Business Update Release

Expansion of Chlorinated Paraffin Wax (CPW) manufacturing capacity from current 50 TPD to 100 TPD

18th June 2025, New Delhi: Lords Chloro Alkali Limited (BSE: 500284), amongst India's leading producers of wide range of chemicals, is pleased to announce the expansion of its **Chlorinated Paraffin Wax (CPW)** manufacturing capacity from **50 TPD to 100 TPD**.

Key Highlights of the Expansion

- Capacity Expansion: Increasing from current 50 TPD to 100 TPD
- Capex: INR ~30 Crore
- Production growth: Over 100% increase in capacity
- Funding: Through internal accruals and existing sanctioned credit lines
- Expected Completion: By end of FY 2025-26
- Expected to enable greater economies of scale, improved fixed cost absorption, and enhanced product availability to meet increasing market demand, along with more efficient utilization of chlorine.

Management Comment

Commenting on this development,

Mr Ajay Virmani,

Managing Director, Lords Chloro Alkali Ltd, said:

“We are happy to announce the expansion of our CPW manufacturing capacity from 50 TPD to 100 TPD. This marks a significant step towards strengthening our product offering and capturing emerging opportunities in the chemicals segment.

With our existing capacity operating at a utilization rate of ~80%, this strategic expansion was both timely and essential. It reinforces our ability to position as a reliable and forward-thinking industry partner. We believe this move will further enhance our operational efficiency and contribute meaningfully to our performance from FY 2026-27 onwards.

Looking ahead, we remain focused on sustainable growth, value creation for stakeholders, and driving long-term strategic initiatives. As we continue to build on our core strengths, our emphasis will remain on operational excellence, customer satisfaction, and innovation. We are committed to scaling responsibly while aligning with broader environmental and economic goals..”

Commenting on the recent development,

Mr. Madhav Dhir,

Executive Director, Lords Chloro Alkali Ltd. said:

“The expansion of our CPW plant marks a significant milestone in our journey to scale operations in line with industry demand and long-term strategic priorities. This move is set to unlock greater economies of scale, enhance fixed cost efficiency, and boost product availability, while also ensuring more effective utilization of chlorine across operations

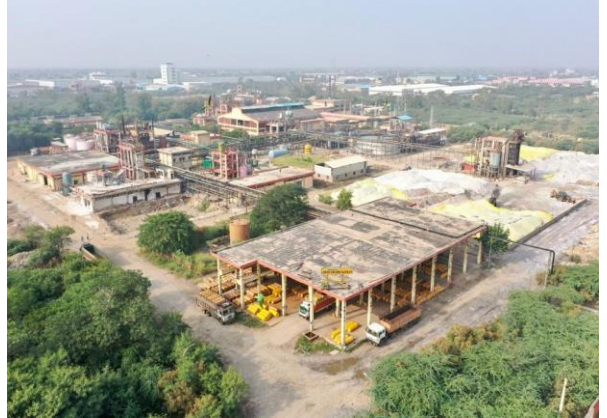

By doubling capacity, we are enhancing our ability to serve customers more efficiently, strengthen supply reliability, and deepen our presence in high-growth markets. We view this development as a catalyst for future growth and a reflection of our confidence in the evolving opportunities within the specialty chemicals sector. We remain fully committed to executing this project with precision and speed, while upholding the trust of our stakeholders who continue to support our growth vision.”
