Sub.: Press Release – KP Group becomes first in India to install ‘Make in India’ 4.2M160 wind turbine

Dear Sir/Madam,

In accordance with Regulation 30 of the SEBI (Listing Obligations and Disclosure Requirements) Regulations, 2015, please find enclosed a press release titled “**KP Group becomes first in India to install ‘Make in India’ 4.2M160 wind turbine.**”

This is for your information and records.

Thanking you,

Yours faithfully,
For KPI Green Energy Limited

Moh. Sohil Yusuf Dabhoya
Whole Time Director

For immediate release

KP Group becomes first in India to install 'Make in India' 4.2M160 wind turbine

KP Group has become the **first company in India to install 4.2 MW wind turbine generator (4.2M160) manufactured by Senvion India**, marking a key milestone in the adoption of next-generation wind technology under the '**Make in India**' initiative. The turbine, part of Senvion's new generation 4XM platform, has been installed by KP Group in South Gujarat and is specifically engineered for Indian wind conditions and site requirements.

With a rated capacity of **4.2 MW**, a **160-metre rotor diameter**, and a **140-metre hub height**, the 4.2M160 is designed to maximise energy capture in low-to-medium wind regimes. Its larger swept area, advanced control systems, and site-optimised design enable higher generation output, improved efficiency, and enhanced long-term value.

The 4XM platform features a modular architecture enabling efficient transportation, faster installation, and streamlined commissioning, while also improving serviceability and operational reliability. Engineered and manufactured in India with over **85% localisation**, and included in the ALMM in December 2025, the platform represents the next phase of India's wind energy evolution towards larger and more efficient turbines.

Commenting on the development, Dr. Faruk Patel, Chairman & Managing Director, said:

"Being the first to install the 'Make in India' 4.2 MW M160 wind turbine in South Gujarat reinforces KP Group's commitment to adopting advanced, next-generation technologies that enhance generation efficiency, optimise lifecycle performance, and deliver long-term value. This milestone further strengthens our position as a trusted partner in executing scalable and high-performance renewable energy solutions, while contributing meaningfully to India's transition towards a cleaner and more sustainable energy future"

About KP Group:

Established in 1994, by Dr. Faruk G. Patel, KP Group has grown into a multi-faceted conglomerate with core expertise in renewable energy, infrastructure, and innovation. Over the past three decades, the group has championed sustainability by spearheading transformative projects in wind, solar, hybrid energy, Battery Energy Storage System (BESS) and green hydrogen, thereby contributing to India's green energy mission. With a strong portfolio of renewable energy projects, KP Group has earned a reputation as a trusted partner for companies committed to reducing their carbon footprint. The group remains steadfast in its mission to contribute meaningfully to India's energy transition while setting new benchmarks in the renewable energy sector.
