VISIT FOLLOWS STARMER-MODI MEET IN BRAZIL

UK PM hosts Indian business leaders to boost investments

ADITI KHANNA
London, December 19

UK PRIME MINISTER Keir Starmer hosted a delegation of 13 Indian companies at 10 Downing Street in London, with the British government describing it as a "curated visit" to enhance bilateral partnership and boost investments.

The visit on Wednesday follows Starmer's meeting with Prime Minister Narendra Modi on the sidelines of the G20 Summit last month, when they committed to take forward an "ambitious" UK-India Comprehensive Strategic Partnership with collaboration opportunities on economic growth, security and defence, technology, climate, health, and education.

According to a readout from the British High Commission in New Delhi, the Indian investors and CEOs also met senior Cabinet ministers to discuss job creation and growth opportunities under a proposed India-UK trade deal after Starmer had confirmed the relaunch of Free Trade Agreement (FTA) negotiations early in the new year.

"India is a vital partner for the UK and we have huge ambition to unlock more opportunities together, building on our already strong relationship," said Starmer, with reference to the business meeting. "I'm delighted to welcome some of

UK Prime Minister Keir Starmer (right) meets a delegation of the Confederation of Indian Industry (CII) in London. Bharti Enterprises chairperson Sunil Bharti Mittal led the delegation

India's most senior business leaders to Downing Street and to outline the UK's ambitious focus on economic growth and innovation," he said.

The delegation, supported by the Confederation of Indian Industry (CII), discussed deepening ties with chancellor of the exchequer Rachel Reeves and foreign secretary David Lammy. Meanwhile, business and trade secretary Jonathan Reynolds and minister for trade policy Douglas Alexander discussed bilateral trade, worth £42 billion a year and supporting over 600,000 jobs across both economies.

The companies represented are said to have collectively invested over £10 billion into the UK and employ tens of thousands of people across the country. The delegation was led

by Sunil Bharti Mittal, chairperson of Bharti Enterprises, which completed a major investment in the BT Group this year.

"This business delegation comes at a pivotal moment, as India stands as the fastest-growing large economy and is on track to become a \$5 trillion economy by 2027. Over time, India-UK relations have developed into a robust, multifaceted partnership built on historical ties, economic synergy, and increasing geopolitical alignment," said Mittal, adding, "The India-UK Free Trade Agreement negotiations present significant opportunities for mutual growth and cooperation."

Other companies represented included Biocon Group, Reliance Industries, Tata Steel, and TVS Motor Company. —PTI

DoT asked to diversify revenue streams

JATIN GROVER
New Delhi, December 19

THE STANDING COMMITTEE on communications and information technology has asked the department of telecommunications (DoT) to diversify its revenue streams from the telecom sector to increase the government's revenue without burdening the industry excessively.

This is because of the fall in growth rate of revenue receipts for DoT projected in FY25 compared to growth in previous years. In FY25, DoT is estimated to earn a revenue of ₹1.1 lakh crore. It includes ₹25,501 crore from licence fee, ₹3,000 crore from spectrum usage charges, ₹80,766 crore from spectrum auction payments, and ₹1,000 crore from other sources.

In the Budget estimates, the non-tax revenue from the telecom sector in FY25 were kept at ₹1.2 lakh crore. According to the committee, the total revenue receipts increased sharply from ₹45,500.65 crore in 2020-21 to ₹90,659.26 crore in 2023-24. However, the projections for 2024-25 is at ₹110,267.31 crore.

According to the committee, heavy reliance on one-time spectrum auctions for financial need could lead to revenue gaps in years when auctions are not held or when the spectrum supply decreases. Therefore, it has recommended that DoT should explore other streams like monetising data services, expanding into satellite broadband, and capitalising on emerging technologies like 5G and IoT, which could provide consistent and diverse income streams.

First trade data review since 2011 likely

FE BUREAU
New Delhi, December 19

IT COULD BE a throwback to 2011 for the commerce ministry as it is having a relook at gold import data for November. During the month, gold imports surged 331% on year to \$14.8 billion, the highest ever, giving rise to doubts whether the numbers have been overstated.

In April-November 2011, due to problems in the recently upgraded software, the exports were overstated by \$9 billion. The numbers were revised a month later.

Overall gold imports have been high this financial year after the Budget in July that cut import duties to 6% from 15%. Imports crossed \$10 billion in August this year. In November there has been no such trigger nor a festive or wedding season.

After the reports of possible

discrepancy, the commerce ministry's Directorate General of Commercial Intelligence and Statistics (DGCIS) has taken up a detailed examination of data. Now the reconciliation of data of DGCIS will be done with data received by the Central Board of Indirect Taxes and Customs (CBIC).

According to some experts the possibility of double counting of gold import data is unlikely. They said all imports are accompanied by a bill of entry and the data captured at the ports is transferred to DGCIS which compiles the data

of inbound and outbound shipments. They say the demand could have surged in November as gold has become a viable investment option after the cut in customs duty. The performance of the stock markets in the past few months would also have investors turning to gold as its prices have risen almost 30% during the year.

The gold entering the Indian border through a bill of entry filed at the customs stations alone is the country's import, the Global Trade Research Initiative (GTRI) said, adding that movements within the country, such as for use in SEZs, EOU (export oriented units), or Gift City, do not qualify as imports and should not be included in total import data. The experts say it is unlikely that the system which was changed in July reported problems in November.

Push for local solar cells may raise project costs

THE GOVERNMENT'S DECISION to include solar cells in the Approved Lists of Models and Manufacturers — though will be implemented from June 1, 2026 — may in the short term inflate delivered costs of domestic modules, drive up the capital cost of projects, and affect timelines, analysts say.

Additionally, high prices of locally manufactured cells can be a bane because they would tend to impact the tariff levels bid at solar power project auctions, according to Crisil Market Intelligence and Analytics. As per Crisil, the prices of Indian solar cells today are 1.5-2.0 times more than alternatives from China even after basic customs duty. —FE BUREAU

No sugar exports for now: Official

Industry urges govt to allow 2 MT of shipments

SANDIP DAS
New Delhi, December 19

THE GOVERNMENT IS not in favour of allowing sugar exports at present despite a projection of surplus of around one million tonne in the 2024-25 sugar season (October-September), Sanjeev Chopra, secretary, the department of food and public distribution, said on Thursday.

"We will take a decision on allowing sugar exports in due course in the current season as the first priority is to ensure adequate supplies for domestic consumption and then ensuring supplies for ethanol production," he said on the sidelines of a meeting of the Indian Sugar and Bio-Energy Manufacturers Association (ISMA).

According to the food ministry, the production in the 2024-25 sugar season is estimated to be around 32 MT,

DOMESTIC SUPPLY PRIORITY

Sugar production (in million tonne)	
2020-21	31.1
2021-22	35.9
2022-23	33
2023-24	32
2024-25	32*

while domestic consumption would be 27 MT. The government has allotted 4 MT of sugar to be diverted for ethanol manufacturing. The opening stock of sugar on October 1, 2024 was 7.9 MT.

India exported 6 MT of sugar in the 2022-23 season and since then the government has not allocated any quota for sugar export. The food ministry had earlier ruled out providing any quota for sugar export in the current season as they are closely watching the supply situation as crushing of sugar-

cane has commenced.

ISMA has urged the government to allow around 2 MT of sugar exports in the current season so that mills don't have to incur the carrying cost of surplus sweetener due to expectation of a better harvest and comfortable opening stocks.

On the sluggish lifting of rice for grain-based distilleries

for ethanol manufacturing, Chopra said that prices were not viable. The food ministry has allotted 3.2 MT of rice for ethanol production at ₹28/kg, which the industry association has said is not economically viable. "We will discuss the viability issues," he said.

According to an official note, the blending percentage has touched 15.8% in July 2024 and cumulative blending percentage has crossed 13.6% in the ethanol supply year 2023-24. Encouraged by this progress, the government has set a target of reaching 20% blending by the end of 2025-26.

India is the world's second largest sugar producing country, after Brazil. The government sees the ethanol blending programme as a key to meeting its green energy commitments and improving the financial health of sugar mills.
