### Lupin Digital Health Introduces Comprehensive Post-Procedure Home-Based Care Guide in Collaboration with the American College of Cardiology

An initiative aimed at improving patient recovery and well-being following cardiac procedures

**Mumbai, March 22, 2025** – Lupin Digital Health (LDH), India's leading evidence-based Digital Therapeutics (DTx) platform, today announced the launch of its comprehensive *Post-Procedure Home-Based Care Guide* at India Live, an annual confluence of leading interventional cardiologists from the Asia Pacific Region, held at Jio World Convention Centre in Mumbai. This guide is based on the American College of Cardiology (ACC)'s 'Home-Based Care Workbook' and has been developed by LDH along with the workgroup constituted by the ACC.

Co-authored by eminent cardiologists Dr. JPS Sawhney, Dr. Prafulla Kerkar, Dr. Harikrishnan and Dr. Aditya Kapoor along with Dr. Chetan Gharat, these user-friendly guides provide patients and caregivers with essential information and practical advice to manage post-procedure recovery at home. Covering conditions such as Heart Failure (HF), Arrhythmia, Percutaneous Coronary Intervention (PCI), and Coronary Artery Bypass Grafting (CABG), the guides help patients understand their recovery process, recognize potential complications, manage medications, make necessary lifestyle adjustments, and access cardiac rehabilitation resources.

**Mr. Rajeev Sibal, President – India Region Formulations, Lupin**, emphasised the importance of patient-centric care, stating, "At Lupin, we believe empowering patients with the right knowledge is crucial for better health outcomes. This initiative by Lupin Digital Health, in partnership with the American College of Cardiology, provides structured guidance that simplifies recovery and enhances post-procedure care at home."

**Sidharth Srinivasan, CEO, Lupin Digital Health**, added, "With the rising burden of cardiovascular diseases, improving home-based care is no longer optional—it is essential. These guides, developed in collaboration with leading cardiologists, offer patients the support they need to navigate recovery with confidence, reducing hospital readmissions and ensuring a smoother transition from hospital to home."

**Dr. Prafulla Kerkar, Senior Interventional Cardiologist, Asian Heart Institute, Mumbai, and Former HOD Cardiology, KEM Hospital Mumbai**, stressed the importance of structured recovery, noting, "The transition from hospital to home can be a vulnerable period for cardiac patients. By equipping them with clear, actionable guidance, we can significantly improve their overall quality of life and reduce complications."

**Dr. Harikrishnan, HOD Cardiology, Sri Chitra Tirunal Institute, Trivandrum**, highlighted the growing need for digital solutions, stating, "With heart failure rates rising at an alarming pace in India, leveraging digital infrastructure for specialized care is an urgent necessity. This collaboration enables early symptom detection, optimized medication management, and improved patient outcomes."

This initiative underscores Lupin Digital Health's commitment to delivering evidence-based, high-quality educational resources that enhance patient recovery and long-term well-being.

### About Lupin Digital Health

Lupin Digital Health (LDH) is India's leader in chronic disease management, specializing in cardiovascular and metabolic conditions. Through a blend of AI-driven insights and expert-led care, LDH empowers patients and policyholders to achieve better health outcomes. Its flagship program, LYFE, provides remote cardiac rehabilitation and chronic disease management, helping reduce hospital readmissions, improve adherence, and enhance recovery. By seamlessly integrating into hospitals, insurers, and corporate wellness programs, LDH bridges gaps in long-term care, ensuring patients stay connected to their care teams beyond hospital discharge.

With a commitment to accessible, scalable, and high-quality healthcare, LDH is redefining chronic disease management in India.
