Company Secretary &amp; Compliance Officer

## India-Oman zero duty deal in force from today

Our Bureau  
New Delhi

The India-Oman Comprehensive Economic Partnership Agreement (CEPA) will formally come into force on Monday, providing immediate zero duty market access to Indian exports across 98 per cent tariff lines.

Strengthening economic and trade ties with Oman also holds great strategic importance for India as the country provides access to the Gulf countries bypassing the strife-stricken Strait of Hormuz.

Indian exporters across sectors such as textiles, automobiles and components, agricultural items, marine products, engineering goods, gems and jewellery and machinery — facing about 5 per cent tariffs — are expected to benefit significantly following duty elimination, per government estimates.

### BIG GAINS

“Commerce Minister Piyush Goyal will preside over the India-Oman CEPA entry into force ceremony,” according to the Commerce Department. Omani officials and top representatives are likely to join the ceremony virtually, an official said.

In FY26, India's exports to Oman were at \$4.02 billion while it imported goods valued at \$7.16 billion from the country.

An estimated \$3.6 billion of India's exports are likely to gain immediate benefits, the government noted.

India has offered tariff liberalisation on 77.79 per cent of its total tariff lines to Oman, and the country stands to gain larger market access in energy and industrial inputs.

# ‘Underlying momentum in industrial sector is intact’

**CRUCIAL FACTOR.** Continued policy support will remain instrumental in sustaining momentum and facilitating broad-based recovery, says FinMin report

Shishir Sinha  
New Delhi

Ahead of the launch of the new series of industrial growth data, a Finance Ministry report has said that the underlying momentum in the industrial sector remains intact.

Further, it said that continued policy support will remain instrumental in sustaining this momentum.

“The continued resilience in construction-linked sectors, expanding manufacturing exports, sustained hiring

**IMPETUS NEEDED.** Core sector output crawled to a two-month high of 1.7 per cent in April, buoyed by steel, cement and electricity, despite contractions in five other sectors REUTERS

intent, largescale investment commitments and emerging strength in sunrise sectors suggest that the un-

derlying momentum in the industrial sector remains intact,” said a report by the Department of Economic Af-

airs (DEA) of the Finance Ministry.

### CORE SECTOR OUTPUT

This commentary arrives alongside a dual set of data showing subdued economic performance. India's core sector output crawled to a two-month high of 1.7 per cent in April, buoyed by steel, cement and electricity, despite contractions in five other sectors. Simultaneously, the Manufacturing Purchasing Managers' Index (PMI) ticked up to 54.7 in April from 53.9 in March, yet still marking the second

slowest growth in operating conditions in 46 months.

The report further said that continued policy support, whether through the recently approved Bhavaya scheme or through targeted interventions under PLI, SPECS, promotion of surface coal/lignite gasification projects and the broader semiconductor mission, will “remain instrumental in sustaining this momentum and facilitating a more broad-based industrial recovery as external conditions gradually stabilise”.

Highlighting the S&P

Global's report on PMI Manufacturing about resilience in the manufacturing sector, the DEA report mentioned that the pipeline of investment commitments had remained robust.

“Toyota Motor Corporation is reportedly considering establishing additional vehicle assembly plants in Maharashtra, with planned investments estimated at around \$1.9 billion, underscoring the longer-term recalibration underway in global automotive supply chains,” it said.

According to the DEA re-

port, the electronics and semiconductor value chain is gathering momentum, with the ELCINA Electronics Manufacturing Cluster at Bhiwadi in Rajasthan attracting planned investments of over ₹1,200 crore from 20 companies, of which 11 are already operational and generating employment for over 2,700 people.

“The Sahara Semiconductors ATMP/OSAT facility has become the first SME-led semiconductor packaging unit to commence commercial production in India,” it said.

## TODAY'S PICK.

### Chennai Petroleum Corporation (₹1,056.50)

Akhil Nallamuthu  
bl. research bureau

#### CPCL

The stock of Chennai Petroleum Corporation has been in an uptrend since March 2025. After hitting a one-year high of ₹1,159 last month, the price has moderated.

However, the broader bull trend remains positive and the price stays above both 21- and 50-day moving averages. Even if there is another downswing from the current level, it is unlikely to drag the stock below the crucial support at ₹950, where a trendline coincides. So, we expect the stock to resume the rally either from the current level or after another dip to ₹950.

In either case, the stock can rebound and appreciate to ₹1,300 over the medium-term. Buy now at ₹1,056 and accumulate at ₹970.

Stop-loss can be ₹880. On a rally to ₹1,150 and ₹1,250, raise

the stop-loss to ₹950 and ₹1,180 respectively. Exit at ₹1,300.

Note: The recommendations are based on technical analysis. There is a risk of loss in trading
