L&T Construction awarded (Significant*) Contracts for its Transportation Infrastructure Business

Mumbai, February 11, 2021: The Transportation Infrastructure business of L&T Construction has secured an order to extend the mainline corridor of the Mauritius Metro by 3.4 km from Metro Express Limited (MEL), Mauritius.

The project involves the construction of a fully integrated light rail based Urban Transit System from Rose Hill Interchange towards Ebene reaching Reduit near the University of Mauritius. This extension will connect the densely populated areas of Ebene Cybercity and the University of Mauritius and give added impetus to the development of the island nation.

The extension will involve the construction of three new stations, viaducts & bridges, track works (with substantial ballastless track including plinth, embedded & grass tracks), DC electric Traction Systems, Ticketing & Passenger Information Systems and integration with road traffic through advanced signaling systems.

L&T is already executing the 26 km Mainline LRT network connecting Curepipe to Immigration Square in Port Louis.

L&T has successfully completed the 12 km priority section from Rosehill to Victoria station, and this is under commercial operation since January 2020.

The Railways Strategic Business Group of Transportation Infrastructure business has also secured an order from Uttar Pradesh Metro Rail Corporation Limited (UPMRCL).

Uttar Pradesh Metro Rail Corporation Limited (UPMRCL) is the nodal agency responsible for the implementation of the Kanpur and Agra Metro projects that are being funded through equity participation by the Government of India and Government of Uttar Pradesh and loans from bilateral/multilateral agencies.

The scope of works includes Design, Installation, Testing & Commissioning of Ballastless Track of Standard Gauge in 4 Corridors in Elevated as well as Underground sections of Kanpur and Agra Metro Projects along with supply of fastening systems and associated Ballasted/Ballastless Tracks in 4 Depots. This order has been secured against stiff competition from various local and major multi-national companies. This win vindicates L&T's position as a leader in Ballastless Track Technology in India.

Background:

Larsen & Toubro is an Indian multinational engaged in EPC Projects, Hi-Tech Manufacturing and Services with over USD 21 billion in revenue. It operates in over 30 countries worldwide. A strong, customer-focused approach and the constant quest for top-class quality have enabled L&T to attain and sustain leadership in its major lines of business for eight decades.
