Lupin and Mylan Receive European Marketing Authorization for Nepexto®, Biosimilar Etanercept

MUMBAI, India, HERTFORDSHIRE, England, and PITTSBURGH, U.S, June 4, 2020: Lupin Limited (Lupin) and Mylan N.V. (NASDAQ: MYL) today announced that the European Commission (EC) has granted marketing authorization for Nepexto®, a biosimilar to Enbrel® (etanercept), for all indications of the reference product including rheumatoid arthritis, juvenile idiopathic arthritis, psoriatic arthritis, axial spondyloarthritis (including ankylosing spondylitis and non-radiographic axial spondyloarthritis), plaque psoriasis and paediatric plaque psoriasis.

The regulatory approval follows the adoption of a positive opinion by the Committee for Medicinal Products for Human Use (CHMP) in March this year, which was based on a biosimilarity assessment including preclinical and clinical studies demonstrating bioequivalence to Enbrel. In addition, a phase 3 clinical study in patients with moderate-to-severe active rheumatoid arthritis confirmed equivalence of Nepexto to Enbrel in terms of efficacy, safety and immunogenicity.

The centralized marketing authorization applies to all member countries of the European Union.

Vinita Gupta, CEO, Lupin Limited said, “We are truly delighted with this approval. Nepexto is our first biosimilar to receive regulatory approval in Europe. With this important milestone, we bring an affordable biosimilar to the European market through our partner Mylan. Biosimilars like Nepexto will play a critical role in expanding access to patients in Europe, providing an effective treatment for multiple therapies including rheumatoid arthritis.”

Mylan President, Rajiv Malik commented, “The approval of Nepexto, our biosimilar etanercept, is a positive step forward as we work to broaden our biosimilars franchise offerings and do our part to increase access to biologic treatments for patients in many European countries. This milestone reflects a strong scientific program behind Nepexto and commitment by our teams and our partner, Lupin, to bring the product to market as soon as possible. We look forward to launching Nepexto in the second half of this year.”

Enbrel had sales of approximately \$9.6 billion globally for the 12 months ending December 2019, according to IQVIA.

In June 2018, Lupin and Mylan announced a collaboration to commercialize a biosimilar to etanercept in several global markets.

About Etanercept

Etanercept is an injectable, biologic medicine which inhibits Tumour Necrosis Factor (TNF). TNF is a key cytokine involved in the pro-inflammatory cascade in many chronic, immune-mediated inflammatory diseases such as rheumatoid arthritis, psoriatic arthritis, axial spondyloarthritis or plaque psoriasis. By specifically binding to TNF, etanercept blocks its activity, thereby reducing inflammation and other disease symptoms.

Forward-Looking Statement: Lupin

This press release includes statements that constitute "forward-looking statements," including with regard to the approval of Nepexto, a biosimilar etanercept, being a positive step forward as we work to broaden Lupin's Biotech franchise offerings and do our part to increase access to biologic treatments for patients globally; this milestone reflecting a strong scientific program behind Nepexto and commitment by our teams and our partner, Mylan, to bring the product to market as soon as possible; and looking forward to launching Nepexto in the second half of this year. These statements are made pursuant to the safe harbor provisions of the Private Securities Litigation Reform Act of 1995. Because such statements inherently involve risks and uncertainties, actual future results may differ materially from those expressed or implied by such forward-looking statements. Factors that could cause or contribute to such differences include, but are not limited to: our or our partners' ability to execute on new product opportunities; any regulatory, legal or other impediments to our or our partners' ability to bring products to market; the scope, timing, and outcome of any ongoing legal proceedings, including government investigations, and the impact of any such proceedings on our or our partners' businesses; actions and decisions of healthcare and pharmaceutical regulators, and changes in healthcare and pharmaceutical laws and regulations, in the United States and abroad; the impact of competition; strategies by

competitors or other third parties to delay or prevent product introductions; the effect of any changes in our or our partners' customer and supplier relationships and customer purchasing patterns; any other changes in third-party relationships; changes in the economic and financial conditions of the businesses of Mylan or its partners; uncertainties and matters beyond the control of management; the potential widespread and highly uncertain impact of public health outbreaks, epidemics and pandemics, such as the COVID-19 pandemic; and the other risks detailed in Mylan's filings with the Securities and Exchange Commission. Mylan undertakes no obligation to update these statements for revisions or changes after the date of this release.
