Q2 & H1 FY27 Key Operational & Financial Highlights

**Mr. Sushil Kumar
Agrawal**

Managing Director

“

“I am happy to share that we have delivered a strong performance in Q2 FY27, supported by robust export demand, improved realizations, and the growing contribution of our Aluminium-Zinc steel portfolio across domestic and international markets. Our focus on niche applications, including dry wall systems, metal ceilings and metal roofing, is opening up new opportunities across markets. Despite elevated raw material and freight costs, our pricing discipline and focus on value-added products helped us deliver record EBITDA per MT and improve margins.

Going forward, our priorities remain centered on capacity expansion, cost optimization and operational excellence. The second colour coating line and captive solar power plant, both targeted for commissioning in Q3 FY27, will strengthen our value-added product capabilities and improve energy cost efficiency. We are also investing in digitalization through Salesforce CRM to enhance customer engagement and sales management, and MES software to strengthen production planning, process control and manufacturing efficiency. Together with our backward integration and product premiumization initiatives, these measures will support our FY29 vision of tripling output, revenue and EBITDA.”
