Operational Highlights

- El Nino had impacted the season with rainfall deficit reflecting lower interest towards the premium products with high value
- In Cotton, the Company has established a strong foundation in the northern markets like Haryana, Punjab and Rajasthan
- Despite multiple challenges like illegal cotton and reduction in sowing acreage in the cotton business, volumes were maintained constant vis-à-vis last year
- New cotton products have contributed for significant growth from 22% to 37%
- Maize volumes down by 39% owing to drop in sowing acreage by 30% in Karnataka. Despite decline in Maize sowing acreage, new hybrids (single cross) contributed 20% plus in maize portfolio

- The Company had successfully introduced Hybrid paddy KRH7344 and KRH7227, which had contributed significantly at 62% in the new product bucket
- Volume of Bajra sustained with new hybrids contribution increased from 61% to 65%
- Export business increased significantly from ₹ 1.15 crore to ₹ 5.79 crore

Commenting on the results, **Mr. G V Bhaskar Rao, Chairman & Managing Director** said, "The rainfall deficit brought on by El Nino made this a difficult quarter, and farmer interest in our premium, high value products was lower than we would have liked. Even so, our cotton business held its ground, and our new cotton products now make up 37% of the portfolio against 22% earlier.

Maize was affected by the drop in acreage in Karnataka, though our new single cross hybrids already account for over 20% of that portfolio. The reception to our new hybrid paddy varieties has been encouraging, and exports have grown from Rs 1.15 crore to Rs 5.79 crore, a 4x growth in the exports business YoY portrays a strong growth prospect towards international markets.

If rainfall improves during Q2FY27, we are expecting some spill over demand"
