The strong growth in our domestic business has been an important contributor to the overall performance, while our export business continues to remain an integral part of our diversified market strategy.

Upon commissioning, approximately 70% of its total energy requirements will be met through its renewable sources, representing a significant milestone in its sustainability journey while supporting long-term operational efficiency and cost optimisation.

Going forward, our focus will remain on strengthening operational efficiencies, improving profitability, maintaining a healthy balance between domestic and export markets, and creating sustainable long-term value for our stakeholders.”
