Subject: Disclosure under Regulation 30 of SEBI (LODR) Regulations, 2015 – Strategic Foray into AI-based Film Production and Media Technology by Kridhan Mediatech Private Limited.

Dear Sir/Madam,

Pursuant to Regulation 30 of the SEBI (Listing Obligations and Disclosure Requirements) Regulations, 2015, we would like to inform you that M/s Kridhan Mediatech Private Limited, a subsidiary of M/s Kridhan Infra Limited, has forayed into film making and media technology.

As part of this strategic initiative, M/s Kridhan Mediatech Private Limited has successfully released its maiden AI-based full-length feature film, "SHATAK", honoring and commemorating 100 years of the Rashtriya Swayamsevak Sangh (RSS). "SHATAK" is a historical and cinematic presentation of the RSS through its hundred-year journey.

It is Kridhan Mediatech's initiative to present real-life historical narratives through documentaries and cinematic formats that enhance public understanding. "SHATAK" is an AI-led full-length feature film and among the early attempts of its kind globally. The project reflects the Company's commitment to technology-driven content creation and aligns with the Hon'ble Prime Minister's call to "Design in India, deliver to the world," reinforcing India's emergence as a global AI hub. We believe this production model will act as a disruptor, ushering in a revolution within the film industry.

Press release is enclosed herewith.

Kindly take the same on your record.

Thanking You,
For Kridhan Infra Limited

PRESS RELEASE

Kridhan Infra Limited through its subsidiary Kridhan Mediatech Private Limited Enters Film Production & Media Technology with One of the World's First AI-Led Feature Films – “Shatak: Sangh Ke 100 Varsh”

Mumbai, 26 February 2026:

Kridhan Infra Limited, today announced its strategic entry into film production and media technology through its subsidiary Kridhan Mediatech Private Limited with the nationwide theatrical release of Shatak: Sangh Ke 100 Varsh, a full-length AI-led feature film.

With “Shatak,” the Company marks not just its foray into filmmaking, but also what it believes to be one of the early full-length AI-led feature film attempts globally, integrating Artificial Intelligence at the core of creative and production workflows.

Tribute Reimagined Through AI

“Shatak: Sangh Ke 100 Varsh” commemorates the 100-year journey of the Rashtriya Swayamsevak Sangh, portraying defining historical phases, personalities and moments that shaped its evolution. By embedding AI across key stages of scripting visualization, environment creation, modelling and production design, the film blends historical storytelling with technological innovation at scale.

The result is a cinematic experience that combines emotional depth with modern execution—demonstrating how AI can meaningfully enhance large-format storytelling.

Building India's Media Technology Footprint

While “Shatak” is proudly AI-led, Kridhan Mediatech's long-term vision spans a broader canvas of film production and media technology, including Artificial Intelligence, CGI, virtual production systems and scalable content creation models for theatrical and digital platforms.

This strategic step aligns with India's expanding digital ambition. At the 2026 AI Impact Summit, Hon'ble Prime Minister Narendra Modi urged innovators to “Design in India, deliver to the world,” positioning India as a global AI hub. Kridhan Mediatech's initiative reflects this vision—demonstrating how AI-powered content creation can originate in India and resonate globally.

India's Media & Entertainment industry, valued at over ₹2.5 lakh crore, alongside a rapidly growing AI economy projected to cross ₹1.4 lakh crore in the coming years, presents significant opportunities at the intersection of storytelling and advanced technology.

Kridhan Infra Limited

“With ‘Shatak’, we proudly present one of the world’s first AI-led full-length feature films at a global level while marking Kridhan Infra Limited’s strategic entry into film production and media technology through our subsidiary. Our vision is to combine India’s rich narrative heritage with forward-looking innovation. We believe this is the beginning of building globally competitive, technology-enabled cinematic experiences.”
