Stage-compliant fuels that meet international standards.

UNJUST SANCTIONS
In the face of unjust sanctions by the EU, the refinery is operating at a healthy run rate, and Nayara Energy continues

to supply oil and oil products across India to meet the demands of its Indian consumers, it added. Nayara Energy continues to place the highest priority on operational, environmental and personal safety at its facilities and towards serving the franchisees at its retail outlets, which account for 7 per cent of India's auto fuel retailing outlets.

"Despite the supply chain inhibitions caused due to the EU sanctions, we remain committed in maintaining reliable transportation of our products via

coastal, rail and road networks to efficiently serve our customers and ensure there is no impact to our Indian consumers," the OMC emphasised.

Nayara Energy reiterated that despite sanctions imposed, it will continue its plans to invest more than ₹70,000 crore in the long term towards petrochemicals, ethanol plants, marketing infrastructure expansion and refinery reliability, including ESG projects.

Since 2017, the company has invested more than ₹14,000 crore in India.
