Request you to acknowledge receipt of the same.

Thanking you.

Yours faithfully,

For **KPIT Technologies Limited**

KPIT Technologies Limited

Sneha Padve
Company Secretary & Compliance Officer

Encl.:- As mentioned above.

KPIT joins German consortium Industrie-Gemeinschaft Aerosole e.V. (IGA) i.e. Industrial Community Aerosol

Pune, Munich, August XX, 2018: KPIT Technologies (BSE: 532400; NSE: KPIT), a global technology company specializing in IT consulting and product engineering, today announced becoming the first System Integrator (SI) in the aerosol industry to earn the membership of the Industrie-Gemeinschaft Aerosole e.V. (IGA) [Industrial Community Aerosol] consortium in Germany. The membership demonstrates KPIT's unparalleled expertise in technologies such as MES (Manufacturing Execution Systems) and Analytics for the aerosol industry.

KPIT combines extensive manufacturing industry experience with expertise in engineering and digital technologies to help clients in their journey towards excellence in manufacturing - from product design, production and supply chain, to process efficiency and regulatory compliance. KPIT offers services, solutions, and pre-packaged accelerators across these key areas - Product Lifecycle Management (PLM), Smart Manufacturing, Connected Products, Asset Management, and Supply Chain Optimization.

The IGA association, formed in 1958 currently has 67 members and represents the common interests of organizations in the aerosol industry, including manufacturers of tinplate or aluminum cans and valves as well as suppliers of the ingredients contained in aerosols.

KPIT was selected for successfully implementing a technology solution for a large global packaging company in the aerosol industry, which is also a member of the consortium. It provided the customer with Manufacturing Execution System solution to enable real-time shop floor visibility and automate reporting. The project work included integration with upstream business systems and enabling data management capabilities. The implementation resulted in delivering an improved stakeholder experience from shop floor to top floor, increased productivity, improved manufacturing efficiency and enhanced throughput. The synchronized production plans, made manufacturing process flexible with reusable templates, and allowed systematic and on-demand quality planning and execution while ensuring continuous quality improvement plan across the enterprise.

Probodh Chiplunkar, Head of Digital Business at KPIT *said, "We are delighted to become part of the IGA forum. KPIT brings scalable digital solutions to help our customers in the aerosol industry modernize, innovate, and transform their business. From Industry 4.0 solutions using Automation, Simulation, and Connected & Smart Manufacturing capabilities to using digital technologies such as Cognitive, AI, ML, AR & VR, and Analytics integrated with enterprise systems, we positively impact the manufacturing value chain for our clients and help them build new business models."*

KPIT is also participating at the FEA Global Aerosol Events 2018 scheduled from October 4-5 in Düsseldorf, Germany, where it will showcase its solutions in MES. The annual forum focuses on promoting the aerosol business in Europe's second-biggest aerosol producing country.
