PANEL ON INDIAN ACCOUNTING STANDARDS TO EASE CORPORATE TAX COMPLIANCE

Government to usher in new tax accounting rules

MANU KAUSHIK
New Delhi, March 6

SIMPLIFYING COMPLIANCE ■ ICDS are a set of 10 mandatory accounting standards for computation of taxable income

■ The alignment will likely reduce tax adjustments currently required under ICDS

■ It was also ease the tax audit reporting

■ When introduced in FY17, IndAS was applicable to all listed companies and large unlisted companies with a net worth exceeding ₹250 crore

IN A MOVE to simplify corporate tax compliance, the government may soon form a panel and mandate it to integrate the Income Computation and Disclosure Standards (ICDS) with the Indian Accounting Standards (IndAS), a senior official told FE.

IndAS, based on International Financial Reporting Standards (IFRS), is globally accepted. Since domestic companies are going global and there's a need to attract foreign investments, the government decided to align the two stan-

dards, officials said. The alignment will likely reduce tax adjustments currently required under ICDS and consequently ease the tax audit reporting, they said.

According to an official, the panel will consist of officials from the Ministry of Corporate Affairs (MCA) and the tax department besides industry professionals. "The panel's task

will be to identify the ICDS that can be aligned with IndAS. Additionally, it will suggest amendments in the relevant laws if some differences remain after aligning the two standards (IndAS and ICDS)," he said.

Further, the government is considering providing support to small taxpayers who currently do not follow IndAS. Also, there are plans to introduce transitional provisions to ensure well-ordered convergence with minimum impact on taxpayers.

In the Budget 2026-27 speech, Finance Minister Nirmala Sitharaman said a joint committee will be formed to incorporate the requirements of ICDS into IndAS itself. "Separate accounting requirements based on ICDS will be done away with from the tax year 2027-28," the FM had said.

Experts said the proposed integration is a meaningful step toward simplifying India's tax compliance landscape and strengthening the government's broader objective of promoting ease of doing business.

"The budget announcement only states the policy direction but it does not yet prescribe the technical mechanism for integration.

"The integration is likely to

take place through a calibrated modification of certain IndAS principles or by introducing tax-specific clarifications within the standards rather than retaining ICDS as a separate computation framework," said Shalu Kedia, director at Nangia & Co.

To be sure, the ICDS are a set of 10 mandatory accounting standards notified by the government to standardise the computation of taxable income under the Income Tax Act, 1961.

When IndAS was introduced in FY17, it became applicable to all listed companies and large unlisted companies with a net worth exceeding Rs 250 crore. At the time of introducing IndAS, the Central Board of Direct Taxes (CBDT) prescribed a separate framework - ICDS - for computing taxable income. Designed to operate independently of financial reporting standards to ensure uniformity in tax computation, ICDS became effective from FY17, coinciding with IndAS implementation.

However, the coexistence of IndAS for financial reporting and ICDS for tax computation created practical challenges for corporates because they must maintain year-end reconciliations, increasing compliance burden.

Reinsurers triple insurance costs after US attack

MIHIR MISHRA & SAIKAT DAS

■ Most policy cancellations have been initiated since Thursday, say sources

LONDON-BASED REINSURERS of ships are cancelling their coverage of war risk and demanding 200% more to reinstate policies, according to people familiar with the matter, after a US submarine sank an Iranian warship off Sri Lanka, amplifying risk perceptions.

Rates for shipping lines to buyback this cover that usually climb as much as 50% in wartime have instead tripled in some cases - rising to \$750,000 per vessel from \$250,000, the people said, asking not to be identified because the information is private.

Most policy cancellations have been initiated since Thursday, they said, adding that premiums vary depending on vessel flag, ownership, and ports of call. Bloomberg News has seen a cancellation notice dated as recently as March 4 - the day a US submarine sank the Iranian warship.

■ Premiums vary depending on vessel flag, ownership, and ports of call

■ If hostilities persist for another 10 days, buyback options may no longer be available

■ Limited buybacks outside the Strait of Hormuz are still being offered

man and MD at GIC.

As an immediate impact on the marine war-risk cover, "notices of cancellation are being issued by international marine underwriters," he said. "The restoration of covers is being carefully considered at much higher rates."

If hostilities persist for another 10 days, buyback options may no longer be available, the people said. Limited buybacks outside the Strait of Hormuz are still being offered by some London market insurers, said Balasundaram R, head of marine insurance at Policybazaar for Business.

Finance panel proposals positive for states

FE BUREAU
New Delhi, March 6

THE RECOMMENDATIONS of the 16th Finance Commission aimed at reducing rising revenue deficits and encouraging higher growth-oriented capital spending are expected to strengthen the long-term fiscal position of states, Crisil Ratings said in a report.

However, in the immediate term, states may continue to face pressures as additional fiscal support from the Centre remains limited, it said.

The Commission, a constitutional body responsible for recommending the sharing of financial resources between the Union and states for the period FY27-FY31, has decided to retain the vertical devolution—the share of states in the Centre's tax revenues—at 41%, unchanged from the previous arrangement.

At the same time, a new parameter was added to the formula used to distribute tax revenues among states: the contribution of individual states to the national gross domestic product (GDP).

This measure is intended to encourage states to prioritise investments that support long-term economic expansion, particularly through capital expenditure.

Another notable change is the discontinuation of revenue deficit (RD) grants, which earlier finance commissions had provided. Removing these grants is intended to correct the incentive structure that may have encouraged states to rely on central support to cover recurring expenditure gaps. The move signals a push for stronger fiscal discipline and greater accountability in managing revenue deficits.

"Discontinuation of RD grants can compel states to constrain populist spending," said Anuj Sethi, senior director at Crisil Ratings.

The 16th FC also recommended uniform disclosure and rationalisation of subsidy expenditures, especially unconditional cash transfers, which have drained state finances, primarily in the last couple of years, Sethi said.

"Social welfare expenditure is estimated to have increased sharply to around 1.9% of gross state domestic product (GSDP) in fiscal 2026 (basis budget estimates) from around 1.5% in fiscal 2024, with around 43% of the increase pertaining to direct transfer schemes," Sethi added.

While RD grants have been discontinued, the Commission shifted its focus towards strengthening local governance by substantially increasing grants to local bodies.

The allocation for these grants during the current award period has been raised by about 81%, compared with the ₹4.36 lakh crore allocated during FY21-FY26.
